Baristas Coffee Company, Inc. ("BCCI") is a Nevada Corporation that was originally formed on October 18, 1996. Its fiscal year end date is December 31st. Neither the issuer nor any of its predecessors has ever been in bankruptcy, receivership or any other similar proceeding. Our independent public accounting firm has issued a going concern opinion, in our prior financial statements. This means that our auditors believed there is substantial doubt that we can continue as an on-going business for the next 12 months.

The Company was originally formed as InfoSpi.com in 1996, and developed software programs, hired programmers and procured funding from a venture capital group prior to merging with Innovative Communications Technologies in 2001. At this time the company was renamed Innovative Communications Technologies, Inc. In 2009, Innovative Communications Technologies, Inc. was looking for new opportunities, as its discount long distance business was decreasing and winding down. Pangea was accumulating coffee shops, formulating a business model and procedures for the Baristas brand. On December 22, 2009, Innovative Communications Technologies, Inc. acquired greater than a 60% interest in Pangea Networks, Inc. ("Pangea"), DBA Baristas and Inc., for cash, stock, and other consideration, including numerous coffee stands in the greater Seattle area. In May of 2010, the Company changed its name to Baristas Coffee Company, Inc. The transaction was structured as a partial stock purchase. After the acquisition, the assets and operations were transferred to Innovative Communications Technologies, Inc., and it was renamed to Baristas Coffee Company. In April 2010, Pangea became inactive.

The company is not in default on the terms of any indebtedness or financing arrangement requiring it to make payments, nor has it had a change of control.

In conjunction with the above discussed acquisition of Pangea, the acquisition of certain coffee shops and the conversion of debt to equity, the Company issued common stock shares that increased the number of shares outstanding by more than 10%. The Company effected a 20:1 reverse split resulting in

the number of shares outstanding at June 30, 2010, being more than 10% less than the number of shares outstanding at December 31, 2009.

The Company's common stock is currently quoted for trading on the OTC Markets' Pink Sheets under the symbol BCCI.

On March 15, 2017, the Company filed a Form 15-12G, Certificate and Notice of Termination of Registration under Section 12(g) of The Securities Exchange of the 1934 Act. The Form 15-12G terminates the registration of the Company's Common Stock which was registered under 12(g) of The Securities Exchange Act of 1934 on July 24, 2015.

Basis of Presentation

The Company prepares its financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP").

Reclassifications

Certain prior year amounts have been reclassified to conform with the current year presentation for comparative purposes.

Estimates and Assumptions

Preparing financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Examples include, but are not limited to, estimates for asset and goodwill impairments, stock-based compensation forfeiture rates, future asset retirement obligations, and inventory reserves; assumptions underlying self-insurance reserves and income from unredeemed stored value cards; and the potential outcome of future tax consequences of events that have been recognized in the financial statements. Actual results and outcomes may differ from these estimates and assumptions.

Financial Instruments

Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. At December 31, 2016 and December 31, 2015, the Company had \$4,470 and \$0 cash, respectively.

Marketable Securities

The Company's marketable equity securities have been classified and accounted for as available-for-sale. Management determines the appropriate classification of its investments at the time of purchase and reevaluates the designations at each balance sheet date. The Company classifies its marketable equity securities as either short-term or long-term based on the nature of each security and its availability for use in current operations. The Company's marketable equity securities are carried at fair value, with the unrealized gains or losses reported as a component of shareholder's equity except impairment.

Adjustments resulting from the change in fair value, included in accumulated other comprehensive income in shareholder's equity, were an unrealized loss on marketable securities of \$11 and a realized gain on marketable securities of \$157,500 for the year ended December 31, 2016, and an unrealized loss on marketable securities of \$54,829, and a realized gain on marketable securities of \$199,600, for the year ended December 31, 2015.

Fair Value of Financial Instruments

The carrying amount of the Company's cash, accounts payables and accrued liabilities approximates their estimated fair values due to the short-term maturities of those financial instruments.

The Company has adopted a single definition of fair value, a framework for measuring fair value, and providing expanded disclosures concerning fair value whereby estimated fair value is the price to be paid for an asset or the amount to settle a liability in an orderly

transaction between market participants at the measurement date. Accordingly, fair value is a market-based measurement and not an entity-specific measurement.

The Company utilizes the following hierarchy in fair value measurements:

Level 1 – Inputs use quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.

Level 2 – Inputs use other inputs that are observable, either directly or indirectly. These inputs include quoted prices for similar assets and liabilities in active markets as well as other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 – Inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset or liability.

As at December 31, 2016

Investments in Marketable Securities, available-for-sale	\$ 44	\$ 44	-	\$ 44
Total	\$ 44	\$ 44	-	\$ 44

As at December 31, 2015

Carrying Value	Level 1	Level 2	Level 3	Total
Investments in Marketable Securities, available-for-sale	\$ 4,555	\$ 4,555	-	\$ 4,555
Total	\$ 4,555	\$ 4,555	-	\$ 4,555

Inventories

Inventories are stated at the lower of cost or market. Cost is computed using weighted average cost, which approximates actual cost, on a first-in, first-out basis. Inventories on hand are evaluated on an on-going basis to determine if any items are obsolete or in excess of future needs. Items determined to be obsolete are reserved for. The Company provides for the possible inability to sell its inventories by providing an excess inventory reserve. As at December 31, 2016 and December 31, 2015, the Company determined that no reserve was required.

Property, Plant and Equipment

Property, plant and equipment are carried at cost less accumulated depreciation. Cost includes all direct costs necessary to acquire and prepare assets for use, including internal labor and overhead in some cases. Depreciation of property, plant and equipment, which includes assets under capital leases, is provided on the straight-line method over estimated useful lives, generally ranging from 3 to 5 years for equipment and 5 years for buildings. Leasehold improvements are amortized over the shorter of their estimated useful lives or the related lease life, generally 5 years. For leases with renewal periods at our option, we generally use the original lease term, excluding renewal option periods, to determine estimated useful lives. If failure to exercise a renewal option imposes an economic penalty to us, we may determine at the inception of the lease that renewal is reasonably assured and include the renewal option period in the determination of the appropriate estimated useful lives. The costs of repairs and maintenance are expensed when incurred, while expenditures for refurbishments and improvements that significantly add to the productive capacity or extend the useful life of an asset are capitalized. When assets are retired or sold, the asset cost and related accumulated depreciation are eliminated with any remaining gain or loss recognized in net earnings.

Goodwill

We test goodwill for impairment on an annual basis, or more frequently if circumstances, such as material deterioration in performance or a significant number of store closures, indicate reporting unit carrying values may exceed their fair values. When evaluating goodwill for impairment, we may first perform a qualitative assessment to determine if the fair value of the reporting unit is more likely than not greater than its carrying amount. If we do not perform a qualitative assessment or if the fair value of the reporting unit is not more likely than not greater than its carrying amount, we calculate the implied estimated fair value of the reporting unit. If the carrying amount of goodwill exceeds the implied estimated fair value, an impairment charge to current operations is recorded to reduce the carrying value to the implied estimated fair value. There were no goodwill impairment charges recorded during the periods ended December 31, 2016 and 2015.

Other Intangible Assets

Definite-lived intangible assets, which mainly consist of acquired rights, trade secrets, trademarks and copyrights, are amortized over their estimated useful lives, and are tested for impairment when facts and circumstances indicate that the carrying values may not be recoverable. There were no intangible asset impairment charges recorded during the periods ended December 31, 2016 and 2015.

Long-lived Assets

Long-lived assets such as property, equipment and identifiable intangibles are reviewed for impairment whenever facts and circumstances indicate that the carrying value may not be recoverable. When required impairment losses on assets to be held and used are recognized based on the fair value of the asset. The fair value is determined based on estimates of future cash flows, market value of similar assets, if available, or independent appraisals, if required. If the carrying amount of the long-lived asset is not recoverable from its undiscounted cash flows, an impairment loss is recognized for the difference between the carrying amount and fair value of the asset. When fair values are not available, the Company estimates fair value using the expected future cash flows discounted at a rate commensurate with the risk associated with the recovery of the assets. We did not recognize any impairment losses for any periods presented.

Revenue Recognition

The Company's revenues consist of sales by Company-operated coffee stores.

Revenues are presented net of intercompany eliminations for investees controlled by us. Additionally, revenues are recognized net of any discounts, returns, allowances and sales incentives, including coupon redemptions and rebates. Company-operated stores revenues are recognized when payment is tendered at the point of sale. Company-operated store revenues are reported net of sales, use or other transaction taxes that are collected from customers and remitted to taxing authorities. All revenue is recognized when (i) persuasive evidence of an arrangement exists; (ii) the service or sale is completed; (iii) the price is fixed or determinable; and (iv) the ability to collect is reasonably assured.

Marketing & Advertising

Advertising costs are expensed as incurred. Advertising costs totaled \$8,785 and \$68,799 for the year ended December 31, 2016, and 2015, respectively.

Stock-based Compensation

The Company accounts for employee stock-based compensation to employees, including grants of employee stock options, based on their fair values. The fair value of the equity instrument is charged directly to compensation expense and credited to additional paid-in capital over the period during which services are rendered.

Stock options and warrants issued to consultants and other non-employees are accounted for based upon the fair value of the services provided or the estimated fair market value of the option or warrant, whichever can be more clearly determined.

Stock-based expenses to employees and consultants for general and administration services totaled \$282,602 and \$263,220, for the year ended December 31, 2016, and 2015, respectively.

Earnings per Share

Basic earnings per common share equal net earnings or loss divided by the weighted average of shares outstanding during the reporting period. Diluted earnings per share reflects the potential dilution that could occur if stock options and other commitments to issue common stock were exercised or equity awards vest resulting in the issuance of common stock that could share in the earnings of the Company. The Company incurred a net loss for periods ended December 31, 2016 and 2015, respectively and therefore, basic and diluted earnings per share for those periods are the same because all potential common equivalent shares would be anti-dilutive.

As at December 31, 2016, convertible shareholder loans of \$462,917, convertible notes payable of \$245,750 and 27,328,358 shares of preferred stock were considered to be anti-dilutive.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued guidance codified in Accounting Standards Codification ("ASC") 606, "Revenue Recognition - Revenue from Contracts with Customers," which amends the guidance in ASC 605, "Revenue Recognition," and becomes effective beginning January 1, 2017. The Company is currently evaluating the impact of the provisions of ASC 606.

Accounting standards that have been issued by the FASB or other standards setting bodies that do not require adoption until a future date are being evaluated by the Company to determine whether adoption will have a material impact on the Company's financial statements.

NOTE 2 – GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates the realization of assets and the liquidation of liabilities in the normal course of business. As at December 31, 2016, the Company has a loss from operations of \$1,360,560 and an accumulated deficit of \$13,230,976. The Company intends to fund operations through equity financing arrangements, which may be insufficient to fund its capital expenditures, working capital and other cash requirements for the year ending December 31, 2017.

The ability of the Company to fully commence its operations is dependent upon, among other things, obtaining additional financing to continue operations, and execution of its business plan. In response to these concerns, management intends to raise additional funds through public or private placement offerings and through loans from officers and directors.

These factors, among others, raise substantial doubt about the Company's ability to continue as a going concern. The accompanying financial statements do not include any adjustments that might result from the outcome of this uncertainty. There can be no assurance that management's plan will be successful.

Goodwill

The intangible assets were purchased along with the hard assets, in December 2009, for \$3.5 million in our common stock. After the assets and intangible assets were identified, the remaining \$2,770,651 was recorded as goodwill. The Company does not amortize goodwill. Instead, the Company evaluates goodwill annually in the fourth quarter and whenever events or changes in circumstances indicate that it is more likely than not that an impairment loss has been incurred.

As at December 31, 2016, the Company determined that no such impairment existed based on the following financial and non-financial considerations:

- As at December 31, 2016 the company's market capitalization was approximately \$4,000,000 and has historically exceeded goodwill.
- Management has been actively building brand awareness through obtaining a brand patent, establishing multiple locations, periphery product branding, and development of a pilot TV episode.

The Company follows ASC 260, "Earnings per Share," ("EPS") which requires presentation of basic EPS on the face of the income statement for all entities with complex capital structures and requires a reconciliation of the numerator and denominator of the basic EPS computation. In the accompanying financial statements, basic earnings (loss) per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. Diluted EPS include additional dilution from common stock equivalents, such as convertible notes, preferred stock, stock issuable pursuant to the exercise of stock options and warrants. Common stock equivalents are not included in the computation of diluted earnings per share when the Company reports a loss because to do so would be anti-dilutive for periods presented. As at December 31 2016 and 2015, the Company had \$462,917 and \$579,431 in convertible shareholder loans, respectively, \$245,750 and \$259,850 convertible notes payable and respectively, 27,328,358 and 27,328,358 convertible preferred stock issued and outstanding, respectively, which have been omitted from diluted EPS.

The following table sets forth, as of March 29, 2017, certain information with respect to the beneficial ownership of our common shares by each shareholder known by us to be the beneficial owner of more than 5% of our common shares, as well as by each of our current directors and executive officers as a group. Certain shares may be deemed to be beneficially owned by more than one person (if, for example, persons share the power to vote or the power to dispose of the shares). In addition, shares are deemed to be beneficially owned by a person if the person has the right to acquire the shares (for example, upon exercise of an option) within 60 days of the date as of which the information is provided. In computing the percentage ownership of any person, the amount of shares outstanding is deemed to include the amount of shares beneficially owned by such person (and only such person) by reason of these acquisition rights. As a result, the percentage of outstanding shares of any person as shown in this table does not necessarily reflect the person's actual ownership or voting power with respect to the number of shares of common stock actually outstanding on March 29, 2017.
