Item IX The nature of products or services offered.

Medical Marijuana, Inc. will provide institutional level financial systems to local, state and federal governments, testing and certification services, education programs, consulting and turn-key solutions to all levels of government and the Medical Marijuana Industry.

EDUCATIONAL SYMPOSIUM AND SEMINARS

MMI began its seminars with the its first education forum in Northern California. The focus of these seminars is on educating entrepreneurs, existing industry operators, regulators, city officials, law enforcement officials and the general public on the benefits of a legitimate medical marijuana industry. MMI will hold a minimum of four education seminars in cities across the US in 2010.

The seminars and workshops will focus on the entrepreneur and help them find their niche in the emerging Medical Marijuana industry. Topics will include:

- Applicable law for the cooperative and how to become a caregiver.
- Cultivation- indoor, outdoor, hydroponics and aeroponics
- Medical uses of Cannabis
- Taxes, Accounting and Trade
- Delivery Service
- Related industries with the best product to use and distribute.

FINANCIAL SOLUTIONS

Medical Marijuana, Inc. has a provisional patent pending on the MMI Financial Solutions that provide local, state and federal governments with a closed loop financial accounting system to monitor compliance and collect tax revenues in a near real-time environment. MMI will also provide an integrated business system for medical marijuana Industry participants, from growers to distributors to dispensaries. MMI Solutions will ensure compliance with local, state and federal regulations where it concerns operations and taxation.

TAX REMITTANCE

Using this new invention, the "Point of Sale" System will recognize the dispensary's tax ID number and the tax rates for state and local taxes as well as provide "Automated Clearing House" (ACH) settlement of the taxes to the proper financial institutions. The state sales tax amount is sent to a database and at the end of the day all money in the sales tax database is cleared and posted through an "Automated Clearing House" (ACH) to the state and other appropriate governmental agencies for that days collected sales tax. The remaining funds are sent to the dispensary's account or other designations.

The Company has introduced a Stored Value Platform System with a full slate of interactive Financial Services made readily available through a patent pending delivery system, a Stored Value Debit Card.

This Stored Value Platform System will provide verifiable solutions for an inter-agency approach to manage the difficult task of Revenue and Taxation Collection for the emerging medical marijuana industry.

The stored platform cards will be sold by Master Agents around the United States whereby commissions will be paid on a per transaction basis. The company has engaged a total of nineteen master agents to date. The agents are trained through a series of training conference calls held daily.

There are patents pending for both the stored value platform system and an inventory control system now in development.

The company is the first to step up into unknown territory, becoming the first U.S. public corporation to enter the medical marijuana industry. Much of the necessary infrastructure required to efficiently and effectively manage an industry of this magnitude simply does not exist. MMI will develop groundbreaking systems and applications to service this emerging industry.

MMI is in negotiation with established scientists actively engaged in ongoing cannabinoid research. By the end of the third quarter of operations, MMI expects to have established several strategic relationships in the science and medical communities. Testing and Grading is in the development stage at this time.

Inventory Management System & Supply Chain Network - MMI's Inventory Management and Distribution System is an all encompassing supply chain and inventory management system that provides technologically advanced, comprehensive tools to the rapidly emerging Medical Marijuana Industry. The MMI System provides industry operators with the necessary tools to confidently track their valuable inventory at all points along the supply chain, from cultivation to retail sales. The system will provide a dashboard with user definable snapshots of inventory levels and value at any point in time historical, current or projected to give business managers the ability to more effectively manage their businesses. Dashboards can be distributed in a variety of formats, numerical and textual, graphical, audio and video.

The MMI System is an integrated "plug and play" network that allows, Grow-Ops, Distributors, and Co-Ops/Collectives to easily collaborate and build a strong and diversified supply chain network. The system is modularized to allow various business models to select only the modules that are necessary for their particular business model. Other operators in the industry will also "plug-in" to the network to form a vast integrated network of Grow-Ops, Distributors, Co-Ops/Collectives and third party product or service providers, all collaborating cohesively.

The MMI W2W (Wholesale-to-Wholesale) module is seamlessly integrated into a comprehensive pricing and research database that provides a matrix of fluctuating strains, pricing, and availability from inventory across the entire MMI Network of Co-Ops/Collectives and Grow-Ops. Co-Ops/Collectives low on inventory, or have overstock inventory, can query and post in real-time "available-for-trade" inventory levels. The database has over 30 predefined defined data points such as TCH Content, CBA, CBD, etc., as well as an unlimited number of user/community defined criteria.

The underlying infrastructure is based on a "closed-loop" design to minimize theft and fraud by identifying unauthorized breaks in the supply chain audit trail in real time. Business managers can be notified immediately via text message or email on mobile devices as well as supplying a real-time video feed of suspected activity to mobile devices. The closed-loop infrastructure also facilitates "batch-tracking" for recall purposes in the event contaminated product is introduced into the system.

There is also a "Mom & Pop Grow-Op" feature that promotes and supports a small business boutique model over big agribusiness super-grows that will inevitably make their way into the industry. Small and tightly controlled Grow-Ops will produce more variety and higher quality product than large automated industrial models, this model has been proven in the micro-brew industry. MMI chooses a "quality over quantity" approach, and long term sustainability over short-term gain.

Turnkey Business Solutions - MMI provides Turnkey Business Management Solutions for Co-Ops, Grow-Op and Distributors as a much needed service to the rapidly expanding number of businesses in the Medical Marijuana Industry. There is a high Level of confusion and contradiction as to the laws and regulations that apply to this industry. MMI has stepped up to provide clarity and to ensure that new entrepreneurs to this industry and existing industry operators are able to operate efficiently and in full compliance from the first moment they are open for business.

MMI Turnkey Solutions can be purchased in bundles or ala carte. MMI Business Management Solutions provide the following solutions and more:

- Local, State and eventually Federal Licensing Services
- Site Location Scouting
- Lease/Contract Negotiation
- Store Design and Built-Out
- Product Sourcing
- Staffing & Training
- Insurance Sourcing, including Health plans for employees, Worker's Comp, Business Liability, and Fire and Theft
- Security Systems and Personnel
- Notification and Coordination with local regulatory and law enforcement officials
- Implementation & Support of all Business Systems:
 - Tax Remittance Cards
 - Point of Sale (POS) Systems
 - Business Accounting Systems
 - Inventory Management Systems
 - Supply Chain Network
 - Contact/Customer/Vendor Management Systems
- Advertising Programs
- Accounting Services
- Legal Services
- Tech Support Services
- MMI Industry Newsletters & Magazine

MMI Turnkey Business Management Solutions allow entrepreneurs to invest in this industry and begin operating worry free right out of the gate, avoiding the potential pitfalls of starting a new business in a new and rapidly emerging industry. MMI will be working alongside the entrepreneur to provide solutions to the regulatory and operating environment which has not yet been fully and clearly defined as in other mature industries.

Consulting - Consulting Services for local, state and federal governments and the business community. Experts at MMI will be available for consulting engagements at all levels of the industry. This is a new and emerging industry that requires a thoughtful and concise approach to establish the infrastructure and many components required for the industry to flourish. MMI Consultants will be available for planning and education purposes to municipalities, county, state and federal governments, as well as to industry participants from cultivation to dispensary operation and all operations in between. MMI Consulting has already begun to operate its accounting and cash flow audits for its signed collectives.

Accounting – MMI is in the process of acquiring Certified Public Accountants and personnel to provide full service accounting from daily and weekly bookkeeping to quarterly tax and yearly income tax filings.

Security Services - MMI will provide expert security, specific to the industry and the security issues it will face. MMI will provide contract and temporary security personnel to cultivators, distributors and collectives. MMI will also provide state-of-the-art electronic security solutions.

Future areas of concentration to be entered into include but are not limited to:

Distribution - MMI will provide distribution services to cultivators and dispensary operators to provide a safe, secure and proper method of distribution from cultivation to the market. The value of this cargo is substantial, so standard distribution methods are unacceptable for this market. An added level of security is required to minimize potential high-jacking by the criminal element that will take time to eradicate in the transition to a legitimate market.

Grow Operations- MMI will analyze the cultivation market for opportunities to establish itself. As the market matures, many farmers are going to turn to growing medical marijuana crops as it is far more lucrative than any other crop in the U.S. or the world. There may initially be a glut of farmers/cultivators producing medical marijuana which will drive down prices until the market stabilizes. MMI will organize and coordinate the grow-op market by providing the infrastructure to allow it to operate efficiently.

Co-Op/Collective Management - As the market matures, MMI will provide outsourced management services to dispensaries under contract. MMI will standardize operations and product selection in its group of managed dispensaries.

Medical Marijuana Business Journal - Industry News, Education and Information - MMI will distribute an industry magazine that addresses all issues concerning businesses in the emerging Medical Marijuana Industry.

MMI University - high-level educational programs to industry participants, law enforcement, political groups and consumers. Curriculum includes, but is not limited to; business management in the medical marijuana industry, managing co-ops and grow-ops, distribution, marijuana horticulture, laws and regulations.

Item XVI Management's Discussion and Analysis of Plan of Operations

A. Plan of Operation

Currently the issuer is in the process of a Private Party Memorandum for the sale of 2,000,000 shares of restricted common stock. It is expected this funding will provide the issuer with start up funds to initiate its first product roll out. The first six to nine months will be dedicated to building MMI's infrastructure, laying the groundwork for marketing campaigns, developing systems, documenting policies and procedures, writing white papers, making public appearances, etc. The company may not earn a profit for as much as 6 to 12 months or more. The issuer's tax remittance cards are already at the testing stage and expect to be operational within a couple months. Sales of the issuer's financial management systems are projected at \$3.4 million the first full year of operation.

The changing state of the medical marijuana industry has led to much confusion in regards to local and state ordinances and tax collections. Education seminars and consulting services will be a large part of the first year sales. To insure the efficiency of the issuer's tax remittance system it will be necessary to develop accounting, POS and inventory systems for the customer. Tax remittance and stored value cards will generate revenue on a per transaction basis.

Quality Assurance programs are projected to generate approximately \$888,000 the first full year of operation. The issuer expects to concentrate on the stored platform and tax remittance cards, as well as Educational Seminars, Consulting and Quality Assurance programs its first full year in operation.

As additional products are developed personnel will be added at a modest rate.

The key to MMI's sales strategy will be strategic alignment with organizations that have been the leaders of the medical marijuana movement over the past decade and are interconnected with most participants in the industry, including local, state and federal governments.

B. Management's Discussion and Analysis of Financial Conditions and the Results of Operations

As is often the case for companies in their first year of operations, the continuing development of the issuer's multi-faceted business plan developed a loss. Management changes during the third and fourth quarter of 2009 stalled the direction and development of the issuer's plan of operations. The appointment of Don Steinberg to President and the appointment of a new CFO will take place after the first of the year to redirect the focus of the company towards segments of the marijuana industry which have proven to be profitable. It is anticipated that the Educational Expo and seminars that are scheduled for 2010 will bring revenue and with cost containment and budgeting in place the company is expected to show profit.

C. Off-Balance Sheet Arrangements

The issuer has no off-balance sheet arrangements

Note 1 - Organization and Basis of Presentation

Organization and Line of Business

Medical Marijuana Inc. was incorporated in the State of Oregon in May of 2005. Medical Marijuana, Inc. will provide institutional level financial systems to local, state and federal governments, testing and certification services, education programs, consulting and turn-key solutions to all levels of government and the Medical Marijuana Industry.

Medical Marijuana, Inc. has a provisional patent pending on the MMI Financial Solutions that provides local, state and federal governments with a closed loop financial accounting system to monitor compliance and collect tax revenues in a near real-time environment. MMI will also provide an integrated business system for medical marijuana Industry participants, from growers to distributors to dispensaries. MMI Solutions will ensure compliance with local, state and federal regulations where it concerns operations and taxation.

Medical Marijuana, Inc. is positioned to take advantage of opportunities as they appear in the emerging legal medical marijuana industry through an enhanced payment gateway introducing verifiable levels of enhanced security. A trend is in place that clearly indicates medical marijuana is quickly becoming a legal enterprise in need of various solutions in numerous areas.

Basis of Presentation

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America.

Note 2 - Summary of Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Principles of Consolidation

The financial statements are not consolidated.

Cash and Cash Equivalents

Cash and cash equivalents include cash in hand and cash in time deposits, certificates of deposit and all highly liquid debt instruments with original maturities of three months or less.

Prepaid Expenses

None.

Deposits

Deposits are the balances outstanding that have not been redeemed as of the date of the Financial Statements.

Notes Receivable

This represents monies loaned to the Past President, Charles Larsen by the company.

Property and Equipment

Property and equipment are stated at cost. Expenditures for maintenance and repairs are charged to earnings as incurred; additions, renewals and betterments are capitalized. When property and equipment are retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the respective accounts, and any gain or loss is included in operations.

Depreciation of property and equipment is provided using the MACRS method for substantially all assets with estimated lives of 5 years.

Revenue Recognition

The Company's revenue recognition policies are in compliance with SEC Staff Accounting Bulletin ("SAB") 104.

Stock-Based Compensation

The Company accounts for its stock-based compensation in accordance with SFAS No. 123R, "Share-Based Payment, an Amendment of FASB Statement No. 123." The Company recognizes

in the statement of operations the grant date fair value of stock options and other equity-based compensation issued to employees and non-employees.

Income Taxes

The Company utilizes SFAS No. 109, "Accounting for Income Taxes," which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial reporting amounts at each period end based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

Basic and Diluted Earnings per Share

Earnings per share are calculated in accordance with the SFAS No. 128 ("SFAS No. 128"), "Earnings per Share." Net earnings per share for all periods presented have been restated to reflect the adoption of SFAS No. 128. Basic earnings per share is based upon the weighted average number of common shares outstanding. Diluted earnings per share is based on the assumption that all dilutive convertible shares and stock options were converted or exercised. Dilution is computed by applying the treasury stock method. Under this method, options and warrants are assumed to be exercised at the beginning of the period (or at the time of issuance, if later), and as if funds obtained thereby were used to purchase common stock at the average market price during the period. At this time there are no stock options granted.

Note 3 - Going Concern

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America, which contemplates continuation of the Company as a going concern.

Note 4 - Notes Payable

None.

Note 5 - Stock Options and Warrants

None.

Note 6 - Prepaid Expenses

None.

Note 7 - Subsequent Events

Merger with My Newpedia, Inc. – Effective May 21, 2008.

The Company was originally incorporated as The Berkshire Collection, Inc., in Canada in 2003. On May 23, 2005 the company was incorporated in the State of Oregon. The name was changed to My Newpedia Corp. on January 31, 2007. MyNewpedia, Corp changed its name to Club Vivanet Inc., in August 2006. On May 21, 2008 the issuer with the consent of the majority shareholder of My Newpedia, agreed to issue common stock of My Newpedia, Inc. (MYNW) to the shareholders of Club Vivanet (Florida) in exchange for all issued and outstanding, 9,300,000 common shares of the stock of Club Vivanet, exchanging one share of Club Vivanet for twelve shares of MyNewpedia, Inc. Total outstanding shares after merger was 221,176,840. A subsequent name change to Club Vivanet, Inc. took place on May 22, 2008, and on August 28, 2008 a 20:1 reverse split brought the issued and outstanding down to 11,058,842. With the election of a new Board of Directors, control of the corporation transferred from the major shareholder of My Newpedia to the new shareholders. The fiscal year end date for the company is December 31. The issuer or its past predecessors have not been engaged in bankruptcy, receivership or any similar proceeding.

Name Change to Medical Marijuana, Inc. – Effective April 28, 2009

Medical Marijuana, Inc., formerly Club Vivanet (PINKSHEETS: CVIV), received April 27, 2009 from NASDAQ its new symbol MJNA which became effective April 28, 2009 at open of market including the 10-for-1 forward split. This increased holdings of all shareholders as of April 27, 2009 by 9 additional shares for each Club Vivanet, Inc. share held.

The company also announced that the payment for spin-off of two of its subsidiaries, Club Vivanet Inc. (Florida) and MyNewPedia Corp (Colorado), share for share is today, April 27, 2009 based on a record date of April 13, 2009.
