B. Business of Issuer

OVERVIEW

Riverdale Oil and Gas Corporation limited its operations to acquiring properties either for drilling and production, or for production of oil, gas, or geothermal steam or water and does not conduct working interest operations. The Company relies upon highly qualified entities to present it with researched and evaluated prospects for development participation or property acquisition. It also relies upon a properly bonded operator(s) to conduct the daily field and administrative operations for the Company's non-operated working interests. The

purpose of restricting itself to a non-operational position of oil and gas activity is to considerably minimize the risks associated with oil and gas operations.

The Company has focused its attention on the State of Texas for its oil and gas activity, and especially in the areas of south Texas and the Gulf Coast of Texas. It has intentionally concentrated its interest in those areas, as south Texas has historically been a very prolific natural gas and condensate producing area, with a great potential for development; and, the Gulf Coast of Texas likewise has a long history of prolific oil and gas production, which, the Company believes, has the opportunities for finding new reservoirs in new fields and in once thought depleted oil and gas fields.

DESCRIPTION OF LEASEHOLD INTERESTS

Riverdale Oil and Gas Corporation currently holds and owns interests in the following oil and gas leases:

Lease	County/State	%Working Interest
Koomey Lease Well #2	Waller/Texas	37.50%
Koomey Lease Wells #4 & 5	Waller/Texas	5.50%
Koomey LeaseSalt Water Disposal	Waller/Texas	5.00%
Sills Lease Well #1	Victoria/Texas	1.00%
Lampley Lease Well #1R	Lavaca /Texas	1.667%
Hitzfelder/Calame 5 Wells, 310 Acres	Frio/Texas	2.50%
Stowe #5	Waller/Texas	2.50%

The above interests listed are in various phases of development or production. The interests that the Company earns is through the purchase of working interests and also carried working interests, meaning that the funding entities pay for 100% of the costs to the point of producing a well into the oil tanks or into the gas pipeline. Once operational, the Company pays its pro rata share of taxes and lease operating expenses.

1. the issuer's primary and secondary SIC codes;

Standard Industrial Code for the Company's main line of business is: 1382

There is no secondary SIC code.

2. if the issuer has never conducted operations, is in the development stage, or is currently conducting operations;

The Company is currently conducting business and operations.

3. if the issuer is considered a "shell company" pursuant to Securities Act Rule 405;

The Company is not a "shell company".

4. the names of any parent, subsidiary, or affiliate of the issuer, and its business purpose, its method of operation, its ownership, and whether it is included in financial statements attached to this disclosure statement;

There is no parent, subsidiary, or affiliate of the issuer.

5. the effect of existing or probable governmental regulations on the business;

There are numerous governmental regulations which impact the operations and the operated interests of the Company. These regulations include: environmental, tax, corporate governance and, various leasing requirements at both the state and federal level.

6. an estimate of the amount spent during each of the last two fiscal years on research and development activities, and if applicable, the extent to which the cost of such activities are borne directly by customers;

The Company has not spent any material amounts in the last two fiscal years on research or development activities. Any costs associated with such activities are ultimately borne directly by customers.

7. costs and effects of compliance with environmental laws (federal, state and local); and

The oil and gas industry faces a wide range of regulations, including environmental laws and regulations, occupational regulations (including OSHA); and local and state licensing and permitting requirements. The Company, through the lease operating expense associated with its production revenue, pays its pro rata share of the expenses, should any occur.

8. the number of total employees and number of full-time employees.

The Company employs four employees, of which 2 are full-time.

Item IX The nature of products or services offered

A. principal products or services offered

The Company's principal service is oil and gas leasehold development. The Company owns or acquires oil and gas lease rights for the development of oil and gas reserves. Our service is to an entity or entities that will fund exploration and/or activity, and either operate the project or join with us to contract an operator for the project.

Company revenues are derived from oil and gas sales from working interest revenue. It is the intention of the company to acquire royalty interests through the retention of overriding royalty interests (ORRI) when working interests are assigned. It is also the intention of the Company to acquire mineral royalty ownership, purchased from mineral owners that wish to sell their mineral estates or portions of those estates.

B. distribution methods of the products or services;

The primary method for distribution of our oil and gas prospects has been through long standing relationships with entities that are active in the oil and gas industry or active in the

investment of energy programs. It is our intent to publicize the Company at major oil and gas industry trade shows that are designed to exhibit oil and gas prospects.

C. status of any publicly announced new product or service;

The Company has not made any public announcement regarding new products or services.

D. competitive business conditions, the issuer's competitive position in the industry, and methods of competition;

There is always a level of competition within the oil and gas industry to create, market and fund oil and gas prospects. The Company is highly competitive in its position in the oil and gas industry. The Company believes that its primary competitive advantage has been through developing or acquiring high-quality oil and gas prospects that have a potentially low risk to high reward basis, and developing ongoing relationships with those individuals and entities that fund and develop our prospects.

E. sources and availability of raw materials and the names of principal suppliers;

The Company feels strongly that there exists an ample supply of oil and gas left to be economically developed. The Company's primary objective is to identify feasible areas for accumulations of oil and gas; areas of by-passed reserves; incomplete or poor initial oil and gas operations; and, other opportunities that offer a financial benefit to the Company.

F. dependence on one or a few major customers;

The Company is not dependent upon one or a few major customers.

G. patents, trademarks, franchises, concessions, royalty agreements or labor contracts, including their duration; and

The Company does not have any patents, trademarks, franchises, concessions, royalty agreements or labor contracts.

H. the need for any government approval of principal products or services and the status of any requested government approvals.

The Company does not have a need for government approval of principal products or services. Any governmental needs for approval are the responsibility of the operator of the prospect. The Company does not engage in field operations and it contracts with bonded operators to operate its working interests.

Item X The nature and extent of the issuer's facilities.

The Company's corporate headquarters are located in Austin, Texas. The Company operates out of 1,986 square feet of leased office space. The expiration date of the lease is June 1, 2017. In the opinion of management, the Company's current space is adequate for its operating needs.

Riverdale Oil and Gas Corporation

Notes to Consolidated Financial Statements

The financial activity and financial state of the Company through December 31, 2014, had been very positive, with increased production revenue and Gross Profit. Corporate expense increased slightly with increased fees in developing our RVDO 2014-1 Program, but ended the year with a net income of \$1,492.00 up from a loss of \$177.00 from the prior year.

The Total Revenues of the Company increased from \$17,314.00 in 2013 to \$22,388.00 in 2014.

The Gross Profits increased from \$12,600.00 in 2013 to \$16,364.00 in 2014.

The Company went from Net Loss of \$(177.00) in 2013 to a Net Income of \$1,492.00 in 2014.

During 2014, the Company utilized its revenue flow to initiate the 2014 year acquisition program, designed to create new, low cost oil and gas production interests, non-operating drilling prospect interests, and other oil and gas related projects. These programs are intended to grow the Company through real assets that can book true proven reserves and legitimate undeveloped acreage. The RVDO 2014-1 Program commenced on January 1, 2014. During the 4th Quarter, the Company prepared to make its first purchase of producing properties. The Program will provide the funding participants with 18.75% carried working interest (CWI) and the Company with 6.25% CWI in the various acquisitions. The Program has been designed to return the leasehold costs to the acquisition pool for future lease acquisition, increasing the activity level and asset base for the Participants and the Company. Year 2014 has been a year of stabilization for significant increased capital infusion for 2015.

The Company still maintains revenue flow from existing oil and gas well interests that are considered to be stable production, with little annual decline in production. The annual revenue decline was further arrested through the increase pricing for oil and gas.

The Consolidated Financial Statements are presenting a very positive indication for a strong improvement seen in 2014 and continued strong growth in 2015.

Item XVI Management's Discussion and Analysis or Plan of Operation.

A. Plan of Operation

The Company is actively pursuing an increase in its asset base through the generation and the acquisition of low risk, high yield oil and gas objectives, at a very low cost basis. The Company has presented a plan for capitalization to accelerate its acquisition program and fund its prospect generation activities. Beginning in the First Quarter 2015, the Company will continue its acquisition program and production interest acquisition. The Company will expand its operations outside the State of Texas, looking for opportunities that make good economic sense. To rapidly and significantly expand its asset base, the Company will initiate an aggressive capital funding program, to take advantage of the excellent opportunities created by the significant drop in the price of oil and gas.

Management's Discussion and Analysis of Financial Condition and Results of Operations.

- 1. For the fiscal years ended December 31, 2013 and December 31, 2014
- 1. Introduction Full fiscal years

The following discussion should be read in conjunction with the consolidated Financial Statements of the Company and related notes thereto included elsewhere herein.

Overview

Riverdale Oil and Gas Corporation is an energy company that owns mineral rights that require development. It has oil production revenue from those minerals, operated by others. Significant mineral right holdings of the Company is currently being developed by outside operations that could materially increase the proved developed producing status of the Company's holdings. In recent years, there has been a fairly continuous market for oil and gas, and we expect that trend to continue well into the future. There are many sources for liquidity, as the oil and gas marketplace is desirous of purchasing prospects for development. The volatility of oil and gas pricing has appeared to become more apparent, with the global manipulation of fossil fuels. The period from 2013 to the end of 2014, the company went from a net loss of (\$177.00) to net income of \$1,492.00. This was due largely to the increase in production revenue and stable generation fees. Despite the global negative impact on oil and gas pricing in the 4th Quarter of 2014, the Company had made tremendous strides in increasing its financial stability and condition laying the groundwork for continued and acceleration of growth.

Interim Periods

The financial condition of the Company increased during 2014. The company increased the Total Stockholders' Equity from \$9,299.00 to\$ 9,991.00, while increasing the Total Revenues by \$5,074.00 during 2014.

B. Off-Balance Sheet Arrangements

The Company has not had and does not intend to have any off-balance sheet arrangements.
