## FAIR VALUE OF FINANCIAL INSTRUMENTS

The Financial Accounting Standards Board (FASB) issued Accounting Standards Codification (ASC) 820-10, "Fair Value Measurements and Disclosures" for financial assets and liabilities. FASB ASC 820-10 provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. FASB ASC 820-10 defines fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. FASB ASC 820-10 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available.

Level 1: Quoted prices in active markets for identical assets or liabilities.

Level 2: Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities.

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

## RECENT ACCOUNTING PRONOUNCEMENTS – Not Yet Adopted

In April 2013, the FASB issued ASU No. 2013-07, Presentation of Financial Statements (Topic 205): Liquidation Basis of Accounting. The objective of ASU No. 2013-07 is to clarify when an entity should apply the liquidation basis of accounting and to provide principles for the measurement of assets and liabilities under the liquidation basis of accounting, as well as any required disclosures. The amendments in this standard is effective prospectively for entities that determine liquidation is imminent during annual reporting periods beginning after December 15, 2013, and interim reporting periods therein. The Company is evaluating the effect, if any, adoption of ASU No. 2013-07 will have on its financial statements.

## RECENT ACCOUNTING PRONOUNCEMENTS – Adopted

In June 2014, the FASB issued ASU No. 2014-10, Development Stage Entities (Topic 915): Elimination of Certain Financial Reporting Requirements, including an Amendment to Variable Interest Entities Guidance in Topic 810 Consolidation. The objective of the amendments in ASU No. 2014-10 is to improve financial reporting by reducing the cost and complexity associated with the incremental reporting requirements for development stage entities. ASU No. 2014-10 is effective as of the first annual period beginning after December 15, 2014, at which time the presentation and disclosure requirements in Topic 915 will no longer be required. The revised consolidation standards are effective one year later, in annual periods beginning after December 15, 2015. Early adoption of those new standards is permitted.

The Company adopted ASU No. 2014-10 effective June 1, 2014. The amendments eliminate the requirements for development stage entities to (1) present inception-to-date information in the statements of income, cash flows, and shareholder equity, (2) label the financial statements as those of a development stage entity, (3) disclose a description of the development stage activities in which the entity is engaged, and (4) disclose in the first year in which entity is no longer a development stage entity that in prior years it had been in the development stage.

## INCOME TAXES

Under ASC 740, "Income Taxes", deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Valuation allowances are established when it is not more likely than not that some or all of the deferred tax assets will be realized.

LOSS PER COMMON SHARE

Basic loss per common share excludes dilution and is computed by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted loss per common share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the loss of the entity.

RJD Green, Inc.  
Notes to the Consolidated Financial Statements  
(Unaudited)

All common stock amounts and per share amounts in these financial statements reflect the fifty-for-one and two-for-one stock splits of the Company, effective November 30, 2012 and March 31, 2013 respectively, including retrospective adjustment of common stock amounts to reflect a par value of \$0.001 per share.

NOTE 8 - INCOME TAXES

The items accounting for the difference between income taxes computed at the federal statutory rate and the benefit for income taxes were as follow:

	August 31, 2016	August 31, 2015
Benefit computed at federal statutory rate	34.00%	34.00%
State tax, net of federal tax benefit	0.00%	0.00%
Valuation allowance	(34.00%)	(34.00%)
Effective income tax rate	0.00%	0.00%

Deferred tax assets resulting from the net operating losses (“NOL”) are reduced by a valuation allowance, when, in the opinion of management, utilization is not more likely than not. The following summarizes the deferred tax assets:

	August 31, 2016	August 31, 2015
Deferred tax asset - NOL	\$ 357,846	\$1357,846
Less valuation allowance	(357,846)	(357,846)
Net deferred tax asset	\$ 0	\$ 0

As at August 31, 2016, the Company has \$357,846 of NOL carryforwards expiring during various years up to 2034.

The Company periodically evaluates the likelihood of the realization of deferred tax assets, and adjusts the carrying amount of the deferred tax assets by a valuation allowance to the extent the future realization of the deferred tax assets is not judged to be more likely than not.

The Company considers many factors when assessing the likelihood of future realization of our deferred tax assets, including recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income or loss, the carry-forward periods available to it for tax reporting purposes, and other relevant factors.

At August 31, 2016, based on the weight of available evidence, including cumulative losses in recent years and expectations of future taxable income, the Company determined that it was not more likely than not that its deferred tax assets would be realized. Accordingly, the Company has recorded a valuation allowance equivalent to 100% of its cumulative deferred tax assets.

As a result of the implementation of certain provisions of ASC 740, the Company performed an analysis of its previous tax filings and determined that there were no positions taken that it considered materially uncertain. Therefore, there was no provision for uncertain tax positions for the fiscal year ended August 31, 2016 and for the year ended August 31, 2015. Future changes in uncertain tax positions are not expected to have an impact on the effective tax rate due to the existence of the valuation allowance.
