SARISSA RESOURCES INC.

(An Exploration Stage Company)

Notes to Financial Statements

For the Period from Inception (November 8, 2005) to March 31, 2014

1. NATURE AND CONTINUANCE OF OPERATIONS

Sarissa Resources Inc. (the "Company") was incorporated in the State of Delaware on November 8, 2005 as Ecological Recycling Co. Inc. On November 14, 2005, the name was changed to Michigan Mining Investment Inc. On December 5, 2006 the Company changes its name to Sarissa Resources Inc. and changed jurisdiction from the State of Delaware to the State of Nevada.

The Company's principal business activity is the acquisition, exploration and development of mineral property interests in Canada. The Company is considered to be in the exploration stage and substantially all of the Company's efforts are devoted to financing and developing these property interests. There has been no determination whether the Company's interests in unproven mineral properties contain mineral reserves which are economically recoverable.

These consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America, with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations.

The Company currently earns no operating revenues. The Company's ability to continue as a going concern is uncertain and is dependent upon the generation of profits from mineral properties, obtaining additional financing or maintaining continued support from its shareholders and creditors. In the event that additional financial support is not received or operating profits are not generated, the carrying values of the Company's assets may be adversely affected. Current market conditions make the present environment for raising additional equity financing less favorable.

2. SIGNIFICANT ACCOUNTING POLICIES

These financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The significant accounting policies followed in the preparation of these financial statements are as follows:

Exploration Stage Company

The Company is an exploration stage company. The Company is still devoting all its efforts on establishing the Business. All losses accumulated since inception, have been considered as part of the Company's exploration stage activities.

Principles of consolidation

These consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Nio-Star Corp. which was incorporated under the Laws of the Province of Ontario on November 19, 1996 and Shining Tree Resources Corp. which was incorporated under the Laws of Ontario on March 28, 2011. All inter-company balances and transactions have been eliminated upon consolidation. These transactions were in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

SARISSA RESOURCES INC.

(An Exploration Stage Company)

Notes to Financial Statements

For the Period from Inception (November 8, 2005) to March 31, 2014

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Mineral properties and exploration and development costs

All costs related to the acquisition of mineral properties are capitalized to the applicable property. If economically recoverable ore reserves are developed, capitalized costs of the related property are reclassified as mining assets and amortized using the unit of production method. When a property is abandoned, all related costs are written off to operations. If, after management review, it is determined that the carrying amount of a mineral property is impaired, that property is written down to its estimated net realizable value. A mineral property is reviewed for impairment whenever events or changes in circumstances indicate that its carrying amount may not be recoverable.

The amounts shown for mineral properties do not necessarily represent present or future values. Their recoverability is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof.

Carrying value of mineral property interests

The cost of acquiring mineral property interests is capitalized. Capitalized acquisition costs are expensed if the carrying value is written down if future cash flows, including potential sales proceeds related to the property, are estimated to be less than the carrying value of the property. The Company reviews the carrying value of mineral property interests periodically and whenever events or changes in circumstances indicate that the carrying value may not be recoverable, reductions in the carrying value of each property would be recorded to the extent the carrying value of the investment exceeds the property's estimated fair value.

Foreign Currency Translation

Management has determined that the functional currency of the Company is the Canadian dollar ("CAD"), and translated the CAD statements into US dollar statements in accordance with the provisions of ASC No. 830 *Foreign Currency Matters*. All assets and liabilities are translated into US dollars at the exchange rate at the balance sheet date. Share Capital, stock to be issued and accumulated deficit are translated into US dollars historical exchange rates. All revenue and expenses are translated into US dollars at the average exchange rate for the period. Adjustments resulting from the translation of the financial statements from its functional currency to US dollars are accumulated as a separate component of accumulated other comprehensive income and have not been included in the determination of income for the relevant period.

Under this method, the statements of operations and cash flows for each quarter have been translated into the reporting currency using the average exchange rates prevailing during each reporting period (2014 – \$0.906; 2013 – \$0.999) and all assets and liabilities have been translated using the exchange rate prevailing at the consolidated balance sheet dates (March 31 2014– \$0.904; December 31, 2013 – \$0.940).

Use of estimates

The preparation of consolidated financial statements in accordance with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the year. Actual results could differ from these estimates. Significant accounts that require estimates relate to the impairment of mineral properties, valuation of agents' warrants and units granted as finder's fees, warrants issued as part of private placements and the valuation taken on future income tax assets, and stock-based compensation.

Notes to Financial Statements

For the Period from Inception (November 8, 2005) to March 31, 2014

2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Comprehensive income

The Company follows the guidance in ASC 220, *Comprehensive Income*, ASC 220 establishes standards for the reporting and presentation of comprehensive income and its components in a full set of financial statements. . Comprehensive income is presented in the statement of stockholders' deficiency, and consists of foreign currency translation adjustments. ASC 220 requires only additional disclosures in the financial statements and does not affect the Company's financial position or results of operations.

Fair value of financial instruments

The Company measures its financial assets and liabilities in accordance with the requirements of ASC 820, Fair value measurement and Disclosures, *and elects not to disclose its fair value information about financial assets and liabilities for which fair value was not readily available.*

Income taxes

The Company accounts for income, taxes pursuant to ASC 740, uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments based on SFAS No. 128. Under this method the dilutive effect on loss per share is recognized on the use of the proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds would be used to purchase common shares at the average market price during the period.

Stock –based compensation

The Company accounts for Stock-Based Compensation in accordance with ASC 718, *Compensation – Stock Compensation*. ASC 718 establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. ASC 718 focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. ASC 718 requires that the compensation costs related to share-based transactions be recognized in the financial statements. The cost is measured on the fair value of the equity or liability instrument issued.

Net Loss per share

The Company accounts for loss per share pursuant to ASC 260, Earnings Per Share, which requires disclosure on the financial statements of "basic" and "diluted" earnings (loss) per share. Basic earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of common shares outstanding for the period. Diluted earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of common shares outstanding plus common stock equivalents (if dilutive) related to stock options and warrants in the period.

There were no dilutive financial instruments for the three month period ended March 31, 2014 or the year ended December 31, 2013 and for the period from inception, November 8, 2005 to March 31, 2014.
