*The following discussion and analysis should be read in conjunction with the accompanying unaudited condensed consolidated financial statements and related notes included elsewhere in this report. It contains forward-looking statements that reflect our future plans, estimates, beliefs and expected performance. The forward-looking statements are dependent upon events, risks and uncertainties that may be outside our control. Our actual results could differ materially from those discussed in these forward looking statements. Factors that could cause or contribute to such differences include, but are not limited to, the following risks and uncertainties:*

Anasazi Energy Corporation (the "Company", and together with all of its subsidiaries, "Anasazi") was originally incorporated in Nevada as Royal Blue Explorations Inc. On June 18, 2008 the company's name was changed to CH4 Energy Inc. On March 26, 2014 the company's name was changed to High Sierra Acquisitions Inc. by an amendment filed with the Nevada Secretary of State after approval by the Company's directors and shareholders. On November 4, 2014, the company's name was changed to Anasazi Energy Corporation by an amendment filed with the Nevada Secretary of State after approval by the Company's directors and shareholders. The Company has begun the process of changing its name to Solar Quartz Technologies, Inc.

The Company's primary SIC code is 1382 Oil and Gas Exploration Services. The Company currently has a December 31 fiscal year end.

#### ***Business Overview***

Anasazi Energy Corporation ("Anasazi" or the "Company") was initially founded to engage in the acquisition, development and production of oil and gas properties as an independent oil and gas company. The principal business of Anasazi will now change upon closing the transaction with SQT.

#### ***Initial Leased Oil and Gas Property***

The Company currently owns a 3% working interest in three producing oil wells, having completed the acquisition of the Glide-Williams mineral lease in September 2014. From September 2014 through December 31, 2014, the Company owned a 95% working interest in these leases, but all but 3% of the interest was reassigned back to the assignors effective December 31, 2014. The lease covers 120 acres in Kern County, California, northwest of Bakersfield, CA. Two wells were drilled in 1956 and one in 1964 to depths of 7,800 feet and 7,600 feet respectively, both being completed in the Randolph Sand. The wells produce with minimal operating expenses. Based on an independently appraised engineering SEC valuation, we initially capitalized the oil and gas properties at

\$500,000 and issued 4,400,000 shares of common stock for the assignment of the lease. The remaining 3% interest in the lease will be reassigned back to the assignors at the closing of SQT.

The Glide-Williams mineral lease is operated by Pacific Energy Resources, Inc. pursuant to an Operating Agreement. Pursuant to the Operating Agreement, Pacific Energy Resources is entitled to 2% of the gross revenues generated by the wells, is paid a monthly fee of \$125 for each operating well, is entitled to be reimbursed for direct expenses.

#### *Currently Proposed Acquisition of SQT; Business of SQT*

On May 31, 2016 the Company entered into a Reorganization and Stock Purchase Agreement (“RSPA”) with Solar Quartz Technologies Limited, incorporated in New Zealand. The transaction closed in escrow on July 12, 2016.

The Company has begun the process of changing its name to Solar Quartz Technologies, Inc. (“SQT”) and obtain a new trading symbol. The Company issued shares of common stock for SQT that will be equivalent to 95% of the Company’s shares on issue. The Company does not anticipate any further reorganization of its common stock. The Company has begun the process of engaging accountants and auditors to prepare audited financial statements and become fully reporting with the SEC, and subsequent apply to trade on the more senior OTCQX exchange or NASDAQ. The company anticipates qualifying to trade on a more senior exchange prior to the end of 2016.

#### *High-tech Manufacturing HPQS Facility*

Solar Quartz Technologies Limited is an emerging High-Tech Refining and Processing enterprise group focused on the production of commercial quantities of High Purity Quartz Sand (“HPQS”), an essential component necessary for the manufacture of PV Solar Panels, semi-conductors and in fact all high-end electronics. The longevity of the SQT projects is also assured due to its extensive supplies of feedstock raw material for refining HPQs located at its wholly owned HP silica mineral deposits (JORC 14 m. tonnes) located in Queensland, Australia.

SQT’s primary focus is on re-establishing the highly profitable production of commercial quantities (30,000 tpa.) of High Purity Quartz Sand from new commercial facilities in both Australia and the USA.

The SQT management team has had extensive hands on experience in all technical and operational management areas of the highly lucrative HPQS manufacturing business. Management believes there are only a few organizations worldwide that are capable of manufacturing appropriate commercial quantities of HPQS. HPQS is traditionally in a position of under supply compared to global requirements. The burgeoning global demand for large capacity power generating solar farms both in the US and worldwide is further accentuating the high demand for high purity quartz production.

#### *PV Solar Panel Feedstock Production Materials*

SQT has attracted a high degree of interest from large potential Joint Venture Global end-user of Solar Grade silicon metal necessary for the production of all PV solar panels. SQT’s sole ownership of large mineral deposits of high purity silica/quartz feedstock provides substantial cost advantages compared to global pricing of such high purity silica/quartz feedstock. Management believes that SQT is well positioned to become a dominant global supplier of all raw materials required in the production of both PV Solar panels, and HPQS to many segments of the Semi-conductor, and the high-end electronics manufacturing industries.

#### *Research and Development*

In the two fiscal years ending December 31, 2015 and through June 30, 2016 the Issuer spent \$nil on research and development.

## ***Employees***

As of the date of this report, the Issuer employed one person who is a management employee. With the acquisition of SQT, the Company intends now to engage additional employees.

## ***Intellectual Property***

The Company currently maintains no active intellectual property rights.

## **Item VII. The nature and extent of the issuer's facilities.**
