LADYBUG RESOURCE GROUP, INC.
September 30, 2012 and 2011
Notes to Interim Consolidated Financial Statements

(Unaudited)

NOTE 1 - ORGANIZATION

Ladybug Resource Group, Inc. (the “Company”) was incorporated in the State of Nevada on November 27, 2007. Its business purpose is to assist in the design of websites and website components that use specific marketing messages or themes to reach target audiences. Its initial marketing focus is the websites of the funeral industry in the Seattle, Washington area.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The accompanying interim consolidated financial statements for the three months ended September 30, 2012 and 2011 are unaudited and have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The results of operations realized during an interim period are not necessarily indicative of results to be expected for a full year. These interim consolidated financial statements should be read in conjunction with the consolidated financial statements of the Company for the fiscal year ended June 30, 2012 and notes thereto filed as part of the Company’s Annual Report.

Fiscal year-end

The Company has elected a fiscal year ending on December 31.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Business Combination

In accordance with section 805-10-05 of the FASB Accounting Standards Codification the Company allocates the purchase price of acquired entities to the tangible and intangible assets acquired and liabilities assumed, based on their estimated fair values.

Management makes estimates of fair values based upon assumptions believed to be reasonable. These estimates are based on historical experience and information obtained from the management of the acquired companies. These estimates are inherently uncertain and unpredictable. Assumptions may be incomplete or inaccurate, and unanticipated events and circumstances may occur which may affect the accuracy or validity of such assumptions, estimates or actual results.

Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

Computer equipment

Computer equipment is stated at cost less accumulated depreciation. Depreciation is provided on the straight-line basis over an estimated useful life of three (3) years.

Impairment of long-lived assets

The Company follows section 360-10-05-4 of the FASB Accounting Standards Codification for its long-lived assets. The Company's reviews its long-lived assets, which includes computer equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The Company assesses the recoverability of its long-lived assets by comparing the projected undiscounted net cash flows associated with the related long-lived asset or group of long-lived assets over their remaining estimated useful lives against their respective carrying amounts. Impairment, if any, is based on the excess of the carrying amount over the fair value of those assets. Fair value is generally determined using the asset's expected future discounted cash flows or market value, if readily determinable. If long-lived assets are determined to be recoverable, but the newly determined remaining estimated useful lives are shorter than originally estimated, the net book values of the long-lived assets are depreciated or amortized over the newly determined remaining estimated useful lives. The Company determined that there were no impairments of long-lived assets as of September 30, 2012 and 2011.

Fair value of financial instruments

The Company follows paragraph 825-10-50-10 of the FASB Accounting Standards Codification for disclosures about fair value of its financial instruments and paragraph 820-10-35-37 of the FASB Accounting Standards Codification ("Paragraph 820-10-35-37") to measure the fair value of its financial instruments. Paragraph 820-10-35-37 establishes a framework for measuring fair value in accounting principles generally accepted in the United States of America (U.S. GAAP), and expands disclosures about fair value measurements. To increase consistency and comparability in fair value measurements and related disclosures, Paragraph 820-10-35-37 establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of fair value hierarchy defined by Paragraph 820-10-35-37 are described below:

- Level 1 Quoted market prices available in active markets for identical assets or liabilities as of the reporting date.
- Level 2 Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date.
- Level 3 Pricing inputs that are generally observable inputs and not corroborated by market data.

The carrying amounts of the Company's financial assets and liabilities, such as cash, accounts payable and accrued professional fees, approximate their fair values because of the short maturity of these instruments.

The Company does not have any assets or liabilities measured at fair value on a recurring or a non-recurring basis, consequently, the Company did not have any fair value adjustments for assets and liabilities measured at fair value at September 30, 2012 or 2011, nor gains or losses are reported in the statement of operations that are attributable to the change in unrealized gains or losses relating to those assets and liabilities still held at the reporting date for the interim period ended September 30, 2012 or 2011.

Revenue Recognition

The Company applies paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company recognizes revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

Stock-based compensation for obtaining employee services

The Company accounts for equity instruments issued to parties other than employees for acquiring goods or services under guidance of section 505-50-30 of the FASB Accounting Standards Codification. Pursuant to paragraph 718-10-30-6 of the FASB Accounting Standards Codification, all transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable. The measurement date used to determine the fair value of the equity instrument issued is the earlier of the date on which the performance is complete or the date on which it is probable that performance will occur.

The fair value of each option award is estimated on the date of grant using a Black-Scholes option-pricing valuation model. The ranges of assumptions for inputs are as follows:

The Company uses historical data to estimate employee termination behavior. The expected life of options granted is derived from paragraph 718-10-S99-1 of the FASB Accounting Standards Codification and represents the period of time the options are expected to be outstanding.

The expected volatility is based on a combination of the historical volatility of the comparable companies' stock over the contractual life of the options.

The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods within the contractual life of the option.

The expected dividend yield is based on the Company's current dividend yield as the best estimate of projected dividend yield for periods within the contractual life of the option.

The Company's policy is to recognize compensation cost for awards with only service conditions and a graded vesting schedule on a straight-line basis over the requisite service period for the entire award.

Equity instruments issued to parties other than employees for acquiring goods or services

The Company accounts for equity instruments issued to parties other than employees for acquiring goods or services under guidance of section 505-50-30 of the FASB Accounting Standards Codification ("FASB ASC Section 505-50-30"). Pursuant to FASB ASC Section 505-50-30, all transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable. The measurement date used to determine the fair value of the equity instrument issued is the earlier of the date on which the performance is complete or the date on which it is probable that performance will occur.

Income Taxes

The Company accounts for income taxes under Section 740-10-30 of the FASB Accounting Standards Codification. Deferred income tax assets and liabilities are determined based upon differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the statements of operations in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB Accounting Standards Codification (“Section 740-10-25”). Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. The Company had no material adjustments to its liabilities for unrecognized income tax benefits according to the provisions of Section 740-10-25.

Net Loss per Common Share

Net loss per common share is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic net loss per common share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. Diluted net loss per common share is computed by dividing net loss by the weighted average number of shares of common stock and potentially outstanding shares of common stock during the period. There were no potentially dilutive shares outstanding as of September 30, 2012 or 2011.

Commitment and Contingencies

The Company follows subtopic 450-20 of the FASB Accounting Standards Codification to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated.

Cash Flows Reporting

The Company adopted paragraph 230-10-45-24 of the FASB Accounting Standards Codification for cash flows reporting, classifies cash receipts and payments according to whether they stem from operating, investing, or financing activities and provides definitions of each category, and uses the indirect or reconciliation method (“Indirect method”) as defined by paragraph 230-10-45-25 of the FASB Accounting Standards Codification to report net cash flow from operating activities by adjusting net income to reconcile it to net cash flow from operating activities by removing the effects of (a) all deferrals of past operating cash receipts and payments and all accruals of expected future operating cash receipts and payments and (b) all items that are included in net income that do not affect operating cash receipts and payments. The Company reports the reporting currency equivalent of foreign currency cash flows, using the current exchange rate at the time of the cash flows and the effect of exchange rate changes on cash held in foreign currencies is reported as a separate item in the reconciliation of beginning and ending balances of cash and cash equivalents and separately provides information about investing and financing

activities not resulting in cash receipts or payments in the period pursuant to paragraph 830-230-45-1 of the FASB Accounting Standards Codification.

Subsequent Events

The Company follows the guidance in Section 855-10-50 of the FASB Accounting Standards Codification for the disclosure of subsequent events. The Company will evaluate subsequent events through the date when the financial statements are issued. Pursuant to ASU 2010-09 of the FASB Accounting Standards Codification, the Company as an SEC filer considers its financial statements issued when they are widely distributed to users, such as through filing them on EDGAR.

Recently Issued Accounting Standards

The Company has adopted the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 105-10, *Generally Accepted Accounting Principles – Overall* ("ASC 105-10"), which was formerly known as SFAS 168. ASC 105-10 establishes the FASB Accounting Standards Codification (the "Codification") as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with U.S. GAAP. Rules and interpretive releases of the Securities and Exchange Commission (the "SEC") under authority of federal securities laws are also sources of authoritative U.S. GAAP for SEC registrants. All guidance contained in the Codification carries an equal level of authority. The Codification superseded all existing non-SEC accounting and reporting standards and all other non-grandfathered, non-SEC accounting literature not included in the Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates ("ASUs"). The FASB will not consider ASUs as authoritative in their own right. ASUs will serve only to update the Codification, provide background information about the guidance and provide the basis of conclusions on the change(s) in the Codification. References made to FASB guidance throughout this document have been updated for the Codification.

The Company has reviewed all other recently issued, but not yet adopted, accounting standards in order to determine their effects, if any, on its results of operation, financial position or cash flows. Based on that review, the Company believes that none of these pronouncements will have a significant effect on its consolidated financial statements.

NOTE 3 - GOING CONCERN

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As reflected in the accompanying consolidated financial statements, the Company had an accumulated deficit of \$80,507 at September 30, 2012, a net loss from continuing operations of \$13,896, and net cash provided by operations of \$1,104 for the interim period then ended.

While the Company is attempting to generate sufficient revenues, the Company's cash position may not be enough to support the Company's daily operations. The Company intends to seek business aggressively through the business contacts of its management and investors. While the Company believes in the viability of its strategy to increase revenues and in its ability to raise funds if necessary, there can be no assurances to that effect. The ability of the Company to continue as a going concern is dependent upon the Company's ability to generate increased levels of revenues.

The consolidated financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

NOTE 4 – NOTES PAYABLE OF DISCONTINUED OPERATIONS

Notes payable of New Solar Electricity Corporation, of \$9,328, accrues interest at 5% per annum, are due on demand and are payable to related parties.

NOTE 5 - RELATED PARTY TRANSACTIONS

Free office space

The Company had been provided office spaces by its majority stockholder at no cost. The management determined that such cost is nominal and did not recognize rent expense in its financial statements.

NOTE 6 - SUBSEQUENT EVENTS

The Company has evaluated all events that occurred after the balance sheet date through the date when the financial statements were issued to determine if they must be reported. The Management of the Company determined that there were reportable subsequent events to be disclosed.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

When used in this Form 10-Q and in our future filings with the Securities and Exchange Commission, the words or phrases will likely result, management expects, or we expect, will continue, is anticipated, estimated or similar expressions are intended to identify forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Readers are cautioned not to place undue reliance on any such forward-looking statements, each of which speaks only as of the date made. These statements are subject to risks and uncertainties, some of which are described below. Actual results may differ materially from historical earnings and those presently anticipated or projected. We have no obligation to publicly release the result of any revisions that may be made to any forward-looking statements to reflect anticipated events or circumstances occurring after the date of such statements.

Background

Additional details about our business are set forth in our Annual Report for the year ending December 31, 2011. The following discussion should be read in conjunction with the financial information included elsewhere in this Quarterly Report.

The purpose of this section is to discuss and analyze our financial condition, liquidity and capital resources and results of operations. You should read this analysis in conjunction with the financial statements and notes that appear elsewhere in this Quarterly Report on Form 10-Q. This section contains certain "forward-looking statements" within the meaning of federal securities laws that involve risks and uncertainties, including statements regarding our plans, objectives, goals, strategies and financial performance. The Company's actual results could differ materially from the results anticipated in these forward-looking statements as a result of factors set forth under "Disclosure Regarding Forward-Looking Statements" in this Quarterly Report on Form 10-Q.

Plan of Operations

During the quarter ended September 31, 2012 our officers and interested shareholders devoted substantial time to identify new opportunities in the energy, health, and intellectual property sectors. We continued to focus our attention on niche technologies or technology that lends themselves to marketing through licensing or sublicensing but we extended our efforts in the energy sector to include energy efficient electric and flex fuel off-road vehicles.

For the nine months ended September 30, 2012 and 2011, our operations were as follows:

REVENUES	\$ 17,000	\$ 30,000
EXPENSES		
Office and subcontractor costs	30,895	16,950
TOTAL OPERATING EXPENSES	30,895	16,950
INCOME (LOSS) FROM OPERATIONS	(13,895)	13,050
PROVISION FOR INCOME TAXES	-	-
NET INCOME (LOSS)	\$ (13,895)	\$ 13,050

During the period ended September 30, 2012 our expenses decreased primarily because we did not require outside contractors to maintain our web sites and we did not pay any compensation. Shareholders voluntarily maintained our subsidiaries' web sites. The loss from operations is attributable to our subsidiary, New Solar Electricity Corporation.

LIQUIDITY AND CAPITAL RESOURCES

Ladybug had total liabilities of \$20,651 September 30, 2012 consisting principally of accrued professional fees and notes payable.

Ladybug had negative working capital of \$10,617 and an accumulated deficit of \$80,507 as of September 30, 2012.

Ladybug had net cash provided by operating activities of \$1,104 for the nine months ended September 30, 2012, consisting of net loss of \$13,385 and decrease in accounts receivable of \$15,000.

Ladybug does not have any credit facilities or other commitments for debt or equity financing. No assurances can be given that advances when needed will be available. We do not believe that we need funding to cover current operations because we do not have a capital intensive business plan can also use independent contractors to assist in many projects, and currently have shareholder who volunteer services at no cost to us. We will use funding, if obtained, to cover the salary of our President and to pay for marketing materials and proposal efforts. We currently have no formal salary arrangements with our President. While no annual salary or length of employment has been determined to date, we anticipate providing an annual salary not to exceed \$100,000, the accrual of which will begin after we generate annual revenue of at least \$100,000 per year.

We may seek private capital at some time in the future. If a market for our shares develops, of which there can be no assurance, we will use shares to compensate employees/consultants wherever possible. To date, we have not sought any funding source and have not authorized any person or entity to seek out funding on our behalf.

We are subject to the periodic reporting requirements of the Securities Exchange Act of 1934, as amended and as such will incur ongoing expenses associated with professional fees for accounting, legal and a host of other expenses for annual reports and proxy statements. We estimate that these costs may range up to \$50,000 per year for the next few years and will be higher if our business volume and activity increases. These obligations may reduce our ability and resources to fund other aspects of our business. We hope to be able to use our status as a public company to increase our ability to use noncash means of settling obligations and compensating independent contractors who provide services for us, although there can be no assurances that we will be successful in any of those efforts. We will reduce the compensation levels paid to management if there is insufficient cash generated from operations to satisfy these costs.

To meet commitments that become due more than 12 months in the future, we will have to achieve sufficient levels of profitability, of which there can be no assurance. There does not currently appear to be any viable source of long-term financing except that management may consider various sources of debt and/or equity financing if the same financing can be obtained on terms deemed reasonable to management.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Not applicable to Smaller Reporting Companies

Pursuant to Item 305(e) of Regulation S-K (§ 229.305(e)), the Company is not required to provide the information required by this Item because it is a “smaller reporting company,” as defined by Rule 229.10(f)(1).

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”) that are designed to be effective in providing reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission (the “SEC”), and that such information is accumulated and communicated to our management to allow timely decisions regarding required disclosure.

In designing and evaluating disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable, not absolute assurance of achieving the desired objectives. Also, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. The design of any system of controls is based, in part, upon certain assumptions about the likelihood of future events and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Principal Financial Officer (Chairman of the Board), of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, management concluded that our disclosure controls and procedures are effective as of September 30, 2012 to cause the information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods prescribed by SEC, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Principal Financial Officer (Chairman of the Board), as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in our internal controls over financial reporting identified in connection with the requisite evaluation that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Limitations

Our management, including our Chief Executive Officer and Principal Financial Officer (Chairman of the Board), does not expect that our disclosure controls or internal controls over financial reporting will prevent all errors or all instances of fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and any design may not succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitation of a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, we may become party to litigation or other legal proceedings that we consider to be a part of the ordinary course of our business. We are not currently involved in legal proceedings that could reasonably be expected to have a material adverse effect on our business, prospects, financial condition or results of operations. We may become involved in material legal proceedings in the future.

Item 1A. Risk Factors

You should be aware that there are various risks to an investment in our common stock. You should carefully consider these risk factors, together with all of the other information included in this Report, before you decide to invest in shares of our common stock.

If any of the following risks develop into actual events, then our business, financial condition, results of operations and/or prospects could be materially adversely affected. If that happens, the market price of our common stock, if any, could decline, and investors may lose all or part of their investment.

Risks Related to the Business

1.

LADYBUG has virtually no financial resources.

LADYBUG has virtually no financial resources. negative working capital of \$10,617 and a net stockholder's deficit of \$7,617 at September 30, 2012. No assurances can be given that we will generate sufficient revenue or obtain necessary financing to continue as a going concern.

2.

LADYBUG is and will continue to be completely dependent on the services of our officers and directors the loss of whose services may cause our business operations to cease, and we will need to engage and retain qualified employees and consultants to further implement our strategy.

LADYBUG's operations and business strategy are completely dependent upon the knowledge and business connections of our officers and directors. They are under no contractual obligation to remain employed by us. If they, or any one of them, should choose to leave us for any reason, our operations may likely fail. Even if we are able to find additional personnel, it is uncertain whether we could find someone who could develop our business along the lines described in this prospectus.

3.

Most of our competitors or potential competitors may include large firms that have significantly greater financial and marketing resources than do we.

Most of our competitors, which include large energy, intellectual property, or medical firms, have significantly greater financial and marketing resources than do we. Many have sophisticated Websites and the ability to advertise in a wide variety of media. We will principally depend on the business contacts of our officers and directors and word of mouth. There are no assurances that our approach will be successful.

4.

There are significant potential conflicts of interest

Our key personnel are required to commit significant time to our affairs and, accordingly, these individual(s) (particularly our Chief Operating Officer, Dr. Craig Barton) may have conflicts of interest in allocating management time among various business activities. In the course of other business activities, certain key personnel (particularly our president) may become aware of business opportunities which may be appropriate for presentation to us, as well as the other entities with which they are affiliated. As such, there may have conflicts of interest in determining to which entity a particular business opportunity should be presented.

In an effort to resolve such potential conflicts of interest, we have entered into an agreement with Dr. Barton specifying that any business opportunities that he may become aware of independently or directly through his association with us (as opposed to disclosure to him of such business opportunities by management or consultants associated with other entities) would be presented by him solely to us.

We cannot provide assurances that our efforts to eliminate the potential impact of conflicts of interest will be effective.

5.

Fred G. Luke Trace, our Chief Executive Officer, and Chief Financial Officer, has no meaningful accounting or financial reporting education or experience and, accordingly, our ability to meet Exchange Act reporting requirements on a timely basis will be dependent to a significant degree upon others.

Fred G. Luke, our Chief Executive Officer and Chief Accounting Officer, has no meaningful financial reporting education or experience. Consequently he is heavily dependent on advisors and consultants. As such, there is risk about our ability to comply with all financial reporting requirements accurately and on a timely basis.

6.

We are subject to the periodic reporting requirements of the Securities Exchange Act of 1934 which require us to incur audit fees and legal fees in connection with the preparation of such reports. These costs could reduce or eliminate our ability to earn a profit.

We are required to file periodic reports with the SEC pursuant to the Securities Exchange Act of 1934 and the rules and regulations promulgated thereunder. In order to comply with these requirements, our independent registered public accounting firm will have to review our financial statements on a quarterly basis and audit our financial statements on an annual basis. Moreover, our legal counsel will have to review and assist in the preparation of such reports. The costs charged by these professionals for such services cannot be accurately predicted at this time because factors such as the number and type of transactions that we engage in and the complexity of our reports cannot be determined at this time and will have a major effect on the amount of time to be spent by our auditors and attorneys. However, the incurrence of such costs will obviously be an expense to our operations and thus have a negative effect on our ability to meet our overhead requirements and earn a profit.

We do not have a sufficient number of employees to segregate responsibilities and may be unable to afford increasing our staff or engaging outside consultants or professionals to overcome our lack of employees. Moreover, effective internal controls, particularly those related to revenue recognition, are necessary for us to produce reliable financial reports and are important to help prevent financial fraud. If we cannot provide reliable financial reports or prevent fraud, our business and operating results could be harmed, investors could lose confidence in our reported financial information, and the trading price of our common stock, if a market ever develops, could drop significantly.

7.

Our internal controls may be inadequate, which could cause our financial reporting to be unreliable and lead to misinformation being disseminated to the public.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. As defined in Exchange Act Rule 13a-15(f), internal control over financial reporting is a process designed by, or under the supervision of, the principal executive and principal financial officer and effected by the board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;

- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and/or directors of the Company; and

- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Our internal controls may be inadequate or ineffective if our operations expand, which could cause our financial reporting to be unreliable and lead to misinformation being disseminated to the public. Investors relying upon this misinformation may make an uninformed investment decision.

8.

The costs of being a public company could result in us being unable to continue as a going concern.

As a public company, we have to comply with numerous financial reporting and legal requirements, including those pertaining to audits and internal control. The costs of this compliance could be significant. If our revenues do not increase and/or we cannot satisfy many of these costs through the issuance of our shares, we may be unable to satisfy these costs in the normal course of business which would result in our being unable to continue as a going concern.

9.

Having only two directors limits our ability to establish effective independent corporate governance procedures and increases the control of our president.

We have only two directors, Fred G. Luke and Alan M. Rothman. Accordingly, we cannot establish board committees comprised of independent members to oversee functions like compensation or audit issues. In addition, a tie vote of board members is decided in favor of the chairman, which gives him significant control over all corporate issues.

Until we have a larger board of directors that would include some independent members, if ever, there will be limited oversight of our president's decisions and activities and little ability for minority shareholders to challenge or reverse those activities and decisions, even if they are not in the best interests of minority shareholders.

Risks Related to Our Common Stock

10.

Shareholders may be diluted significantly through our efforts to obtain financing and satisfy obligations through issuance of additional shares of our common stock.

We have no committed source of financing. Wherever possible, our board of directors will attempt to use non-cash consideration to satisfy obligations. In many instances, we believe that the non-cash consideration will consist of restricted shares of our common stock. Our Board of Directors has authority, without action or vote of the shareholders, to issue all or part of the authorized but unissued common shares. We have authorized 300,000,000 shares of common stock and 20,000,000 of preferred stock. As of June 30, 2010, 168,050,000 common shares and 20,000,000 preferred shares remain unissued. In addition, if a trading market develops for our common stock, we may attempt to raise capital by selling shares of our common stock, possibly at a discount to market. These actions will result in dilution of the ownership interests of existing shareholders, may further dilute common stock book value, and that dilution may be material. Such issuances may also serve to enhance existing management's ability to maintain control of Ladybug because the shares may be issued to parties or entities committed to supporting existing management.

11.

The interests of shareholders may be hurt because we can issue shares of our common stock to individuals or entities that support existing management with such issuances serving to enhance existing management's ability to maintain control of our Company.

Our board of directors has authority, without action or vote of the shareholders, to issue all or part of the authorized but unissued common shares. Such issuances may be issued to parties or entities committed to supporting existing management and the interests of existing management which may not be the same as the interests of other shareholders. Our ability to issue shares without shareholder approval serves to enhance existing management's ability to maintain control of our Company.

12.

Our articles of incorporation provide for indemnification of officers and directors at our expense and limit their liability that may result in a major cost to us and hurt the interests of our shareholders because corporate resources may be expended for the benefit of officers and/or directors.

Our Articles of Incorporation at Article VII provide for indemnification as follows: No director or officer of the Corporation shall be personally liable to the Corporation or any of its stockholders for damages for breach of fiduciary duty as a director or officer; provided, however, that the foregoing provision shall not eliminate or limit the liability of a director or officer: (i) for acts or omissions which involve intentional misconduct, fraud or knowing violation of law; or (ii) the payment of dividends in violation of Section 78.300 of the Nevada Revised Statutes. Any repeal or modification of an Article by the stockholders of the Corporation shall be prospective only, and shall not adversely affect any limitation of the personal liability of a director or officer of the Corporation for acts or omissions prior to such repeal or modification.

We have been advised that, in the opinion of the SEC, indemnification for liabilities arising under federal securities laws is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification for liabilities arising under federal securities laws, other than the payment by us of expenses incurred or paid by a director, officer or controlling person in the successful defense of any action, suit or proceeding, is asserted by a director, officer or controlling person in connection with our activities, we will (unless in the opinion of our counsel, the matter has been settled by controlling precedent) submit to a court of appropriate jurisdiction, the question whether indemnification by us is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue. The legal process relating to this matter if it were to occur is likely to be very costly and may result in us receiving negative publicity, either of which factors is likely to materially reduce the market and price for our shares, if such a market ever develops.

13.

Any market that develops in shares of our common stock will be subject to the penny stock regulations and restrictions pertaining to low priced stocks that will create a lack of liquidity and make trading difficult or impossible.

The trading of our securities will be in the over-the-counter market which is commonly referred to as the OTCBB as maintained by FINRA. As a result, an investor may find it difficult to dispose of, or to obtain accurate quotations as to the price of our securities.

Rule 3a51-1 of the Securities Exchange Act of 1934 establishes the definition of a "penny stock," for purposes relevant to us, as any equity security that has a minimum bid price of less than \$4.00 per share or with an exercise price of less than \$4.00 per share, subject to a limited number of exceptions which are not available to us. It is likely that our shares will be considered to be penny stocks for the immediately foreseeable future. This classification severely and adversely affects any market liquidity for our common stock.

For any transaction involving a penny stock, unless exempt, the penny stock rules require that a broker or dealer approve a person's account for transactions in penny stocks and the broker or dealer receive from the investor a written agreement to the transaction setting forth the identity and quantity of the penny stock to be purchased. In order to approve a person's account for transactions in penny stocks, the broker or dealer must obtain financial information and investment experience and objectives of the person and make a reasonable determination that the transactions in penny stocks are suitable for that person and that that person has sufficient knowledge and experience in financial matters to be capable of evaluating the risks of transactions in penny stocks.

The broker or dealer must also deliver, prior to any transaction in a penny stock, a disclosure schedule prepared by the SEC relating to the penny stock market, which, in highlight form, sets forth:

-
- the basis on which the broker or dealer made the suitability determination, and
-

that the broker or dealer received a signed, written agreement from the investor prior to the transaction.

Disclosure also has to be made about the risks of investing in penny stock in both public offerings and in secondary trading and commissions payable to both the broker-dealer and the registered representative, current quotations for the securities and the rights and remedies available to an investor in cases of fraud in penny stock transactions. Additionally, monthly statements have to be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stocks.

Because of these regulations, broker-dealers may not wish to engage in the above-referenced necessary paperwork and disclosures and/or may encounter difficulties in their attempt to sell shares of our common stock, which may affect the ability of selling shareholders or other holders to sell their shares in any secondary market and have the effect of reducing the level of trading activity in any secondary market. These additional sales practice and disclosure requirements could impede the sale of our securities, if and when our securities become publicly traded. In addition, the liquidity for our securities may decrease, with a corresponding decrease in the price of our securities. Our shares, in all probability, will be subject to such penny stock rules for the foreseeable future and our shareholders will, in all likelihood, find it difficult to sell their securities.

14.

The market for penny stocks has experienced numerous frauds and abuses that could adversely impact investors in our stock.

Company management believes that the market for penny stocks has suffered from patterns of fraud and abuse. Such patterns include:

- Control of the market for the security by one or a few broker-dealers that are often related to the promoter or issuer;
- Manipulation of prices through prearranged matching of purchases and sales and false and misleading press releases;
- "Boiler room" practices involving high pressure sales tactics and unrealistic price projections by sales persons;
- Excessive and undisclosed bid-ask differentials and markups by selling broker-dealers; and
- Wholesale dumping of the same securities by promoters and broker-dealers after prices have been manipulated to a desired level, along with the inevitable collapse of those prices with consequent investor losses.

15.

Any trading market that may develop may be restricted by virtue of state securities "Blue Sky" laws that prohibit trading absent compliance with individual state laws. These restrictions may make it difficult or impossible to sell shares in those states.

There is currently no established public market for our common stock, and there can be no assurance that any established public market will develop in the foreseeable future. Transfer of our common stock may also be restricted under the securities or securities regulations laws promulgated by various states and foreign jurisdictions, commonly referred to as "Blue Sky" laws. Absent compliance with such individual state laws, our common stock may not be traded in such jurisdictions. Because the securities recently registered have not been registered for resale under the blue sky laws of any state, the holders of such shares and persons who desire to purchase them in any trading market that might develop in the future, should be aware that there may be significant state blue sky law restrictions upon the ability of investors to sell the securities and of purchasers to purchase the securities. These restrictions prohibit the secondary trading of our common stock. We currently do not intend to and may not be able to qualify securities for resale in at least 17 states which do not offer manual exemptions (or may offer manual exemptions but may not to offer one to us if we are considered to be a shell company at the time of application) and require shares to be qualified before they can be resold by our shareholders. Accordingly, investors should consider the secondary market for our securities to be a limited one.

16.

Our board of directors has the authority, without stockholder approval, to issue preferred stock with terms that may not be beneficial to common stockholders and with the ability to affect adversely stockholder voting power and perpetuate their control over us.

Our articles of incorporation allow us to issue shares of preferred stock without any vote or further action by our stockholders. Our board of directors has the authority to fix and determine the relative rights and preferences of preferred stock. Our board of directors also has the authority to issue preferred stock without further stockholder approval, including large blocks of preferred stock. As a result, our board of directors could authorize the issuance of a series of preferred stock that would grant to holders the preferred right to our assets upon liquidation, the right to receive dividend payments before dividends are distributed to the holders of common stock and the right to the redemption of the shares, together with a premium, prior to the redemption of our common stock.

17.

We do not expect to pay cash dividends in the foreseeable future.

We have never paid cash dividends on our common stock. We do not expect to pay cash dividends on our common stock at any time in the foreseeable future. The future payment of dividends directly depends upon our future earnings, capital requirements, financial requirements and other factors that our board of directors will consider. Since we do not anticipate paying cash dividends on our common stock, return on your investment, if any, will depend solely on an increase, if any, in the market value of our common stock.

18.

Because we are not subject to compliance with rules requiring the adoption of certain corporate governance measures, our stockholders have limited protection against interested director transactions, conflicts of interest and similar matters.

The Sarbanes-Oxley Act of 2002, as well as rule changes proposed and enacted by the SEC, the New York and American Stock Exchanges and the Nasdaq Stock Market, as a result of Sarbanes-Oxley, require the implementation of various measures relating to corporate governance. These measures are designed to enhance the integrity of corporate management and the securities markets and apply to securities that are listed on those exchanges or the Nasdaq Stock Market. Because we are not presently required to comply with many of the corporate governance provisions and because we chose to avoid incurring the substantial additional costs associated with such compliance any sooner than legally required, we have not yet adopted these measures.

Because none of our directors are independent directors, we do not currently have independent audit or compensation committees. As a result, these directors have the ability, among other things, to determine their own level of compensation. Until we comply with such corporate governance measures, regardless of whether such compliance is required, the absence of such standards of corporate governance may leave our stockholders without protections against interested director transactions, conflicts of interest, if any, and similar matters and investors may be reluctant to provide us with funds necessary to expand our operations.

We intend to comply with all corporate governance measures relating to director independence when and as required. However, we may find it very difficult or be unable to attract and retain qualified officers, directors and members of board committees required to provide for our effective management as a result of Sarbanes-Oxley Act of 2002. The enactment of the Sarbanes-Oxley Act of 2002 has resulted in a series of rules and regulations by the SEC that increase responsibilities and liabilities of directors and executive officers. The perceived increased personal risk associated with these recent changes may make it more costly or deter qualified individuals from accepting these roles.

19.

You may have limited access to information regarding our business because our obligations to file periodic reports with the SEC could be automatically suspended under certain circumstances.

We are required to file periodic reports with the SEC which will be immediately available to the public for inspection. Except during the year following when our registration statement became effective, these reporting obligations may (in our discretion) be automatically suspended under Section 15(d) of the Securities Exchange Act

of 1934 if we have less than 300 shareholders and do not file a registration statement on Form 8A. If this occurs after the year in which our registration statement became effective, we will no longer be obligated to file periodic reports with the SEC and your access to our business information would then be even more restricted. We will also not be required to furnish proxy statements to security holders and our directors, officers and principal beneficial owners will not be required to report their beneficial ownership of securities to the SEC pursuant to Section 16 of the Securities Exchange Act of 1934 until we have both 500 or more security holders and greater than \$10 million in assets. This means that your access to information regarding our business will be limited.

For all of the foregoing reasons and others set forth herein, an investment in our securities in any market that may develop in the future involves a high degree of risk.

Item 2. Unregistered Sale of Equity Securities and Use of Proceeds.

None

Item 3. Defaults upon Senior Securities.

None.

Item 4. Removed and Reserved.

Item 5. Other Information.

None

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
