Note 1 – Nature of Business and Significant Accounting Policies

Nature of Business

WEED, Inc. (the “Company”), (formerly United Mines, Inc.) was incorporated under the laws of the State of Arizona on August 20, 1999 (“Inception Date”) as Plae, Inc. to engage in the exploration of gold and silver mining properties. On November 26, 2014, the Company was renamed from United Mines, Inc. to WEED, Inc. and was repurposed to pursue a business involving the purchase of land, and building Commercial Grade “Cultivation Centers” to consult, assist, manage & lease to Licensed Dispensary owners and organic grow operators on a contract basis, with a concentration on the legal and medical marijuana sector. The Company’s plan is to become a True “Seed-to-Sale” company providing infrastructure, financial solutions and real estate options in this new emerging market. The Company, under United Mines, was formerly in the process of acquiring mineral properties or claims located in the State of Arizona, USA. The name was previously changed on February 18, 2005 to King Mines, Inc. and then subsequently changed to United Mines, Inc. on March 30, 2005. The Company trades on the OTC Pink Sheets under the stock symbol: BUDZ.

On April 20, 2017, the Company acquired Sangre AT, LLC, a Wyoming company doing business as Sangre AgroTech. (“Sangre”). Sangre is a plant genomic research and breeding company comprised of top-echelon scientists with extensive expertise in genomic sequencing, genetics-based breeding, plant tissue culture, and plant biochemistry, utilizing the most advanced sequencing and analytical technologies and proprietary bioinformatics data systems available. Sangre is working on a cannabis genomic study to complete a global genomic classification of the cannabis plant genus.

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America. These statements reflect all adjustments, consisting of normal recurring adjustments, which in the opinion of management are necessary for fair presentation of the information contained therein.

The Company has a calendar year end for reporting purposes.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the following entities, all of which are under common control and ownership:

Name of Entity	State of Incorporation	Relationship ⁽¹⁾	Abbreviated Reference
WEED, Inc.	Nevada	Parent	WEED
Sangre AT, LLC ⁽²⁾	Wyoming	Subsidiary	Sangre

⁽¹⁾Sangre is a wholly-owned subsidiary of WEED, Inc.

⁽²⁾Sangre AT, LLC is doing business as Sangre AgroTech.

The consolidated financial statements herein contain the operations of the wholly-owned subsidiary listed above. All significant inter-company transactions have been eliminated in the preparation of these financial statements. The parent company, WEED and subsidiary, Sangre will be collectively referred to herein as the “Company”, or “WEED”. The Company's headquarters are located in Tucson, Arizona and its operations are primarily within the United States, with minimal operations in Australia.

These statements reflect all adjustments, consisting of normal recurring adjustments, which in the opinion of management are necessary for fair presentation of the information contained therein.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 1 – Nature of Business and Significant Accounting Policies (Continued)

Cash and Cash Equivalents

We maintain cash balances in non-interest-bearing accounts, which do not currently exceed federally insured limits. For the purpose of the statements of cash flows, all highly liquid investments with an original maturity of three months or less are considered to be cash equivalents. There were no cash equivalents on hand for the periods presented herein.

Fair Value of Financial Instruments

Under FASB ASC 820-10-05, the Financial Accounting Standards Board establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This Statement reaffirms that fair value is the relevant measurement attribute. The adoption of this standard did not have a material effect on the Company's financial statements as reflected herein. The carrying amounts of cash, prepaid expenses and accrued expenses reported on the balance sheet are estimated by management to approximate fair value primarily due to the short term nature of the instruments.

Property and Equipment

Property and equipment is stated at the lower of cost or estimated net recoverable amount. The cost of property, plant and equipment is depreciated using the straight-line method based on the lesser of the estimated useful lives of the assets or the lease term based on the following life expectancy:

Software	3 years
Furniture and fixtures	5 years
Equipment	5-7 years

Repairs and maintenance expenditures are charged to operations as incurred. Major improvements and replacements, which have extend the useful life of an asset, are capitalized and depreciated over the remaining estimated useful life of the asset. When assets are retired or sold, the cost and related accumulated depreciation and amortization are eliminated and any resulting gain or loss is reflected in operations.

Impairment of Long-Lived Assets

Long-lived assets held and used by the Company are reviewed for possible impairment whenever events or circumstances indicate the carrying amount of an asset may not be recoverable or is impaired. Recoverability is assessed using undiscounted cash flows based upon historical results and current projections of earnings before interest and taxes. Impairment is measured using discounted cash flows of future operating results based upon a rate that corresponds to the cost of capital. Impairments are recognized in operating results to the extent that carrying value exceeds discounted cash flows of future operations.

Basic and Diluted Loss Per Share

The basic net loss per common share is computed by dividing the net loss by the weighted average number of common shares outstanding. Diluted net loss per common share is computed by dividing the net loss adjusted on an "as if converted" basis, by the weighted average number of common shares outstanding plus potential dilutive securities. For the periods presented, potential dilutive securities had an anti-dilutive effect and were not included in the calculation of diluted net loss per common share.

Stock-Based Compensation

Under FASB ASC 718-10-30-2, all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. The Company's stock based compensation issued for services was \$980,801 and \$119,312 for the six months ended June 30, 2017 and 2016, respectively.

Revenue Recognition

Sales on fixed price contracts are recorded when services are earned, the earnings process is complete or substantially complete, and the revenue is measurable and collectability is reasonably assured. Provisions for discounts and rebates to customers, estimated returns and allowances, and other adjustments are provided for in the same period the related sales are recorded. The Company will defer any revenue from sales in which payment has been received, but the earnings process has not occurred. Sales have not yet commenced on the MMJ business. The Company also did not recognize revenues from its previous mining operations during the periods presented herein.

Advertising and Promotion

All costs associated with advertising and promoting products are expensed as incurred. These expenses were \$1,771 and \$-0- for the six months ended June 30, 2017 and 2016, respectively.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. A valuation allowance is provided for significant deferred tax assets when it is more likely than not, that such asset will not be recovered through future operations.

Uncertain Tax Positions

In accordance with ASC 740, “Income Taxes” (“ASC 740”), the Company recognizes the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be capable of withstanding examination by the taxing authorities based on the technical merits of the position. These standards prescribe a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. These standards also provide guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

Various taxing authorities periodically audit the Company’s income tax returns. These audits include questions regarding the Company’s tax filing positions, including the timing and amount of deductions and the allocation of income to various tax jurisdictions. In evaluating the exposures connected with these various tax filing positions, including state and local taxes, the Company records allowances for probable exposures. A number of years may elapse before a particular matter, for which an allowance has been established, is audited and fully resolved. The Company has not yet undergone an examination by any taxing authorities.

The assessment of the Company’s tax position relies on the judgment of management to estimate the exposures associated with the Company’s various filing positions.

Recently Issued Accounting Pronouncements

In January 2017, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2017-04, *Intangibles – Goodwill and Other (Topic 350)*. ASU 2017-04 simplifies the subsequent measurement of goodwill by removing the second step of the two-step impairment test. The amendment requires an entity to perform its annual, or interim goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An impairment charge should be recognized for the amount by which the carrying amount exceeds the reporting unit’s fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. The amendment should be applied on a prospective basis. ASU 2017-04 is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The Company intends to early adopt the ASU in 2017.

In January 2017, the FASB issued ASU 2017-01, *Business Combinations (Topic 805): Clarifying the Definition of a Business*, which clarifies the definition of a business to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The standard will be effective for the Company in the first quarter of 2018. Early adoption is permitted. The Company is currently evaluating the impact of adopting this ASU on its consolidated financial statements.

No other new accounting pronouncements, issued or effective during the six months ended June 30, 2017, have had or are expected to have a significant impact on the Company’s financial statements.

Note 2 – Going Concern

As shown in the accompanying financial statements, the Company has no revenues, incurred net losses from operations resulting in an accumulated deficit of \$17,436,377, and had working capital of \$308,742 at June 30, 2017. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management is actively pursuing new products and services to begin generating revenues. In addition, the Company is currently seeking additional sources of capital to fund short term operations. The Company, however, is dependent upon its ability to secure equity and/or debt financing and there are no assurances that the Company will be successful; therefore, without sufficient financing it would be unlikely for the Company to continue as a going concern.

The financial statements do not include any adjustments that might result from the outcome of any uncertainty as to the Company's ability to continue as a going concern. The financial statements also do not include any adjustments relating to the recoverability and classification of recorded asset amounts, or amounts and classifications of liabilities that might be necessary should the Company be unable to continue as a going concern.

Note 3 – Asset Purchase Acquisitions

Business Combination – Sangre AT, LLC, April 20, 2017

On April 20, 2017, the Company closed on a Share Exchange Agreement ("SEA") with Sangre AT, LLC, a Wyoming company doing business as Sangre AgroTech. Pursuant to the SEA, we purchased all of the outstanding membership interests in consideration for an a total of 500,000 shares of common to seven individuals, valued at \$569,000 based on the closing price of the Company's common stock on the date of grant.

Sangre is a plant genomic research and breeding company comprised of top-echelon scientists with extensive expertise in genomic sequencing, genetics-based breeding, plant tissue culture, and plant biochemistry, utilizing the most advanced sequencing and analytical technologies and proprietary bioinformatics data systems available. Sangre is working on a cannabis genomic study to complete a global genomic classification of the cannabis plant genus.

In connection with the SEA, two members of Sangre and the Company entered into Consulting Agreements, pursuant to which the members of Sangre agreed to provide consulting services to the Company for a period of one year following closing, with the option to extend for a two year period in annual increments, upon mutual written agreement by both parties. Pursuant to the agreement, the members were each awarded 50,000 shares of common stock with the issuances deferred until January 1, 2108.

Note 3 – Asset Purchase Acquisitions (Continued)

This acquisition was accounted for as a business combination under the purchase method of accounting, given that substantially all of the Company's assets and ongoing operations were acquired. The purchase resulted in \$594,874 of goodwill, which was subsequently impaired and expensed in the current period. According to the purchase method of accounting, the Company recognized the identifiable assets acquired and liabilities assumed as follows:

	April 20, 2017
Consideration:	
Fair value of common stock paid at closing ⁽¹⁾	\$ 569,000
Short term liabilities assumed ⁽²⁾	25,929
Fair value of total consideration exchanged	\$ 594,929
Fair value of identifiable assets acquired assumed:	
Cash	\$ 54
Total fair value of assets assumed	54
Consideration paid in excess of fair value (Goodwill)⁽³⁾	\$ 594,875

⁽¹⁾Consideration consisted of 500,000 shares of the Company's common stock valued at \$569,000 based on the closing price of the Company's common stock on the date of grant.

⁽²⁾Assumed liabilities consisted of trade payables and outstanding credit card debt.

⁽³⁾The fair value of the seller financed note in excess of the \$100,000 principal balance attributable to the deferred payment terms will be amortized to interest expense over the deferred financing period.

⁽³⁾The consideration paid in excess of the net fair value of assets acquired and liabilities assumed has been recognized as goodwill and was expensed due to economic uncertainties and the absence of a revenue stream.

Management believes the intangible assets acquired, consisting of the personnel of Sangre, will enable the Company to launch their business model and take advantage of additional growth opportunities.

The unaudited supplemental pro forma results of operations of the combined entities had the dates of the acquisitions been January 1, 2017 are as follows:

Note 4 – Related Party

Notes Payable

From time to time, the Company has received short term loans from officers and directors as disclosed in Note 8 below.

Capital Contributions

The Company imputed interest on non-interest bearing, related party loans, resulting in a total of \$321 and \$259 of contributed capital during the six months ended June 30, 2017 and 2016, respectively.

Common Stock Issued for Bartered Assets

On January 18, 2017, the Company exchanged 66,000 units, consisting of 66,000 shares of common stock and warrants to purchase 66,000 shares of common stock at an exercise price of \$3.00 per share, exercisable until January 18, 2018, in exchange for a 2017 Audi Q7 and a 2017 Audi A4 driven by the Officers. The total fair value received, based on the market price of the stock at \$4.02 per share, was allocated to the \$105,132 purchase price of the vehicles and the \$160,188 excess value of the common stock and warrants was expensed as stock based compensation.

A total of \$171,505 and \$157,505 of officer compensation was unpaid and outstanding at June 30, 2017 and December 31, 2016, respectively.

Note 5 – Fair Value of Financial Instruments

Under FASB ASC 820-10-5, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The standard outlines a valuation framework and creates a fair value hierarchy in order to increase the consistency and comparability of fair value measurements and the related disclosures. Under GAAP, certain assets and liabilities must be measured at fair value, and FASB ASC 820-10-50 details the disclosures that are required for items measured at fair value.

The Company has certain financial instruments that must be measured under the new fair value standard. The Company's financial assets and liabilities are measured using inputs from the three levels of the fair value hierarchy. The three levels are as follows:

Level 1 - Inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 - Inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates, yield curves, etc.), and inputs that are derived principally from or corroborated by observable market data by correlation or other means (market corroborated inputs).

Level 3 - Unobservable inputs that reflect our assumptions about the assumptions that market participants would use in pricing the asset or liability.

Total liabilities	-	51,300	-
	<u>\$ 231</u>	<u>\$ (51,300)</u>	<u>\$ -</u>

The fair values of our related party debts are deemed to approximate book value, and are considered Level 2 inputs as defined by ASC Topic 820-10-35.

There were no transfers of financial assets or liabilities between Level 1, Level 2 and Level 3 inputs for the six months ended June 30, 2017 and the year ended December 31, 2016.

Note 6 – Property and Equipment

Property and equipment consist of the following at June 30, 2017 and December 31, 2016, respectively:

	June 30, 2017	December 31, 2016
Automobiles	\$ 105,132	\$ -

Note 7 – Convertible Notes Payable

Convertible notes payable consist of the following at June 30, 2017 and December 31, 2016, respectively:

	June 30, 2017	December 31, 2016
On December 7, 2007, the Company issued a 10% note payable to the Lebrecht Group, PC (“Lebrecht Note”) for services rendered related to the registration of certain securities of the Company. The note and accrued interest were due December 7, 2008 and at the option of the holder payable in full on the maturity date or in 12 monthly payments beginning on the maturity date. The note and accrued interest are convertible to common shares at any time at the option of the holder at 75% of the average closing bid price on the five trading days immediately preceding the conversion. Management estimates, at this time, that 1,650,000 shares may be issued if this conversion feature is exercised. In accordance with generally accepted accounting principles, the 25% discount to market related to the beneficial conversion feature has been reported as a component of additional paid in capital. Additionally, since this represents a prepayment for services related to a future public offering, management had elected to offset the cost to future capital raised as a result of the offering, if any.	\$ -	\$ 35,000

The Company recognized interest expense of \$1,759 and \$1,750 related to the convertible debts for the six months ended June 30, 2017 and 2016, respectively.

Common Stock Warrants Expired or Cancelled

No warrants were expired or cancelled during the six months ended June 30, 2017.

Note 12 – Income Taxes

The Company accounts for income taxes under FASB ASC 740-10, which requires use of the liability method. FASB ASC 740-10-25 provides that deferred tax assets and liabilities are recorded based on the differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes, referred to as temporary differences.

For the six months ended June 30, 2017 and the year ended December 31, 2016, the Company incurred a net operating loss and, accordingly, no provision for income taxes has been recorded. In addition, no benefit for income taxes has been recorded due to the uncertainty of the realization of any tax assets. At June 30, 2017 and December 31, 2016, the Company had approximately \$10,498,000 and \$8,056,000 of federal net operating losses, respectively. The net operating loss carry forwards, if not utilized, will begin to expire in 2031.

Note 12 – Income Taxes (Continued)

The components of the Company’s deferred tax asset are as follows:

	June 30, 2017	December 31, 2016
Deferred tax assets:		
Net operating loss carry forwards	\$ 3,674,300	\$ 2,862,500
Net deferred tax assets before valuation allowance	\$ 3,674,300	\$ 2,862,500
Less: Valuation allowance	(3,674,300)	(2,862,500)
Net deferred tax assets	\$ -	\$ -

Based on the available objective evidence, including the Company’s history of losses, management believes it is more likely than not that the net deferred tax assets will not be fully realizable. Accordingly, the Company provided for a full valuation allowance against its net deferred tax assets at June 30, 2017 and December 31, 2016, respectively.

A reconciliation between the amounts of income tax benefit determined by applying the applicable U.S. and State statutory income tax rate to pre-tax loss is as follows:

	June 30, 2017	December 31, 2016
Federal and state statutory rate	35%	35%
Change in valuation allowance on deferred tax assets	(35%)	(35%)

In accordance with FASB ASC 740, the Company has evaluated its tax positions and determined there are no uncertain tax positions.
