## **5) Financial Statements**

**Twelve Month Financial Statement for December 31, 2015 posted on August 7, 2016.**

## **6) Describe the Issuer's Business, Products and Services**

A. a description of the issuer's business

operations; PM & E, Inc has a wholly owned subsidiary.

SUNCETIX, INC. that has been founded as a Canadian corporation to engage in the design, development, and implementation of solar power technologies (Modular Photovoltaic System, or MPVS), for which the Company owns proprietary technology. Once commercialized, the technology will be able to deliver solar derived energy at a cost below

that of today's prevailing utility prices SUNCETIX aims to do this by integrating the most modern advances in tracking and concentration of solar rays, and supporting these functionalities with an inventive cooling system. Through simultaneously employing all 3 of these innovations in a novel and extremely cost effective manner, the SUNCETIX system has the potential to produce power at prices below the \$1/Watt (\$USD) benchmark. This is considerably more economical than producing energy using flat panel technology – the process that is currently dominating most of the Photovoltaic (PV) space.

Implementing the company's technologies and methodologies reduce costs to a level below \$1/Watt translates to a price of less than \$0.02/kWh (\$USD). Thus, SUNCETIX technology is capable of supplying energy cheaper than is often available via the modern grid. Achieving this state of grid parity is the requisite condition to bring solar power into the mainstream

B. Date and State (or Jurisdiction) of Incorporation:

PM & E, INC. was originally incorporated under the laws of the State of Colorado on August 17, 2010,

C. the issuer's primary and secondary SIC

Codes; n/a

D. the issuer's fiscal year end

date; December 31

E. principal products or services, and their markets;

PM & E, INC., through its operating division Suncetix Inc. is engaged in the design, development, and implementation of solar power technologies (Modular Photovoltaic System, or MPVS), for which the Company owns proprietary technology.

A. Principal products or services, and their markets: SUNCETIX, INC. has developed and patented a Modular Photovoltaic Solar Power system (MPVS) that utilizes specifically developed, unique technologies that severely increase system efficiency and stabilize its output characteristics in daily and seasonal erratic environment that allows the MPVS to bring peak capacity to the market at \$0.9/Watt

B. Distribution methods of the products or services: Electricity cost of utility companies is defined by system cost and electricity it provides during its lifetime. The system's high efficiency, even higher productivity, prolonged lifetime, low degradation rates and relatively low cost, enable MPVS to provide electricity with present grid utility competitive cost and lower, thus lowering business and consumer's electricity costs. SUNCETIX, INC. has developed and patented a Modular Photovoltaic Solar Power system (MPVS) that utilizes specifically developed, unique technologies that severely increase system efficiency and stabilize its output characteristics in daily and seasonal erratic environment that allows the MPVS to bring peak capacity to the market at \$0.9/Watt.

The innovative engineering ideas integrated in systems reliable yet simple and inexpensive architecture, such as solar irradiation concentration, movement tracking and build-in cooling mechanism permit MPVS to achieve very impressive results. In particular, system usage of silicon is less than standard flat-plate system by 80%, allowing system to compete with utility energy

tariffs, achieving lower than current grid utility level costs, by providing higher magnitude efficiency with increased for high temperatures output characteristics stability and longer daily operating duration. The combination of the low sunk cost and higher capacity utilization will equate the cost of the energy produced by a Modular Photovoltaic System down to lower than \$0.02/kWh over the unit's useful life.

## **7) Describe the Issuer's Facilities**
