**MAS Environmental, LLC (MAS)** is pleased to provide this Interim Deliverable #3 corresponding to the second event per the above mentioned Purchase Order. Herein are enclosed maps, figures, field notes, laboratory analytical results and a copy of the professional land survey. The laboratory analytical results were processed using ADaPT and uploaded on Oculus.

Based on the soil analytical data, confirmatory soil sample collected in the vicinity of MW-1 did not exhibit the presence of impacts. Based on the groundwater analytical data, concentrations of naphthalene were detected at a level above its Groundwater Cleanup Target Level (GCTL) of 14 micrograms per liter (ug/L) in MW-3 (20.1 ug/L, and benzo(b)fluoranthene was detected at a level above its GCTL of 0.05 ug/L at MW-6 (0.20 ug/L). MAS recommends the installation of two (2) offsite shallow wells (PMW-7 and PMW-8 on **Figure 4**) to evaluate the extent of the groundwater impacts (**Figure 4**).
