#### 1. Nature of operations and going concern

Zazu Metals Corporation (the "Company") is a Canadian company which is engaged in the exploration and development of mineral properties. The Company was incorporated by a Certificate of Incorporation issued pursuant to the provisions of the Canada Business Corporations Act on November 29, 2006. The address of its registered office is 500 – 666 Burrard Street, Vancouver, BC, Canada, V6C 3P6.

The Company incorporated Zazu Metals (Alaska) Corporation ("Zazu Alaska"), a subsidiary of the Company, in the State of Alaska, United States on January 18, 2007.

The Company and its subsidiary (together, the "Group") are currently exploring a mineral exploration property located in the State of Alaska, United States and have not yet determined whether their mineral property contains resources that are economically recoverable. The underlying value of the Group's mineral property and the recoverability of the related deferred costs are dependent on the existence of economically recoverable resources in its mineral property and the ability of the Group to obtain the necessary financing to complete development and upon future profitable production from, or the proceeds from the disposition of, its mineral property.

At September 30, 2016 the Company did not have enough cash on hand to meet its planned expenditures for the next twelve months. The Company plans to pursue financing in the future in order to fund its operations and to continue the advancement of its mineral property but the material uncertainty of raising sufficient funds casts significant doubt about the Company's ability to continue as a going concern. The Company has historically raised funds primarily through the sales of equity securities for cash. While the Company expects that it will obtain funding through an equity funding, or other means depending on market conditions, there can be no assurance that the Company will be able to obtain such funding or obtain it on acceptable terms.

These condensed interim consolidated financial statements have been prepared on the basis of a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of operations. These financial statements do not reflect the adjustments to carrying values of assets and liabilities that would be necessary should the going concern assumption prove to be inappropriate, and these adjustments could be material.

### 2. Basis of presentation

These condensed interim consolidated financial statements should be read in conjunction with our audited consolidated annual financial statements for the year ended December 31, 2015.

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). These condensed interim consolidated financial statements were approved by the Board of Directors on November 10, 2016.

#### 3. Summary of significant accounting policies

The Group prepares its audited consolidated annual financial statements in accordance with IFRS as issued by IASB. These condensed interim consolidated financial statements follow the same accounting policies and methods of application as our most recent annual financial statements and should be read in conjunction with our most recent annual financial statements.

#### Lik Property

The Group is participating in the exploration and development of the Lik property through a joint arrangement with Teck American, Inc. ("Teck American"), a wholly owned subsidiary of Teck Resources Limited. The Group acquired its interest in the joint arrangement in June 2007 by making a cash payment of \$20 million and granting a 2% net proceeds royalty.

The Group is the operator of the joint arrangement and holds a 50% interest in the project. The Group has the right to form a joint venture with Teck American and increase its interest to 80% by incurring qualifying exploration expenditures on or before January 27, 2018. The terms of the joint arrangement are governed by the Lik Block Agreement, signed in 1983, which specified an amount of \$25.0 million of qualifying expenditures to be adjusted annually for inflation, and which amount is currently estimated to be approximately \$42.2 million. As of September 30, 2016 a total of \$21.9 million has been incurred in exploration expenditures pursuant to the terms of the Lik Block Agreement. If the qualifying expenditures are not made before January 2018, the Group remains as operator and its interest stays at 50%.

Once the Group satisfies this expenditure obligation, Teck American has a onetime election to (i) maintain the 20% interest which shall become a participating interest pursuant to a joint venture agreement with a pro rata sharing of the pre-existing 1% net profits interest, or (ii) transfer its interest in exchange for a 2% net smelter return royalty interest such that the Group would become the holder of a 100% undivided interest in the Lik property subject only to the pre-existing 1% net profits interest, the 2% net proceeds royalty and the 2% net smelter return royalty.

Acquisition and deferred exploration expenditures made by the Group are as follows:

# 5. Share capital

The Company's common shares began trading on the Toronto Stock Exchange on December 19, 2007 under the symbol "ZAZ" and on the OTCQX exchange in the United States on July 28, 2014 under the symbol "ZAZUF". The Company is authorized to issue an unlimited number of Common Shares with no par value and an unlimited number of Special Voting Shares with no par value.

At September 30, 2016 the Company had 55,398,051 shares (2015 – 55,398,051 shares) issued and outstanding.

# 6. Stock options and share based compensation

August 2020	600,000	0.25	400,000
Total stock options outstanding	4,990,000		4,790,000

Under the terms of the employment agreements between the Group and its senior officers, an officer's unvested stock options will vest immediately and become exercisable if the agreement is terminated by the Group, or if the officer so elects within 120 days of a change of control of the Group.

The Company recognizes stock based compensation over the vesting period of the underlying options using the fair value calculated by the Black-Scholes option pricing model. Option pricing models require the input of highly subjective assumptions including expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options granted and/or vested during the period.

#### 7. Compensation of key management

The remuneration of directors and other members of key management personnel included:

#### 9. Commitments

The following is a summary of the Group's contractual obligations and commitments as at September 30, 2016:

	Total	2016	2017 – 2019	2020 – 2021	2022 and beyond
Lik project	\$ 12,000	\$ 12,000	_	-	_
Office operation leases	2,661	798	\$ 1,862	-	-

The Group has entered into employment agreements with its senior officers for an aggregate of \$7,500 per month effective January 1, 2016. These agreements can be terminated by the Group at any time, or by the officer within 120 days of a change of control of the Group, subject to the payment of the greater of (i) a lump sum amount ranging from \$25,000 to \$30,833, and (ii) the minimum payment prescribed by applicable employment standards legislation. At such time any outstanding stock options will immediately vest and, upon the officer's request, the Group will provide an interest free loan for up to six months to exercise any stock options, with the shares held by the Group as collateral. Salary amounts are reviewed annually by the Compensation Committee of the Board of Directors.

The Department of Natural Resources of the State of Alaska requires the Group, as operator of the Lik project, to post a \$250,000 bond to cover any future reclamation activities necessary upon the abandonment of the mining claims that make up the project. The Group has contracted with a surety bond company to provide this bond.

#### 10. Financial instruments

The Group's financial instruments are classified into the following categories and the following table shows their carrying values.

	September 30, 2016	December 31, 2015
Loans and receivables <sup>(1)</sup> Financial liabilities at amortized cost	\$ 124,079 10,230	\$ 459,727 47,236
(1) Consists of: Cash and cash equivalents – US currency Cash and cash equivalents – CDN currency	42,861 81,218	227,245 232,213

The carrying values of all of the Group's financial assets and liabilities reasonably approximate their fair values.

The Group is exposed to certain financial risks, including currency risk, liquidity risk and credit risk.

#### Capital Risk Management

The Group's objectives of capital management are intended to safeguard the entity's ability to support the Group's normal operating requirements on an ongoing basis, continue the development and exploration of its mineral properties and support any expansionary plans.

The capital structure of the Group consists of equity attributable to shareholders. The Group manages the capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the Group's assets.

Notes to the Condensed Interim Consolidated Financial Statements For the nine months ended September 30, 2016 and 2015 (Unaudited) In US dollars

To effectively manage the entity's capital requirements, the Group has in place a planning and budgeting process to help determine the funds required to ensure the Group has the appropriate liquidity to meet its operating and growth objectives. The Group has historically relied on the issuance of shares to develop the project and will most likely be obliged to do so again in the future.

#### Currency risk

The Group's financial assets and liabilities consist of cash and cash equivalents, trade receivables and trade payables, some of which are denominated in Canadian dollars. The Group is exposed to financial gain or loss as a result of foreign exchange movements by the Canadian dollar against the US dollar.

In addition to costs denominated in US dollars, the Group also incurs general and administrative costs denominated in Canadian dollars. Accordingly, the Group's general and administrative costs are affected by changes in the foreign exchange rate of the Canadian dollar. The Group has elected not to hedge its exposure to fluctuations in the Canadian dollar.

The Group was exposed to currency risk through the following assets and liabilities denominated in Canadian dollars:

	September 30,	December 31, 2015	
	2016		
	(CDN\$)	(CDN\$)	
Loans and receivables	\$ 106,534	\$ 321,384	
Financial liabilities at amortized cost	(9,277)	(64,144)	

Based on the net exposures in the preceding table as at September 30, 2016, and assuming that all other variables remain constant, a 10% appreciation or depreciation of the Canadian dollar against the US dollar would result in an increase/decrease of \$7,400 (2015 – \$29,800) in the Group's net loss.

#### Liquidity risk

Liquidity risk is the potential that the Group will be unable to meet its obligations as they come due because of an inability to liquidate assets or obtain adequate funding. The Group manages liquidity risk through the management of its capital structure. The Group manages and makes adjustments to the capital structure as opportunities arise in the marketplace or as and when funding is required. Historically the Group's primary source of funding has been the sale of equity securities for cash. The Group is not in commercial production on the Lik property and, accordingly, it does not generate cash from operations. See Note 1 for going concern discussion.

Trade and other payables are all due within the current operating period.

#### Credit risk

The Group's credit risk arises from the non-performance by counterparties to fulfill their contractual obligations. The Group's maximum exposure to credit risk is limited to its cash and cash equivalents and trade and other receivables.

The Group mitigates its credit risk on its cash and cash equivalents by maintaining its funds in bank and investment accounts in one of Canada's largest financial institutions that holds a Standard & Poor's senior debt credit rating of AA-.

The maximum credit risk exposure at September 30, 2016 is limited to the carrying value of the cash and cash equivalents and trade and other receivables at the period end.

# 11. Segment reporting

The Group currently operates in one business segment, being the exploration and development of mineral properties. The Group's non-current assets at September 30, 2016 and December 31, 2015 by geographic areas are as follows:

	Canada Unite		Total
Non-current assets at December 31, 2015	\$ 1,828	\$ 15,387,714	\$ 15,389,542
Non-current assets at September 30, 2016	1,211	15,456,675	15,457,886

# 12. Subsequent events

In October 2016, the Chief Executive Officer loaned the Group \$70,000. The loan is unsecured and payable on demand, with interest calculated at 6% per year and paid monthly and is intended to provide working capital while a larger financing is pursued.
