liability accounts, as recorded when material to the financial statements, are entirely the result of temporary differences. Temporary differences represent differences in the recognition of assets and liabilities for tax and financial reporting purposes, primarily accumulated depreciation and amortization.

As of December 31, 2014 and 2013, the deferred tax assets related to the Company's net operating loss carryforward are fully reserved. Due to the provisions of Internal

Revenue Code Section 338, the Company may have no net operating loss carryforwards available to offset financial statement or tax return taxable income in future periods as a result of a change in control involving 50 percentage points or more of the issues and outstanding securities of the Company.

Dividends

The Company has not yet adopted a policy regarding the payment of dividends.

Earnings (Loss) per Share

Basic earnings (loss) per share is computed by dividing the net income (loss) available to common shareholders by the weighted-average number of common shares outstanding during the respective period presented in our accompanying financial statements.

Fully diluted earnings (loss) per share is computed similar to basic income (loss) per share except that the denominator is increased to include the number of common stock equivalents (primarily outstanding options and warrants).

Common stock equivalents represent the dilutive effect of the assumed exercise of outstanding stock options and warrants, using the treasury stock method, at either

the beginning of the respective period presented or the date of issuance, whichever is later, and only if the common stock equivalents are considered dilutive based upon the Company's net income (loss) position at the calculation date.

As of June 30, 2015 the Company's has no issued and outstanding warrants or options.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The only significant estimate was the useful life of fixed assets.

Goodwill and Acquired Technologies

The company recorded goodwill and technology valued at \$32,364 when it acquired Neekson, its wholly owned subsidiary. The Company wrote off this amount during 2014 when it returned Neekson to its prior shareholders in exchange for the return of 2,000,000 shares of common stock.

Recent Accounting Pronouncements

The Company has evaluated recent pronouncements through Accounting Standards Updates "ASU" 2015-14 and believes that none of them will have a material impact on the Company's financial position, results of operations or cash flows. The Company has adopted 2014-10 "Development State Enterprises" and eliminated all inception to date reporting in these financial statements.

2. Property And Equipment

Novagant, Inc.
(formerly Petrogulf, Inc.)

Notes to Financial Statements
For the Nine Months Ended

September 30, 2015

Property and equipment are stated at cost. Depreciation expense for the periods ended June 30, 2015 and 2014 amounted to \$536 and \$534, respectively. Gains from losses on sales and disposals are included in the statements of operations. Maintenance and repairs are charged to expense as incurred.

4. Income Taxes

The Company provides for income taxes under Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes. SFAS No. 109 requires the use of an asset and liability approach in accounting for income taxes. Deferred tax assets and liabilities are recorded based on the differences between the financial statement and tax bases of assets and liabilities and the tax rates in effect when these differences are expected to reverse. SFAS No. 109 requires the reduction of deferred tax assets by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized.

The Company has approximately \$13,135,000 in net operating loss carryovers as of December 31, 2014, which begin to expire in 2026. Due to changes in the majority ownership of the Company, the benefit of net operating loss carry forwards for federal income tax reporting purposes are significantly limited.

At December 31, 2014, the Company has established a valuation allowance equal to its deferred tax assets, consisting primarily of loss carryforwards, as the use of these benefits is limited and there is no assurance that the Company will generate future taxable income to utilize these potential assets.

5. Stockholders' Equity

Preferred Stock

Novagant, Inc.
(formerly Petrogulf, Inc.)

Notes to Financial Statements
For the Nine Months Ended

September 30, 2015

The Company has 20,000,000 shares of Preferred Stock authorized at \$0.01 par value, and 200,000 shares were outstanding at June 30, 2015 and December 31, 2014. This stock may be voting or have other rights and preferences as determined from time to time by the Board of Directors.

Common Stock

The Company has 400,000,000 authorized shares of Common Stock with a par value of \$0.001 with 75,871,562 shares issued and outstanding.

During 2014, the Company received 2,000,000 shares of common stock in return for transferring its subsidiary Neeksom, Inc back to its original shareholders..

During the year ended December 31, 2013, the Company issued 17,422,000 share of common stock for services with a value of \$31,955, 18,600,000 common shares for notes payable with a value of \$5,033, 3,0000,000 for officer compensation with a value of \$5,502, and 25,000,0000 common shares with a value of \$45,854 for settlement of a prior debt. No shares were issued during 2015.

6. Going Concern

The accompanying financial statements have been prepared assuming the Company will continue as a going concern, which contemplates the realization of assets and the liquidation of liabilities in the normal course of business. However, the Company has incurred significant losses and has an accumulated deficit of \$32,500,000 as of December 31, 2014.

The Company is dependent on obtaining adequate capital to fund operating losses until it becomes profitable. If the Company is unable to obtain the necessary funding it could cease operations as a new enterprise.

Management anticipates that the Company will be dependent, for the near future, on additional investment capital to fund operating expenses. The Company intends to position itself so that it may be able to raise additional funds through the capital markets. In light of management's efforts, there are no assurances that the Company will be successful in this or any of its endeavors or become financially viable and continue as a going concern. This raises substantial doubt about the Company's ability to continue as a going concern. These financial statements do not include any adjustments that might result from this uncertainty.

7. Prior Period Adjustment and Subsequent Event

These financial statements have been adjusted to include the issuance of 200,000 Preferred Shares as part of the original acquisition of Neeksom, Inc. in 2012.
