- 5.2 **ICFR – material weakness relating to design:** The issuer has disclosed in its interim MD&A for each material weakness relating to design existing at the end of the interim period.

In its assessment of the effectiveness in internal control over financial reporting as of November 30, 2014, the Company determined that there were control deficiencies that constituted material weaknesses, as described below.

- Management has identified certain material weaknesses that existed in the design or operation of the Company’s internal control over financial reporting including ineffective control over the financing reporting of subsidiaries and ineffective controls related to the period-end financial reporting process that impacts management’s ability to oversee the preparation of the consolidated financial statements.

Due to these material weaknesses, management concluded that our internal control over financial reporting was not effective as of November 30, 2014.

The Company is in the process of developing and implementing a remediation plan to address the material weaknesses as described above. The Company has taken the following actions to improve internal controls over financial reporting:

- During the year ended August 31, 2015, we will enhance our risk assessment, internal control design and documentation; and
- Develop and implement other procedures in the internal control function.

In light of the aforementioned material weaknesses, management conducted a thorough review of all significant or non-routine adjustments for the interim period ended November 30, 2014. As a result of this review, management believes that there are no material inaccuracies or omissions of material fact and, to the best its knowledge, believes that the consolidated financial statements for the interim period ended November 30, 2014 fairly present in all material respects and financial position and results of operations for the Company in conformity with IFRS.

5.3 N/A
