

ABC ENERGY, INC. ANNOUNCES COMPLETION
OF \$300,000 UNIQUE SOLAR PROJECT

January 28, 2016

TUCSON, AZ – January 28, 2016, ABCO Energy, Inc., (OTCQB: “ABCE”) announced completion of a unique solar project in Tucson, Arizona that taxed the abilities of all of our staff. The project was constructed at a cost of \$300,000 on the property of a consortium of doctors and other medical professionals which owned the condominium offices in a commercial facility. ABCO put together nine different projects for 14 offices in the 29 office complex and obtained interconnection agreements with the local utility for each individual project and the project as a whole, a first in Tucson for such an installation.

This project contains 324 solar panels and each medical office has a separate solar electrical meter. The entire array is separated into 9 different sized projects on the parking shade structure and all projects are wired individually. Our executive staff was also called upon to arrange financing for some of the medical office owners who preferred or requested bank financing. ABCO’s design staff, engineers and construction technicians met the challenges to complete this project in record time.

“Our staff could not have worked harder or been more committed to this difficult project”, said Charles O’Dowd, President of ABCO Solar, “and we all stepped up to make sure the project was completed timely. The substantial technical requirements and the administrative difficulties of working with a very diversified group provided challenges we have not seen before and our staff brought all of the cooperation necessary to bring it together. We are very proud of our ABCO team”.

ABC Energy, Inc. is an Arizona licensed contractor for sales and installation of Photovoltaic Solar Systems, Solar Street Lighting and installation of LED and energy conservation lighting systems in their markets. ABCO has offices in Tucson, Phoenix and Flagstaff, Arizona. ABCO provides products and services to residential, commercial, government and non-profit entities in all of their markets.
