PERMANENT TECHNOLOGIES, INC.

Quarterly Report

For the Quarter Ended March 31, 2016

CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING STATEMENTS

INCLUDED IN THIS QUARTERLY FILING ARE FORWARD-LOOKING STATEMENTS. THESE FORWARD-LOOKING STATEMENTS ARE IDENTIFIED BY THEIR USE OF TERMS AND PHRASES SUCH AS "MAY," "EXPECT," "ESTIMATE," "PROJECT," "PLAN." "BELIEVE," "INTEND," "ACHIEVABLE," "ANTICIPATE," "CONTINUE," "POTENTIAL," "SHOULD," "COULD," AND SIMILAR TERMS AND PHRASES. ALL STATEMENTS, OTHER THAN STATEMENTS OF HISTORICAL FACTS, INCLUDED HEREIN CONCERNING, AMONG OTHER THINGS, BUSINESS STRATEGY AND OTHER PLANS AND OBJECTIVES FOR FUTURE OPERATIONS, ARE FORWARD-LOOKING STATEMENTS. ALTHOUGH WE BELIEVE THAT THE EXPECTATIONS REFLECTED IN THESE FORWARD-LOOKING STATEMENTS ARE REASONABLE, THEY DO INVOLVE CERTAIN ASSUMPTIONS, RISKS AND UNCERTAINTIES. OUR ACTUAL RESULTS COULD DIFFER MATERIALLY FROM THOSE ANTICIPATED IN THESE FORWARD-LOOKING STATEMENTS.

1) Name of the issuer and its predecessors (if any)

In answering this item, please also provide any names used by predecessor entities in the past five years and the dates of the name changes.

Permanent Technologies, Inc. (the "Company" or "Permanent Technologies")

2) Address of the issuer's principal executive offices

Company Headquarters 100 Marina Drive, Suite 316 Quincy, MA 02171

Phone: 617-481-9531

Email: fbarry@tinelok.com Website(s): www.tinelok.com

3) Security Information

Trading Symbol: PERT

Exact title and class of securities outstanding: Common Stock, par value \$.001 per share

CUSIP: 714205101

Par or Stated Value: \$0.001

Total shares authorized: <u>500,000,000</u> as of: May 16, 2016

Total shares outstanding: <u>269,643,504</u> as of: May 16, 2016

Transfer Agent

Name: Securities Transfer Corp. Address 1: 2591 Dallas Pkwy

Address 2: Suite 102

Address 3: Frisco, TX 75034

Phone: 469-633-0101

Is the Transfer Agent registered under the Exchange Act?* Yes. List any restrictions on the transfer of security:

Rule 144 is currently unavailable for the resale of our securities because of the limitations set forth in Rule 144 (i). Rule 144 will remain unavailable until at least one year has elapsed from the time we file "Form 10 information" (as such term is defined in Rule 144 (i)(3)) with the Securities and Exchange Commission.)

Describe any trading suspension orders issued by the SEC in the past 12 months.

None

List any stock split, stock dividend, recapitalization, merger, acquisition, spin-off, or reorganization either currently anticipated or that occurred within the past 12 months:

None

4) Issuance History

List below any events, in chronological order, that resulted in changes in total shares outstanding by the issuer in the past two fiscal years and any interim period. The list shall include all offerings of equity securities, including debt convertible into equity securities, whether private or public, and all shares or any other securities or options to acquire such securities issued for services, describing (1) the securities, (2) the persons or entities to whom such securities were issued and (3) the services provided by such persons or entities.

On February 11, 2014, the Company and an investor entered in to a stock purchase agreement, whereby the Company agreed to sell 4,000,000 shares of the Company's Common Stock to the investor at the purchase price of \$.0125 per share for an aggregate proceed of \$50,000.

On August 18, 2014 the Company entered into a Stock Purchase Agreement with an investor, pursuant to which the Company sold 375,000 shares of Common Stock to the investor at a price of \$.04 per share, for an aggregate proceeds of \$15,000.

On August 18, 2014 the Company entered into a Stock Purchase Agreement with an investor, pursuant to which the Company sold 375,000 shares of Common Stock to the investor at a price of \$.04 per share, for an aggregate proceeds of \$15,000.

On January 6, 2015, the Company entered into a Stock Purchase Agreement with an investor, pursuant to which the Company sold 2,000,000 shares of Common Stock to the investor at a price of \$.05 per share, for an aggregate proceeds of \$100,000.

On March 24, 2016, the Company issued 375,000 shares of its Common Stock to a service provider in exchange for accounting services rendered to the Company.

The above issuances of the shares of Common Stock were exempt from registration under the Securities Act of 1933, as amended pursuant to Section 4(2) of the Securities Act and/or Regulation D promulgated thereunder.

The stock certificates representing the above issuances of shares bear a standard restrictive legend pursuant to the Securities Act of 1933, as amended.

5) Financial Statements

The following financial statements have been posted through the OTC Disclosure and News Service under the report name "Quarterly Report – Financial Report" for the quarter ended March 31, 2016 and are incorporated herein by reference:

- a) Balance Sheet as of March 31, 2016
- b) Income Statement for the quarter ended March 31, 2016
- c) Statement of Cash Flow for the quarter ended March 31, 2016
- d) Notes to Financial Statement for the quarter ended March 31, 2016

6) Describe the Issuer's Business, Products and Services

Describe the issuer's business so a potential investor can clearly understand the company. In answering this item, please include the following:

A. a description of the issuer's business operations:

Permanent Technologies, Inc. ("Permanent Technologies," the "Company," "we" or "us") is a publicly traded company, with domestic and international patents for what we believe to be a unique and innovative fastener system called TineLok. This is a vibration proof fastening system that we believe has the potential to become the industry standard for quality and integrity. Our current understanding is that the industry addresses the vibration with vibration "resistant" techniques such as certain adhesives and friction components between internal and external threads. The TineLok system consists of three or more channels parallel to the center axis of the externally threaded bolt and an internally threaded nut with three or more tines positioned above

the threads of the nut. The tines are positioned to allow the assembler positive locking at a variety of torques to meet the manufacturers design requirements. There are many benefits to this technology including, but not limited to:

- lower warranty costs due to superior reliability;
- greatly improve safety factors;
- prevent joint failure in hard to service locations;
- self-locking mechanism easily viewed during routine maintenance or inspection;
- easily installed, tightened or removed; and
- discourage tampering with warranty parts or theft of valuable components.

On March 26, 2014, the Company recruited Frederick Barry II, as its President and Executive Board Member. Mr. Barry has thirty-years of experience in industrial fastener manufacturing and sales. Mr. Barry's directive is to further develop the Company's manufacturing, design and engineering capabilities and to identify new sales opportunities for the TineLokTM® Vibration Proof Fastening System. Mr. Barry spent most of his career helping build smaller companies in the nut and bolt industries into viable, sustainable successful companies. He brings crucial skills the Company has been seeking to help TineLokTM® gain wide acceptance across various market segments. Prior to joining the Company, Mr. Barry spent twenty-six years with Standard Lock Washer & Manufacturing Company. He is also the third generation of his family with a career in the fastener industry. Collectively he and his family have over ninety years of experience in the business.

The Company has tested its TineLok fastener system with the U.S. Navy on its LCAC hovercraft for overall integrity and torque. These machines endure extreme vibration, particularly in the area around the rubber skirts. After 18 months of testing the stainless steel version of the TineLok fastener has been specified for replacement with a new skirt design on the refurbishment program for the 80 LCAC Hovercrafts. Initially, the first tests were administered with a Grade 8 stainless steel product. The Company has delivered its Tinelok product into the US Navy in a lightweight aluminum product for the LCAC Hovercraft program. The Company is completing a required 25 hour testing period which it believes will result in an initial order.

On September 10, 2014, the Company engaged as consultants two retired US Marine Colonels with thirty years of military experience, to help navigate the US Navy contract and other applications in the Defense sector. With the help of Colonels Richard Coleman and Robert Leary Sr., the Company believes that it is now poised to conduct business in all of the Armed forces with Commercial and Government Entity (CAGE) Code and System for Award Management (SAM) numbers. There are now a number of applications that have been identified where we believe Tinelok's product would be helpful in alleviating vibration issues in the military sector. The Company is currently bidding on a number of these applications within this sector, however there can be no assurance of any such bids being accepted.

On October 9, 2014, the Company entered into a contract with Walker SCM and Global Packaging Solutions, both leading Certified Minority Business Enterprises (MBE) with extensive experience and solutions for procurement, transportation, compliance, logistics and technology.

Tinelok will gain exposure to their existing base of Fortune 100 customers in Automotive, Technology, Consumer Products, Health Care and Public Transportation.

Additionally, the Company negotiated a contract with Broadbrand International Limited on November 18, 2014 for product sourcing and licensing of Tinelok's product in Europe, China and Hong Kong. Broadbrand International Limited currently licenses DuPont's brand in similar territories. The Company believes that this partnership with Broadbrand International Limited strengthens Permanent's sales position and gives us a knowledgeable outsourced sales staff.

The Company anticipates promoting this product globally and believes that it has the potential to become a new industry standard in this industry space. The Company believes that it has taken reasonable and necessary steps in order to assure patent protection of its technologies internationally and as such, believes that there may be reduced competition in the locking fastener arena.

On September 10, 2015, the Company entered into a non-binding Letter of Intent (the "LOI") with the principal shareholders of Pride Electronics, Inc., a Delaware based corporation ("Pride"). Pursuant to the LOI, the Company and Pride have agreed to negotiate and enter into definitive agreements pursuant to which the Company will acquire all of the issued and outstanding shares of Pride in exchange for the issuance of shares of the Company's Common Stock and cash consideration. After the consummation of the transactions contemplated by the LOI, Pride shall be a wholly owned subsidiary of the Company. The specific terms of the transactions contemplated by the LOI are in the process of being negotiated and there may be vesting and other conditions attached to the stock to be issued by the Company pursuant to the LOI. There can be no guarantee that such transactions will ever be consummated. Additionally the transactions contemplated by the LOI are dependent solely on the Company obtaining the necessary financing. There can be no assurance or guarantee that the Company will be able to raise the necessary capital or that even if it can, that it will be available on terms that are acceptable to the Company. If the Company fails to raise sufficient capital, it will not be able to consummate the transactions contemplated by the LOI.

On February 3, 2016, the Company entered into a non-binding Letter of Intent (the "Dixon LOI") with the principal shareholders of Dixon Tool & Manufacturing, Inc., a New York corporation ("Dixon"). Pursuant to the Dixon LOI, the Company and Dixon have agreed to negotiate and enter into definitive agreements pursuant to which the Company will acquire all of the issued and outstanding shares of Dixon Tool in exchange for \$3,000,000 total with part of the purchase price to be paid at closing and the remainder of the purchase price to be paid in the form of a promissory note issued at the closing with a 5 year term accruing interest at an annual rate of 5 %, which will be due and payable in equal monthly installments during the term. The specific terms of the transactions contemplated by the Dixon LOI are in the process of being negotiated and may differ from those stated herein.

The Company believes that Dixon is a profitable entity that can produce our vibration proof product in house and has engineering and prototyping capabilities. We believe that prototyping is an integral manufacturing process that we expect can enable the Company to control client

inquiries, from engineering through the final approved production, controlling the entire process from new application to sale.

Although the Company plans to consummate its planned acquisition of Dixon, there can be no guarantee that the acquisition and the transactions contemplated by the Dixon LOI will ever be consummated. Additionally the transactions contemplated by the Dixon LOI are dependent solely on the Company obtaining the necessary financing. There can be no assurance or guarantee that the Company will be able to raise the necessary capital or that even if it can, that it will be available on terms that are acceptable to the Company. If the Company fails to raise sufficient capital, it will not be able to consummate the transactions contemplated by the Dixon LOI.

The transactions contemplated by the LOI and the Dixon LOI (the "Acquisitions") are dependent upon obtaining financing, of which there can be no assurance. The Company believes that the Acquisitions, if completed, can give the Company a reach into multiple industries including automotive, aerospace, construction, plumbing & valves with our fastener components. Additionally, both Dixon and Pride are ISO 9001:2008 certified and have the ability to access potential buyers in the U.S. Department of Defense, where we believe there to be many potential sales opportunities. If the Acquisitions are completed, the Company plans to avail itself to such sales opportunities.

Additionally, the TinelokTM \otimes fastener assembly is currently beginning testing stages with a significant railway company in the US, for use in frog switches and track crossovers.

On January 17, 2016, the Company established a new wholly owned subsidiary Permanent Consulting Solutions ("PCS"). This division was established to assist in the sale of established manufacturing and distribution companies. PCS, has two such engagements.

B. Date and State (or Jurisdiction) of Incorporation:

Date of Incorporation: April 14, 1994 State of Incorporation: State of Nevada

C. the issuer's primary and secondary SIC Codes;

3452 bolts, nuts, rivets and washers

D. the issuer's fiscal year end date;

12/31

E. principal products or services, and their markets;

<u>Overview</u>

Permanent Technologies is the inventor and manufacturer of the TineLok Fastening System, a family of fasteners that are designed to hold tight in the most demanding, extreme and harshest

conditions, environments and applications. Our website is www.TineLok.com. The TineLok product is a patented, one-way nut and bolt combination which locks the nut and bolt at predefined positions, eliminating the possibility that vibration may loosen the nut or bolt. The device provides easy removal of the nut from the bolt with most conventional tools. A positive locking device is a device used in conjunction with a fastener in order to positively lock the fastener. This means that the fastener cannot work loose from vibrations.

We believe that the TineLok Fastening System's vibration-proof, self-locking technology is an affordable alternative to traditional fasteners when increased safety, reliability, operating life and reduced maintenance is desired or required. The TineLok product features a number of benefits including that the locking feature is not clamp load dependent. Another benefit of the product is that its vibration proof characteristic may lower warranty costs and also serves to prevent failures in hard to service areas. Additionally, the product can be manufactured in a variety of materials and can be installed with conventional tools.

The Company has been granted patents in the U.S., Canada, EU, Hong Kong, and China for the TineLok technology.

Market

The United States industry for industrial fasteners is very large and according to the American Fastener Journal, is expected to increase at a rate of 4.3% per year to reach a total of \$14.8 billion dollars in units annually in the United States alone by 2017. According to Grand View Research Market Research and Consulting, the global industry for industrial fasteners is expected to top \$104 billion in sales by 2020.

Recent Developments

On May 4, 2015 the Company's board of directors unanimously approved and ratified the appointment of Joseph Mastanduno as the Company's Chief Financial Officer effective as of April 2, 2015.

On September 10, 2015, the Company entered into a non-binding Letter of Intent (the "LOI") with the principal shareholders of Pride Electronics, Inc., a Delaware based corporation ("Pride"). Pursuant to the LOI, the Company and Pride have agreed to negotiate and enter into definitive agreements pursuant to which the Company will acquire all of the issued and outstanding shares of Pride in exchange for the issuance of shares of the Company's Common Stock and cash consideration. After the consummation of the transactions contemplated by the LOI, Pride shall be a wholly owned subsidiary of the Company. The specific terms of the transactions contemplated by the LOI are in the process of being negotiated and there may be vesting and other conditions attached to the stock to be issued by the Company pursuant to the LOI. There can be no guarantee that such transactions will ever be consummated. Additionally the transactions contemplated by the LOI are dependent solely on the Company obtaining the

The Company believes that Dixon is a profitable entity that can produce our vibration proof product in house and has engineering and prototyping capabilities. We believe that prototyping is an integral manufacturing process that we expect can enable the Company to control client inquiries, from engineering through the final approved production, controlling the entire process from new application to sale

Although the Company plans to consummate its planned acquisition of Dixon, there can be no guarantee that the transactions contemplated by the Dixon LOI will ever be consummated. Additionally the transactions contemplated by the Dixon LOI are dependent solely on the Company obtaining the necessary financing. There can be no assurance or guarantee that the Company will be able to raise the necessary capital or that even if it can, that it will be available on terms that are acceptable to the Company. If the Company fails to raise sufficient capital, it will not be able to consummate the transactions contemplated by the Dixon LOI.

The transactions contemplated by the LOI and the Dixon LOI (the "Acquisitions") are dependent upon obtaining financing, which there can be no assurance. The Company believes that the Acquisitions, if completed, can give the Company a reach into multiple industries including automotive, aerospace, construction, plumbing & valves with our fastener components. Additionally, both Dixon and Pride are ISO 9001:2008 certified and have the ability to access potential buyers in the U.S. Department of Defense, where we believe there to be many potential sales opportunities. If the Acquisitions are completed, the Company plans to avail itself to such sales opportunities.

Also, the Company has re-designed its website for informational and web sales purposes, which can be viewed at www.tinelok.com.

On January 17, 2016, the Company established a new wholly owned subsidiary Permanent Consulting Solutions ("PCS"). This division was established to assist in the sale of established manufacturing and distribution companies. PCS, has two such engagements.

7) Describe the Issuer's Facilities

The Company's current office is at 100 Marina Drive, Suite 316, Quincy, MA 02171.

8) Officers, Directors, and Control Persons

The goal of this section is to provide an investor with a clear understanding of the identity of all the persons or entities that are involved in managing, controlling or advising the operations, business development and disclosure of the issuer, as well as the identity of any significant shareholders.

A. <u>Names of Officers, Directors, and Control Persons</u>. In responding to this item, please provide the names of each of the issuer's executive officers, directors, general partners and control persons (control persons are beneficial owners of more than five percent (5%) of any class of the issuer's equity securities), as of the date of this information statement.

As of May 16, 2016
