

Press Release #201613

FOR IMMEDIATE RELEASE

June 16, 2016

Enertopia Announces Surface Exploration Program

Vancouver, BC—Enertopia Corporation (ENRT) on the OTCBB and (TOP) on the CSE (the "Company" or "Enertopia") is pleased to announce it has engaged McKay Mineral Exploration, LLC to conduct the first auger sampling program on the Company's three Nevada Lithium projects.

Auger drilling is expected to take up to three days to complete. From our review of historic data available in the public domain this is believed to be the first ever lithium auger program at Edwards Creek Valley, Smith Creek Valley and the north half of the Big Smoky Valley projects in Nevada.

The auger program has been designed to test for Lithium and associated minerals at near surface depths of up to 9 feet depending on hosted sediment conditions. Sampling, bagging and shipments of all samples will be taken and completed as per best industry practice and standards.

This first sampling program, in conjunction with compilation of existing data, will help optimize the next phase of exploration.

Once the current sampling program is completed the number of samples and depth of each sample will be provided in a follow up press release.

The Qualified person:

The technical data in this news release have been reviewed by Douglas Wood, P.Geol a qualified person under the terms of NI 43-101.
