RED EAGLE MINING CORPORATION

Management's Discussion and Analysis

For the three and nine months ended September 30, 2014

This management's discussion and analysis ("MD&A") focuses on significant factors that affected Red Eagle Mining Corporation and its subsidiaries ("Red Eagle" or the "Company") during the three and nine months ended September 30, 2014 and to the date of this report. The MD&A supplements, but does not form part of, the unaudited interim condensed consolidated financial statements of the Company and the notes thereto for the three and nine months ended September 30, 2014. Consequently, the following discussion of performance and financial condition should be read in conjunction with the unaudited interim condensed consolidated financial statements for the three and nine months ended September 30, 2014 and the notes thereto. All amounts presented in this MD&A are in Canadian dollars unless otherwise indicated. The Company has prepared its financial statements in accordance with IFRS as issued by the IASB since inception on January 4, 2010.

Additional information related to Red Eagle is available on SEDAR at **www.sedar.com** and on the Company's website at **www.redeaglemining.com**.

This MD&A contains information up to and including November 28, 2014.

FORWARD-LOOKING INFORMATION

Statements in this report that are not historical facts are forward-looking statements involving known and unknown risks and uncertainties, which could cause actual results to vary considerably from these statements. Readers are cautioned not to put undue reliance on forward-looking statements. For more information on forward-looking information, please refer to pages 27 and 28 of this MD&A.

CORPORATE OVERVIEW

The Company was incorporated under the *Business Corporations Act (British Columbia)* on January 4, 2010. The Company completed its initial public offering ("IPO") on June 24, 2011 and commenced trading its common shares under the symbol "RD" on the TSX Venture Exchange ("Exchange") on June 28, 2011. The Company is also listed on the OTCQX under the symbol "RDEMF". The Company is engaged in exploration and development of mineral properties located in Colombia.

QUALIFIED PERSONS

The scientific and technical information contained in this MD&A has been reviewed and approved by Jeff Toohey P.Eng., Vice President Exploration, who is a "Qualified Person" as defined under National Instrument 43-101.

MINERAL PROPERTIES

The Company has two significant mineral properties, Santa Rosa and Pavo Real, both of which are located in Colombia. All direct costs relating to the acquisition of mineral property interests are capitalized into intangible assets on a property by property basis. All mineral property exploration expenditures are expensed as incurred. A breakdown of expenditures on these two properties is provided below in the section "Mineral Properties". Further information on the mineral properties can be found in the consolidated financial statements for the three and nine months ended September 30, 2014.

<u>Santa Rosa Project</u>

On April 15, 2011 the Company acquired 100% of the Santa Rosa Gold Project in Antioquia, Colombia, for US$9,600,000. Of this, US$8,900,000 has been paid with the remaining US$700,000 originally payable in November 2014. On October 31, 2014 the Company signed an amendment to the original purchase agreement so that US$250,000 is due by November 30, 2014 (paid November 21, 2014) and the remaining US$450,000 is due upon receipt of the San Ramon environmental license. The Company also agreed to acquire certain adjacent concession contracts for US$780,000, of which US$40,000 has been paid and US$740,000 is due upon title transfer. As at September 30, 2014 the outstanding balance relating to these purchases was US$1,440,000 ($1,568,548).

On October 22, 2012, concurrent with a private placement financing, the Company completed the sale of a 2% NSR royalty over the Santa Rosa property to Liberty Metals and Mining Holdings LLC, ("Liberty") a 19.9% shareholder of the Company, for gross proceeds of $8,333,333. The Company had the option to sell an additional 1% royalty for $4,166,667 at any time until December 31, 2013 and on December 20, 2013, the Company exercised this option. These transactions were recorded as a credit to the mineral property reducing the value of the property to nil and the excess was reflected as a gain of $1,415,704 in the statement of comprehensive loss. The Company has the option to repurchase a 1% royalty for $8,333,333 at any time during the first two years of gold production. Liberty also has a participation right to maintain a 19.9% interest in the Company.

On October 24, 2012 the Company executed a purchase agreement with Bullet Holdings Corp. to acquire mineral concession contracts totaling 35,910 hectares adjacent to the Company's Santa Rosa project. The consideration for the transaction was the issuance of 905,000 common shares, reimbursement of current year concession fees and the granting of a 1.5% NSR royalty over the properties acquired. Liberty's royalty does not cover these new properties.

On May, 28, 2014 the Company executed a purchase agreement with AngloGold Ashanti Colombia S.A. ("AGAC"), to acquire 100% of contiguous mineral concession contracts totaling 1,673 hectares within the Company's Santa Rosa. In consideration for the property, the Company has agreed to pay US$375,000 to AGAC and grant AGAC a 2% net smelter return royalty over the properties acquired. The cash payments are to be made as follows:

Condition		**Amount (USD)**
Within 10 days of execution of contract (paid)	$	25,000
Upon transfer of concession contract		100,000
On first anniversary of transfer		125,000
On second anniversary of transfer		125,000
	$	375,000

MINERAL PROPERTIES (continued)

Santa Rosa Project (continued)

The Company paid the initial US$25,000 and has recorded the balance as a provision, discounted at the risk free rate of 1%. The fair value of total payments is $399,617 representing the initial $26,150 (US$25,000) and $373,467 relating to the outstanding US$350,000, and this has been recorded as an increase in capitalized mineral properties. As at September 30, 2014 the mineral property obligation relating to this acquisition was $378,245 which represents the discounted value of the US$350,000 remaining to be paid. The Company has recorded an interest expense of $1,178 relating to the unwinding of the discount on the obligation. The Company also incurred $18,062 of transaction costs which have been recorded as acquisition costs.

Pavo Real Project

The Company, through its 70% owned subsidiary Rovira Mining Limited, is earning in to an option agreement on the Pavo Real Project in Tolima, Colombia with Miranda Gold Corp. (TSX-V: MAD). The terms of the option agreement require paying certain cash amounts, issuing common shares and incurring certain minimum levels of exploration expenditure. The Company has made all required scheduled payments and share issuances to date. The details of the option agreement can be found in the consolidated financial statements for the nine months ended September 30, 2014. On July 2, 2013 the Company successfully applied for an additional 8,800 hectares within the Pavo Real Project.

MINERAL PROPERTIES (continued)

Following is the breakdown of mineral property expenditures incurred during the nine months ended September 30, 2014:

For the nine months ended September 30, 2014

	Santa Rosa	Pavo Real	Total
Mineral property exploration costs:			
Assays and sampling	$ 36,901	$ 12,297	**$ 49,198**
Concession fees	331	6,710	**7,041**
Depreciation	77,783	18,775	**96,558**
Drilling	216,827	-	**216,827**
Environmental	94,943	-	**94,943**
Field and camp expenses	568,963	34,934	**603,897**
Legal, office and administration	119,165	18,174	**137,339**
Licences and permits	1,097	-	**1,097**
Metallurgical testwork	217,257	-	**217,257**
Salaries and consulting fees	1,366,918	76,149	**1,443,067**
Technical studies	1,459,048	-	**1,459,048**
Travel and transportation	224,440	9,056	**233,496**
Total exploration costs for the nine months ended September 30, 2014	**$ 4,383,673**	**$ 176,095**	**$ 4,559,768**
Cumulative expenditures as at January 1, 2014	21,854,526	4,917,439	**26,771,965**
Cumulative exploration costs as at September 30, 2014	**$ 26,238,199**	**$ 5,093,534**	**$ 31,331,733**

For the nine months ended September 30, 2013

	Santa Rosa	Pavo Real	Total
Mineral property exploration costs:			
Assays and sampling	$ 192,707	$ -	**$ 192,707**
Concession fees	16,141	37,236	**53,377**
Depreciation	85,589	24,341	**109,930**
Drilling	2,330,761	-	**2,330,761**
Field and camp expenses	930,920	18,675	**949,595**
Geological and geochemical	29,036	-	**29,036**
Hydrology	110,670	-	**110,670**
Legal, office and administration	264,931	66,558	**331,489**
Licences and permits	128,111	-	**128,111**
Metallurgical testwork	292,793	-	**292,793**
Salaries and consulting fees	2,099,600	7,214	**2,106,814**
Technical studies	646,717	-	**646,717**
Travel and transportation	299,750	-	**299,750**
Total exploration costs for the nine months ended September 30, 2013	**$ 7,427,726**	**$ 154,024**	**$ 7,581,750**

MINERAL PROPERTIES (continued)

Exploration to date has primarily focussed on the Santa Rosa gold project and has entailed:

- Detailed structural and geological mapping of hundreds of near surface underground adits within the oxidized saprolite and over a hundred historic open cut hydraulic workings;
- Surface geological mapping;
- Trench sampling;
- Collection and analysis of thousands of adit channel samples in the oxides;
- Helicopter-borne magnetic and radiometric surveys;
- Detailed Mobile Metal Ion (MMI) geochemical sampling programme;
- Core drilling (totaling 45,000 metres in 233 holes);
- Detailed metallurgical studies;
- Environmental baseline studies;
- Resource Estimate;
- Preliminary Economic Assessment;
- Environmental Impact Assessment; and
- Feasibility study

Surface exploration programmes at Santa Rosa have identified a number of intrusive related gold targets that have never been drilled. In these targets, potassic alteration from the radiometric survey, anomalous gold results from the MMI programme and historic workings are coincident. The Company has initially focussed on advancing the San Ramon deposit where a significant gold system has been defined in the south-east sector of Santa Rosa. Mineralized quartz veins and veinlet stockworks at San Ramon occur primarily within a strong shear zone structure striking approximately east-west. The San Ramon shear zone is related to regional-scale northwest-southeast striking fault systems. Sinistral movement along these structures created the dilational east-west shear zone, which is up to 50 meters wide, dips 70° to the north, has been defined over at least 2,000 metres of strike length and is exposed at surface. In addition, mineralised quartz veins are common within the hanging wall of the shear zone. The 45,000 metres of core drilling conducted to date delineated the San Ramon deposit on 50 metre centres to a vertical depth of approximately 250 metres.

Exploration was also conducted at Pavo Real. To date the work programme has included stream sediment sampling, detailed geological mapping and rock chip and trench sampling.

OUTLOOK

The work program for Santa Rosa for the remainder of 2014 includes:

- Detailed engineering;
- Completion of the permitting process; and
- Regional exploration and drill target identification.

The work program for Pavo Real for the remainder of 2014 includes:

- Continued detailed mapping and trenching of the identified mineralised zones;
- Expansion of the geochemical sampling programme over the entire project; and
- Regional exploration and drill target identification.

RESULTS OF OPERATIONS

NINE MONTHS ENDED SEPTEMBER 30, 2014 COMPARED TO NINE MONTHS ENDED SEPTEMBER 30, 2013

The Company recorded a loss of $6,376,591 for the nine months ended September 30, 2014 which is a decrease of $2,577,764 compared to the loss of $8,954,355 for the nine months ended September 30, 2013.

Following is an analysis of the significant movements in balances between the nine month periods ended September 30, 2014 and September 30, 2013:

	For the nine months ended September 30, 2014	For the nine months ended September 30, 2013	
Mineral property exploration costs	$ 4,559,768	$ 7,581,750	Refer to breakdown of exploration costs in mineral property section. Total exploration costs decreased by $3.02m due to a significant reduction in site activities as a result of transitioning from drilling to permitting and feasibility.
Office and administration	691,537	543,699	Increase due to share option expense from options granted in April 2014
Salaries and benefits	593,430	361,040	Increase due to share option expense from options granted in April 2014
Relations and business development	289,943	444,681	Reduced investor relations expense due to market conditions
Professional fees	190,619	146,969	Increase due to increase in audit and tax fees
Foreign exchange (gain) loss	83,687	208,980	The balance is due to the impact of movement in exchange rates on the US denominated debt. Difference is due to size of debt ($1.98m in Q3 2014 vs $6.12m in Q3 2013) as well as magnitude of movement in period exchange rates.
Deferred tax recovery	-	(217,000)	Income tax recovery on expiry of warrants

RESULTS OF OPERATIONS (continued)

THREE MONTHS ENDED SEPTEMBER 30, 2014 COMPARED TO THREE MONTHS ENDED SEPTEMBER 30, 2013

The Company recorded a loss of $2,135,629 for the three months ended September 30, 2014 which is an increase of $92,997 compared to the loss of $2,042,632 for the three months ended September 30, 2013.

Following is an analysis of the significant movements in balances between the three month periods ended September 30, 2014 and September 30, 2013:

	For the three months ended September 30, 2014	For the three months ended September 30, 2013	
Mineral property exploration costs	$ 1,665,806	$ 1,814,523	Refer to breakdown of exploration costs in mineral property section. Total exploration costs decreased by $149k due to a significant reduction in site activities.
Office and administration	193,628	168,370	Increase due to share option expense from vesting options granted in April 2014
Relations and business development	94,222	118,440	Reduced investor relations expense due to market conditions
Foreign exchange (gain) loss	43,366	(130,287)	The balance is due to impact of movement in exchange rates on the US denominated debt. Difference is due to size of debt ($1.95m in Q1 2014 vs $6.56m in Q1 2013) as well as magnitude of movement in period exchange rates.

SUMMARY OF QUARTERLY RESULTS

Following is a summary of quarterly results since January 1, 2012. These results are taken from the interim and annual financial statements of Red Eagle Mining Corporation, which are prepared in accordance with IFRS as issued by the IASB. The results are presented in Canadian dollars, which is the functional currency of the parent company. The Colombian branches have a functional currency of the Colombian peso.

	For the three months ended March 31, 2014	For the three months ended June 30, 2014	For the three months ended September 30, 2014
Interest income	$ 8,956	$ 15,129	$ 8,308
Net loss	1,641,778	2,599,184	2,135,629
Basic and diluted loss per share	0.03	0.04	0.03

	For the three months ended March 31, 2013	For the three months ended June 30, 2013	For the three months ended September 30, 2013	For the three months ended December 31, 2013
Interest income	$ 31,662	$ 20,365	$ 63,737	$ 11,364
Net loss	3,995,335	2,916,388	2,042,632	829,228
Basic and diluted loss per share	0.07	0.05	0.03	0.01

	For the three months ended March 31, 2012	For the three months ended June 30, 2012	For the three months ended September 30, 2012	For the three months ended December 31, 2012
Interest income	$ 19,776	$ 12,442	$ 16,872	$ 25,127
Net loss	3,500,171	2,819,194	2,079,607	3,799,052
Basic and diluted loss per share	0.09	0.07	0.06	0.09

The analysis provided in the "results of operations" section above provides information regarding the movements during the three and nine months ended September 30, 2014. Due to the nature of operations and the climate at the Company's locations in Colombia (little fluctuation in temperatures throughout the year) there is no significant seasonality in the business. The Company was incorporated on January 4, 2010 and has grown in its level of operations since that date. The loss per quarter is most impacted by the nature of the drilling programme underway at the time, and whether or not there is a significant share based payment expense due to the granting of share purchase options. Excluding the options grants, the general trend is for the loss to increase in each quarter through to early 2012, and from mid-2012 through to present there is a decrease in expenditures as the drilling programmes were further refined, rationalized and focused on the Santa Rosa project. The net loss in the three months to December 2013 is significantly reduced due the gain on sale of the 1% NSR in December 2013.

LIQUIDITY

As at	September 30, 2014	December 31, 2013	December 31, 2012
Working capital	$ 349,407	$ 2,351,521	$ 9,523,558
Total assets	4,481,955	5,578,368	20,385,464
Total liabilities	(2,626,647)	(2,137,930)	(7,035,647)
Share capital	37,148,285	32,665,403	32,643,403
Deficit	(36,426,951)	(32,203,324)	(24,064,836)

As at September 30, 2014, the Company had working capital of $349,407 (December 31, 2013: $2,351,521), including cash and cash equivalents of $2,502,694 (December 31, 2013: $4,118,484). Included in current liabilities are $1,984,997 (US$1,790,000) mineral property obligations of which US$250,000 is due in November 2014, US$450,000 upon the Company's receipt of its environmental permit and the remaining US$1,090,000 is payable upon title transfer of certain concessions.

On April 9, 2014, the Company raised $5,003,844 in a combined bought deal and private placement equity financing. The Company targets to obtain financing in the future primarily through further equity financings but also potentially through debt financing, should a positive construction/production decision be made upon the completion of the definitive feasibility study. At present, Red Eagle has no operations that generate cash flow and its financial success is dependent on management's ability to discover and develop economically viable mineral deposits, raise required funding through future equity issuances, asset sales or a combination thereof. The mineral exploration process can take many years and is subject to many factors that are beyond the Company's control.

The Company relies on equity financings and the exercise of options and warrants to fund its exploration activities and its corporate and overhead expenses. Many factors influence the Company's ability to raise funds, including the health of the resource market, the climate for mineral exploration investment, the Company's track record, and the experience and caliber of its management and personnel. Actual funding requirements may vary from those planned due to a number of factors, including the progress and results of exploration activities.

The Company's operations to date have been financed by issuing common shares and the sale of a 3% NSR over a portion of the Santa Rosa property. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. There is no guarantee that the Company will be able to secure additional financings in the future at terms that are favourable. To date, the Company has not used, nor does it currently have future plans to use, debt or other similar debt structures of financing to fund its exploration programs.

Based on the cash position on hand as at the date of this MD&A, including the April 2014 equity financing, management believes the Company is sufficiently capitalized to fund the ongoing operational needs for the balance of 2014.

OUTSTANDING SHARE DATA

Common shares

As at September 30, 2014 and the date of this MD&A the Company had 73,932,714 common shares issued and outstanding (December 31, 2013: 58,667,818).

On April 9, 2014 the Company issued 12,121,212 common shares at $0.33 per share for gross proceeds of $4,000,000 as part of a brokered bought deal offering. Concurrently the Company's largest shareholder, Liberty Metals and Mining Holdings LLC, exercised its participation rights in order to maintain its pro rata 19.9% interest in the Company. As a result the Company issued 3,011,387 common shares at $0.33 per share, 7,453 at $0.42 per share and 24,844 at $0.28 per share for gross proceeds of $1,003,844.

On June 24, 2014 the Company issued 100,000 common shares in accordance with the Pavo Real Option agreement (June 24, 2013: 100,000 common shares).

Warrants

No warrants expired, were issued or were exercised during the nine months ended September 30, 2014.

On June 28, 2013, 6,581,883 warrants expired unexercised. The expiry of these warrants created a capital gain and the Company recorded a $217,000 tax charge in equity which was offset by a deferred tax recovery. The balance in warrants reserve relating to expired warrants has been reclassified to deficit.

The Company had the following warrants outstanding as at September 30, 2014:

Expiry Date	Warrants Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in Years)
February 12, 2015	4,500,000	$ 0.25	0.37
	4,500,000	**$ 0.25**	**0.37**

On November 6, 2014 the Company extended the expiry date of 3,375,000 share purchase warrants with a $0.25 exercise price from February 12, 2015 to June 28, 2016. As a result the remaining contractual life of the warrants that are extended is 1.75 years and the weighted average remaining contractual life of all warrants is 1.4 years.

OUTSTANDING SHARE DATA (continued)

Options

On March 9, 2014, 100,000 share purchase options that had been granted to a director expired unexercised following his resignation in December 2013. In addition 50,000 options expired unexercised following the departure of an employee from the Company.

On April 9, 2014 the Company granted 2,180,000 share purchase options to directors, officers, employees and consultants at a price of $0.33 exercisable for a period of 5 years and vesting in tranches of up to 18 months.

On May 1, 2014 the Company cancelled a total of 2,700,000 share purchase options with an exercise price of $1.25 and 160,000 options at an exercise price of $1.00. The balance in share option reserve relating to expired share purchase options has been reclassified to deficit.

The Company had the following share purchase options outstanding and exercisable as at September 30, 2014 and at the date of this MD&A.

Expiry Date	Options Outstanding	Options Exercisable		Exercise Price	Weighted Average Remaining Contractual Life (in Years)
December 6, 2017	2,205,000	2,092,500		0.55	3.19
April 9, 2019	2,180,000	1,670,000		0.33	4.53
	4,385,000	**3,762,500**	**$**	**0.44**	**3.85**

TRANSACTIONS WITH RELATED PARTIES

Following is a list of subsidiaries including country of incorporation and % of ordinary shares and voting rights held:

Name	Country of incorporation	Principal activities	Per cent of ordinary shares held & voting rights
Red Eagle Mining de Colombia Limited	Canada	Exploration company	100%
Rovira Mining Limited	Canada	Exploration company	70%

The aggregate value of key management compensation is as follows:

		Nine months ended September 30, 2014		Nine months ended September 30, 2013
Short-term employee benefits	**$**	**504,424**	$	319,127
Share option based payments		**163,088**		47,789
	$	**667,512**	$	366,916

The following table provides the total amount of transactions which have been entered into by the Company with related parties during the nine month periods ended September 30, 2014 and 2013 and the balances with related parties at September 30, 2014 and December 31, 2013:

			Purchases from		**Amounts due to**
Rent, salary and related costs recharged from SB Management Ltd., a company controlled by three directors of the Company, Ian Slater, Robert Bell and Tim Petterson ;	2014	$	612,500	$	13,042
	2013	$	487,500	$	-
Legal fees to Anfield Sujir Kennedy & Durno LLP, a partnership in which Jay Sujir, a director of the Company, is a partner;	2014	$	90,929	$	4,259
	2013	$	16,757	$	22,718

Ian Slater and Ken Cunningham are directors common to both the Company and Miranda Gold Corp., which entered into share purchase and shareholder agreements on the Pavo Real Project as described in Note 6 to the interim unaudited condensed consolidated financial statements for the nine months ended September 30, 2014.

Related party transactions are measured at the amounts agreed upon by the parties.

CHANGES IN ACCOUNTING POLICIES

The following accounting standard was adopted effective January 1, 2014.

IFRIC 21 Levies

In May 2013, the IASB issued IFRIC 21 – Levies ("IFRIC 21"), an interpretation of IAS 37 – Provisions, Contingent Liabilities and Contingent Assets ("IAS 37"), on the accounting for levies imposed by governments. IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past event ("obligating event"). IFRIC 21 clarifies that the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy. IFRIC 21 is effective for annual periods commencing on or after January 1, 2014. The adoption of IFRIC 21 did not have a significant impact on the Company's unaudited interim condensed consolidated financial statements for the nine months ended September 30, 2014.

FINANCIAL INSTRUMENTS

Please refer to note 12 of the Company's unaudited interim condensed consolidated financial statements for the nine months ended September 30, 2014 for disclosure regarding the Company's financial instruments. There has been no change in designation of financial instruments or nature of risks in the year ended September 30, 2014. The Company's financial instruments consist of cash and cash equivalents, other financial assets, amounts receivable, accounts payable and the mineral property obligation. The Company does not hold any complex financial instruments or derivatives. The cash is held to fund ongoing exploration work and head office costs and the cash equivalents are held to earn interest until they are needed to fund exploration work and head office costs. The short term investment of $160,000 is a 12 month (maturing February 18, 2015) 1% Guaranteed Investment Certificate placed on deposit at a major Canadian bank which is held as collateral for the Company's credit cards. Amounts receivable and accounts payable relate to regular working capital requirements.

Credit risk

The Company is exposed to credit risk with respect to its cash, cash equivalents and other financial assets. Other financial assets are short term investments that have been placed on deposit with major Canadian financial institutions. All cash and cash equivalents are on deposit with major Canadian or Colombian financial institutions. The short term investment recorded as other financial assets is a GIC with a 12 month maturity that has been placed on deposit with a major Canadian institution.

The risk arises from the non-performance of counterparties of contractual financial obligations. The Company manages credit risk, in respect of cash and cash equivalents, by purchasing highly liquid, short-term investment-grade securities held at major Canadian financial institutions.

FINANCIAL INSTRUMENTS (continued)

Concentration of credit risk with respect to the Company's cash, cash equivalents and short term investments is mitigated since the amounts are held at several major Canadian financial institutions. The Company's concentration of credit risk and maximum exposure thereto is as follows:

		September 30, 2014		December 31, 2013
Held at major Canadian financial institutions:				
Cash and cash equivalents	**$**	**2,305,541**	$	4,023,426
Short-term investments		**160,000**		160,000
	$	**2,465,541**	$	4,183,426
Held at major Colombian financial institutions:				
Cash and cash equivalents		**197,153**		95,058
Total cash, cash equivalents and short-term investments	**$**	**2,662,694**	$	4,278,484

The credit risk associated with cash, cash equivalents and short term investments is minimized by ensuring the majority of these Canadian financial assets are held with major Canadian financial institutions with strong investment-grade ratings by a primary rating agency. The amounts held in Colombia are with a major Colombian financial institution.

Interest rate risk

The Group has cash balances, investment-grade short-term deposit certificates issued by its banking institution and no interest-bearing debt. Interest income is not material to the Company. The Group is not exposed to significant interest rate risk.

Foreign currency risk

The Company is exposed to currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in Canadian dollars. The Company has not entered into any foreign currency contracts to mitigate this risk.

Certain of the Company's cash and cash equivalents, amounts receivable and accounts payable and accrued liabilities are held in Colombian Peso ("COP"); therefore, COP amounts are subject to fluctuation against the Canadian dollar (CAD).

The Company had the following balances in foreign currency as at September 30, 2014:

		USD		**COP**		**CAD Equivalent**
Cash	$	-	$	358,070,264	$	197,153
Amounts receivable		-		9,180,916		5,055
Accounts payable and accrued liabilities		-		(671,445,540)		(369,698)
Mineral property obligation		(1,790,000)		-		(1,984,997)
	$	**(1,790,000)**	**$**	**(304,194,360)**	**$**	**(2,152,487)**

FINANCIAL INSTRUMENTS (continued)

Assuming that all other variables remain constant, a 10% appreciation or depreciation of the COP against the CAD would have a negligible impact on net loss since translation of the COP functional currency to the presentation currency results in translation differences being recorded within other comprehensive income.

The Company's mineral property obligation is denominated in US dollars. Consequently the Company is exposed to the foreign exchange risk relating to this balance. The balance as at September 30, 2014 was US$1,790,000 ($1,984,997) (December 31, 2013: US$1,440,000 ($1,539,980)). As a result of the movement in exchange rates the Company has recorded a loss of $80,739 related to this obligation during the nine months ended September 30, 2014.

The Company also has transactional currency exposures. Such exposures arise from purchases in currencies other than the respective functional currencies, typically the US dollar. The Company manages this risk by matching receipts and payments in the same currency and monitoring.

Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or currency risk. The Company is not exposed to significant other price risk.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company anticipates that there is sufficient capital and liquidity to meet liabilities when due.

The Company maintained sufficient cash and cash equivalents at September 30, 2014 in the amount of $2,502,694 (December 31, 2013: $4,118,484) in order to meet short-term business requirements. At September 30, 2014, the Company had accounts payable of $641,650 (December 31, 2013: $597,950), which will be paid within three months and mineral property obligations of $1,984,997 (December 31, 2013: $1,539,980) of which $278,950 (US$250,000) is due in November 2014, $502,110 (US$450,000) upon the Company receiving its environmental permit and $1,203,937 upon title transfer or the anniversary of title transfer of certain concessions (see note 6 to the interim unaudited condensed consolidated financial statements).

CAPITAL COMMITMENTS AND OFF BALANCE SHEET ARRANGEMENTS

The Company's capital commitments mostly relate to the mineral property purchase agreements and option agreements. See table below and Note 10 to the consolidated financial statements for capital commitments as at September 30, 2014. The Santa Rosa property payments are a contractual obligation and the obligation has been capitalized and recorded as a current liability. The total obligation in Canadian dollars as at September 30, 2014 is $1,984,997 (US$1.79m) of which $278,950 (US$250,000) is due by November 30, 2014 (paid November 21, 2014), $502,110 (US$450,000) due upon the Company receiving its environmental permit (expected within the following 12 months) and $1,203,937 (US$1.09m) upon title transfer of certain concessions, recorded as due on demand but not expected to be paid within the following 12 months. The Pavo Real commitment is an option (see note 6 to the interim unaudited condensed consolidated financial statements) and has not been capitalized or recorded as a liability.

In addition there are also operating leases relating to the Colombian offices, camps and rental equipment. There are no other capital commitments, nor are there any off balance sheet arrangements.

The following table shows the obligations as at the date of this MD&A (in Canadian dollars):

	Payments Due by Period		
Commitments	***Total***	***Less than 1 year***	***1 – 3 years***
Santa Rosa obligations	$1,984,997	$781,060	$1,203,937
Operating lease commitments	$41,686	$41,686	$ -
Total Commitments	$2,026,683	$822,746	$1,203,937

RISKS AND UNCERTAINITES

Exploration, Development and Operations

Exploration and development of mineral deposits involves a high degree of risk which even a combination of careful evaluation, experience and knowledge does not eliminate. Few properties which are explored are ultimately developed into producing properties. Any potential determination as to whether a mineral deposit will be commercially viable can be affected by such factors as: deposit size, grade, unusual or unexpected geological formations and metallurgy; proximity to infrastructure; metal prices which are highly cyclical; environmental factors; unforeseen technical difficulties; work interruptions; and government regulations, including regulations relating to permitting, prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted.

The long term profitability of the Company's operations will be in part directly related to the cost and success of its exploration programs, which may be affected by a number of factors. Substantial expenditures are required to establish reserves through drilling, to develop processes to extract the resources and, in the case of new properties, to develop the extraction and processing facilities and infrastructure at any site chosen for extraction. Although substantial benefits may be derived from the discovery of a major deposit, no assurance can be given that any such deposit will be commercially viable or that the funds required for development can be obtained on a timely basis.

Mining operations generally involve a high degree of risk. The Company's operations will be subject to all the hazards and risks normally encountered in the exploration, development and production of gold and copper, including unusual and unexpected geologic formations, seismic activity, rock bursts, cave-ins, flooding and other conditions involved in the drilling and removal of material, any of which could result in damage to, or destruction of, the mine and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although appropriate precautions to mitigate these risks are taken, operations are subject to hazards such as equipment failure or failure of structures which may result in environmental pollution and consequent liability. Even though the Company intends to obtain liability insurance in an amount which it considers adequate, the nature of these risks is such that liabilities might exceed policy limits, the liabilities and hazards might not be insurable, or the Company might not elect to insure itself against such liabilities due to high premium costs or other reasons, in which event the Company could incur significant costs that could have a material adverse effect upon its financial condition.

RISKS AND UNCERTAINITES (continued)

Risks with Title to Mineral Properties

The Company's interest in the Santa Rosa Gold Project is subject to the Santa Rosa Purchase Agreement pursuant to which the Company must make a cash payment of US$250,000 on or before November 30, 2014 (paid November 21, 2014) and a final cash payment of US$450,000 upon receipt of the San Ramon environmental permit in order to retain its interest in the property. If the Company fails to make this payment, it may lose its interest in the property. Any failure by the Company to retain title to properties which comprise its projects could have a material adverse effect on the Company and the value of its Common Shares. The Company has sufficient cash on hand and intends to make this final payment.

Title on mineral properties and mining rights involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyance history of many mining properties. The Company has diligently investigated and continues to diligently investigate and validate title to its mineral claims; however, this should not be construed as a guarantee of title, nor does the Company carry title insurance. The Company is continuously in the process of establishing the certainty of the title of mineral concessions which it holds either directly or through its equity interest in its subsidiaries or will be seeking to consolidate those titles through a government-sanctioned process. The Company cannot give any assurance that title to properties it acquired individually or through historical share acquisitions will not be challenged or impugned and cannot guarantee that the Company will have or acquire valid title to these mining properties.

The Company Has No Mineral Properties in Production.

The Company does not currently have mineral properties in production. The future development of properties found to be economically feasible, and the development of which is approved by the Board, will require the construction and operation of mines, processing plants and related infrastructure. As a result, the Company is and will continue to be subject to all of the risks associated with establishing new mining operations, including:

- the timing and cost, which can be considerable, of the construction of mining and processing facilities;
- the availability and cost of skilled labour and mining equipment;
- the need to obtain necessary environmental and other governmental approvals and permits and the
- timing of the receipt of those approvals and permits;
- the availability of funds to finance construction and development activities;
- potential opposition from non-governmental organizations, environmental groups or locals;
- groups which may delay or prevent development activities; and
- potential increases in construction and operating costs due to changes in the cost of fuel, power, materials and supplies.

RISKS AND UNCERTAINITES (continued)

The costs, timing and complexities of developing the Company's projects may be greater than anticipated because the majority of such property interests are not located in developed areas, and, as a result, the Company's property interests may not be served by appropriate road access, water and power supply and other support infrastructure. Cost estimates may increase as more detailed engineering work is completed on a project. It is common in new mining operations to experience unexpected costs, problems and delays during construction, development and mine start-up. In addition, delays in the early stages of mineral production often occur. Accordingly, the Company cannot provide assurance that its activities will result in profitable mining operations at its mineral properties.

Metal Price Volatility

The Company's business is strongly affected by the world market price of gold. If the world market price of gold were to drop and the prices realized by the Company on gold sales were to decrease significantly and remain at such a level for any substantial period, the Company's future profitability and cash flow would be negatively affected.

Gold prices can be subject to volatile price movements, which can be material and can occur over short periods of time and are affected by numerous factors, all of which are beyond the Company's control. Industry factors that may affect the price of gold include: industrial and jewellery demand; the level of demand for gold as an investment; central bank lending, sales and purchases of gold; speculative trading; and costs of and levels of global gold production by producers of gold. Gold prices may also be affected by macroeconomic factors, including: expectations of the future rate of inflation; the strength of, and confidence in, the U.S. dollar, the currency in which the price of gold is generally quoted, and other currencies; interest rates; and global or regional, political or economic uncertainties.

Depending on the market price of gold, the Company may determine that it is not economically feasible to continue some or all of its operations or the development of some or all of its projects, as applicable, which could have an adverse impact on the Company's financial performance and results of operations. In such a circumstance, the Company may also curtail or suspend some or all of its exploration activities.

History of Losses and No Immediate Foreseeable Earnings

The Company has a history of losses and there can be no assurance that it will ever be profitable. The Company expects to continue to incur losses unless and until such time as it develops its properties and commences profitable mining operations on its properties. The development of the properties will require the commitment of substantial financial resources. The amount and timing of expenditures will depend on a number of factors, some of which are beyond the Company's control, including the progress of ongoing exploration, studies and development, the results of consultant analysis and recommendations, the rate at which operating losses are incurred and the execution of any joint venture agreements with any strategic partners, if any. There can be no assurance that the Company will ever achieve profitability.

RISKS AND UNCERTAINITES (continued)

Mining Risks and Insurance Risks

The mining industry is subject to significant risks and hazards, including environmental hazards, industrial accidents, unusual or unexpected geological conditions, labour force disruptions, civil strife, unavailability of materials and equipment, weather conditions, pit wall failures, rock bursts, cave-ins, flooding, seismic activity, water conditions and gold bullion losses, most of which are beyond the Company's control. These risks and hazards could result in: (i) damage to, or destruction of, mineral properties or producing facilities; personal injury or death; environmental damage; (ii) delays in mining; and (iii) monetary losses and possible legal liability. As a result, production may fall below historic or estimated levels and the Company may incur significant costs or experience significant delays that could have a material adverse effect on the Company's financial performance, liquidity and results of operation.

The Company does not maintain insurance to cover these risks and hazards. The lack of, or insufficiency of, insurance coverage could adversely affect the Company's cash flow and overall profitability.

Permitting Approvals

The operations of the Company and the exploration agreements into which it has entered require approvals, licenses and permits from various regulatory authorities, governmental and otherwise (including project specific governmental decrees) that are by no means guaranteed. The Company believes that it holds or will obtain all necessary approvals, licenses and permits under applicable laws and regulations in respect of its main projects and, to the extent that they have already been granted, believes it is presently complying in all material respects with the terms of such approvals, licenses and permits. However, such approvals, licenses and permits are subject to change in various circumstances and further project-specific governmental decrees and/or legislative enactments may be required. There can be no guarantee that the Company will be able to obtain or maintain all necessary approvals, licenses and permits that may be required and/or that all project-specific governmental decrees and/or required legislative enactments will be forthcoming to explore and develop the properties on which it has exploration rights, commence construction or operation of mining facilities or to maintain continued operations that economically justify the costs involved.

Repatriation of Earnings Risk

There are currently no restrictions on the repatriation from Colombia of earnings to foreign entities. However, there can be no assurance that restrictions on repatriations of earnings from Colombia will not be imposed in the future. Exchange control regulations require that any proceeds in foreign currency originated on exports of goods from Colombia (including minerals) be repatriated to Colombia. However, purchase of foreign currency is allowed through any Colombian authorized financial entities for the purpose of payments to foreign suppliers, repayment of foreign debt, payments of dividends to foreign stockholders and other foreign expenses.

RISKS AND UNCERTAINITES (continued)

Changes in Legislation

The mining industry in Colombia is subject to extensive controls and regulations imposed by various levels of government. All current legislation is a matter of public record and the Company will be unable to predict what additional legislation or amendments may be enacted. Amendments to current laws, regulations and permits governing operations and activities of mining companies, including environmental laws and regulations which are evolving in Colombia, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in expenditures and costs, affect the Company's ability to expand or transfer existing operations or require the Company to abandon or delay the development of new properties.

Economic and Political Factors in Colombia

Although Colombia has a long-standing tradition respecting the rule of law, which has been bolstered in recent years by the present and former government's policies and programs, no assurances can be given that the Company's plans and operations will not be adversely affected by future developments in Colombia. The Company's property interests and proposed exploration activities in Colombia are subject to political, economic and other uncertainties, including the risk of expropriation, nationalization, renegotiation or nullification of existing contracts, mining licenses and permits or other agreements, changes in laws or taxation policies, currency exchange restrictions, and changing political conditions and international monetary fluctuations. Future government actions concerning the economy, taxation, or the operation and regulation of nationally important facilities such as mines, could have a significant effect on the Company. Colombia is home to South America's longest running insurgency. While the situation has improved significantly in recent years, the conflict continues in very localized areas and there can be no guarantee that the situation not again deteriorate. Any increase in kidnapping, gang warfare, homicide and/or terrorist activity in Colombia generally may disrupt supply chains and discourage qualified individuals from being involved with the Company's operations.

Additionally, the perception that matters have not improved in Colombia may hinder the Company's ability to access capital in a timely or cost effective manner. Any changes in regulations or shifts in political attitudes are beyond the Company's control and may adversely affect the Company's business.

Exploration may be affected in varying degrees by government regulations with respect to restrictions on future exploitation and production, price controls, export controls, foreign exchange controls, income and/or mining taxes, expropriation of property, environmental legislation and mine and/or site safety.

Competition

The mineral exploration and mining business is competitive in all of its phases. The Company competes with numerous other parties with greater financial, technical and other resources than the Company, in the search for and acquisition of exploration and development rights on attractive mineral properties. The Company's ability to acquire exploration and development rights on properties in the future will depend not only on its ability to develop the properties on which it currently has exploration and development rights, but also on its ability to select and acquire exploration and development rights on suitable properties for exploration and development. There is no assurance that the Company will continue to be able to compete successfully in acquiring exploration and development rights on such properties.

RISKS AND UNCERTAINITES (continued)

Changes to Environmental Laws

The Company's operations are subject to the extensive environmental risks inherent in the gold mining industry. The current or future operations of the Company, including development activities, commencement of production on its properties, potential mining and processing operations and exploration activities require permits from various governmental authorities and such operations are and will be governed by laws and regulations governing prospecting, development, mining, production, exports, taxes, labor standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters.

Companies engaged in the development and operation of mines and related facilities generally experience increased costs, and delays in production and other schedules as a result of the need to comply with applicable laws, regulations and permits. Existing and possible future environmental legislation, regulations and actions could cause significant additional expense, capital expenditures, restrictions and delays in the activities of the Company. Although the Company believes that it is in substantial compliance in all material respects with applicable material environmental laws and regulations, there are certain risks inherent in its activities such as accidental spills, leakages or other unforeseen circumstances, which could subject the Company to extensive liability. In addition, the Company cannot assure that the illegal miners operating on its properties are in compliance with applicable environmental laws and regulations.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations. Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

Shortage of Experienced Personnel and Equipment

The ability to identify, negotiate and consummate transactions that will benefit the Company is dependent upon the efforts of the Company's management team. The loss of the services of any member of management could have a material adverse effect on the Company. The Company's future drilling activities may require significant investment in additional personnel and capital equipment. Given the current level of demand for equipment and experienced personnel within the mining industry, there can be no assurance that the Company will be able to acquire the necessary resources to successfully implement its business plan.

Furthermore, certain of the directors and officers of the Company are directors and officers of other reporting issuers and, as such, will devote only a portion of their time to the affairs of the Company.

RISKS AND UNCERTAINITES (continued)

Conflicts of Interest

Certain of the Company's directors and officers serve as directors or officers of other companies or have significant shareholdings in other resource companies and, to the extent that such other companies participate in ventures in which the Company may participate, the directors of the Company will have a conflict of interest in negotiating and concluding terms respecting the extent of such participation. In the event that such a conflict of interest arises, a director or officer who has such a conflict will disclose that conflict and will abstain from voting for or against the approval of such participation or such terms. In determining whether or not the Company will participate in a particular program and the interest therein to be acquired by it, the directors will consider, among other things, the degree of risk to which the Company may be exposed and its financial position at that time.

Possible Volatility of Stock Price

The market price of the Company's Common Shares can be subject to wide fluctuations in response to factors such as actual or anticipated variations in the Company's results of operations, changes in financial estimates by securities analysts, general market conditions, the issuance of Common Shares in connection with acquisitions made by the Company or otherwise, and other factors. Market fluctuations, as well as general economic, political and market conditions such as recessions, interest rate changes or international currency fluctuations may adversely affect the market price of the Common Shares.

Enforcement of Civil Liabilities

Substantially all of the Company's assets are located outside of Canada and certain of the directors and officers of the Company are residents outside of Canada. As a result, it may be difficult or impossible to enforce judgments granted by a court in Canada against the assets of the Company or any of the Company's directors and officers residing outside of Canada.

Dividends

Any payments of dividends on the Common Shares will be dependent upon the financial requirements of the Company to finance future growth, the financial condition of the Company and other factors which the Board may consider appropriate in the circumstance. It is unlikely that the Company will pay dividends in the immediate or foreseeable future.

Infrastructure

Mining, processing, development and exploration activities depend, to one degree or another, on adequate infrastructure. Reliable roads, bridges, power sources and water supply are important determinants, which effect capital and operating costs. Unusual or infrequent weather phenomena, terrorism, sabotage, community, government or other interference in the maintenance or provision of such infrastructure could adversely affect the Company's operations, financial condition and results of operations.

RISKS AND UNCERTAINITES (continued)

Financing Risks

Additional funding may be required to complete the proposed or future exploration and other programs on the properties. There is no assurance that any such funds will be available. Failure to obtain additional financing, if required, on a timely basis, could cause the Company to reduce or delay its proposed operations.

The majority of sources of funds currently available to the Company for its acquisition and development projects are in large portion derived from the issuance of equity. While the Company has been successful in the past in obtaining equity financing to undertake its currently planned exploration and development programs, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

Option agreements and other risk sharing structures

The Company is party to the Pavo Real Shareholder Agreement with a third party and may enter into other comparable agreements in the future. Any failure of a partner to meet its obligations to the Company or third parties, or any disputes with respect to the parties' respective rights and obligations could have a material adverse effect on such projects. In addition, the Company may suffer dilution of its interest in the properties if it is not able to meet its funding obligations under the terms of the joint venture.

Currency Risk

The Company maintains its accounts in Canadian dollars and the market for gold is principally denominated in U.S. dollars. The Company's operations in Colombia make it subject to foreign currency fluctuations and such fluctuations may materially affect the Company's financial position and results. Colombia has a free and unrestricted supply and demand market. The Company is exposed to foreign exchange risk from the exchange rate of Colombian pesos relative to the Canadian and U.S. dollars. Foreign exchange risk is mainly derived from assets and liabilities stated in Colombian pesos. The Company limits its foreign exchange risk by the acquisition of short-term financial instruments and, when possible, minimizes its Colombian peso monetary asset positions.

Price Volatility of Publicly Traded Securities

In recent years, the securities markets in the United States and Canada have experienced a high level of price and volume volatility, and the market prices of securities of many companies have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur. The market for the Common Shares will be subject to market trends generally, notwithstanding any potential business of the Company. The value of the Shares will be affected by such volatility.

Stress in the Global Economy

Reduction in credit, combined with reduced economic activity and the fluctuations in the United States dollar, may adversely affect businesses and industries that purchase commodities, affecting commodity prices in more significant and unpredictable ways than the normal risks associated with commodity prices. The availability of services such as drilling contractors and geological service companies and/or the terms on which these services are provided may be adversely affected by the economic impact on the service providers. The adverse effects on the capital markets generally make the raising of capital by equity or debt financing much more difficult and the Company is dependent upon the capital markets to raise financing. Any of these events, or any other events caused by turmoil in world financial markets, may have a material adverse effect on the Company's business, operating results, and financial condition.

APPROVAL

The Audit Committee of the board of Directors of the Company, to whom the authority was delegated by a resolution of the board of directors, has approved the disclosure contained in this MD&A. A copy of this MD&A is filed on SEDAR will be provided to anyone who requests it.

FORWARD-LOOKING INFORMATION

Statements contained in this MD&A that are not historical facts are forward-looking statements (within the meaning of the Canadian securities legislation and the U.S. Private Securities Litigation Reform Act of 1995) that involve risks and uncertainties. Forward-looking statements include, but are not limited to, statements with respect to the future price of metals; the estimation of mineral reserves and resources, the realization of mineral reserve estimates; the timing and amount of estimated future production, costs of production, and capital expenditures; costs and timing of the development of new deposits; success of exploration activities, permitting time lines, currency fluctuations, requirements for additional capital, government regulation of mining operations, environmental risks, unanticipated reclamation expenses, title disputes or claims, limitations on insurance coverage and the timing and possible outcome of pending litigation. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and other factors include, among others, risks related to the integration of acquisitions; risks related to operations; risks related to joint venture operations; actual results of current exploration activities; actual results of current reclamation activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of metals; possible variations in ore reserves, grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of development or construction activities, as well as those factors discussed in the sections entitled "Risks and Uncertainties" in this MD&A. Although the Company has attempted to identify important factors that could affect the Company and may cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. In light of the risks and uncertainties inherent in all forward-looking statements, the inclusion or incorporation by reference of forward-looking statements in this MD&A should not be considered a representation by the Company or any other person that the Company's objectives or plans will be achieved.

FORWARD-LOOKING INFORMATION (Continued)

The forward-looking statements in this MD&A speak only as of the date hereof. The Company does not undertake any obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date hereof to reflect the occurrence of unanticipated events.

Forward-looking statements and other information contained herein concerning the mining industry and general expectations concerning the mining industry are based on estimates prepared by the Company using data from publicly available industry sources as well as from market research and industry analysis and on assumptions based on data and knowledge of this industry which the Company believes to be reasonable. However, this data is inherently imprecise, although generally indicative of relative market positions, market shares and performance characteristics. While the Company is not aware of any misstatements regarding any industry data presented herein, the industry involves risks and uncertainties and is subject to change based on various factors.
