Item XVI: Management's discussion and analysis or plan of operation.

A. Plan of Operation: Issuer's Plan of Operation for the next twelve months.

Water Technologies International's (WTII), business model has been well received by our current distributors, manufactures and commercial customers. The global awareness regarding the importance to access fresh drinking water is becoming more prevalent. The ability of our products to generate fresh drinking water is well received and as the company grows over the next several years, the mission is to continue to capitalize on the popularity of Atmospheric Water Generators, and our ancillary AC and filtration products. WTII will achieve this by increasing the number of distributors worldwide to sell our products and service customer for our exclusive patent pending products. This will improve direct access to WTII's unique products, educational resources, and expanding awareness of the quality brand through local, regional and national marketing initiatives. Plans for the WTII's website, (www.gr8water.net) include offering targeted products for sale to the online community and expanding the site knowledge base to gradually become a resource for all things involving AWG's.

The Company's products are unique and patent pending, the ability to generate drinking water from air is a novel idea and in some countries a life saving proposition. WTII and our distributors are ready to capitalize on this incredible opportunity before them. Currently, the Company has patent issued in China with expiration on May 17, 2021 and patent issued in South Africa with expiration on May 17, 2031.

B. Management's Discussion and Analysis of Financial Condition and Results of Operations.

For the periods ended September 30, 2014 and 2013 (Unaudited)

Revenues

We had revenues of \$36,223 and \$20,603 for the nine months ended September 30, 2014 and 2013, respectively. We are in the business of designing, manufacturing and distributing AWG's and related products. Our current revenues do not steadily increase since we do not have well developed market for our products yet. The sales in 2014 were due to closing deals in South Africa, Mexico, South America as well as testing products in these countries. We had no revenues during the three months ended September 30, 2014 and 2013.

Operating Expenses

We had operating expenses of \$139,214 and \$378,795 for the three and nine months ended September 30, 2014, respectively. Comparatively, we had operating expenses of \$224,128 and \$713,129 for the three and nine months ended September 30, 2013, respectively. Operating expenses were in connection with our daily operations, including but not limited to, consulting and advising fees, accounting fees, officer compensation, rent, website development and others. The decrease in operating expenses in 2014 were due primarily to the decrease in non-cash expenses, which were \$72,264 and \$166,024 for the three and nine months ended September 30, 2014, respectively, compared to \$97,326 and \$477,877 during the same periods in 2013. The shares were valued at the fair value on the grant date, and booked pro rata within the relative service periods.

Both operating costs and expected revenue generation are difficult to predict. There can be no assurance that revenues will be sufficient to cover future operating costs, and it may be necessary to continuously raise additional capital to sustain operations.

We expected our operating expenses would significantly increase in 2015 resulting from the business of designing, manufacturing and distributing AWG's and related products.

Income/Losses

Net losses were \$140,681 and \$366,866 for the three and nine months ended September 30, 2014, respectively, compared to \$225,781 and \$762,018 during the same periods in 2013. The decrease in net loss in 2014 was primarily attributable to the decrease in stock issued for services during the period.

We expected we would be profitable resulting from the business of designing, manufacturing and distributing AWG's and related products. However, there can be no assurance that we will achieve or maintain profitability, or that any revenue growth will take place in the future.

Impact of Inflation

We believe that inflation has had a negligible effect on operations since inception. We believe that we can offset inflationary increases in the cost of operations by increasing sales and improving operating efficiencies.

Liquidity And Capital Resources

During the nine months ended September 30, 2014 and 2013, net cash flows used in operating activities were \$181,354 and \$169,421, respectively. Negative cash flows in the nine months ended September 30, 2014 were due primarily to the net loss of \$366,866, partially offset by the non-cash expenses of \$166,024 due to stock issuance for services. Negative cash flows in the nine months ended September 30, 2013 were due primarily to the net loss of \$762,018, partially offset by the non-cash expense of \$477,877 due to stock issued for services and \$47,544 in deposits made for products.

During the nine months ended September 30, 2014 and 2013, we had cash flows of \$10,708 and \$28,060 used in investing activities, respectively, attributable to legal fees and other costs associated with obtaining patents.

During the nine months ended September 30, 2014, net cash flows provided by financing activities were \$180,000 consisting of proceeds from notes payable in amount of \$55,000 and the proceeds from sales of shares in amount of total \$125,000. During the nine months ended September 30, 2014, the Company sold 10,500,000 shares of its Common Stock at a price of \$.01 per share, sold 50,000 shares of its Series "B" Preferred Stock for cash payment of \$15,000 and received a cash payment of \$5,000 in connection with a stock-based consulting agreement. During the nine months ended September 30, 2013, net cash flows provided by financing activities were \$192,183, due primarily to the \$213,000 proceeds from sales of common stock partially offset by a loan repayment to related party in the amount of \$21,167.

We had cash of \$3,450 on hand as of September 30, 2014. On the short-term basis, we will be required to raise a significant amount of additional funds over the next 12 months to sustain operations. On the long-term basis, we will potentially need to raise capital to grow and develop our business.

It is likely that we will require significant additional financing within the next 12 months and if we are unable to raise the needed funds on an acceptable basis, we may be forced to cease or curtail operations.
