#### **NOTE 2 - BASIS OF PRESENTATION**

The accompanying financial statements have been prepared in accordance with generally accepted accounting principles of the United States of America ("GAAP") for interim financial statements pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three-month period ended March 31, 2017, are not necessarily indicative of the results that may be expected for the year ending December 31, 2017. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, as filed with the Securities and Exchange Commission ("SEC") on March 30, 2017.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported amount of revenues and expenses during the reporting period. Actual results may differ from these estimates.

#### **NOTE 3 - SIGNIFICANT ACCOUNTING POLICIES**

#### Revenue Recognition

Our electricity revenue is recognized by our Company upon delivery of electricity to a customer's meter. This method of revenue recognition is commonly referred to as the flow method. The flow method of revenue relies upon Electric Reliability Council of Texas ("ERCOT") settlement statements to determine the estimated revenue for a given month. Supply delivered to customers for the month, measured on a daily basis, provides the basis for revenues. Electricity revenue consists of proceeds from energy sales, including, pass through charges from the Transmission and Distribution Providers ("TDSPs") billed to the customer at cost.

#### Unbilled Revenue and Accounts Receivable

Electric services not billed by month-end are accrued based upon estimated deliveries to customers as tracked and recorded by ERCOT multiplied by our average billing rate per kilowatt hour ("kWh") in effect at the time. At the end of each calendar month, revenue is accrued to unbilled receivables based on the estimated amount of power delivered to customers using the flow technique. Unbilled revenue also includes accruals for estimated TDSP charges and monthly service charges applicable to the estimated electricity usage for the period. All charges that were physically billed to customers in the calendar month are recorded from the unbilled account to the customer receivable account. Unbilled accounts as of March 31, 2017 and December 31,2016 were estimated at \$12,630,394 and \$10,922,288, respectively. Accounts receivable are customer obligations billed at the customer's monthly meter read date for that period's electricity usage and due within 16 days of the date of the invoice. Balances past due are subject to a late fee that is assessed on that billing.

The Company determines the allowance based upon a review of outstanding receivables, historical write-off experience and existing economic conditions. Receivables past due over 90 days are considered delinquent and reviewed individually for collectability. After all means of collection have been exhausted, delinquent receivables are written off. Management has determined that the allowance for doubtful accounts as of March 31, 2017, and December 31, 2016 is \$1,497,780 and \$999,046 respectively. Bad debt expense for the three months ended March 31, 2017 and 2016 is \$501,261 and \$433,134, respectively.

#### Cost Recognition

Direct energy costs are recorded when the electricity is delivered to the customer's meter.

Cost of Goods Sold ("COGS") include electric power purchased and pass through charges from the TDSP's in the areas serviced by the Company. TDSP charges are costs for metering services and maintenance of the electric grid. TDSP charges are established by regulation of the PUCT.

The energy portion of our COGS is comprised of two components: bilateral wholesale costs and balancing/ancillary costs. These two cost components are incurred and recognized differently as follows:

Bilateral wholesale costs are incurred through contractual arrangements with wholesale power suppliers for firm delivery of power at a fixed volume and fixed price. We are invoiced for these wholesale volumes at the end of each calendar month for the volumes purchased for delivery during the month, with payment due 20 days after the end of the month.

Balancing/ancillary costs are based on the customer load and are determined by ERCOT through a multiple step settlement process. Balancing costs/revenues are related to the differential between supply that we provided through our bilateral wholesale supply and the supply required to serve our customer load. The Company endeavors to minimize the amount of balancing/ancillary costs through our load forecasting and forward purchasing programs.

#### NOTE 4 – PRIVATE PLACEMENT OF SERIES B PREFERRED SHARES

Each Commodity Loan and any Credit Guaranty shall bear interest on the outstanding principal amount thereof, from the date such Commodity Loan or Credit Guaranty is issued until it becomes due or is revoked, respectively, at a rate per annum equal to the Prime Rate (as reported by the Wall Street Journal) plus two percent (2%). The Company covenanted not to, among other things, (a) merge or consolidate with any other person, (b) acquire all or substantially all of the capital stock or property of another person, (c) create, assume or suffer to exist any lien on any property now owned or hereafter acquired by the Company except for permitted liens (as set forth in the Credit Agreement) or (d) become liable for any indebtedness (other than permitted indebtedness, as set forth in the Credit Agreement).

In connection with the Agreement, the Borrower made certain customary representations and warranties, and agreed that while the Loan amount remains outstanding, it would not take certain actions, including that it will not incur certain debts (as defined in the Agreement); create, assume, or suffer to exist any lien on any property or asset of the Borrower, except those set forth in and allowed by the Agreement; consolidate or merge with any other entity; or sell, lease, or transfer all or substantially all of the assets of the Borrower.

Our filings with the SEC, including our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those filings, pursuant to Sections 13(a) and 15(d) of the Exchange Act, are available free of charge at www.summerenergy.com, when such reports are available via the EDGAR system maintained by the SEC at www.sec.gov.

#### **Recent Developments**

The consolidated financial statements include the accounts of Summer Energy Holdings, Inc., a Nevada corporation and its wholly-owned subsidiaries Summer Energy, LLC, a Texas limited liability company ("Summer LLC") Summer EM Marketing ("Marketing LLC") and Summer Energy of Ohio, LLC ("Summer Ohio") (collectively referred to as the "Company," "we," "our," or "us").

On March 27, 2012, Summer LLC became a wholly-owned subsidiary of Summer Energy Holdings, Inc. (formerly known as Castwell Precast Corporation) through a reverse acquisition transaction, which resulted in the former members of Summer LLC owning approximately 92.3% of the Summer Energy Holdings, Inc. outstanding common stock. Our sole operations are conducted through Summer LLC.

Marketing LLC was formed in the state of Texas on November 6, 2012 to provide marketing services to Summer LLC.

Summer Ohio was formed in the State of Ohio on December 16, 2013 to procure and sell electricity in the state of Ohio. The Public Utilities Commission of Ohio ("PUCO") issued a certificate as a Retail Electric Service Provider to Summer Ohio on June 16, 2015. At this time, there is no business activity in the State of Ohio.

#### Plan of Operation

Our wholly owned subsidiary, Summer LLC, is a licensed Retail Electricity Provider (REP) in the State of Texas. In general, Texas regulatory structure permits REPs, such as Summer LLC, to procure and sell electricity at unregulated prices. REPs pay the local transmission and distribution utilities a regulated tariff rate for delivering electricity to their customers. As a REP, we sell electricity and provide the related billing, customer service, collections and remittance services to residential and commercial customers. We offer retail electricity to commercial and residential customers in designated target markets within the State of Texas. In the commercial market, the primary target is small to medium-sized customers (less than one megawatt of peak usage), but we will also selectively pursue larger commercial customers through management's existing, historical relationships. Residential customers are a secondary target market. We anticipate that a majority of our customers will be located in the Houston and Dallas-Fort Worth metropolitan areas; although, we anticipate a growing number will be located in a variety of other metropolitan and rural areas within Texas.

We began delivering electricity to customers in mid-February 2012.

#### **Results of Operations**

#### Quarter Ended March 31, 2017, compared to the Quarter ended March 31, 2016

**Revenue** – For the quarter ended March 31, 2017, we generated \$22,197,834 in electricity revenue primarily from commercial customers, and from the addition of various long and short-term residential customers. The majority of our revenue comes from the flow of electricity to customers. However, we also generated revenues from contract cancellation fees, disconnection fees and late fees of \$1,133,688. Revenues for the quarter ended March 31, 2016 were \$18,769,166 from electricity revenue and \$887,543 from disconnection and late fees.

Management plans to continue to execute on its sales and marketing program to solicit individual commercial and residential customers. Management also plans to continue to acquire portfolios of commercial and residential customers when offered at reasonable prices.

Cost of Goods Sold and Gross Margin – For the quarter ended March 31, 2017, cost of goods sold and gross profit totaled \$19,576,270 and \$3,755,252, respectively. Cost of goods sold and gross profit recorded in the quarter ended March 31, 2016 were \$15,256,269 and \$4,400,440, respectively.

The three months ended March 2017 compared to the three months ended March 2016 reflects a lower profit margin which is a result of compressed unit margin caused by the competitive pressures in the marketplace and the customer base for the Company has shifted towards a greater number of commercial accounts than residential accounts which yield lower unit margins.

Operating expenses – Operating expenses for the quarter ended March 31, 2017 totaled \$3,659,572, consisting primarily of general and administrative expenses of \$2,227,353, stock compensation of \$76,624, bank service fees of \$181,126, commission expense of \$757,712, collection fees/sales and verification fees of \$13,828, professional fees of \$122,834, and \$280,095 of billing fees. Billing fees are primarily costs paid to third party Electronic Data Inter-Chain (EDI) provider to handle transactions between us, ERCOT and the TDSPs in order to produce customer bills.

Operating expenses for the quarter ended March 31, 2016 totaled \$2,910,856, consisting primarily of general and administrative expenses of \$1,792,484, stock compensation of \$7,500, bank service fees of \$150,151, commission expense of \$629,451, collection fees/sales and verification fees of \$6,642, professional fees of \$93,736, and \$230,892 of billing fees.

Net Income/(Loss) – Net income/(loss) for the quarter ended March 31, 2017 and 2016, totaled \$(48,000) and \$1,040,633, respectively, relating primarily to operating expenses and cost of goods sold incurred in excess of revenue as we attempt to obtain economies of scale.

#### **Liquidity and Capital Resources**

At March 31, 2017 and December 31, 2016, our cash totaled \$784,464 and \$1,523,008, respectively. Our principal cash requirements for the quarter ended March 31, 2017, were for operating expenses and cost of goods sold (including power purchases, employee cost, and customer acquisition) and capital expenditures. During the quarter ended March 31, 2017, the primary source of cash was from electricity revenues. During the quarter ended March 31, 2016, the primary source of cash was from electricity revenues.

General - The Company's decrease in net cash flow during the first three months of 2017 is attributable to \$730,717 cash used in operating activities, \$7,827 cash used in investing activities which includes \$2,563 for the purchase of property and equipment. The Company's increase in net cash flow during the first three months of 2016 is attributable to \$378,420 cash provided in operating activities, \$133,295 cash used in investing activities which includes \$50,612 for the purchase of property and equipment and \$155,936 used by financing activity.

The Company has no present agreements or commitments with respect to any material acquisitions of other businesses, products, product rights or technologies. However, we will continue to evaluate acquisitions of and/or investments in products, technologies, or companies that complement our business and may make such acquisitions and/or investments in the future. Accordingly, we may need to obtain additional sources of capital in the future to finance any such acquisitions and/or investments. We may not be able to obtain such financing on commercially reasonable terms, if at all. If we are able to obtain additional financing, such financing may result in restrictions on our operations, in the case of debt financing, or substantial dilution for stockholders, in the case of equity financing.

#### Cash Outflows for Capital Assets, Customer Acquisition and Deposits

We expect to expend funds for capital assets, customer acquisition and deposits in connection with the expansion of our business during the remainder of the current fiscal year. The anticipated source of funds will be cash on hand and the capital raised through the year ended December 31, 2017.

#### **Future Financing Needs**

The Company did not commence operations and the generation of revenue until the middle of the three-month period ended March 31, 2012. Management believes that we have adequate liquidity to support operations. But, this belief is based upon many assumptions and is subject to numerous risks.

While we believe in the viability of our plan of operations and strategy to generate revenues and in our ability to raise additional funds, there can be no assurances that our plan of operations or ability to raise capital will be successful. The ability to grow is dependent upon our ability to further implement our business plan, generate revenues, and obtain additional financing, if and as needed.

#### **Off-Balance Sheet Arrangements**

Our existing wholesale power purchase agreement provides that we will provide additional credit support to cover mark-to-market risk in connection with the purchase of long term power. A mark-to-market credit risk occurs when the price of previously purchased long term power is greater than the current market price for power purchased for the same term. While we believe that the current environment of historically low power prices limits our exposure to risk, a collateral call, should it occur, could limit our working capital and, if we fail to meet the collateral call, could cause liquidation of power positions.

#### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

As a "small reporting company" as defined by Item 10 of Regulation S-K, we are not required to provide this information.

#### ITEM 4. CONTROLS AND PROCEDURES.

#### **Evaluation of Disclosure Controls and Procedures**

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this Quarterly Report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures, as of the end of the period covered by this Quarterly Report, were effective at the reasonable assurance level to ensure that the information required to be disclosed by us in reports filed under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure. A controls system cannot provide absolute assurance, however, that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

#### **Changes in Internal Control over Financial Reporting**

There have been no changes in internal control over financial reporting during the period of time covered by this Quarterly Report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. Our process for evaluating controls and procedures is continuous and encompasses constant improvement of the design and effectiveness of established controls and procedures and the remediation of any deficiencies which may be identified during this process.

#### **PART II – OTHER INFORMATION**

#### ITEM 1A. RISK FACTORS

As of the date of this filing, there have been no material changes to the Risk Factors included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, filed with the SEC on March 30, 2017 (the "2016 Form 10-K"). The Risk Factors set forth in the 2016 Form 10-K should be read carefully in connection with evaluating our business and in connection with the forward-looking statements contained in this Quarterly Report on Form 10-Q. Any of the risks described in the 2016 Form 10-K could materially adversely affect our business, financial condition or future results and the actual outcome of matters as to which forward-looking statements are made. These are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.
