

Bayside Corp: Revitalizes Vault 51 Bitcoin Sales

Bayside Corp. revitalizes Vault 51 Bitcoin sales by new decreased price point.

Dallas, TX-Bayside Corp. (BYSD.PK) today announced through Bitcoinz USA a subsidiary corporation of Bayside Corp. the company's decision to decrease its Vault 51 Bitcoin sale price point by more than 50% in order to be more competitive with current market prices.

To continue, the company's management team believes that Bitcoin prices may remain in the \$300-\$500 price range for the foreseeable future, creating a tremendous buying opportunity in the Bitcoin ecosystem. The new prices will take effect immediately and will be reflected on the company's [Vault 51](#) website.

Vault 51 is an offline storage system for Bitcoin users, which is represented by a Physical Bitcoin. The electronic Bitcoin is then stored off-line in a secured computer chip known as Vault 51 and embedded in a Physical Bitcoin, which is not connected to the internet. This process is also known as cold storage and is done to avoid hacking, loss, or theft.
