(an Exploration Stage Company)

Financial Statements

For the Years Ended December 31, 2014, and 2013

INDEPENDENT AUDITORS' REPORT

To the Shareholders of **Northern Graphite Corp.**:

We have audited the accompanying financial statements of **Northern Graphite Corp.**, which comprise the statements of financial position as at December 31, 2014 and 2013 and the statements of comprehensive loss, changes in equity, and cash flows for the years then ended and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Northern Graphite Corp. as at December 31, 2014 and December 31, 2013, and the results of its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 2 of these financial statements, which states that Northern Graphite Corp. incurred significant losses from operations, negative cash flows from operating activities and has an accumulated deficit. This, along with other matters described in Note 2, indicates the existence of a material uncertainty which may cast significant doubt about the ability of Northern Graphite Corp. to continue as a going concern.

Northern Graphite Corporation
(an Exploration Stage Company)
Notes to Financial Statements
For the years ended December 31, 2014 and 2013

1. Corporate Information

Northern Graphite Corporation ("Northern" or "the Company") was incorporated under the laws of the Province of Ontario on February 25, 2002, under the name Industrial Minerals Canada Inc. The Company's name was changed to Northern on March 1, 2010. Northern was incorporated to develop and hold title to a 100% interest in the Bissett Creek Graphite Property (the "Bissett Creek Property"). The Company was a wholly owned subsidiary of Mindesta Inc. ("Mindesta") until early in 2010. Mindesta no longer owns any shares in Northern. Northern is listed on the TSX Venture Exchange and trades under the symbol "NGC".

The Company's address and head office is 290 Picton Avenue, Suite 201, Ottawa, Ontario K1Z 8P8 Canada.

2. Basis of Preparation

a. Statement of compliance

These financial statements and the notes thereto (the "Financial Statements") present Northern's financial results of operations and financial position under International Financial Reporting Standards ("IFRS") as at and for the years ended December 31, 2014 and 2013.

In the opinion of management, all adjustments necessary to present fairly the financial position of the Company as at December 31, 2014 and the results of its operations and cash flows for the year then ended have been made.

The policies set out in note 3 were consistently applied to all the periods presented.

The Financial Statements were approved and authorized for issue by the Board of Directors on March 30, 2015.

b. Basis of measurement

The Financial Statements have been prepared on a historical cost basis except those accounts as noted in the financial instruments section (note 11). In addition, the Financial Statements have been prepared using the accrual basis of accounting.

c. Going Concern

The Company is an exploration stage company that incurred a net loss of \$990,734 for the year ended December 31, 2014 (2013 - \$1,493,512) and has an accumulated deficit of \$9,697,450 since the inception of the Company. As at December 31, 2014, the Company had working capital of \$1,536,519 (December 31, 2013 - \$3,224,752) and the Company's ability to continue as a going concern is dependent upon its ability to raise additional capital to continue the development of the Bissett Creek Property. The Company completed a private placement with proceeds of \$10,550,841 during the first quarter of 2012, and an IPO with proceeds of \$4,000,000 during the second quarter of 2011. While the Company has been successful in raising capital to advance the Bissett Creek Property, substantial additional capital is required to ultimately build a mine and processing plant on the Bissett Creek Project and to enable the Company to enter production and continue its operations. However, there is a high degree of risk and many inherent uncertainties in the mining industry and there is no assurance management will be successful in its endeavors. These factors indicate the existence of a material uncertainty which may cast significant doubt about the ability of the Company to continue as a going concern.

The Financial Statements have been prepared on a going concern basis, which assumes that the Company will be able to continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

The Company's management believes that it can continue to finance operating expenses over the next twelve months with funds on hand. Given the continuation of negative investor sentiment and weak capital markets in the resource sector, there exists a material uncertainty as to the Company's ability to raise additional funds on favourable terms. The Company's discretionary activities have considerable scope for flexibility in terms of the amount and timing of expenditures. The Company will thoroughly assess all such activities before undertaking them in advance of additional financing being secured. The Company's Financial Statements do not include any adjustments that might result from negative outcomes with respect to these uncertainties.

d. Functional and presentation currency

The Company's functional and presentation currency is the Canadian dollar.

Northern Graphite Corporation

(an Exploration Stage Company)

Notes to Financial Statements

For the years ended December 31, 2014 and 2013

e. Critical accounting estimates and judgments

The preparation of the Financial Statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities at the date of the Financial Statements, and revenues and expenses for the period. By their nature, these estimates and judgments are subject to uncertainty and the effect on the Financial Statements of changes in such estimates in future periods could be significant. Actual results may differ from those estimates and judgments.

Significant estimates used in the preparation of the Financial Statements include, but are not limited to:

- (i) asset carrying values and impairment charges;
- (ii) the economic recoverability of exploration expenditures incurred and the probability of future economic benefits from development expenditures incurred;
- (iii) the expected costs of asset retirement obligations; and
- (iv) the calculation of share-based compensation and warrants which includes the assumptions used in the Black-Scholes option pricing model including volatility, estimated forfeiture rates and expected time until exercise.

Significant judgments used in the preparation of these Financial Statements include, but are not limited to:

- (i) those relating to the assessment of the Company's ability to continue as a going concern;
- (ii) the useful lives and related depreciation of property and equipment;
- (iii) the identification of separately identifiable components in property and equipment where their respective cost is significant in comparison to the total cost;
- (iv) the classification of expenditures as exploration and evaluation assets; and
- (v) the recognition of deferred tax.

The key sources of estimation uncertainty that have a significant risk of causing material adjustment to the amounts recognized in the financial statements are as follows:

- (i) Exploration and evaluation assets

The Company is required to review the carrying value of its exploration and evaluation properties for potential impairment. Impairment is indicated if the carrying value of the Company's exploration and evaluation is not recoverable. If impairment is indicated, the amount by which the carrying value of exploration and evaluation assets exceeds their estimated fair value is changed to the statement of loss.

Evaluating for recoverability during the exploration and evaluation phase requires judgment in determining whether future economic benefits from future exploitation, sale or otherwise are likely. Evaluations may be more complex where activities have not reached a stage which permits a reasonable assessment of the existence of reserves or resources. Management must make certain estimates and assumptions about future events or circumstances including, but not limited to, the interpretation of geological, geophysical and seismic data, the Company's financial ability to continue exploration and evaluation activities, contractual issues with joint venture partners, the impact of government legislation and political stability in the region, and the impact of current and expected future metal prices to potential reserves.

- (ii) Share-based payments

The Company has an equity-settled share-based scheme for directors, officers, employees and consultants. Services received, and the corresponding increase in equity, are measured by reference to the fair value of the equity instruments at the date of the grant, excluding the impact of any non-market vesting conditions. The fair value of share options are estimated by using the Black-Scholes model on the date of the grant based on certain assumptions. Those assumptions are described in Note 7 and include, among others, expected volatility, expected life of the options and number of options expected to vest.

- (iii) Useful lives of equipment, buildings and improvements depreciation

The Company estimates the useful lives of equipment, buildings, and improvements based on the period over which the assets are expected to be available for use. The depreciation method and useful lives reflect the pattern in which management expects the asset's future economic benefits to be consumed by the Company. The amounts and timing of recorded expenses for any period would be affected by changes in assumptions and estimates used.

- (iv) Taxes

Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the probable timing and the level of future taxable income realized, including the usage of tax planning strategies.

Northern Graphite Corporation

(an Exploration Stage Company)

Notes to Financial Statements

For the years ended December 31, 2014 and 2013

(v) Restoration and site closure provision

The Company recognizes the liability for statutory, contractual, constructive or legal obligations, including those associated with the reclamation of mineral properties, when those obligations result from the exploration or development of its properties. The Company assesses its provision for site restoration and site closure at each reporting date. The fair value of an asset retirement obligation is recorded in the period in which it is incurred. When the liability is initially recorded, the cost is capitalized by increasing the carrying amount of the related long-lived asset. Over time, the liability is adjusted to reflect the passage of time (accretion expense) and for changes in estimated future cash flows. The provision at the reporting date represents management's best estimate of the present value of the future restoration and site closure costs required.

3. Significant accounting policies

Cash and cash equivalents

Cash and cash equivalents include bank balances, funds held in trust with lawyers, and short term investments that are readily convertible into cash with original maturities of three months or less.

Property and equipment

Upon initial acquisition, land, buildings, plant and equipment are valued at cost, being the purchase price and the directly attributable costs of acquisition or construction required to bring the asset to the location and condition necessary for the asset to be capable of operating in the manner intended by management.

In subsequent periods, buildings, plant and equipment are stated at cost less accumulated depreciation and any impairment in value, whilst land is stated at cost less any impairment in value and is not depreciated.

Each component or part of property and equipment with a cost that is significant in relation to total cost of the item will be depreciated separately unless there is no difference in depreciation on the respective components.

Impairment of long-lived assets

At each balance sheet date, the Company assesses whether there is any indication that any long-lived assets or finite life tangible assets are impaired. The Company monitors the recoverability of long-lived assets based on factors such as current market value, future asset utilization, business climate and future undiscounted cash flows expected to result from the use of the assets. An impairment is recognized if the recoverable amount, determined as the higher of an asset's fair value less cost to sell and the discounted future cash flows generated from use and eventual disposal of an asset, is less than its carrying value. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Mining properties and exploration and evaluation assets are also assessed for impairment upon the transfer of exploration and evaluation assets to development assets regardless of whether facts and circumstances indicate that the carrying amount of the exploration and evaluation assets is in excess of their recoverable amount.

Mining properties and exploration and evaluation expenditures

Mining properties correspond to acquired interests in mining exploration leases/permits/claims which include the rights to explore, mine, extract and sell all minerals. All pre-exploration costs, i.e. costs incurred prior to obtaining the legal right to undertake exploration and evaluation activities on an area of interest, are expensed as incurred.

Once the legal right to explore has been acquired, exploration and evaluation expenditures are capitalized in respect of each identifiable area of interest until the technical feasibility and commercial viability of extracting a mineral resource have been demonstrated.

General and administration expenditures relating to exploration are capitalized where they can be directly attributed to the site undergoing exploration and evaluation.

Exploration and evaluation assets are carried at historical cost, less any impairment losses recognized.

When the technical feasibility and commercial viability of extracting a mineral resource are demonstrated for an area of interest, the Company stops capitalizing exploration and evaluation costs for that area, tests recognized exploration and evaluation assets for impairment and reclassifies any unimpaired exploration and evaluation assets either as tangible or intangible mine development assets according to the nature of the assets.

Northern Graphite Corporation
(an Exploration Stage Company)
Notes to Financial Statements
For the years ended December 31, 2014 and 2013

Depreciation and depletion

Depreciation and depletion is provided so as to write off the cost less estimated residual values of mining properties, buildings, plant and equipment on the following bases:

Buildings, plant and equipment unrelated to production are depreciated using the straight-line method based on estimated useful lives. Where significant parts of an asset have differing useful lives, depreciation is calculated on each separate part. The estimated useful life of each item or part has due regard to both its own physical life limitations and the present assessment of economically recoverable reserves of the mine property on which the item is located, and to possible future variations in those assessments. Estimates of remaining useful lives and residual values are reviewed annually. Changes in estimates which affect depreciation are accounted for prospectively.

The expected useful lives are as follows:

Electrical building	7 years
Office furniture	7 years
Office building	10 years
Equipment	3 – 20 years
Process buildings	20 years
Laboratory equipment	3 years

Income taxes

Income tax expense comprises current and deferred tax. Income tax expense is recognized in the statement of comprehensive loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized on the initial recognition of assets or liabilities in a transaction that is not a business combination and at the time of the transaction, affects neither accounting profit (loss) nor taxable profit (loss). In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Translation of foreign currencies

Monetary items denominated in foreign currencies are translated to Canadian dollars at the exchange rate in effect at the balance sheet date, and non-monetary items are translated at exchange rates in effect when the assets were acquired or liabilities incurred. Revenue and expense items are translated at the rate of exchange in effect on the transaction date. Foreign currency transaction gains or losses are reflected in the results of operations.

Restoration and site closure provision

The fair value of an asset retirement obligation is recorded in the period in which it is incurred. When the liability is initially recorded, the cost is capitalized by increasing the carrying amount of the related long-lived asset. Over time, the liability is adjusted to reflect the passage of time (accretion expense) and for changes in estimated future cash flows. Accretion expense is charged to the statement of comprehensive profit or loss, while adjustments related to changes in estimated cash flows are recorded as increases or decreases in the carrying value of the asset. The capitalized cost is amortized over the useful life of the related asset. Upon settlement of the liability, a gain or loss is recorded if the actual costs incurred are different from the liability recorded.

Northern Graphite Corporation
(an Exploration Stage Company)
Notes to Financial Statements
For the years ended December 31, 2014 and 2013

Comprehensive income

Other comprehensive income represents the change in net equity for the period resulting from unrealized gains and losses on available-for-sale financial instruments, and changes in the fair market value of derivative instruments designated as cash flow hedges. These amounts are shown net of tax. Cumulative changes in other comprehensive income are included in accumulated other comprehensive income which is presented, if any, as a new category in shareholders' equity. The Company did not have any transactions during the year ended December 31, 2014 and 2013 that give rise to other comprehensive income, and therefore no balance has accumulated.

Share capital

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial asset or liability. The Company's common shares and common share purchase warrants are classified as equity instruments. Incremental costs directly attributable to the issuance of new equity instruments are shown in equity as deduction from the proceeds of issuance.

Earnings per share

Basic loss per share is calculated by dividing the net loss by the weighted average number of shares outstanding during the period. Fully diluted loss per share is calculated using the treasury share method and reflects the potential dilution by including share options and contingently issuable shares, in the weighted average number of common shares outstanding for the year. For the year ended December 31, 2014 and the year ended December 31, 2013, all outstanding share options and warrants were anti-dilutive.

Share-based payments

The Company has a share option plan (the "Plan") described in Note 7. The Company measures the compensation cost of share options issued under the Plan using the fair-value method as determined using the Black-Scholes option pricing model. Compensation costs are measured at the grant date based on the fair value of the award and are recognized over the vesting period in net income (loss) with a corresponding increase to contributed surplus. Upon exercise, common shares are issued from treasury and the amount reflected in contributed surplus is credited to share capital, as adjusted for any consideration paid.

The Black-Scholes option pricing model incorporates highly subjective assumptions, including volatility, estimated forfeiture rates and expected time until exercise, which affect the calculated values. At the end of each reporting period, the Company reviews the option pricing model and updates model inputs for any changes for the purposes of determining the fair value of new grants, and reflects the impact of changes to non-market input estimates for previous grants in net income (loss) with a corresponding adjustment to contributed surplus.

Financial instruments

All financial instruments are required to be measured at fair value on initial recognition. Measurement in subsequent periods depends upon whether the financial instrument is classified as fair value through profit or loss ("FVTPL"), available-for-sale assets, held-to-maturity investments, loans and receivables, or other liabilities measured at amortized cost ("Other Financial Liabilities"). Financial instruments classified as FVTPL are measured at fair value with unrealized gains and losses recognized in the statement of operations. Available-for-sale asset financial instruments are measured at fair value with unrealized gains and losses recognized in other comprehensive income. Financial assets classified as held-to-maturity investments, loans and receivables and Other Financial Liabilities, are measured at amortized cost. Transaction costs in respect of financial assets and liabilities which are FVTPL are recognized in profit or loss immediately. Transaction costs in respect of Other Financial Liabilities are included in the initial fair value measurement of the financial instrument.

The Company may enter into derivative contracts or, financial instruments and non-financial contracts containing embedded derivatives. Embedded derivatives are required to be accounted for separately at fair value as derivatives when the risks and characteristics of the embedded derivatives are not closely related to those of their host contract, and the host contract is not carried at fair value.

The Company has designated each of its significant categories of financial instruments as follows:

Cash and cash equivalents	FVTPL
Deposits	Loans and receivables
Reclamation deposit	Loans and receivables
Accounts payable and accrued liabilities	Other Financial Liabilities

Northern Graphite Corporation
(an Exploration Stage Company)
Notes to Financial Statements
For the years ended December 31, 2014 and 2013

Recently adopted accounting standards

The following amended or new Standards were issued by the IASB and are effective for the Company's fiscal year beginning on January 1, 2014.

- IFRS 10 – Consolidated Financial Statements (amendment);
- IFRS 12 – Disclosure of Interests in Other Entities (amendment);
- IAS 32 – Financial Instruments: Presentation (amendment);
- IAS 36 – Impairment of Assets (amendment);
- IAS 39 – Financial Instruments: Recognition and Measurement (amendment); and
- IFRIC 21 – Levies.

IFRS 10 – Consolidated Financial Statements (amendment) - In October 2012, the IASB issued amendments to this Section, incorporated into the Handbook by the AcSB in January 2013, that introduce an exception for investment entities to the principle that all subsidiaries are consolidated. The amendments define an investment entity and require an investment entity to measure subsidiaries at fair value through profit or loss in accordance with IFRS 9 Financial Instruments or IAS 39 Financial Instruments: Recognition and Measurement. Consequential amendments were also made to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 3 Business Combinations and IAS 7 Statement of Cash Flows. Adoption of this standard did not have an effect on the Company's financial statements.

IFRS 12 – Disclosure of Interests in Other Entities (amendment) - In October 2012, the IASB issued amendments to this Section, incorporated into the Handbook by the AcSB in January 2013, to add disclosure requirements for investment entities. The amendments require an entity to disclose that it meets the definition of an investment entity, if applicable, including significant judgments and assumptions it has made in determining that it is an investment entity. Specific disclosure requirements for information about an investment entity's non-consolidated subsidiaries have also been included. Adoption of this standard did not have an effect on the Company's financial statements.

IAS 32 – Financial Instruments: Presentation (amendment) - This Section was amended by the International Accounting Standards Board (IASB) in December 2011, incorporated into Part I of the CPA Canada Handbook – Accounting (the Handbook) by the Accounting Standards Board (AcSB) in May 2012, to address inconsistencies in applying criteria for offsetting financial assets and financial liabilities. The meaning of the offsetting criterion “currently has a legally enforceable right to set off” has been clarified, to state that the right must not be contingent on future events and must be enforceable in the normal course of business, in event of default and in the event of insolvency or bankruptcy. Additional guidance has been included to clarify the principle behind net settlement, including identifying when some gross settlement systems may be considered equivalent to net settlement. Adoption of this standard did not have an effect on the Company's financial statements.

IAS 36 – Impairment of Assets (amendment) - In May 2013, the International Accounting Standards Board (IASB) issued an amendment, incorporated into Part I of the CPA Canada Handbook – Accounting by the Accounting Standards Board (AcSB) in September 2013, to IAS 36. These narrow-scope amendments address the disclosure of information about the recoverable amount of impaired assets if that amount is based on fair value less costs of disposal. Adoption of this standard did not have an effect on the Company's financial statements.

IAS 39 – Financial Instruments: Recognition and Measurement (amendment) - In June 2013, the International Accounting Standards Board (IASB) issued an amendment, incorporated into Part I of the CPA Canada Handbook – Accounting by the Accounting Standards Board (AcSB) in September 2013, to IAS 39. The amendments clarify that novation of a hedging derivative to a clearing counterparty as a consequence of laws or regulations or the introduction of laws or regulations does not terminate hedge accounting. Adoption of this standard did not have an effect on the Company's financial statements.

IFRIC 21 – Levies - In May 2013, the International Accounting Standards Board (IASB) issued IFRIC 21, incorporated into Part I of the CPA Canada Handbook – Accounting by the Accounting Standards Board (AcSB) in September 2013, which provides guidance on the accounting for levies within the scope of IAS 37 Provisions, Contingent Liabilities and Contingent Assets. Adoption of this standard did not have an effect on the Company's financial statements.

Future accounting standards

Certain pronouncements were issued by the IASB or the International Financial Reporting Interpretations Committee (“IFRIC”) that are mandatory for accounting periods after December 31, 2014. Pronouncements that are not applicable or do not have a significant impact to the Company have been excluded from the discussion below.

- IFRS 2 – Share Based Payments (amendment);
- IFRS 9 - Financial Instruments;
- IAS 24 – Related Party Disclosures (amendment).

The amendments to IFRS 2, issued by the International Accounting Standards Board (IASB) in December 2013, incorporated into Part I of the CPA Canada Handbook – Accounting by the Accounting Standards Board (AcSB) in March 2014, clarify the definition of “vesting conditions” and “market conditions”, and separately define a “performance condition” and a “service condition”. A performance condition requires the counterparty to complete a specified period of service and to meet a specified performance target during the service period. A service condition solely requires the counterparty to complete a specified period of service. The amendments are effective for share-based payment transactions for which the grant date is on or after July 1, 2014. The Company does not expect the implementation to have a significant impact on the Company’s results of operations, financial position and disclosures.

The IASB has issued a new standard, IFRS 9, Financial Instruments (“IFRS 9”), which will ultimately replace IAS 39, “Financial Instruments: Recognition and Measurement” (“IAS 39”). The replacement of IAS 39 is a multi-phase project with the objective of improving and simplifying the reporting for financial instruments and the issuance of IFRS 9 is part of the first phase of this project. IFRS 9 uses a single approach to determine whether a financial asset or liability is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. For financial assets, the approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. IFRS 9 requires a single impairment method to be used, replacing multiple impairment methods in IAS 39. For financial liabilities measured at fair value, fair value changes due to changes in an entity’s credit risk are presented in other comprehensive income. Companies may early adopt IFRS 9 however there is no mandatory application date. The Company does not expect the implementation to have a significant impact on the Company’s results of operations, financial position and disclosures.

The amendments to IAS 24, issued by the International Accounting Standards Board (IASB) in December 2013, incorporated into Part I of the CPA Canada Handbook – Accounting by the Accounting Standards Board (AcSB) in March 2014, clarify that a management entity, or any member of a group of which it is a part, that provides key management services to a reporting entity, or its parent, is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity. This replaces the more detailed disclosure by category required for other key management personnel compensation. The amendments will only affect disclosure and are effective for annual periods beginning on or after July 1, 2014. The Company does not expect the implementation to have a significant impact on the Company’s results of operations, financial position and disclosures.

5. Exploration and evaluation asset

The Company has a 100% interest in the Bissett Creek Property which consists of two mining leases and five unpatented claims. A 565 hectare mining lease, which was set to expire in September 2014, has had its renewal reviewed and the Company has received notification that it meets the necessary requirements for renewal. The lease renewal has been requisitioned for issuance and registration and the new expiry date is expected to be in 2035. The Bissett Creek Property also includes a 1,938 hectare mining lease, expiring in June, 2034, and five unpatented claims totaling approximately 464 hectares. All leases and claims are located in the United Townships of Head, Clara and Maria, in the County of Renfrew, Ontario.

As of December 31, 2014, accumulated costs with respect to the Bissett Creek Property consisted of the following:

	\$
Balance, December 31, 2012	7,143,817
Exploration expenditures made from January 1, 2013 to December 31, 2013:	
Drilling & exploration	209,139
Environmental & mine permitting	538,470

Balance, December 31, 2014	10,869,049

The Company is required to make royalty payments of \$20 per ton of graphite carbon concentrate produced to the previous owners and is subject to a 2.5% net smelter return payable on any other minerals derived and sold from the Bissett Creek Property. An advance royalty of \$27,000 per annum is payable in semi-annual installments and is recorded in exploration and evaluation assets.

Northern Graphite Corporation
(an Exploration Stage Company)
Notes to Financial Statements
For the years ended December 31, 2014 and 2013

The advance will be credited against any future royalty payments.

6. Scientific research and experimental development program claims

The Company filed federal and provincial claims under the scientific research and experimental development program in the amount of \$317,736 related to the 2011 taxation year. The refundable portion of the claims was \$125,090 which was received during 2013. The Company recognized a reduction of \$116,852 against Exploration and Evaluation assets and a reduction of \$8,508 against Office and miscellaneous and management and consulting expenses in period in which the claims were accepted.

On October 18, 2013, the Company filed federal and provincial claims under the scientific research and experimental development program in the amount of \$381,458 related to the 2012 taxation year. The refundable portion of these claims is \$125,944. \$116,407 of this amount was refunded in 2014 and \$9,536 was refunded in 2013. These refunds resulted in a reduction of \$104,191 against Exploration and Evaluations assets. The Company has not yet filed federal and provincial claims related to the 2013 and 2014 taxation years.

7. Share capital

Authorized

The Company is authorized to issue an unlimited number of common shares. On March 1, 2010, the Company subdivided its common shares on the basis of 11,750,000 common shares for the one common share outstanding.

Issued

	Common shares	
	Number of shares	Amount \$

Balance, December 31, 2012	71,480	2.00
Expired	(71,480)	2.00
Balance, December 31, 2013 and December 31, 2014	-	-

Share options

The Company has adopted a stock option plan (the "Option Plan") for directors, officers, employees and consultants of the Company. Under the Option Plan, the Company may grant non-transferable options to purchase common shares of the Company for a period of up to ten years from the date of the grant. The maximum number of common shares reserved for issuance under the Option Plan together with any common shares reserved for issuance pursuant to any other stock options may not exceed 10% of the issued and outstanding common shares of the Company.

The exercise price of each option shall be determined by the Board of Directors at the time of grant, and shall not be less than the price permitted by any stock exchange on which the common shares are then listed or other regulatory body having jurisdiction. Currently, the TSX Venture Exchange (the "TSX-V") requires that the exercise price of the options must be equal to or greater than the Discounted Market Price (as defined in the policies of the TSX-V). The exercise price of options is solely payable in cash. The Board of Directors has the discretion to determine the term and vesting provisions of any options granted under the Option Plan at the time of grant subject to the policies of the TSX-V.

Northern Graphite Corporation
(an Exploration Stage Company)
Notes to Financial Statements
For the years ended December 31, 2014 and 2013

A summary of the Option Plan activity is presented below:

	Number of options	Weighted average exercise price (\$)
Balance, December 31, 2012	4,000,000	0.83
Granted	-	-
Exercised	(50,000)	0.50
Forfeited	(550,000)	0.58
Balance, December 31, 2013	3,400,000	0.87
Granted	200,000	0.75
Exercised	(50,000)	0.50
Balance, December 31, 2014	3,550,000	0.87

A summary of the Company's share options outstanding and exercisable at December 31, 2014 is presented below:

Exercise price	Options outstanding	Options exercisable	Expiry date
\$0.50	2,225,000	2,225,000	April 18, 2016
\$0.94	25,000	25,000	November 16, 2016
\$0.80	75,000	75,000	December 20, 2016
\$2.50	525,000	525,000	April 11, 2017
\$0.85	500,000	500,000	December 20, 2017
\$0.75	200,000	200,000	May 15, 2017
	3,550,000	3,550,000	

The following is a summary of stock option grant activity and related Black-Scholes option pricing model input factors used for the years ended December 31, 2014 and December 31, 2013:

	Year ended December 31, 2014	Year ended December 31, 2013
Stock options granted during the period	200,000	NA
Weighted-average exercise price	\$0.75	NA
Expected stock option life ⁽¹⁾	3 years	NA
Expected volatility ⁽²⁾	77%	NA
Risk-free interest rate ⁽³⁾	1.33%	NA
Dividend yield	0.00%	NA
Forfeiture rate	0.00%	NA
Weighted-average fair value (Black-Scholes value)	\$0.38	NA

1. The Company estimates the expected stock option life (estimated period of time outstanding) of options granted to be the length of time before the stock option's expiry until such time that the Company can base its estimate on historical information on the Company's options.
2. The Company based its expected volatility on its own trading history.
3. The risk-free rate is based on the yield of a Government of Canada marketable bond in effect at the time of grant with an expiry commensurate with the expected life of the award.

The fair value is calculated using the Black-Scholes option valuation model. As at December 31, 2014 there was \$nil (December 31, 2013 – \$nil) of total unrecognized share-based compensation costs related to unvested stock option awards granted under the Option Plan.

Northern Graphite Corporation
(an Exploration Stage Company)
Notes to Financial Statements
For the years ended December 31, 2014 and 2013

Contributed surplus

	\$
Balance, December 31, 2012	2,605,984
Share-based compensation	(69)
Balance, December 31, 2013	2,605,915
Fair value of options exercised	(22,501)
Share-based compensation	75,490
Balance, December 31, 2014	2,658,904

Contributed surplus as at December 31, 2014 and December 31, 2013 consists of a share-based payment reserve related to stock options issued under the Option Plan. The Company recorded \$75,490 (December 31, 2013 – (\$69)) as share-based compensation expense for the year ended December 31, 2014. In the year ended December 31, 2013, the Company expensed share-based compensation for stock options granted to key management personnel of \$23,184. This expense was offset by a \$23,253 adjustment to the estimate for forfeitures of unvested options.

8. Income taxes

The following table reconciles the expected income tax expense at the Canadian statutory income tax rates to the amounts recognized in the statement of comprehensive income for the years ended December 31, 2014 and 2013:

	Dec 31, 2014	Dec 31, 2013
Income tax (loss) before income taxes	\$ (990,734)	\$ (1,493,512)
Canadian statutory income tax rate	26.50%	26.50%
Expected income tax expense (recovery)	(262,545)	(395,781)
Differences resulting from:		
Non-deductible items	20,082	958
Change in estimates	(381,164)	432,188
Expired losses	389,482	-
Change in tax rates	-	(212,564)
Increase in deferred tax assets not recognized	234,145	175,199
Provision for income taxes	\$ -	\$ -

Deferred taxes reflect the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax values. Deferred tax assets at December 31, 2014 and 2013 are comprised of the following:

	Dec 31, 2014	Dec 31, 2013
Deferred tax assets		
Non-capital loss carry forwards	\$ 4,412,929	\$ 4,337,661
SR&ED pool	-	-
Exploration and evaluation assets	(265,230)	(294,919)
Share issuance costs	50,576	92,849
Investment tax credits	270,098	116,946
Property and equipment	75,004	56,694
Total deferred tax asset not recognized	\$ 4,543,376	\$ 4,309,231

The Company has non-capital loss carry forwards of approximately \$16,652,562 (2013 – \$16,368,532), which may be carried forward to apply against future year income tax for Canadian income tax purposes, subject to the final determination by taxation authorities, expiring in the following years:

2033		2,617,186
2034		1,002,799
Total	\$	16,652,562

9. Capital disclosures

Capital of the Company consists of the equity attributable to the common shareholders, comprised of share capital and deficit. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern so that it can continue to explore and develop its mineral resource property for the benefit of its shareholders. The Company manages its capital structure and makes adjustments based on the funds available to the Company in light of changes in economic conditions. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain the future development of the Company. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that consider various factors, including successful capital deployment and general industry conditions. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

As the Company is an exploration stage company, it has no revenues and its principal source of capital is from the issue of common shares. In order to achieve its objectives, the Company will spend its existing working capital and raise additional funds as required.

The Company is not subject to externally imposed capital requirements and there were no changes to the Company's approach to capital management during the year.

10. Loss per share

	Year ended December 31, 2014	Year ended December 31, 2013
Loss and comprehensive loss for period	(990,734)	(1,493,512)
Weighted average number of shares – basic and fully diluted	49,152,651	49,091,692
Loss and comprehensive loss per share	(\$0.02)	(\$0.03)

11. Financial instruments and risk management

Fair value

Certain of the Company's accounting policies and disclosures require the determination of fair value. Fair value represents the amount at which a financial instrument could be exchanged between willing parties, based on current markets for instruments with the same risk, principal and remaining maturity. Fair value estimates are based on quoted market values and other valuation methods. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

In establishing fair value, the Company uses a fair value hierarchy based on levels as defined below:

- Level 1: defined as observable inputs such as quoted prices in active markets.
- Level 2: defined as inputs other than quoted prices in active markets that are either directly or indirectly observable.
- Level 3: defined as inputs that are based on little or no observable market data and, therefore, requiring entities to develop their own assumptions.

Northern Graphite Corporation
(an Exploration Stage Company)
Notes to Financial Statements
For the years ended December 31, 2014 and 2013

At December 31, 2014, the levels in the fair value hierarchy into which the Company's financial assets and liabilities are measured and recognized on the Statement of Financial Position at fair value on a recurring basis are categorized as follows:

	Category	At December 31, 2014 \$	At December 31, 2013 \$
Cash and cash equivalents	Level 1	1,800,901	3,358,399

At December 31, 2014, there were no financial assets and liabilities measured and recognized at fair value on a non-recurring basis. The Company's policy for determining when a transfer occurs between levels in the fair value hierarchy is to assess the impact at the date of the event or the change in circumstances that could result in a transfer. There were no transfers between Level 1, Level 2 and Level 3 during the year ended December 31, 2014.

At December 31, 2014, there were no financial assets or liabilities measured and recognized on the Consolidated Statement of Financial Position at fair value that would be categorized as Level 2 or Level 3 in the fair value hierarchy (December 31, 2014 - \$Nil; December 31, 2013 - \$Nil; January 1, 2013 - \$Nil).

The carrying value of cash and cash equivalents, deposits and accounts payable and accrued liabilities approximates fair value due to the short-term nature of these financial instruments. The carrying value of the reclamation deposit approximates its fair value as it bears a market rate of interest.

During the year ended December 31, 2014, the Company had written off trade accounts payable of \$80,665. These payables were written off as they had passed the time period noted in the statute of limitations regarding the collection of debt.

Currency risk

As the majority of the Company's expenditures are in Canadian dollars, the Company limits its exposure to currency risk by maintaining its cash and cash equivalents in Canadian dollars. The Company carries a portion of its accounts payable and accrued liabilities in US dollars, and is subject to currency risk on these balances. However, the Company considers this risk to be minimal.

Credit risk

Credit risk is the risk of a loss if a counterparty to a financial instrument fails to meet its contractual obligations. The Company limits its exposure to credit risk by holding its cash in deposits with high credit quality Canadian financial institutions, and considers this risk to be minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company manages its liquidity risk through the management of its capital structure as outlined in note 9. Further discussion on liquidity and management's plans are outlined in note 2. All of the Company's trade payables are due within 1 year.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to interest rate risk due to the short-term nature of its financial instruments.

12. Related parties

Key Management Compensation

In the year ended December 31, 2014, the Company expensed management fees to companies owned and controlled by key management personnel of \$nil (2013 - \$157,500) and expensed salary to key management personnel of \$430,000 (2013 - \$430,000). In the year ended December 31, 2014 and 2013, the Company provided employee benefits totaling \$18,480 (2013 - \$23,323) to key management personnel. In the year ended December 31, 2014, the Company expensed share-based compensation for stock options granted to key management personnel of \$nil (2013 - \$23,184). In 2013, this expense was offset by a \$23,253 adjustment to the estimate for forfeitures of unvested options. As a result, the Company recorded a credit balance of \$69 in share-based compensation expense for the year ended December 31, 2013. In the year ended December 31, 2014, the Company provided bonus payments of \$nil (2013 - \$48,000) to key personnel.

Other Related Party Transactions

During the year ended December 31, 2014, the Company expensed office rental payments of \$23,700 (2013 - \$22,680) to a public

Northern Graphite Corporation

(an Exploration Stage Company)

Notes to Financial Statements

For the years ended December 31, 2014 and 2013

company whose CEO and a Director is also a Director of Northern.

13. Commitments

Leased mineral claims

In connection with the Bissett Creek Property, the Company is required to make production royalty payments of \$20 per ton of graphite carbon concentrate produced to the previous owners and a 2.5% net smelter return payable on any other minerals derived and sold from the Bissett Creek Property. An advance royalty of \$27,000 per annum is payable in semi-annual installments and has been paid for the years ended December 31, 2014 and 2013. The advance will be credited against any future production royalty payments.

Contractual obligations

As at December 31, 2014, the Company had no contractual obligations (commitments as at December 31, 2013 – \$Nil) which related to costs associated with work at the Bissett Creek Property.

14. Provisions

In 2004, a Mine Closure Plan (“MCP”) was filed with, and accepted by, the Ministry of Northern Development and Mines (“MNDM”). The Company filed a revised MCP for a new development scenario in 2012 and in August, 2013, the MNDM accepted the revised MCP. Upon this acceptance, the Company added an additional \$479,610 to the reclamation deposit which now totals \$809,569 (2013 - \$803,135), including accrued interest. These amounts have been paid to the Minister of Finance for the Province of Ontario, and have been accounted for as a long term deposit. As per the revised MCP, the overall required Financial Assurance has increased to \$2,329,008. In addition to the \$479,610 deposited in August of 2013, \$800,000 will be deposited prior to placing any footings in the ground for construction of structures such as buildings and dams and \$729,088 will be deposited prior to the commencement of commercial production. The provision for reclamation and close down represent the estimated amount that would be required to restore the Bissett Creek Property to its original environmental state after construction and operations. The Company has a provision of \$324,661 on its balance sheet (2013 - \$322,081) which represents the estimated current cost of reclamation. In 2014, the Company has not undertaken any work on the property that would increase the provision. The provision has increased by \$2,580 as a consideration for inflation. The money pledged for the reclamation deposit will be returned to the Company once the MNDM is satisfied that the obligations contained in the MCP have been performed by the Company. Should the Company not perform its obligations contained in the MCP, the MNDM will restore the Bissett Creek Property site to its original environmental state using the funds from the reclamation deposit.
