The Quarterly Report for the period ending September 30, 2014 will be completed and posted on or before November 15, 2014. Based upon shareholder input, UHRG will provide a monthly report (based upon the Quarterly Report format) on OTC-Markets and on the URHG.net website and this report will provide updated and current financial and operational information.

URHG informed its shareholders the need for an additional Three (3) Million Dollars to retire debt, provide capital improvement to its subsidiaries, and allow an increased amount of capital for its operations and retired debt. The URHG Board of Directors will provide guidance and approval the structure of the transaction and for the use of these funds.

URHG’s President Mark Kersey made a statement at the stockholders meeting that URHG had an estimated \$50,000 in its corporate account. This statement was misstated due to interest payments that were wired in the amount of \$41,000 and not accounted for in the accounting records. Currently, there is an estimated \$12,000 in the corporate account.

The Dun Glen Mining Corp. (“Dun Glen”), a subsidiary, received approval for its Minor Modification of its Reclamation Permit (“Minor Modification”) on October 22, 2014 by the Nevada Bureau of Mining Regulation and Reclamation (“BMRR”) and change allows Dun Glen to move the mining pit to an area identified by Michael Skopos, URHG’s on site Geologist, where he is of the opinion and belief that a higher grade of ore can be found and subsequently processed to produce gold. Additionally, this new area of disturbance (digging of ore) is located

close to the surface where there is less overburden (valueless dirt) which results in lower expense per ton for ore delivered to the processing plant. Initial testing results on the ore indicate a gold recovery of 0.0205 on a test of 60 yards as reported by Dana Low, URHG's COO.

**About United Resource Holdings Group, Inc.:**

*United Resource Holdings Group, Inc. is a U.S.-\$5 natural resource exploration and development company, focused on the acquisition of mining equipment and the development of placer mines, gold and other precious commodity projects that demonstrate a reasonable probability for near term production.
