TREVALI MINING CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited – Prepared by Management)

Three and six months period ended June 30, 2015 and 2014

(Expressed in thousands of Canadian Dollars, except for share and per share amounts)

1. NATURE OF BUSINESS AND LIQUIDITY

Trevali Mining Corporation (the "Company" or "Trevali") is incorporated under the laws of British Columbia, Canada. The Company is a natural resource company engaged in the acquisition, exploration, development and production from mineral properties. The Company currently holds four properties in Canada and an interest in one property in Peru with an option on a second Peruvian property.

The Company, through its wholly owned subsidiary Trevali Peru S.A.C. operates the Santander underground mine and metallurgical plant located in Peru. The Company entered the production phase at Santander on January 1, 2014 and is producing zinc and lead-silver concentrates.

In Canada, the Company owns through its wholly owned subsidiaries, the Caribou mine and mill, the Halfmile mine and the Stratmat polymetallic deposit all located in northern New Brunswick.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will be able to continue in operation for the foreseeable future, and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

As at June 30, 2015, the Company had working capital of \$35,579 (December 31, 2014 - \$32,471) and a cumulative deficit of \$59,162 (December 31, 2014 - \$56,561).

Based on the anticipated positive cash flows from Santander, the Company is expected to have sufficient resources to meet its committed expenditures for the next twelve months. However, additional funds may be required to complete the development, testing and commissioning, start-up and ramp-up of the Company's Caribou mine project and the Company may need to seek additional funding to finance such activities.

The Company has relied principally upon the issuance of securities and debt financings for financing. The Company intends to continue to rely on the issuance of equity or debt securities to finance its future activities, and from cash flows from its producing Santander mine in Peru, but there can be no assurance that such financing will be available on a timely basis under terms acceptable to the Company.

The business of mining and exploration involves a high degree of risk and there can be no assurance that current exploration programs or development plans will result in profitable mining operations. The Company has positive cash flows generated in Peru to support its operation but not enough at this stage to finance Canadian operations. The Company continues to have significant cash requirements to meet its project development costs and maintain its mineral property interests. The recoverability of amounts shown for mineral properties is dependent on several factors. These include the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development of these properties, and future profitable production or proceeds from disposition of mineral properties.

2. BASIS OF PREPARATON

Statement of compliance

These condensed consolidated financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and Interpretations issued by the IFRS Interpretations committee ("IFRIC") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting.

2. BASIS OF PREPARATON (cont'd)

Statement of compliance (cont'd...)

The Company is following the same accounting policies and methods of computation in these condensed financial statements as it did in the audited financial statements for the year ended December 31, 2014.

Approval of the financial statements

The condensed consolidated financial statements of Trevali for the six month period ended June 30, 2015 and 2014 were reviewed by the Audit Committee, approved and authorized for issue by the Board of Directors on August 14, 2015.

3. USE OF JUDGEMENTS AND ESTIMATES

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the year. Actual outcomes could differ from these estimates. These consolidated financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future years if the revision affects both current and future years. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The following are accounting items which involve judgment and estimates:

- Review of asset carrying values and impairment assessment
- Deferred income taxes
- Provision for environmental rehabilitation
- Mineral properties
- Acquisition of the mill and floatation plant
- Going concern
- Functional currency
- Achievement of commercial production

4. FINANCIAL INSTRUMENTS

Fair value of financial instruments

Fair value represents the price at which a financial instrument could be exchanged in an active market, in an arm's length transaction between knowledgeable and willing parties who are under no compulsion to act. The following provides a comparison of carrying and fair values of each classification of financial instrument as at June 30, 2015.

- (a) The fair value of the working capital facility approximates its carrying value due to the floating interest rate.
- (b) The fair values for short term financial assets and liabilities, which include cash, restricted cash, accounts receivable, accounts payable and accrued liabilities and due to related parties approximate carrying values due to the immediate or short-term maturities of these financial instruments.
- (c) The fair value of the Senior Secured Notes approximates its carrying value (Note 14).
- (d) The fair value of the finance lease approximates its carrying value as it is calculated based on the present value of the future principal cash flows, discounted at the market rate of interest at the reporting dates. For the finance lease the market rate of interest is determined by reference to similar lease agreements. The payments were estimated based on future cash flow from production (Note 13).

13. FINANCE LEASE (cont'd...)

The minimum monthly payment will be based upon US\$13.00 per ton treated.

Any unpaid balance at the end of the term will be due on this date. It may be pre-paid at any stage without penalty.

Finance lease liabilities are payable as follow:

	Future minimum lease payments	Interest at discounted market rate	Present value of minimum lease payment
Less than one year	\$ 7,599	\$ (3,566)	\$ 4,033
Between one and five years	33,649	(6,703)	26,946
	41,248	(10,269)	30,979
Less current portion			(4,033)
Balance at June 30, 2015			\$ 26,946

Fair value, which is estimated for disclosure purposes, is calculated based on the present value of future principal cash flows, discounted at the market rate of interest at the reporting date. For the finance lease the market rate of interest is determined by reference to similar lease agreements. The payments were estimated based on future cash flow from production using an annual effective interest rate of 11.28%.

The plant was recorded in property plant and equipment as assets under finance lease at its inception date fair value of US\$25,608 (Note 10). The Company has provided Glencore with security on the finance lease in the form of a charge on the Plant.

(a) Third party Santander creditor obligation

On September 29, 2009, Santander became a special purpose entity controlled by the Company by virtue of Santander's Creditors Committee approval of the mineral concession purchase option granted to the Company, and 75% voting right held on the Company's creditor's claims, together with other Company obligations relating thereto. The Company recorded the present value of the obligation to those third party creditors of US\$2,160, of which the calculated present value is \$2,698 (2014 - \$2,505) due on or before December 31, 2015 (being the estimated date of repayment by Trevali), at a discount rate of 15%.

14. LONG-TERM DEBT (cont'd...)

(b) Working capital facility

On November 6, 2012, the Company closed a US\$20,000 working capital facility from development partner Glencore. The secured working capital facility bears interest at LIBOR + 5%. The loan is repayable on a monthly basis over a five year repayment term based on a formula, which allocates the repayments between the US\$20,000 working capital facility and the finance lease (Note 13), based upon a sliding scale, which takes into account the price of zinc and the number of tonnes treated at the Santander mine. Any unpaid balance at the end of the term will be due on this date. It may be pre-paid at any stage without penalty. The Company has provided Glencore with security on the working capital facility in the form of a charge covering substantially all of the Company's Peruvian assets.

(c) Senior Secured Notes

On May 30, 2014, the Company closed its offering of 52,500 units ("Unit") consisting of 12.5% Senior Secured Notes due May 30, 2019 and Common Share purchase warrants at a price of \$980 per Unit, for aggregate proceeds of \$51,450. Each Unit consists of \$1 principal amount of Notes and 123.2 warrants. Each whole warrant shall entitle the holder thereof, subject to certain conditions, to purchase one Common Share at an exercise price of \$1.26. The warrants expire on May 30, 2019.

The Company has provided security on the loan facility in the form of a charge over substantially all of the Company's Canadian assets. The Senior Secured Notes bear annual compounded interest at a rate of 12.5% and must be repaid in installments between the second and fourth anniversaries of the closing date. For the six months ended June 30, 2015, \$3,881 (December 31, 2014 - \$4,524) of interest and transaction fees has been capitalized to mine development as capitalized borrowing costs under the Caribou project.

Total	\$20,625	\$52,500

15. PROVISION FOR ENVIRONMENTAL REHABILITATION

The Company's provision for environmental rehabilitation consists of costs accrued based on the current best estimate of mine closure and reclamation activities that will be required at the three mine sites upon completion of mining activity. These activities include costs for earthworks, including land re-contouring and re-vegetation, water treatment and demolition. The Company's provision for future site closure and reclamation costs is based on the level of known disturbance at the reporting date, known legal requirements and estimates prepared by internal and third party specialists.

The assumptions used in the estimation of the provision are as follows:

	Undiscounted liability for closure	Life of mine	Reclamation period (years)	Pre-tax discount rate	Inflation factor	PV of Cash flow required on closure
Santander ¹	\$10,694	15	6	2.59%	2.00%	\$12,664

As of June 30, 2015, the Company has cash on deposit with the Province of New Brunswick as security for reclamation and environmental obligations associated with its Halfmile and Caribou mines of \$5,490 (December 31, 2014 - \$5,460). The Company has a further \$2,884 (December 31, 2014 - \$554) cash on deposit with the Government of Peru as security for reclamation and environmental obligations associated with its Santander mine.

16. CAPITAL STOCK

Authorized:

Unlimited number of common shares without par value.

During the period ended June 30, 2015, the Company:

On June 11, 2015, closed a bought-deal offering of 30,000,000 common shares of the Company at a price of \$1.02 per share for aggregate gross proceeds of \$30,600 and incurred share issue costs of \$1,952.

On February 24, 2015, closed a flow-through private placement financing, issuing 5,000,000 common shares on a "flow-through" basis under the Income Tax Act (Canada) ("Flow-through Shares") at a price of \$1.15 per Flow-through Share for aggregate gross proceeds of \$5,103 of which \$4,836 was recorded in capital stock and the remaining \$266 was recorded as flow through shares premium liability (Note 12). The Company also incurred share issue costs of \$14 with regard to the flow through private placement.

During the second quarter, the Company settled the New Brunswick Action which commenced in New Brunswick in May 2012 by two plaintiffs against Maple and certain other parties. In the New Brunswick Action, the plaintiffs claimed a 24.5% interest in Maple and/or its underlying assets (namely the Caribou mine and mill). Pursuant to the Settlement, Trevali issued on April 9, 2015:

- 1,000,000 Common Shares (such Common Shares having a four month resale restriction from the date of issuance) for \$1,060 as well as \$17 in TSX listing fees;
- 500,000 two year warrants having an exercise price of \$1.04 per Common Share for \$148;
- Paid legal fees of \$60 to plaintiff's legal counsel.

17. SHARE-BASED PAYMENT RESERVE

Stock options

The Company has a stock option plan in place under which it is authorized to grant options to executive officers, directors, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common shares of the Company. Under the plan, the exercise price of each option equals the approximate market price of the Company's stock on the date of grant. The options can be granted for a maximum term of ten years and vesting periods are determined by the Board of Directors.

Share-based compensation

During the six month period ended June 30, 2015, the Company granted 3,222,000 vesting stock options. The Company recorded \$695 in total share-based compensation expense, of which \$271 was capitalized to property, plant and equipment.

Option pricing models require the input of subjective assumptions including the expected volatility. The expected volatility is based on the historical volatility of the Company's common shares.

Changes in the subjective input assumptions can materially affect the fair value estimate.

Bonus Shares, RSU's and DSU's

In May 2013, the Company initiated a long-term incentive plan which provides for the grant of bonus shares, RSU's and DSU's in such amounts as approved by the Corporation's Board of Directors. Bonus shares are granted to directors, executives and key employees, RSU's are granted to executives and key employees, and DSU's are granted to directors.

The Incentive Plan for the grant of the bonus shares is considered an equity-settled share-based compensation arrangement, and is administered by a trustee. Each unit entitles the participant to receive one common share of the Company subject to vesting criteria. Bonus share grants vest one third per year over a three year period.

RSU's and DSU's can be settled in either cash or equity at the option of the Company. RSU grants vest 100% on the third anniversary of the date of grant and DSU grants vest 100% on the first anniversary of the date of the grant. Bonus shares, RSU's and DSU's expected to be settled in common shares are measured at fair value based on the Company's share price on date of grant.

During the six month period ended June 30, 2015, the Company granted 1,325,532 bonus shares, 435,500 RSU's and 3,398,760 DSU's. The Company recorded \$1,148 in share-based compensation expense, of which \$378 was capitalized to property, plant and equipment.

At June 30, 2015 and December 31, 2014 share units were outstanding as follows:
