NOVACAB INTERNATIONAL, INC.
NOTES TO FINANCIAL STATEMENTS

NOTE 1- NATURE OF OPERATIONS

Nature of Operations

The Company was incorporated in the state of Florida in December, 1995. The Company is a holding company organized with a goal of acquiring and managing a diversified portfolio of profitable, growth-oriented companies. The Company merged with Novacab, Inc., on September 27, 2013. The Company has now changed direction in its business and, through the merger, has acquired patented technology. It evolved into a research company in the field of thermal energy and is manufacturing products based on its proprietary technology.

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

These financial statements are presented in United States dollars and have been prepared in accordance with generally accepted accounting principles in the United States of America.

NOTE 3-STOCKHOLDERS' EQUITY

The company's capitalization is 5,000,000,000 common shares with a par value of \$.001 per share. And 10,000,000 shares preferred stock with a par value of \$.001 per share.

NOTE 4 – LONG-TERM DEBT

As of June 30, 2013 the Company had \$229,483 of long-term debt for notes payable to private lenders.

As a result of the merger with Novacab, Inc., the Company has additional accounts payable of \$712,734 as well as a shareholder loan in the amount of \$513,515.

ITEM 6. DESCRIBE THE ISSUER'S BUSINESS, PRODUCTS AND SERVICES.

A. DESCRIPTION OF ISSUER'S BUSINESS OPERATIONS.

The Company merged with Novacab, Inc., on September 27, 2013, and, thus, acquired all of Novacab's technology and other assets. Novacab's technologies are based on patent protected research developed since 1996 and are applicable in two main sectors: vehicles and buildings. The technology provides for thermal storage of electricity that is created from the flow of heat. In sum, these systems convert heat into electricity which can be stored for future use.

The issuer relinquished its rights to gas interests in Venango County, Pennsylvania and has changed direction in its business model and consequently the Note in the amount of \$44,484 was extinguished.

B. DATE AND STATE OF INCORPORATION

The Company was incorporated in the State of Florida in December, 1995.

C. PRIMARY AND SECONDARY SIC CODES

The Company's primary (and only) SIC code is 3600.

D. THE COMPANY'S FISCAL YEAR END DATE

The Company's fiscal year ends on December 31.

E. PRINCIPAL PRODUCTS OR SERVICES AND THEIR MARKETS

Novacab International, Inc., owns and operates NOVACAB and NOVAENERGY. Novacab's technologies are based on patent protected research developed since 1996 and are applicable in two main sectors.

Novacab in Vehicles (Novacab)

The technology provides for thermal storage that is charged directly by coolant flow rate; simply put, electricity is created from the flow of heat in the cooling system of vehicles. This electricity is stored in a modular unit in the vehicle and will supply air conditioning and heating needs for 6 to 10 consecutive hours without running the engine. It is a natural solution for long distance trucks with sleeper cabs.

This patent and technology targets 500,000 Class 8 trucks with sleeper cabs out of a fleet of 2,400,000 Class 8 trucks in the USA and Canada. This technology also applies to 240,000 new vehicles of Class 8 with sleeper cabins built every year in North America.

This technology allows for a reduction in yearly fuel consumption between 6,000 to 8,000 liters per truck.

There are 2 other major advantages. There is a reduction of co2 and other gas emissions. This technology can prolong the engine's useful life between 200,000 km to 300,000 km.

Testing and installations have been made with outstanding results which were monitored and validated by independent sources such as Transport Canada, Hydro-Quebec, etc. Transport Canada's tests showed that the Novacab integrated climate control system has significant advantages compared to present trucking practices.

Currently 22 states in the USA and half of the Canadian provinces have recently passed legislation forbidding idling truck engines when stopped anywhere especially at truck stops.

Thermal Energy Storage in buildings (Novaenergy)

This system for building applications gives great advantages to critical operation such as datacenters, industrial, pharmaceutical, food, hospital and generally every building in which heat is produced from processing electronic or industrial material.

The Thermal Energy Storage unit operates from temperatures ranging from -40 degrees F to 195 degrees F and is built as a sealed integrated heat exchanger without any moving parts. The system is easy to install in existing HVAC Systems, data centers, industrial process, refrigerated warehouses and other heating and cooling installations. The end result is a reduction in energy consumption as well as chemical back up capacity. The electrical energy is stored, as in the Novacab system, for regular or emergency use.

Among the companies that are using it or are conducting pilot projects are IBM, Google, Microsoft Corporation, Siemens, McDonald Corporation, HNMC, NSJH, L'Oreal, Molson-Coors, CBC, Bedcolab, BRP, KW1, Soteno, Intercef, Cambit, Cascade Energies, BAE Systems, Lockheed Martin, TM4, Novabus, Lyonnaise-des-eaux, Mia-Electric, Enbala and many others. Installation of thermal units at Siemens allowed for the consumption transfer of power in off-peak periods; the accumulation of energy during the night converts into free energy during the day.
