Item VI: Describe the Issuer’s Business, Products and Services

Describe the issuer’s business so a potential investor can clearly understand the company. In answering this item, please include the following:

- A. a description of the issuer’s business operations;

The Real Estate business has been the main focus of the Company in the past. It acquired, rehabilitated and rented or resold homes for profit throughout Texas. All of these homes have been lost along with the contract for deed that it held on a large block of homes in Texas. This model has been changed and the Company is in the process of acquiring blocks of land in Florida, California and North Carolina for development of sustainable housing.

On August 20, 2014, the Company entered into a Share Exchange Agreement (the “Agreement”) with Black Pearl Petroleum (BPP) wherein BPP received 36,000,000 outstanding shares of the Company’s Series A Preferred Stock and 4,000,000 shares of Jeffrey B. Love’s Series A Preferred, which he caused to be transferred to BPP. In exchange the Company received 20,000,000 shares (all of the shares) of common stock of CP Resources, LLC (a Nevada Corp) and 20,000,000 shares (all of the shares) of common stock of West Coast Partners, LLC (a Nevada Corp) both of which were BPP Companies. After the exchange BPP owns 40,000,000 shares of Series A Preferred (80%) and Jeffrey B. Love owns 10,000,000 shares of Series A Preferred (20%).

The share exchange agreement brought LIG Assets, Inc. into the Oil and Gas business. But because of the falling oil prices and the lack of ability of the Company to raise any money the oil leases owned by West Coast Partners

and CP Resources were lost.

On June 1, 2016, the Company signed a Restructuring Agreement that reorganized its management team and brought in a new President to concentrate on the real estate portion of the Company. The present CEO will remain and along with the new President will make up the new board of directors. An Advisory Board with three members was also formed.

The Company has entered into agreements in furtherance of the business model that apportions an ownership interest in the sustainable construction materials and processes that are due to commence manufacture and building in the second Quarter of 2017. In addition, LIGA contracted with a Canadian live fish storage system company that will employ LIGA's sustainable technology. LIGA also commenced acquisition of BGTV Direct LLC in March 2017 and completed the acquisition in April 2017. This acquisition will be used as a media arm to support the overall Company mission and will bring a significant revenue stream that will be posted in second quarter report.

B. Date and State (or Jurisdiction) of Incorporation:

LIG ASSETS, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE QUARTER ENDED MARCH 31, 2017 AND DECEMBER 31, 2016.

NOTE – 1 ORGANIZATION AND BUSINESS BACKGROUND

LIG Assets, Inc. ("Company") was incorporated in the State of Nevada on October 14, 2008.

The Real Estate business has been the main focus of the Company in the past. It acquired, rehabilitated and rented or resold homes for profit throughout Texas. All of these homes have been lost along with the contract for deed that it held on a large block of homes in Texas. This model has been changed and the Company is in the process of acquiring blocks of land in Florida, California and North Carolina for development of sustainable housing.

On August 20, 2014, the Company entered into a Share Exchange Agreement (the "Agreement") with Black Pearl Petroleum (BPP) wherein BPP received 36,000,000 outstanding shares of the Company's Series A Preferred Stock and 4,000,000 shares of Jeffrey B. Love's Series A Preferred, which he caused to be transferred to BPP. In exchange the Company received 20,000,000 shares (all of the shares) of common stock of CP Resources, LLC (a Nevada Corp) and 20,000,000 shares (all of the shares) of common stock of West Coast Partners, LLC (a Nevada Corp) both of which were BPP Companies. After the exchange BPP owns 40,000,000 shares of Series A Preferred (80%) and Jeffrey B. Love owns 10,000,000 shares of Series A Preferred (20%).

The share exchange agreement brought LIG Assets, Inc. into the Oil and Gas business. But because of the falling oil prices and the lack of ability of the Company to raise any money the oil leases owned by West Coast Partners and CP Resources were lost.

On June 1, 2016, the Company signed a Restructuring Agreement that reorganized its management team and brought in a new President to concentrate on the real estate portion of the Company. The present CEO will remain and along with the new President will make up the new board of directors. An Advisory Board with three members was also formed.

The Company concentrates on building sustainable housing with partners that have land, land developments and construction materials and technology to contribute to the projects. In addition, the Company has partnership agreements to produce sustainable construction materials and health products.

NOTE 2 -SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

The accompanying unaudited condensed financial statements have been prepared in accordance with accounting principles generally accepted in The United States of America and the rules and regulations of the Securities and Exchange Commission for interim financial information. Accordingly, they include all the information necessary for a comprehensive presentation of financial position and results of operations.

It is management's opinion, however, that all material adjustments (consisting of normal and recurring adjustments) have been made which are necessary for a fair financial statements presentation. The results for the interim period are not necessarily indicative of the results to be expected for the year.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results could differ from those estimates.

Cash equivalents

The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents. At March 31, 2017 and December 31, 2016, the Company had no cash equivalents.

Fair value of financial instruments

The Company adopted the provisions of FASB ASC 820 (the "Fair Value Topic") which defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measurements.

The Fair Value Topic defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. It requires that valuation techniques maximize the use of observable inputs and minimize the use of unobservable inputs. It also establishes a fair value hierarchy, which prioritizes the valuation inputs into three broad levels.

The following fair value hierarchy is used to classify assets and liabilities based on the observable inputs and unobservable inputs used in order to value the assets and liabilities:

- A) Market approach—Uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. Prices may be indicated by pricing guides, sale transactions, market trades, or other sources;
- B) Cost approach—Based on the amount that currently would be required to replace the service capacity of an asset (replacement cost); and
- C) Income approach—Uses valuation techniques to convert future amounts to a single present amount based on current market expectations about the future amounts (includes present value techniques, and option-pricing models). Net present value is an income approach where a stream of expected cash flows is discounted at an appropriate market interest rate.

Level 1: Quoted market prices available in active markets for identical assets or liabilities as of the reporting date. An active market for an asset or liability is a market in which transactions for the asset or liability occur with significant frequency and volume to provide pricing information on an ongoing basis.

Level 2: Observable inputs other than Level 1 inputs. Example of Level 2 inputs include quoted prices in active markets for similar assets or liabilities and quoted prices for identical assets or liabilities in markets that are not active.

Level 3: Unobservable inputs based on the Company's assessment of the assumptions that are market participants would use in pricing the asset or liability.

The carrying amount of the Company's financial assets and liabilities, such as cash, prepaid expenses, accounts payable, accrued expenses, and deferred revenue approximate their fair value because of the short maturity of those instruments. The Company's note payable approximates the fair value of such instruments based upon management's best estimate of interest rates that would be available to the Company for similar financial arrangements at March 31, 2017, and December 31, 2016.

The Company had no assets and/or liabilities measured at fair value on a recurring basis at March 31, 2017, and December 31, 2016, using the market and income approaches.

Property and Equipment

Property and equipment are recorded at cost. Expenditures for major additions and betterments are capitalized. Maintenance and repairs are charged to operations as incurred. Depreciation is computed by the straight-line method over the assets estimated useful life of three (3) years for equipment, (5) years for automobile, and (7) years for furniture and fixtures. Upon sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is reflected in statements of operations.

Impairment of long-lived assets

The Company follows paragraph 360-10-05-4 of the FASB Accounting Standards Codification for its long-lived assets. The Company's long-lived assets, such as intellectual property, are required to be reviewed for impairment annually, or whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable.

The Company assesses the recoverability of its long-lived assets by comparing the projected undiscounted net cash flows associated with the related long-lived asset or group of long-lived assets over their remaining estimated useful lives against their respective carrying amounts. Impairment, if any, is based on the excess of the carrying amount over the fair value of those assets. Fair value is generally determined using the asset's expected future discounted cash flows or market value, if readily determinable. If long-lived assets are determined to be recoverable, but the newly determined remaining estimated useful lives are shorter than originally estimated, the net book values of the long-lived assets are depreciated over the newly determined remaining estimated useful lives.

The Company determined that there were no impairments of long-lived assets as of March 31, 2017 and December 31, 2017.

Commitments and contingencies

The Company follows subtopic 450-20 of the FASB Accounting Standards Codification to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated.

Revenue recognition

The Company follows paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company will recognize revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured. In addition, the Company records allowances for accounts receivable that are estimated to not be collected.

Net income (loss) per share

The Company computes basic and diluted earnings per share amounts pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic earnings per share is computed by dividing net income (loss) available to common shareholders, by the weighted average number of shares of common stock outstanding during the period, excluding the effects of any potentially dilutive securities. Diluted earnings per share is computed by dividing net income (loss) available to common shareholders by the diluted weighted average number of shares of common stock during the period. The diluted weighted average number of common shares outstanding is the basic weighted number of shares adjusted as of the first day of the year for any potentially diluted debt or equity.

There were 2,262,470,850 basic/dilutive shares outstanding as of March 31, 2017. The majority of these shares were issued on the conversion of convertible notes payable.

Subsequent events

The Company follows the guidance in Section 855-10-50 of the FASB Accounting Standards Codification for the disclosure of subsequent events. The Company will evaluate subsequent events through the date when the financial statements were issued.

Recently issued accounting pronouncements

Company management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying financial statements.

NOTE—3 GOING CONCERN

These financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business. The Company has an accumulated deficit of \$3,,001,247 The Company's ability to continue as a going concern is contingent upon its ability to achieve and maintain profitable operations, and the Company’s ability to raise additional capital as required.

These conditions raise substantial doubt about the Company's ability to continue as a going concern. These financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts, or amounts and classification of liabilities that might result from this uncertainty.
