6) **Describe the Issuer's Business, Products and Services**

TeleFix Communications, Inc., operating subsidiary of Parent company (Holdings), private entity was founded in March 2010, pre-launched at the CTIA Wireless Show in Las Vegas. We are a woman-owned turn-key wireless communications infrastructure services provider. We supply a new level of high quality plus lower cost savings in our turn-key wireless network construction and engineering services to a rapidly expanding multi-billion market.

TeleFix surpasses current industry norms, by ensuring lower costs of service by "Getting the job done right the first Time." Our primary customers are private mobile carriers where our turn-key services are cell site design, installations, integrations, upgrades for 3G and 4G networks, and Government federal, state/ local public safety agencies where we design and maintain complex Radio communications systems, surveillance systems, mass emergency communications, GPS tracking, E-911 systems.

Core competencies are expert level RF and Microwave Engineering, principally centered on Converged Networks – 3G(UMTS), 4G (LTE), for Cellular, Land Mobile Radio Communications (Two-Way Radio Communications), Rural Broadband expansion, WiFi, and Digital Healthcare. TeleFix is poised to deliver exemplary services in Design, Project Management, Network Planning, Installation, and Deployment.

We have innovated a process utilizing forward thinking technology, in a virtualization cloud-based solution which will ensure the company's mission and service delivery promise of cost efficiency, higher quality work-force and network performance, documentation process referred to in the industry as "**Close Out Package Solution**" - **COPS®**. This solution has an added benefit of bridging the skills gap so common in today's technology workplace.

Our key advantage is our genuine concern for our customers, employees, and passion for the industry. Our continual commitment is to meet the requirements for higher quality and efficient networks; giving customers what they want at the price they want.

These are the main pains in the industry - higher overall quality in network performance to the end Consumer; faster data speeds and enhanced voice service – reduced dropped calls.

The industry created Quest Forum, a collaboration of telecom companies and government agencies to design ISO qualification standards centered around higher quality and cost efficiency. TeleFix's business model directly addresses that pain.
