On November 16, 2016, the Company entered into an Agreement and Plan of Merger between the Company and Meso Numismatics Corp. The acquisition of Meso Numismatics Corp. is anticipated to support the Company's overall mission of specializing in ventures related to Central America and the Latin countries of the Caribbean; not limited to tourism. Meso Numismatics Corp. is a small but scalable numismatics operation that the Company can leverage for low cost revenues and product marketing. The Company anticipates that Meso Numismatics Corp. will ultimately come to play key role in the Company's overall business strategy. There are no other reclassifications, mergers, consolidations, purchases or sales of significant amounts of assets at this time, not in the ordinary course of business. As of September 30, the acquisition was completed, by which Pure Hospitality Solutions absorbed all shares of Meso Numismatics in exchange for the issuance of Preferred BB shares. Meso Numismatics became a wholly owned subsidiary of Pure Hospitality Solutions, Inc.

The Issuer has however taken steps toward upgrading the Company from the OTC Pink Sheets to the OTCQB. In doing so, the Company will look to use the Form 10 filing as the method of upgrade. The Company has also created a class of preferred shares to (i) complete a debt-to-equity swap with the largest toxic convertible debtholder, who during June 2016, entered into a settlement agreement and forgave $3,364,217.23 in debt, allowing the Company to immediately extinguish that debt obligation, and, (ii) support the Company's intended capital raise of up to $3,500,000. This raise will ultimately lead to a reorganization of the Company to which the Issuer intends on offering dividends to all eligible common shareholders. As of July 20, 2017, the above debt has been extinguished and the Company remains on-track to upgrade to a more transparent stock exchange.

The Board of Directors was required to increase the number of authorized shares of common stock from (a) 200,000,000 to 500,000,000 during June 2015, (b) 500,000,000 to 1,500,000,000 during July 2015, and (c) 1,500,000,000 to 6,500,000,000 during March 2016, to adhere to the Company's contractual obligation to maintain the required reserve share amount for debtholders. The Company has employed considerable efforts to restructure or eliminate its shorter termed convertible debt as more fully explained herein below. As a result of the Company's restructuring of its debt, the Company increased its authorized capital and has currently placed 3,500,000,000 restricted shares into reserve on the behalf of the new longer termed debt.

The Company continues to manage its liabilities and the relationships with its debtholders, as of September 30, 2017, the Company believes that it is now in compliance with the Company's contractual obligations with its debtholders.

In May 2017, the Company filed with FINRA and the Company declared the Ex- Dividend Date, Record Date and Payment Date, of May 24, 2017, May 26, 2017, June 5, 2017, respectively, for the dividend for the Series BB Preferred Stock.

As of September 30th, 2017, the Company has issued 255,578 BB Preferred Shares.

Item VI Describe the Issuer's Business, Products and Services

A. Issuer's Mission;

On September 4th, 2017, the Company decided to temporarily suspend its booking operations, Oveedia, to focus on continuing to build its numismatic business, Meso Numismatics. In the days leading up to this public announcement, management deemed that the cost to run Oveedia was much higher than any revenues generated by the OTA. The Company did however use its footprint within the Latin American Region to expand Meso Numismatics at a much quicker rate.

Upon launching Meso Numismatics, the venture was originally considered a low-cost marketing tool, to target a specific group of travelers to the Latin American Region, Numismatic Tourists – or Numismatourist. Management discovered that the cost of operating this marketing plan, resulted in unexpected growth potential. Weighed against the high cost of growing the online booking business and the significant amount of capital needed to cover those costs, Meso Numismatics quickly became the Company's core venture.

Since then, Meso Numismatics has continued to generate significant revenues with continual, month-over-month gains.

B. Description of the Issuer's business operations;

Meso Numismatics was launched in September of 2016, as low-cost marketing tool, to target a specific group of travelers to the Latin American Region, Numismatic Tourists – or Numismatourist. This venture quickly became a business on its own, when the Company began testing the numismatic waters and found instant scalability. Pure Hospitality Solutions had stumbled upon a low-cost, high yielding venture, focused on the same Latin American Region, that its OTA had established deep-roots in. The difference was, the cost to run an industry-specific OTA can be quite vast, not including customer acquisition costs. With Meso Numismatics, customers began finding the Company, as vice versa with its OTA. It was at that time that the Company went full-throttle with its numismatic efforts, while slowly tapping the brakes of the OTA. The results proved to be quite astounding. The Company went from spending tens of thousands of dollars monthly in OTA related costs, to making tens of thousands of dollars monthly with Numismatic sales and acquisitions. The proof was in the pudding and the Company decided to evolve its numismatic business.

It was then that the Company's CEO, Mr. Pereira, decided to donate his $50,000 numismatic collection to the Company, in hopes of speeding up growth and value. A relatively small eBay business would quickly evolve into what is today's Meso Numismatics, a Company boasting nearly $100,000 in revenue and almost $200,000 in owned inventory. The Company continues to realize multiple revenue streams, stemming from direct to consumer sales, to partnering with some of the largest numismatic auction companies in the world. What began as a regionally-based numismatics company, has quickly evolved into an industry known, global numismatic competitor.

C. Business Model

The Company's business model is quite simple. Led by an avid numismatist, the goal of the Company is to generate continuous, scalable and growing revenues, while also teaching those interested in learning about numismatics.

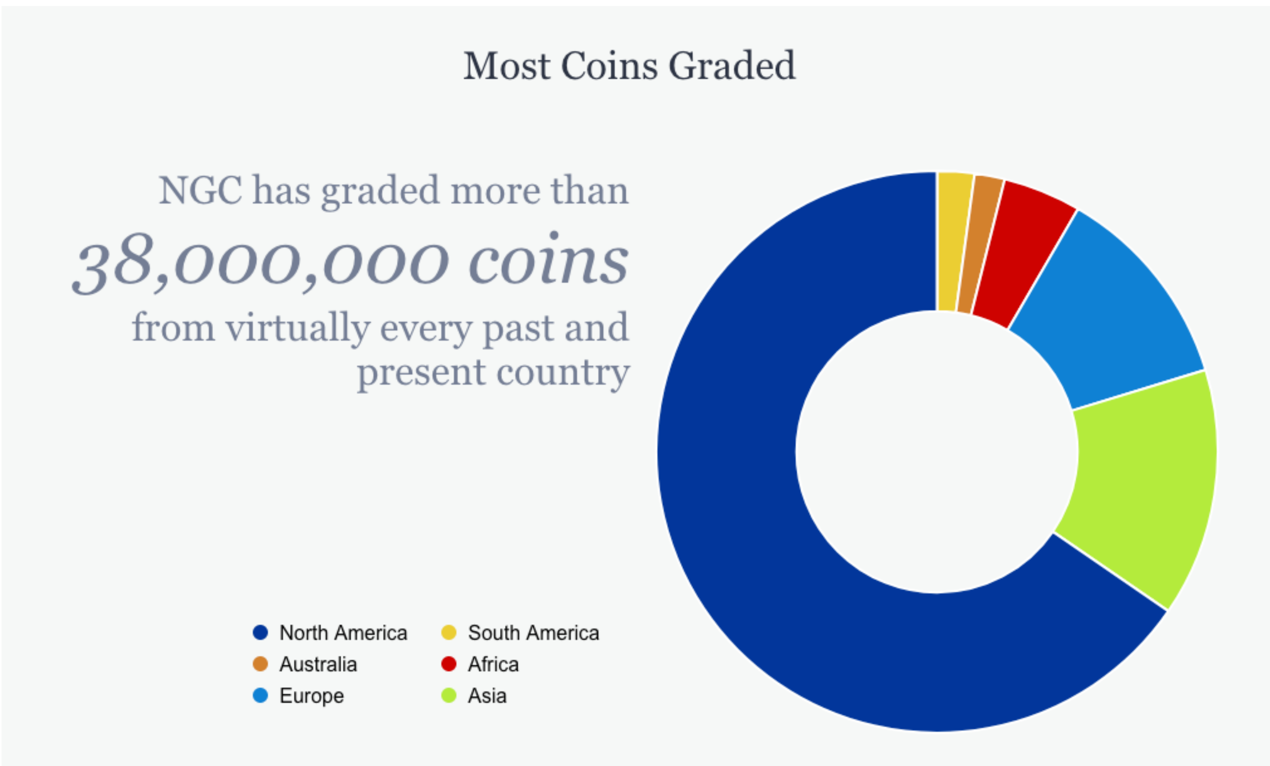
The Company has an on-the-ground advantage, having locations in Costa Rica and Florida. With this advantage, the Company is able to export inventory from Costa Rica, to be sold in the U.S. and around the world. Likewise, the Company also imports items back to Costa Rica, to be sold throughout the local markets.

The procedure that the Company adheres to is fairly vigorous. It begins by selecting the best inventory, be it a rare coin from Latin America, or a banknote with an error from the United States. All inventory is carefully screened, then sent to be graded by the proper grading authority. For all coins, medals and bullion, the Company's inventory is sent to the Numismatic Guaranty Corporation for authentication and grading. For all banknotes, the Company utilizes the Paper Money Guaranty for authentication and grading, both Florida-based companies. Once graded, the inventory is sent to Meso's Florida-based location to then be sent around the world to one of the Company's many customers.

The Company will also be unveiling a new technology specifically for the numismatic industry which management believes will be a total game changer. The App is expected to be released towards the end of the 4th quarter.

Description of Business Opportunity;

As indicated in the following chart, the opportunity for growth within the Latin American Region alone remains massive. If we take into account that Australia has a population of 24 million people; while Latin America has more than 626 million people, the Company has a lot of work to do in educating the region.



If one chooses to speak with collectors of Latin American coins, for instance, the collector will likely say that some of these coins are harder to come by.

The reason is quite simple, the postal systems throughout the various countries. Certain countries throughout the region are known globally to have corrupt postal systems, where many items will not make it out successfully. Having boots on the ground in Costa Rica, and associates throughout all of Latin America, we are able to procure almost any type of item and safely have it graded.

Successful importation and exportation of merchandise between Central America and the United States is crucial for the Company. Being able to acquire inventory at cost then selling the items for healthy profits once graded continues to be the key to growth.

Revenue Opportunity

Meso Numismatics started with only $50,000 in inventory and quickly grew to $ 49,895 in sales as of September 30, 2017, and a current inventory of $114,345. We have clearly demonstrated that the Company is completely self-sustainable in this initial test stage.

Meso Numismatics continues to realize significant month-over-month gains since its inception in September of 2016.

In September of 2016, when Meso Numismatics first started selling items on eBay only, sales were a mere $664.

In November of 2016, sales slipped slightly to $611 due to the Company's adjustment to the business plan – beginning to incorporate some of the largest auction houses in the world, to increase overall sales. December of 2016 realized sales of $965, or a 58% in month-over-month sales.

January 2017 then rolled around with sales topping $1,261, another 30% gain from the previous month. We then entered February 2017, when the Company began expanding from direct sales to consigning with auction-house power players. Sales topped $4,704 in February, bringing another considerable, 273% gain in sales from the previous month.

Following the success that Meso experienced with the various auction houses, the Company decided to send additional, significant amounts of inventory to their respective destinations for sale. With March and April primarily focused on direct sales via eBay, and awaiting upcoming auctions, sales were $2,896 and $1,755, respectively.

In May of 2017, the Company experienced its best month on record, with sales totaling $21,260, from a combination of the different auction houses, as well as continued direct sales. In May alone, the Company experienced an incredible month-over-month gain of 1,111%, proving the absolute scalability that can be achieved by Meso Numismatics.

Sales remained consistent for the following month and quarter, with sales totaling $9,221 for June 2017, $5,344 for July 2017, $9,799 for August 2017 and $8,905 for the close of the quarter, September 2017.

The Company anticipates continued growth and scalability. With additional revenue streams as well as a technology application which will soon be unveiled, the Company is confident in its decision to move forward. The Company has and will continue to reinvest capital in new inventory, further supporting its long-term goal of becoming a recognized, global numismatic brand.

D. Description of the Issuer's History

The Company was originally founded in 1999 as Spectrum Ventures LLC, a private company, registered in Tacoma, WA, for the purpose of developing, marketing and selling voice over IP (at the time a cutting edge emerging technology) products and services.

During 2014, the Board of Directors deemed it in the best interests of the Company to rebuild the Company's business plan, operations, and public appearance as a means to reestablish public confidence.

- 2014: Completes Merger/Acquisition with E Network de Costa Rica;
- 2014: Named Melvin Pereira the new President and CEO.

During the first quarter of 2016, the Company achieved the following:

- Entered into debt settlement agreements to extinguish fourteen (14) of the Company's convertible notes;
- Secured a capital commitment in excess of $600,000.
- Repurchased 12 of 14 outstanding convertible notes. The Company expects the remaining two convertible notes to be repurchased within the second quarter of 2016;
- Eliminated $500,000 of accrued interest.

During the 2nd quarter of 2016, the Company achieved the following:

- Attended its first Expotur as a buyer, securing the interest of nearly 100 hotels, vacation properties and tour operators.
- Repurchased the remaining 2 of 14 outstanding convertible notes targeted within the Debt Repurchase Program; successfully extinguishing all 14 notes;
- Eliminated all of the remaining toxic convertible debt held by the Company's largest noteholder – approximately $3,364,217.23;
- Launched an Affiliate Hotel Program; and,
- Began an initiative to develop and sponsor travel websites and resource pages for Central American tours, hotels and tourism organizations as part of its overall marketing campaign for the Affiliate Hotel Program.

During the 4th quarter of 2016, the Company achieved the following:

- Entered into an Agreement and Plan of Merger with startup venture, Meso Numismatics.
- Merged with startup venture, Meso Numismatics

E. Description of Issuer's Ongoing Development Plans and Assumptions

Our current development plans are described in this disclosure document. Whether we continue developing the project will depend on the following factors:

- Availability and cost of capital;
- Costs and availability of equipment supplies and personnel necessary to conduct operations;
- Success or failure of activities in similar areas;
- Changes in the estimates of the costs to complete our projects; our ability to attract other industry partners to acquire a portion of the working interests, to reduce costs and exposure to risks;
- Our operations may adversely impact the business which could result in material liabilities to us; and,
- Obtaining governmental permits and approvals for operations, technology use and offerings, and/or operations which can be a costly and time-consuming process, can result in restrictions on our operations, and may delay or prevent us from obtaining necessary permits, licenses and/or other approvals and authorizations.

Management will undertake a three-stage approach to its additional technology and development costs. The initial stage will cost approximately $45,000, the second stage will cost approximately $100,000 with the third stage, consisting primarily of marketing, will cost upward of $500,000. The Company has already secured the needed capital for the initial stage of the launch and roll-out. The Company intends to raise the majority of the remaining capital required through private placements.

Management will continue to gather data about our projects, and it is possible that additional information will cause us to alter our schedule or determine that a project should not be pursued. You should understand that our plans regarding our projects might change.

F. Shell Status

Based on all of the foregoing, it has been reasonably determined that the Company is ***not now, nor at any time in the past***, been a "shell company" as that term is defined by the Commission as per Release 33-8869, footnote 172, whereby the Company has always been a fully operative ongoing operation with an implemented business plan, revenues, assets, note payables, leases, rights, etc.

G. Date and State (or Jurisdiction) of Incorporation:

The Issuer was organized under the laws of the State of Washington in 1999.

H. The issuer's primary and secondary SIC codes;

The Issuer's primary SIC Code is 7011.

I. The Issuer's fiscal year end date;

The issuer's year end date is December 31.

J. Principal products or services, and their markets;

Pure Hospitality Solutions, Inc., through its subsidiary, has established a quickly growing numismatics operation through the acquisition and merger of Meso Numismatics. Like the Company's online travel product, Meso Numismatics will focus on the Central American-Caribbean region with a concentration of products surrounding Mesoamerica (Mexico to Panama). The Company plans to build a sustainable business operation focused on low cost of operations, high profits and repeatable scalability. These operations may also double as an effective, low cost marketing tool for tourism to the region; targeting the Numismatic Tourist, often referred to as "The Numismatourist".

Meso Numismatics maintains an online store with eBay (www.mesocoins.com) and participates in live auctions with major companies such as Heritage Auctions, Stacks Bowers Auctions and Lyn Knight Auctions.

Oveedia (www.Oveedia.com) once the Company's core product, provides proprietary technology, marketing solutions and branding services to hoteliers, condominium owners and tour operators, with operations primarily focused within Central America and the Latin countries of the Caribbean. The Company's vision is to build competitive operations in the areas of online marketing, hospitality, internet booking engine services and hotel branding through its OTA (Online Travel Agency), Oveedia; intent on becoming the online travel hub of the Central American-Caribbean region of the Americas.

PURE HOSPITALITY SOLUTIONS, INC.
NOTES TO CONSOLDIATED FINANCIAL STATEMENTS
September 30, 2017

NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

Unaudited Financial Statements

The accompanying unaudited financial statements have been prepared by Pure Hospitality Solutions, Inc. (the "Company") without being reviewed or audited by independent auditors. In the opinion of management, all adjustments (which include only normal recurring adjustments) necessary to present fairly the financial position, results of operations, and cash flows at September 30, 2017, and for all the periods presented herein, have been made.

The summary of significant accounting policies of the Company is presented to assist in understanding the Company's financial statements. The financial statements and notes are the representations of the Company's management, which is responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the unaudited balance sheets herein as of and for the quarter ended September 30, 2017 and year ended December 31, 2016.

The summary of significant accounting policies of the Company is presented to assist in understanding the Company's financial statements. The financial statements and notes are the representations of the Company's management, which is responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the unaudited statements of operations herein as of and for the quarter ended September 30, 2017 and December 31, 2016.

The preparation of unaudited financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates.

Nature of Business

Pure Hospitality Solutions, Inc. (the "Company") was originally organized under the laws of Washington State in 1999, as Spectrum Ventures, LLC to develop, market and sell VOIP (Voice Over Internet Protocol) services. In 2002, the Company changed its name to Nxtech Wireless Cable Systems, Inc. In August 2007, the Company changed its name to Oriens Travel & Hotel Management Corp.

On November 16, 2016, the Company entered into an Agreement and Plan of Merger between the Company and Meso Numismatics Corp. ("Meso"). The acquisition of Meso is anticipated to support the Company's overall mission of specializing in ventures related to Central America and the Latin countries of the Caribbean; not limited to tourism. Meso is a small but scalable numismatics operation that the Company can leverage for low cost revenues and product marketing.

Meso Numismatics maintains an online store with eBay (www.mesocoins.com) and participates in live auctions with major companies such as Heritage Auctions, Stacks Bowers Auctions and Lyn Knight Auctions.

The acquisition was complete on August 4, 2017 following the Company issued 25,000 shares of Series BB preferred stock to Meso to acquire one-hundred (100%) percent of Meso's common stock. Therefore, going forward, all of the books will be appropriately consolidated with the revenue from Meso being consolidated in the third quarter financials.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The Company's unaudited financial statements are prepared in accordance with accounting principles generally accepted in the United States of America applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. While the Company did begin to generate revenues beginning the fourth quarter of 2015 and into the first quarter of 2016 through travel bookings generated through Oveedia, those revenues have not yet proven to be a stable ongoing source of revenues sufficient to cover its operating costs and allow it to continue as a going concern. Therefore, the continuation of the Company as a going concern is dependent upon the continued financial support of its shareholders, the ability of the Company to obtain necessary financing to sustain operations and the attainment of profitable operations.

The Company has an accumulated deficit of approximately $21,173,724 as of September 30, 2017. The Company had a working capital deficit of approximately $5,316,691 as of September 30, 2017. In addition, the Company has total shareholders' deficit of approximately $5,025,716 as of September 30, 2017. These factors, among others, generally tend to raise substantial doubt as to its ability to obtain additional long-term debt or equity financing in order to have the necessary resources to further design, develop and launch the website and market the Company's new service.

In order to continue as a going concern, the Company needs to develop a reliable source of revenues, and achieve a profitable level of operations.

To fund basic operations for the next twelve months, the Company projects a need for $750,000 that will have to be raised through debt or equity.

Accordingly, the unaudited financial statements are accounted for as if the Company is a going concern and does not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amount and classification of liabilities or other adjustments that might be necessary should be Company be unable to continue as a going concern.

Principles of Consolidation

The unaudited consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, E-Network de Costa Rica MA SA and Meso Numismatics Corp. All intercompany transactions have been eliminated.

Business Combinations

As previously noted, during September 2014, the Company acquired the assets of E-Net (Note 1). In accordance with FASB ASC 805, business combinations are accounted for by applying the purchase method of accounting. Identifiable assets acquired and liabilities assumed in a business combination were measured at their estimated fair value at the acquisition date. In the third quarter of 2017, the Company issued 25,000 Series BB Preferred Stock to complete the acquisition of Meso Numismatics, the Company accounted for the acquisition as common control.

Software Development

During 2007, the Company purchased a turnkey travel system for 50,000,000 common shares (estimated value $200,000). The Company capitalized other software development costs incurred subsequent to the purchase date as Company management has determined that technologically feasibility of the travel and hotel management software has generally been established.

Software product development costs incurred prior to reaching technological feasibility are expensed.

Upon commencement of operations, the Company will begin amortizing the software development costs using a straight line method over the estimated useful life of 10 years.

During the second quarter of 2015, the Company began enhancing its travel system software. During the third quarter of 2015, the Company began alpha testing its travel system software. During the fourth quarter of 2015, the Company released the Beta test version of its travel system software.

During the second quarter of 2016, the Company began onboarding properties and tours in a first round of shaping for that segment of the platform.

Use of Estimates

In preparing financial statements in conformity with generally accepted accounting principles in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities in the balance sheet and revenue and expenses in the statement of operations. The accounting estimates that require our significant, difficult, and subjective judgments include:

- the assessment of recoverability of long lived assets;
- the valuation of derivative instruments; and,

Actual results may differ from those estimates and such differences may be material to the financial statements. The current economic environment has increased the degree of uncertainty inherent in these estimates and assumptions.

Company management is in the process of reviewing the new accounting pronouncements issued or effective during the year and has not yet determined, if any, is expected to have a material impact on the financial statements.

NOTE 3 – NOTES PAYABLE

Convertible Notes Payable

During the period 2003 through June 30, 2017, the Company entered into a series of convertible debentures, which bear interest at a rate varying from 8 to 10 percent, due on an annual basis, and are secured by a first priority interest in the Company's assets. Any amount of interest which is not paid when due shall bear interest at 8 to 10 percent until paid in full. These debentures are convertible, at the investors' sole option, into common shares at $0.001 per share of the Company at either (i) a 40 percent discount to the 10 days average daily trading price immediately preceding the conversion date, or (ii) at a fixed conversion price of $0.001 per share during any time whereby the current day market price is at or less than $0.075. During the periods ended September 30, 2017 and December 31, 2016, the Company received $-0- and $-0- in advances, respectively.

It should be noted, that between 2013 and June 30, 2017, these particular convertible notes payable have been partitioned and sold in portions to multiple third parties in a combined amount totaling in excess of $450,000. In the majority of cases, these convertible notes payable, because they were in default, were subject to term adjustments at the note holders' request. Thus, when the convertible notes payable were purchased, the new debt holders (generally) negotiated new terms with the Company. To this end, the Company would issue new notes, referred to as "replacement notes," which more often resulted in slightly better terms. New terms reflected (i) 20 day look-backs, (ii) discounts ranging between 50% and 75% to the lowest daily trading price or bid price, (iii) price resets, and (iv) mandatory common share reserves.

During the 1st quarter 2016, the Company entered into fourteen (14) separate Debt Settlement Lock-Up and Leak-Out Agreements with note holders as a result of its Debt Repurchase Program initiative – a subset of the Debt Reduction Program. As a result, in some cases, the Company was required to make issuances of stock as partial payment and repurchase of the aged debt obligations. As of September 30, 2017, the Company issued a total of 119,330,050 shares of its restricted common stock to these noteholders, with the issuances having Lock-Up and Leak-out holding requirements.

During March 2016, in adhering to a provision of that certain Debt Settlement Lock-Up and Leak-Out Agreement executed between the Company and OA Fund, LP ("OAF"), the Company issued an aggregate amount of 3,600,000 shares of its restricted common stock to OAF. In addition to the Rule 144 Holding restriction, these shares were subject additional corporate restrictions – Lock-Up and Leak-Out. The restrictions required that these shares be Locked-up until March 31st, 2016. Thereafter, the shares would be subject to a Leak-out (daily sales limitations) of the lessor of (i) 5% of the previous day's trading volume of the Company's common stock, or, (ii) 2,500,000 shares per pay; expiring on April 30th, 2016.

During March 2016, in adhering to a provision of that certain Debt Settlement Lock-Up and Leak-Out Agreement executed between the Company and Southridge Partners II LP ("Southridge"), the Company issued an aggregate amount of 7,735,000 shares of its restricted common stock to Southridge. In addition to the Rule 144 Holding restriction, these shares were subject additional corporate restrictions – Lock-Up and Leak-Out. The restrictions required that these shares be Locked-up until March 31st, 2016. Thereafter, the shares would be subject to a Leak-out (daily sales limitations) of the lessor of (i) 5% of the previous day's trading volume of the Company's common stock, or, (ii) 2,500,000 shares per pay; expiring on April 30th, 2016.

During March 2016, in adhering to a provision of that certain Debt Settlement Lock-Up and Leak-Out Agreement executed between the Company and Summit Trading Capital, LLC

("Summit"), the Company issued an aggregate amount of 9,379,110 shares of its restricted common stock to Summit. In addition to the Rule 144 Holding restriction, these shares were subject additional corporate restrictions – Lock-Up and Leak-Out. The restrictions required that these shares be Locked-up until March 31st, 2016. Thereafter, the shares would be subject to a Leak-out (daily sales limitations) of the lessor of (i) 5% of the previous day's trading volume of the Company's common stock, or, (ii) 2,500,000 shares per pay; expiring on April 30th, 2016.

During March 2016, in adhering to a provision of that certain Debt Settlement Lock-Up and Leak-Out Agreement executed between the Company and Asten Wyman International, LLC ("Asten"), the Company issued an aggregate amount of 18,750,000 shares of its restricted common stock to Asten. In addition to the Rule 144 Holding restriction, these shares were subject additional corporate restrictions – Lock-Up and Leak-Out. The restrictions required that these shares be Locked-up until March 31st, 2016. Thereafter, the shares would be subject to a Leak-out (daily sales limitations) of the lessor of (i) 5% of the previous day's trading volume of the Company's common stock, or, (ii) 2,500,000 shares per pay; expiring on April 30th, 2016.

During March 2016, in adhering to a provision of that certain Debt Settlement Lock-Up and Leak-Out Agreement executed between the Company and OA Fund, LP ("OAF"), the Company earmarked 18,750,000 shares of its common stock for OAF; placing these shares into a Balance Account and accounting for them within the Company's Capitalization Table (under Issued Shares). The physical certificate was to be issued on May 5th, 2016. However, at the request of OAF, the shares remained in the balance account. When the aforementioned shares are actually issued in certificate form, in addition to the Rule 144 Holding restriction, these shares were subject to additional corporate restrictions – Lock-Up and Leak-Out. The restrictions required that these shares be Locked-up until May 31st, 2016. Thereafter, the shares would be subject to a Leak-out (daily sales limitations) of the lessor of (i) 5% of the previous day's trading volume of the Company's common stock, or, (ii) 2,500,000 shares per pay; expiring on December 31th, 2016

During March 2016, in adhering to a provision of that certain Debt Settlement Lock-Up and Leak-Out Agreement executed between the Company and Gel Properties, LLC ("GEL"), the Company earmarked 25,042,200 shares of its common stock for GEL; placing these shares into a Balance Account and accounting for them within the Company's Capitalization Table (under Issued Shares). The physical certificate was issued by July 6th, 2016. When the aforementioned shares are actually issued in certificate form, in addition to the Rule 144 Holding restriction, these shares were subject to additional corporate restrictions – Lock-Up and Leak-Out. The restrictions required that these shares be Locked-up until May 31st, 2016. Thereafter, the shares would be subject to a Leak-out (daily sales limitations) of the lessor of
(i) 5% of the previous day's trading volume of the Company's common stock, or, (ii) 2,500,000 shares per pay; expiring on December 31th, 2016.

On June 27th, 2016, the Company entered into a debt settlement equity swap agreement with Wanda Chan to settle those convertible promissory notes issued between 2003 and 2013 for the total amount of $3,936,077.23. Both parties agreed to a future exchange of equity as payment for a settlement amount of $2,018,530.34 in the form of a newly created class of preferred shares that will constitute approximately 17% of the preferred class, which based on the amended agreement, the issuance of the preferred shares shall take place on or before June 9th, 2017. However, the total debt has been extinguished.

If, at any time, the Company issues or sells any shares of common stock for no or below market consideration (dilutive issuance), then immediately upon the dilutive issuance, the fixed conversion price would be reduced to the amount of the consideration per share received by the Company in such dilutive issuance. The number of common shares issuable upon the conversion of the debentures is limited to 10.0 percent in beneficial ownership by the debenture holders of the outstanding shares of common stock. The debentures do not automatically convert to common shares on their due dates.

After a thorough analysis and review of the terms of the note, the Company has determined the appropriate method of accounting is including the entire debt as a current liability on the balance sheet, since the debt is immediately convertible at the option of the holder.

In accordance with ASC Topic 815, “Derivative and Hedging,” the debt features provision (collectively, the features) contained in the terms governing the notes is not clearly and closely related to the characteristics of the notes. Accordingly, the features qualified as embedded derivative instruments at issuance and, because they do not qualify for any scope exception within ASC Topic 815, they were required by ASC Topic 815 to be accounted for separately from the debt instrument and recorded as derivative financial instruments.

Pursuant to the terms of the notes, these notes are convertible at the option of the holder, at any time on or prior to maturity. There is an additional interest rate adjustment feature; a liquidated damages clause, as well as the redemption option. The debt features represent an embedded derivative that is required to be accounted for apart from the underlying notes. At issuance of the notes, the debt features had an estimated initial fair value as follows, which was recorded as a derivative liability on the balance sheet.

In subsequent periods, if the price of the security changes, the embedded derivative financial instrument related to the debt features will be adjusted to the fair value with the corresponding charge or credit to Other Expense or Income. The estimated fair value of the debt features was determined using the probability weighted averaged expected cash flows Black Sholes Model with the closing price on original date of issuance, a conversion price based on the terms of the note, a period based on the terms of the note, and a volatility factor on the date of issuance.

The recorded value of the debt features related to the notes can fluctuate significantly based on fluctuations in the fair value of the Company’s common stock, as well as in the volatility of the stock price during the term used for observation and the term remaining for the warrants. The significant fluctuations can create significant income and expense items on the financial statements of the Company.

Because the terms of the convertible notes require, the accounting rules require a presumption to be made due to the Company no longer having the control to physical or net share settle subsequent convertible instruments because it is tainted by the terms of the notes. Were the notes to not have contained those terms or even if the transactions were not entered into, it could have altered the treatment of the other notes and the conversion features of the latter agreement may have resulted in a different accounting treatment from the liability classification. The current note, as well as any subsequent convertible notes will be treated as derivative liabilities until all such provisions are settled.

For the nine-month period ended September 30, 2017 and year ended December 31, 2016, the Company recorded other expense of $0 and $92,679, respectively, related to the derivative features of the convertible debt.

The balance of the carrying value of the derivative liability as of September 30, 2017 is as follows:

$	3,134,145	December 31, 2016 value of derivative
	-	Increase in value of derivative liability
	-	Initial recognition
$	3,134,145	June 30, 2017 value of derivative liability

The balance of the carrying value of the derivative liability as of December 31, 2016 is as follows:

$	42,358	December 31, 2015 value of derivative
	3,091,787	Increase in value of derivative liability
$	3,134,145	December 31, 2016 value of derivative

In connection with the convertible notes, the Company had approximately $150,965 and $97,912 of accrued interest at September 30, 2017 and December 31, 2016, respectively, which is included in these unaudited financial statements.
