Millennium Energy Corporation announces equity exchange and joint venture with Avis Global Energy renewable energy projects

PR Newswire

NEW YORK, Dec. 31, 2014

New York, NY- (OTC News 2014) -Millennium Energy Corporation. (OTC Pink: MENC) (The "Company" or "Millennium") is pleased to announce entry of the Renewable Green Energy Sector by entering into an equity exchange and joint venture agreement with Avis Global Energy Inc a Global leader in the development of patented Technology for Renewable energy generated from waste to energy conversion.

The Joint Venture and equity exchange agreement entered into on November 25th 2014 and completed December 31st 2014 provides for the issue of 100 million shares of Common stock in Millennium in exchange for the Joint Venture rights to construct up to 25 Waste to energy sites utilizing the patented technology of Avis Global Energy and the acquisition by Millennium of 25,000,000 ordinary Shares of Avis Global Energy Inc. that is in the process of going public on the TSX Venture Exchange via an asset sale with Mineral Hill Industries Ltd. (TSXV Exchange MHI:TSV) a Canadian public company that also holds lithium mining leases in Canada.

About Avis Global Energy Inc.

Avis Global Energy is an international waste management and waste to energy technology Conversion Company with global strategic presence with several processing plants under negotiation and development.

Since inception in 2007, the technology of Avis Global Energy has become recognized as a world leader in the patented technology for processing, management and recycling of municipal waste using its proprietary Cold Catalytic Biomass Liquefaction Technology ("BML") to offer sustainable management of urban waste disposal across the world. Through the use of its BML technology, Avis Global Energy is able to convert municipal waste into diesel fuel, electricity and water. Avis Global Energy is committed to confronting the challenges presented by global

population growth and the corresponding increase demand for energy resources by eliminating toxic landfill sites and transforming them into clean sources of energy and fuels.

Avis Global Energy will erect the first of three proposed BML plants in Canada on a site near to Hamilton, Ontario, with a 6,000 liter per hour Diesel output. The plant will be erected together with a 10 hectare green house which will be powered by bio-energy derived from the conversion of waste presently polluting the environment that is converted to fuel.

Avis Global Energy plants are designed as modular systems and can be extended to a production capacity of up to 75,000 liters of diesel per hour, by converting more than 300 trucks standard unsorted municipal waste into CO₂ neutral high-quality green energy. Avis Energy's projects will not only create hundreds of jobs for the respective local communities, where plants are erected they also will raise the overall health standards while boosting the local economies.

Avis Global Energy's worldwide projects include six (6) plants in Europe under development, ten (10) plants planned in Africa, four (4) plants in Asiatic countries, one (1) Beta plant at the native Indian land in New York State with a capacity to convert Municipal Waste of one (1) Million metric tons per year. The worldwide Avis Energy projects will have a estimated capital cost of four (4) Billion Euros and will be financially insured with a AA Rated insurance policy as each facility will be insured and wrapped by Marsh McLennan in a Global risk insurance package, covering the capital cost and business interruption insurance on the revenue streams and including a non-performance risk.

Millennium Energy's interest in acquiring the shareholding in Avis Global Energy Inc is to enter into the Renewable Green Energy business jointly with Avis Global Energy and to develop several wastes to energy treatment plants in joint ventures with Avis Global Energy, utilizing the unique patented waste to energy technology developed by Avis Global Energy. The first being a project in the United Kingdom located in the Southeast of England is to be developed on an existing licensed waste disposal site with capacity of 10,000Metric Tons per week. The Avis Global Energy waste to energy facility to be developed in the joint venture with Millennium Energy Corp will have the capacity to produce up to 7000 MT of diesel every week, the project is anticipated to be completed and commence production by the end of 2015.
