

**HUMAN UNITEC INTERNATIONAL INC**  
**NASDAQ OTC: HMNU**

Human Unitec International Inc., NASDAQ OTC: HMNU (The Company), is an International Project Financing, Development, and Asset Management Corporation based in Miami Beach, Florida. Human Unitec International Inc. specializes in financing and development of water desalination, renewable and alternative energy projects, emerging growth green energy companies.

As of June 1<sup>st</sup> 2016, HMNU entered in to a preliminary binding contract with Health Target Srl.(Health Target), an International Energy Development Firm, based and operating in Rome, Italy, for the acquisition and the construction of Health Target's patented technology GRONE System and the construction of the first Grone System Facility.

The Grone is a versatile waste sorting center that acts not only as a recycling center, but also a power plant aimed at eliminating the need for landfills. The modern land fill is a gross use of space and increasingly becoming a threat to the environment. The primary purpose of the Grone is to sort and recover Municipal Solid Waste (metals, glass, plastic, textiles, paper, bulky waste). The Grone separates each resource and allocates it to the proper recycling zone through an assembly line consisting of a 4-stage process. Whatever waste is unsalvageable is then used as a nano-structured solid fuel to maintain its perpetual power system. [www.humanunitec.com](http://www.humanunitec.com)

The contract provide also that, in conjunction with the execution and completion of the preliminary project, HMNU and Health Target will enter in to a joint venture agreement for the construction, maintenance and management of the GRONE facility. The contract provides that HMNU will receive 50% of the gross revenue derived from the facility.

**Forward-looking statements**

This document contains certain forward-looking statements with respect to the financial condition, results of operations and business of Human Unitec International Inc., (HMNU), a startup company, and certain of the plans and objectives of HMNU with respect to these items. Examples of forward-looking statements include statements made about our strategy, estimates of sales growth, future EBITA and future developments in our organic business. Forward-looking statements can be identified generally as those containing words such as “anticipates”, “assumes”, “believes”, “estimates”, “expects”, “should”, “will”, “will likely result”, “forecast”, “outlook”, “projects”, “may” or similar expressions. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances and there are many factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements.

These factors include, but are not limited to, domestic and global economic and business conditions, the successful implementation of our strategy and our ability to realize the benefits of this strategy, our ability to develop and market new products, changes in legislation, legal claims, changes in exchange and interest rates, changes in tax rates, pension costs and actuarial assumptions, raw materials and employee costs, our ability to identify and complete successful acquisitions and to integrate those acquisitions into our business, our ability to successfully exit certain businesses or restructure our operations, the rate of technological changes, political, economic and other

developments in countries where HMNU operates, industry consolidation and competition. As a result, HMNU actual future results may differ materially from the plans, goals and expectations set forth in such forward-looking statements.
