Notes to the condensed interim consolidated financial statements

For the three months ended March 31, 2017

(Unaudited – in U.S. dollars; tabular amounts in thousands except for shares and per share amounts)

1. Nature of operations and going concern

GoviEx Uranium Inc. (“**GoviEx**” or the “**Company**”) is a Canadian mineral resources company focused on the exploration and development of uranium properties located in Africa. The head office, principal address, registered and records office of the Company is located at 999 Canada Place, Suite 654, Vancouver, British Columbia, Canada, V6C 3E1.

The condensed interim consolidated financial statements have been prepared on a going concern basis which assumes that the Company will realize its assets and discharge its liabilities in the normal course of business. Since inception to March 31, 2017, the Company has incurred cumulative losses of \$192 million (December 31, 2016 - \$188 million) with a working capital deficiency of \$4.46 million (December 31, 2016 - \$2.86 million).

Continuation of the Company as a going concern is dependent upon the confirmation of economically recoverable reserves, negotiation of the timing and terms of the Euro 7 million payment (\$7.5 million) in connection with the receipt of a mining permit relating to its Madaouela I Project as described in Note 4, and the ability of the Company to obtain further financing to develop its mineral properties. In the event that the Company fails to deliver a definitive feasibility study on its Madaouela project prior to December 31, 2017, the holder of the uranium loan has the right to demand full payment of principal and interest (Note 5). Management intends to raise funds through either equity/debt financing and/or joint venture arrangements. Although the Company has been successful in raising funds in the past, there can be no assurance that it will be able to do so in the future. The lack of sufficient committed funding for the next 12 months cast a significant doubt upon the Company’s ability to continue as a going concern. The Company has no source of revenue, and significant cash requirements to maintain its mineral interests, meet its administrative overhead, and pay its liabilities.

Should the Company be unable to continue as a going concern, the net realizable value of its assets may be materially less than the amounts on the condensed interim consolidated statements of financial position. These condensed interim consolidated financial statements do not reflect adjustments to the carrying value and classification of assets and liabilities that might be necessary in the event of going concern and such adjustments could be material.

2. Basis of presentation

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“**IFRS**”) applicable to the preparation of interim financial statements, including International Accounting Standard (“**IAS**”) 34 *Interim Financial Reporting*, using the same accounting policies as detailed in the Company’s audited consolidated financial statements for the year ended December 31, 2016.

The condensed interim consolidated financial statements do not include all of the information required for complete annual consolidated financial statements, and therefore should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2016 and the notes thereto.

These condensed interim consolidated financial statements include accounts of the Company and its subsidiaries. All amounts are presented in United States dollars (“\$”), which is the functional currency of the Company and each of the Company’s subsidiaries, except as otherwise noted. References to CAD\$ are to Canadian dollars. All inter-company balances, transactions, and expenses have been eliminated.

Critical accounting estimates and judgments

The Company’s management makes estimates and uses judgments when determining the assets, liabilities and expenses reported in these interim financial statements. These estimates and judgments are reviewed on an ongoing basis based on historical experience, current economic conditions, and include expectations of future events that are believed to be reasonable under the circumstances. Actual outcomes could differ from these estimates. The critical estimates and judgments applied in the preparation of these interim financial statements are consistent with those applied and disclosed in Note 2 to the audited consolidated financial statements for the year ended December 31, 2016. The Company’s interim results are not necessarily indicative of its results for a full year.

GoviEx Uranium Inc.

Notes to the condensed interim consolidated financial statements

(Unaudited – in U.S. dollars; tabular amounts in thousands except for shares and per share amounts)

3. Marketable securities

On March 9, 2017, the Company received 1,210,975 common shares of Kincora Copper Limited (“**Kincora**”), as a result of a debt settlement in relation to a series of loan arrangements with a related party during the year ended December 31, 2010, for which the amounts were previously written off. Kincora is a Canadian publicly listed company on TSX-V under trading symbol of KCC.

These Kincora shares are recorded as marketable securities, classified as available-for-sale, and recorded at fair market value determined by reference to their closing share price at each reporting date. Any fair value gain or loss is recognized in the other comprehensive loss during the period.

During the three months ended March 31, 2017, \$502,033 was recorded as other income and \$64,956 was recognized as net change in fair value of marketable securities in the condensed interim consolidated statements of (loss) income and comprehensive (loss) income.

4. Mineral properties

Niger

The Company’s primary asset is an advanced-stage exploration uranium property located in north central Niger.

On February 1, 2016, the Company announced that the mining permit for Madaouela I was granted by the Niger government. Under the terms of the 2007 Mining Convention with the Republic of Niger Ministry of Mines and Energy (“**Niger Ministry**”), the Company will be required to make a one-time payment of Euro 7 million (\$7.5 million) upon the publication of the official decree awarding the first mining permit issued. The Company will discuss with the Niger Ministry for the terms of this payment.

The exploration licenses application for Eralrar (submitted on November 22, 2012) and the renewals for Madaouela II, III, IV and Anou Melle were approved by Niger government in January 2016.

Mali and Zambia

As a result of the Rockgate acquisition closed on June 10, 2016, the Company acquired a 100% interest in Mutanga property in Zambia, a 100% interest in Falea project in Mali, and 90% interest in Dome project in Namibia with a total fair value of \$3.7 million, of which \$2.3 million has been allocated to Mutanga, \$1.4 million to Falea and \$nil to Dome.

5. Uranium loan

Pursuant to a bond purchase agreement with Toshiba Corporation (“**Toshiba**”) in April 2012, the Company borrowed 200,000 pounds of uranium concentrate U_3O_8 (“**Uranium Loan**”) at an interest rate of 12% compounded annually. The Uranium Loan matures on April 19, 2020 subject to early redemption by Toshiba. The principal and interest are stated in pounds of U_3O_8 , and at maturity the Company will have to repay Toshiba a total of 495,193 pounds of U_3O_8 including interest accrued.

The Uranium Loan is secured by a floating charge on all Nigerien assets of the Company.

Toshiba has the right to demand repayment of the Uranium Loan and accrued interest if (i) the Company fails to deliver a definitive feasibility study relating to Madaouela Project prior to December 31, 2017, or (ii) the sum of the production and capital costs per pound of U_3O_8 , as estimated in a feasibility study prepared in respect of the Madaouela Project, is not lower than \$44 per pound.

6. Share purchase warrants derivative liability

Share purchase warrants issued with an exercise price denominated in a currency other than the Company's functional currency are considered derivative instruments. As such they are classified as financial liabilities measured at fair value and are re-measured each reporting period with all changes recorded as a component of net earnings (loss).

In connection with a non-brokered private placement closed in tranches on September 28 and November 3, 2015, the Company issued 22.3 million warrants to the unit holders. Each warrant entitled the holder to purchase one common share of the Company at an exercise price of CAD\$0.18 for a period of two years following the issuances.

The fair value was estimated at \$0.04 on the date of issue (March 31, 2017 - \$0.06, December 31, 2016 - \$0.02) by using the Black-Scholes option pricing model assuming an expected volatility of 75%, a risk-free interest rate of 0.50%, an estimated forfeiture rate of 0%, a dividend yield of 0%, and an expected term of two years (March 31, 2017 – 0.58 years, December 31, 2016 – 0.83 years).

The following table provides detail of the movement of the warrant liability:

	Number of warrants	Amount
Balance as January 1, 2015		\$

14. Commitments and contingencies

- The Company is required to incur certain amounts of exploration expenditures over the validity period of certain of its exploration licenses in Niger and Mali in order to maintain the licenses in good standing.
- The Company has received requests for payment of area taxes from the Niger government. The Company believes that the area tax of \$2.0 million per annum will become payable only once the Nigerien mining company is incorporated, which includes the conclusion of negotiation of the percentage shareholding of the Nigerien government.
- Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers, or title may be affected by undetected defects. In addition to the above matters, the Company and its subsidiaries are also subject to routine legal proceedings and tax audits. The Company does not believe that the outcome of any of these matters, individually or in aggregate, would have a material adverse effect on its condensed interim consolidated net earnings, cash flow or financial positions.
