

## **ABC ENERGY, INC. ANNOUNCES SIGNING OF LIGHTING CONTRACTS**

TUCSON, AZ – October 14, 2016, ABCO Energy, Inc., (OTCQB: “ABCE”) announced signing of a significant LED lighting project with a national company that specializes in shaded parking at international airports in the United States. The customer operates large parking properties at 17 major airports and is growing rapidly. ABCO is the only energy efficient lighting vendor they are using at this time.

ABCO will provide in excess of 1,000 lighting fixtures in the first contract and has opportunities for all parking facilities in the near future.

ABCO hired Mr. Paul d’Hedouville, a long term marketing and international business development specialist, from Washington DC, to head up the “ABCO Commercial Lighting” division. His assignment has been to attract national and multi-location firms that will benefit from energy savings. This technology may save up to 70% of the customer’s electric costs for lighting and significantly reduces cooling and replacement costs.

“Paul’s first accomplishment with a national firm is very encouraging for the company. National multi-location firms often provide sales for many years on a repeat basis. We also know that solar installations normally follow the lighting contracts. In addition, Paul has sold an additional five contracts, one to a multi-location dry cleaning establishment that will put our lighting in several locations here in Tucson. We are pleased to see the LED Commercial Lighting division standing on its own at such an early stage in Paul’s employment” says Charles O’Dowd, President of ABCO Energy.

ABCO Energy, Inc. is an Arizona licensed contractor for sales and installation of Photovoltaic Solar Systems, Solar Street Lighting and installation of LED and energy conservation lighting systems in their markets. ABCO provides products and services to residential, commercial, government and non-profit entities in all of their markets.
