QUARTERLY REPORT FOR THE THREE MONTH PERIOD ENDING
March 31st, 2010

Item 1 Exact name of issuer and its predecessors:

Carbon Jungle, Inc.

Formerly:

One Touch Total Communications until 3-2006

Nettel, Inc. until 10-1999

Eubix Technologies, Inc. until 6-1999

Fertility Advancements, Inc. until 12-1990

Address of the issuers principal executive office(s):

United States:

3920 Birch St. #105

Newport Beach, CA 92660

China:

201 Ningxia Road

Floor 6, Suite G

Shanghai, China 200063

Website: <http://www.carbonjungle.us>

Investor Relations:

NONE

Item 2 Exact titles and classes of securities outstanding

CUSIP: 141148106

Symbol: CBJG

Common Stock

Class A Preferred Stock

Class B Preferred Stock

The number of Authorized Shares as of March 31st, 2010:

Common Shares: 500,000,000

Number of shares issued and outstanding: 281,353,399 of
which approximately 42,825,960 are available in the public float.

Series A Preferred Shares: 1,000,000 of which 595,168 are issued and
outstanding

Series B Preferred Shares: 5,000,000 of which 4,000 are issued and
outstanding

There are 153 shareholders of record.

Item 4 PLAN OF OPERATION

Carbon Jungle, Inc. has signed agreements with the Yangzhou Zhanpeng Fertilizer Company to supply proprietary soil amendment for eventual resale into China. The Company is actively seeking additional suppliers of Potash to capitalize upon existing distribution relationships which the Yangzhou Zhanpeng Fertilizer Company provides. Currently, Carbon Jungle, Inc. has the right to resell its soil amendment sourced from a USDA certified organic mine located in Nevada.

Carbon Jungle has also been raising capital to build its first glass recycle plant which will place the Company in the position to have revenues and negotiate the necessary contracts with local manufacturers.

Additionally, Carbon Jungle has recently negotiated agreements with a liquid fertilizer supplement company based in the United States for exclusive rights to sell and distribute in China. The product in question can reduce the needs for traditional fertilizer significantly while reducing on production and transportation costs.

Product and Technology

- Proprietary Glass Recycling Technology.
- Certified USDA organic soil amendment
- Liquid Fertilizer Supplement

Competitive Advantage

- Most competing glass recycling systems make separation of contaminants nearly impossible.
- Most competing fertilizers are not USDA certified Organic
- Liquid fertilizer supplement is the only one of its kind currently on the market.

The Market

The success of a community's glass recycling program is influenced by three factors: its collection system, the type of recycling equipment used, and its proximity to a high-end user. The costs associated with these factors usually prohibit the financial success of a local glass recycling program, forcing the use of land-fills. Glass recycling has only proven beneficial from a financial stand point in communities where an end- user of recycled glass is located nearby who requires large tonnages of recycled glass, which are supplied by an expensive recycling plant. Because of these limitations, mixed broken waste glass has had little value in the marketplace and little demand. Our unique new process for recycling mixed broken waste glass is changing the economics of glass recycling, capturing a large, immature market segment.

Additionally, China is one of the world's largest purchasers of fertilizer products due to its larger population and high degree of export of food products. Our USDA certified organic soil amendment and liquid fertilizer supplement are both highly desirable items in the marketplace.

Sample Benefactor of Our Process

Fiberglass Insulation Manufacturers

Because recycled glass melts at a lower temperature than the raw materials used to make glass, insulation manufacturers realize substantial savings in both the amount of energy used and the life expectancy of their manufacturing equipment and furnaces. Our product offers manufacturers a more economical alternative to the current large, multi-million dollar recycling plants.

Soybean Farms

Our fertilizer products are the basis for the farming industry in China. The amount of farmland in China required to meet the demand for products forces farmers to continuously use land without allowing it to lie fallow and regain nutrients. To do so, each farm needs to supply enough fresh soil supplemented with fertilizer to continue to produce adequately. Our soil amendment meets this need, while our liquid supplement reduces the overall need for fertilizer in the future, thus reducing overhead for the farm.

Profitability

Fiberglass Insulation Substitute Model

For the fiberglass insulation manufacturing industry, the market rate for clean waste glass is approximately \$83 - \$87 per ton. Our price is \$78 per ton. A lower price per ton, coupled with our superior product, persuades manufacturers to buy our product.

Soil Supplement and Amendment

The current market rates for potash (fertilizer base) in China range from \$350-500 per ton. Our soil amendment fits within the price range, but has the advantage of being USDA certified organic. We have the disadvantage of being a small producer specializing in smaller farms.

However, our soil supplement has the ability to reduce the overall need for potash by up to 25% over a period of 5 years at a much reduced cost, thus saving money over time.

Our Outreach

We hope to market our waste glass recycling facilities to communities throughout China to create a customer base and receive brand recognition through China. Recently, our main focus has shifted to the fertilizer market as we foresee a continued growth trend in China's farming population as they refine their technology to meet local demand and increase exports. We have recently begun speaking at national farm technology conventions and universities throughout SE Asia.

Our China Strategy

The key to our success in China is growing our relationships with national, provincial and local government agencies. It is from this base that we will grow the business, enabling it to enter various markets. The key to long term success will be developing a substantial

presence in the farm industry to demonstrate the ability of our soil supplement products while meeting current demand by supplying our USDA certified organic soil amendment.

Our Candidates

We seek Chinese and Asian individuals and organizations that are looking to benefit financially while providing the basis for continued growth in China through superior food products.

Current Users of Our Product and Technology Process

Our product is currently being tested for resale by the Yangzhou Zhanpeng fertilizer company.

ITEM 5 LEGAL PROCEEDINGS

To the best of our knowledge, there are no existing or threatening legal proceedings against the company.

ITEM 6 DEFAULTS UPON SENIOR SECURITIES

There have been no defaults upon senior securities in the period of this financial report

ITEM 7 OTHER INFORMATION

The Company maintains its agreements with the Yangzhou Zhanpeng Fertilizer Company which obliges said company to blend and offer for resale Carbon Jungle's proprietary soil amendment through their distribution network.

The Company maintains its agreement with the People's Republic of China to construct a glass recycling facility in Xiao Guan Zhuang and/or Baoying County.

The Company is in final negotiation for the resale of a liquid fertilizer supplement product in mainland China.

The Company is providing consulting services between United States based companies and potential Chinese customers.

The Company has ceased its involvement with US Green Energy, Inc.

ITEM 8 EXHIBITS

The contracts mentioned in ITEM 7 were filed with the previous Quarterly Report. No additional exhibits for this period.

ITEM 9 ISSUER'S CERTIFICATION

I, Lee Davidson, certify that:

I have reviewed this annual disclosure statement of Carbon Jungle, Inc.;

Based on my knowledge, this disclosure statement does not contain any untrue statements of a material fact or omit or state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this disclosure statement; and

Based on my knowledge, the financial statements, and other financial information included or incorporated by reference in this disclosure statement, fairly present in all material aspects the financial condition, results of operations and cash flows of the issuer as of, and for, the periods presented in this disclosure statement.

August 13th, 2010

A handwritten signature in black ink, appearing to read 'Lee Davidson', written over a solid horizontal line.

CARBON JUNGLE, INC.
Notes to Unaudited Financial Statements
For the Three Months Ended June 30th, 2010

NOTE 1 - NATURE OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Carbon Jungle, Inc. operates in the United States and China as a development stage company that specializes in green technologies. Currently such technologies include renewable energy, glass recycling programs, and organic fertilizer/fertilizer supplement.

Use of Estimates

In the preparation of financial statements in conformity with generally accepted accounting principles requires managements to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Property and Equipment

Property and equipments are stated at cost. The company will provide for depreciation once the assets are placed in operation. No depreciation has been provided for or during the period.

Unaudited Financial Statements

The financial statements presented are unaudited. The Company believes that these financial statements present fairly, in all material respects, the financial position of the Company and the results of its operations and cash flows for the periods presented, in conformity with generally accepted accounting principles and prepared by persons with sufficient financial skills.

NOTE 2 - ACQUISITIONS

The Company has invested in a license with Glass Pro based in Salt Lake City, Utah for the exclusive rights to utilize proprietary glass recycling technology in China.

The Company also continues to maintain an investment in the movie titled *Living Luminaries*, through Wanna Be Now, LLC.

NOTE 3 - LONG TERM LIABILITIES

The Company continues to service four non-recourse, secured loans, secured by shares of common stock and preferred stock in the Company. At any time prior to full payment, the holders may convert the note into fully paid, unrestricted shares of the Company, if the Company goes into default on the note. The Company is currently in negotiations to reduce these liabilities.

The Company issued a convertible debenture secured by shares of common stock in exchange for the license mentioned in NOTE 2. At any time prior to full payment, the holders may convert the note into fully paid, unrestricted shares of the Company, if the Company goes into default on the note.
