1. Nature of operations and going concern

North Country Gold Corp. (the "Company" or "NCG") was incorporated in Alberta, Canada, on February 3, 2010 and the Company's common shares began trading on the TSX Venture Exchange under the stock symbol "NCG" on April 15, 2010. The Company's primary business is the acquisition, exploration, and development of mineral properties for sale or extraction. The Company's registered office is 4500 Bankers Hall East, 855 – 2nd Street SW, Calgary, Alberta, Canada, T2P 4K7. The Company's head office is at Suite 220, 9797 45 Avenue NW, Edmonton, Alberta, T6E 5V8.

On September 6, 2012 the Company's common shares began trading on the OTCQX under the stock symbol "NCGDF".

These interim consolidated condensed financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS") and on a going concern basis, which contemplates the realization of assets and settlement of liabilities in the normal course of operations. As at November 30, 2014, the Company has a deficit of $11,869,358 (2013 - $11,127,455) and the Company has not determined whether its mineral properties contain mineral deposits that are economically recoverable. These material uncertainties cast significant doubt regarding the Company's ability to continue as a going concern. At the current stage of the Company's operations, the ability of the Company to continue as a going concern is dependent upon its ability to obtain additional sources of financing. Management is seeking out additional sources of funding, which may include equity financing, joint ventures on its mineral properties, sale of assets or any combination thereof. If the Company is unsuccessful in obtaining additional financing to fund operations and the exploration and development of its mineral properties, the going concern assumption may not be appropriate and adjustments would be necessary to the carrying value of assets and liabilities and reported revenues and expenses. Such adjustments could be material.

2. Basis of presentation

These consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board ("IASB").

These consolidated financial statements were authorized for issue by the Board of Directors of the Company on January 28, 2014.

These consolidated financial statements are presented in Canadian Dollars, and the use of the symbol "$" herein is in reference to Canadian Dollars. Disclosures for amounts denominated in currencies other than Canadian Dollars use the International Standards Organization ("ISO") 3-letter symbol for such foreign currency.

These consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries: Committee Bay North Ltd. (incorporated in the Northwest Territories) and CBR Australia Holdings Inc. (amalgamated in Alberta) and its wholly owned subsidiary Matador Mining Pty. Ltd. (incorporated in Australia). All intercompany balances and transactions have been eliminated on consolidation.

These interim consolidated condensed financial statements have been prepared on an historical cost basis with the exception of investments which are measured at fair value.

3. Sale of Toro Drilling

On July 20, 2012, the Company entered into an agreement with a third party to sell the outstanding shares of Toro Drilling and Services Pty Ltd. ("Toro Drilling") for proceeds of AUD 752,000 (the "Share Sale Agreement"). The Company received AUD 200,000 on execution of the Share Sale Agreement and the remaining AUD 552,000 was to be received within twelve months of the sale. As at November 30, 2014, payments totaling AUD 410,000 have been received, with AUD 142,000 remaining in accounts receivable (note 4).

In accordance with an arrangement between the parties, equipment owned by Toro Drilling is being sold to fund the outstanding payments. The Company expects to collect the outstanding amount of AUD 142,000 by June 30, 2015. Interest accrues at a rate of 5.715% on the balance outstanding, which is recognized as a long-term receivable of $25,258.

i) On January 16, 2014, the Company's Board of Directors granted stock options to acquire up to an aggregate 500,000 common shares of the Company under the Plan, vesting immediately upon issuance. The stock options are exercisable at a price of $0.05 per common share and expire on January 16, 2019 or earlier in accordance with the terms of the Plan.

The estimated fair value of these options of $20,000, or $0.04 per option, has been recorded as share-based compensation expense in the 2014 fiscal year and as an increase to option and warrant reserve, and was calculated using the Black-Scholes Option Pricing Model using the following grant-date assumptions: grant date stock price $0.06; expected life, 5 years; expected volatility, 80%; risk-free rate 1.71%; expected dividends, 0%. The options were issued with an exercise price less than the quoted market price of the Company's common shares on the date of issuance.

ii) On February 3, 2014, the Company's Board of Directors granted stock options to acquire up to an aggregate 1,500,000 common shares of the Company under the Plan, vesting immediately upon issuance. The stock options are exercisable at a price of $0.15 per common share and expire on February 3, 2019 or earlier in accordance with the terms of the Plan.

The estimated fair value of these options of $45,000, or $0.03 per option, has been recorded as share-based compensation expense in the 2014 fiscal year and as an increase to option and warrant reserve, and was calculated using the Black-Scholes Option Pricing Model using the following grant-date assumptions: grant date stock price $0.06; expected life, 5 years; expected volatility, 80%; risk-free rate 1.51%; expected dividends, 0%. The options were issued with an exercise price greater than the quoted market price of the Company's common shares on the date of issuance.

11. Financial instruments and risk management

The Company is exposed to the following financial risks:

i) Market risk
ii) Credit risk
iii) Liquidity risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these consolidated financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated in the note.

General objectives, policies and processes

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure effective implementation of the objectives and policies to the Company's finance function.

The overall objective of the Board and the Company's finance function is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility and to ensure that risks are properly identified and that the capital base is adequate in relation to those risks. Further details regarding these policies are set out below.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of three types of risk: currency risk, interest rate risk, other price risk.

Currency risk

Currency risk is the risk that the fair value of, or future cash flows from, the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company's operations in Australia are denominated in Australian Dollars. The Company's share capital as well as the Company's reporting currency is in Canadian Dollars. The Company has not entered into any hedge contracts to manage this risk and does not maintain a formal strategy for foreign currency movements. The impact on net assets from a +/- 10% change in foreign exchange rates would be nominal.

Interest rate risk

Interest rate risk is the risk arising from the effect of changes in prevailing interest rates on the Company's financial instruments. The Company's interest rates on its finance leases are fixed and do not fluctuate. Interest rate risk is limited to potential decreases on the interest rate offered on cash and cash equivalents held with chartered Canadian financial institutions. The Company considers this risk to be minimal.

Credit risk

Credit risk is the risk of potential loss to the Company if counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and cash equivalents and accounts receivable.

The Company has assessed its exposure to credit risk on its cash and cash equivalents and has determined that such risk is minimal. The majority of the Company's cash and cash equivalents are held with financial institutions in Canada.

A portion of the Company's accounts receivable is due from a third party pursuant to a Share Sale Agreement (note 3). In accordance with an arrangement between the parties, the Company expects to collect the outstanding amount by June 30, 2015. The Company is monitoring progress on the collection in order to assess any changes in expectations, which may result in an impairment of the receivable.

The remainder of the Company's accounts receivable balances are current as of November 30, 2014. The Company trades only with recognized, creditworthy third parties and its receivables from such third parties are monitored on an ongoing basis. The Company has determined its credit risk associated with its trade accounts receivable is minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they fall due. The Company monitors its risk by monitoring the maturity dates of its existing debt and other payables. The Company's policy is to ensure that it will always have sufficient cash to allow it to meet its liabilities when they become due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

To achieve this objective, the Company prepares annual expenditure budgets, which are regularly monitored and updated as considered necessary. Further, the Company utilizes authorizations for expenditure on exploration projects to further manage expenditures. Monthly working capital and expenditure reports are prepared by the Company's finance function and presented to management for review and communication to the Board.

At November 30, 2014, the Company's current liabilities consisted of: accounts payable and accrued liabilities of $102,785 due within the next three months, accounts payable and accrued liabilities of $292,628 and current portion of finance lease obligations of $21,809 due after the next three months but within the next year. The Company's cash and cash equivalents of $78,468 and trade and other receivables of $353,372 are sufficient to pay these current liabilities.

Determination of fair value

The consolidated statement of financial position carrying amounts for cash and cash equivalents, trade receivables, accounts payable and accrued liabilities, and finance lease obligations approximate fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

Financial assets and liabilities measured at fair value are grouped into three Levels or a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities; and
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: unobservable inputs for the asset or liability.

The available-for-sale investments of the Company are based on quoted prices and are therefore considered to be Level 1.

Capital management

The Company monitors its equity as capital.

The Company's objectives in managing its capital are to maintain a sufficient capital base to support its operations and to meet its short-term obligations and at the same time preserve inventor's confidence and retain the ability to seek out and acquire new projects of merit. The Company is not exposed to any externally imposed capital requirements.
