If any of the assets of the Corporation are to be distributed other than in cash under this Section 3, then the board of directors of the Corporation shall promptly engage independent competent appraisers to determine the value of the assets to be distributed to the holders of Preferred Stock or Common Stock. B. Business of Issuer.

The Company's current mission is to develop and sell sustainable products. Our original product was rainwater captured, filtered and processed using ultraviolet light and ozone. It would then be magnetized and bottled in a PET bottle that does not stay in a landfill nearly as long as other plastic bottles. Other planned items include organic rainwater based drinks, varied drinks in Stand-up Pouches, Dehydrated Fruits & Vegetables in Stand-up Pouches, Organic Snacks, Hydroponics, Aeroponics, Aquaponics, Bespoke Spirits and other sustainable agriculture products. To this end, Company has endeavored to solicit and queue up several distinctive, green initiatives in the United States and abroad which Company intends to bring to market over the course of 2017 and beyond.

As of the date of the Change in Control in 2013, the company had and continues to have minimal revenues. The Company shall, therefore, be considered at development stage and new management believes that it is unlikely to benefit from any of the past initiatives of former management even though those efforts were reflected in the financial statements.

1. The issuer's primary and secondary SIC Codes;

**The Primary SIC Code for the Company is:
2086 -Bottled and Canned Soft Drinks and Carbonated Waters**

**Secondary SIC Codes for the Company are: 0182 – Food Crops Grown Under Cover and
5083 – Farm and Garden Machinery and Equipment**

2. If the issuer has never conducted operations, is it in the development stage, or is currently conducting operations:

The Company, since its acquisition of Choose Rain, LLC, is conducting business and has operations.

3. If the issuer is considered a "shell company" pursuant to Securities Act Rule405:

The Company believes it is not a "shell company" as defined in Rule 405 of the Securities Act.

4. The names of any parent, subsidiary, or affiliate of the issuer, and its business purpose, its method of operation, its ownership, and whether it is included in the financial statements attached to this disclosure statement.

The Company had no subsidiary as of the date of this Report.

5. The effect of existing or probable governmental regulations on the business;

The Company sees minimal effect from existing and proposed legislation.

6. An estimate of the amount spent during each of the last two fiscal years on research and development activities, and, if applicable, the extent to which the cost of such activities are borne directly by customers.

The Research and Development of the new technologies and products by the Company is an ongoing process. However, during the fiscal periods ended September 30, 2017 and 2016, the Company had no R&D expenses incurred or booked.

7. Costs and effects of compliance with environmental laws (federal, state and local):

Each State regulates the sale, manufacture and distribution of bottled water and organic products independently; therefor costs vary from state-to-state depending upon the state, type of product, size of package, and the number of tons sold, however, we do not believe that these costs have been or will be material to us.

8. The number of total employees and number of full-time employees.

The Company currently has only one full time person, Larry R. Curran, CEO and sole Director. Mr. Curran draws no salary or other form of compensation.

Item IX: The nature of products or services offered.

1. Distribution methods of the products or services:

Distribution methods differ within each product grouping. The Company intends to use a multitude of distribution outlets including product representatives, distributors, direct sales, social media and others as are appropriate.

2. Status of any publicly announced new product or service:

The Company will continue to announce all new services and products as listed. The Company did release a series of Press Releases in the third quarter 2016 identifying key product initiatives including herbal products, herbal products infused with CBD and a series of bespoke spirits with revenues still possible in 2017.

3. Competitive business conditions, the Issuer's competitive position in the industry, and methods of competition:

Competition within the industry varies with the products. Bottled water is a reasonably mature market with three key players controlling the market. The Company's bottled water products are unique in several aspects. We use rainwater not tap water or ground water. Company processes the rainwater without chlorine or other harsh chemicals. We will magnetize the end products and place our rainwater drinks in Stand-up Pouches or in plastic bottles designed to degrade in a land fill more quickly than those of our competitors. We intend to operate within the premium bottled water and drink market, not competing for the high volume low price market. We offer a responsible choice.

The Hydroponics, Aquaponics, Aeroponics and herbal product markets by comparison are relatively new and ever evolving. Current offerings are priced for the hobbyist. Our products will create a brand new hierarchy by offering education combined with reasonably priced systems available to the masses. The market for Bespoke Spirits is mature but new, high quality offerings are received quite well.

4. Sources and availability of raw materials and the names of principal suppliers:

Obviously, rainwater is plentiful with 30 gallons a year falling on average in North America for every square foot of surface. All other raw materials we will need are readily available or we will be growing them.

5. Dependence on one or a few major customers:

Our products do not lend themselves to a few or a single customer.

6. Patents, trademarks, licenses, franchises, concessions, royalty agreements or labor contracts, including their duration:

While the Company does not directly control any patents, trademarks, licenses, franchises or royalty agreements, we are in negotiation with various parties who possess significant intellectual property. Successful completion of these negotiations could greatly influence the competitiveness of our product offerings.

7. The need for any government approval of principal products or services. Discuss the status of any requested government approvals.

The Company is required to have approval and licensing of any bottled water plant and any plant manufacturing food products. Additionally, certain products supporting our Hydroponics, Aeroponics, Aquaponics and Bespoke Spirit offerings would routinely require government approval. Company management anticipates no problem in securing said approvals when needed.

Item X: The nature and extent of the issuer's facilities.

The Company has no facilities as we currently contract the capture and bottling of our rainwater products from another rainwater bottling company.

Item XVI: Management's discussion and analysis or plan of operation.

A. Plan of Operation: Issuer's Plan of Operation for the next twelve months.

As of September 30, 2017, the Company was still considered a development stage company. As reflected in recent press releases, we expect this to change in 2017 and 2018. While developing the products and the markets over the course of the last two years, the Company has identified and has negotiated several key opportunities in the United States and internationally. These opportunities involved the issuance of additional shares but should bring in several new products and services, equipment, intellectual property, key personnel and revenue streams allowing us to further pursue our objectives. See ITEM XVIII – Material Contracts.

B. Management's Discussion and Analysis of Financial Condition and Results of Operations.

For the nine months ended September 30, 2017 (Unaudited)

Revenues

The Company has devoted substantially all of its efforts towards establishing a new business in the production of Bottled Water and other Beverages, Drinks in Stand-up Pouches, Hydroponics, Aeroponics, Aquaponics and other sustainable products. There has been no revenue generated during the quarter ended September 30, 2017 nor the nine months there ended. Revenues for the quarter and nine months ended September 30, 2016 were \$13,332, however, consulting revenues accounted for \$12,179 of that revenue.

Company Management expects operating revenues from product sales beginning in 2017 which will reflect the new business initiatives pursued to date and additional opportunities yet to be identified.

Operating Expenses

Through September 30, 2017, the Company had a Negative Net Worth of \$101,075 and continuing operating losses although these losses have been significantly reduced. 2017 expenses included Depreciation \$1,084, Net Interest

\$10,010, DTC Fees \$4,620 and Stock Transfer Fees \$5,650 for a loss of \$25,915. As of September 30, 2016, the Company had a Negative Net Worth of \$183,001 and continuing operating losses although these losses have been significantly reduced and were only \$57,774 for the nine-month period. Aside from a \$40,000 bad debt incurred in the first quarter from the refusal of a vendor to honor a barter contract, the remaining loss of \$17,774 consists mainly of Interest (\$8,335), Legal Expenses (\$4,530), DTC & Stock Transfer Fees (\$7,014) and Depreciation (\$6,368). With Guardian Registrar & Transfer electing to convert their Convertible Note payable, the Company realized a gain (\$13,440) from the elimination of the Derivative Liability. Management has acted and continues to implement changes designed to improve the Company's financial results and operating cash flows.

The CEO draws no salary nor any other compensation and to maintain cash flow he has periodically loaned funds to the company to cover the ongoing costs associated with being a public company.

We expect our operating expenses will significantly increase in 2017 and 2018 resulting from the new business in Herbal Supplements, Herbal Supplements with CBD, the Distillation of Spirits & Tinctures, Bespoke Spirits and other sustainable products.

Income/Losses

Net loss for the year ended September 30, 2017 was \$25,915 compared to a loss of \$57,774 in 2016. The net losses are due primarily to a previously mentioned bad debt and maintaining the public company.

Company expects that it will become profitable resulting from the new business initiatives. However, there can be no assurance that Company will achieve or maintain profitability, or that any revenue growth will take place in the future.

Impact of Inflation

We believe that inflation has had a negligible effect on operations since inception. We believe that we can offset inflationary increases in the cost of operations by increasing sales and improving operating efficiencies.

Liquidity And Capital Resources

During the nine months ended September 30, 2017, net cash flows provided by operating activities were \$38,260 and, in 2016, operations used \$85,335 due primarily to the cost of maintaining the public entity. Cash on hand as of September 30, 2017 was \$860 compared to cash of \$656 in the prior year. On the short-term basis, with anticipated growth, we may be required to raise significant additional funds over the next 12 months to support operations. On the long-term basis, we may need to raise capital to grow and develop our new businesses. If we are unable to raise the needed funds on an acceptable basis, we may be forced to cease operations. Management does not foresee this happening.

The CEO draws no salary nor any other compensation and to maintain cash flow he has periodically loaned funds to the company to cover the ongoing costs associated with being a public company.

C. Off-Balance Sheet Arrangements: None

Part F: Exhibits

Item XVIII: Material Contracts:

On March 7, 2014, Choose Rain LLC, a Florida limited liability company, merged with and into the Company pursuant to an Agreement and Plan of Merger entered between Choose Rain LLC and the Company (the "Merger"). Each unit of membership interest of Choose Rain LLC ("Company Member Interests"), issued and outstanding immediately prior to the Merger shall be exchanged for and converted into 90,000 fully-paid and non-assessable shares of common stock, par value \$0.001 per share, of the Company, with the same rights, powers and privileges as the Common Stock and all Company Member Interests shall be cancelled and retired and shall cease to exist. The Company is a surviving company after the Merger. A copy of Agreement and Plan of Merger was previously filed on March 10, 2014.

A news release was issued July 1, 2016 - Choose Rain, Inc., (CHOS), announced that it has reached an

Agreement in Principle with Cloudburst Distribution Pty Ltd (Cloudburst) to move the company forward. The Agreement in Principle grants CHOS an Exclusive License for all Cloudburst products manufactured or sold in North America in exchange for Restricted Common Shares. During the third quarter, three additional news releases were issued to clarify and expand upon the July 1, 2016 release identifying contracts that Cloudburst has negotiated which should translate into revenues and profits. On October 5, 2016, another news release was issued describing Cloudburst revenue opportunities extended to CHOS from a contract with a large Australian distillery for bespoke spirits. Bespoke spirits will likely produce the first licensee revenues to CHOS under this agreement.

Possible Change of Control - CHOS also announced on July 1, 2016, a possible Change of Control as CHOS debts are retired using funds from the License Agreement. Both Choose Rain, Inc. and Gabriel's Ventures LLC, the majority shareholder, have agreed to the issuance of new restricted shares for the License Agreement and the transfer of the control block of Gabriel's 200M shares to Cloudburst as CHOS debts are paid. As of December 31, 2016, and pursuant to the Agreement, CHOS has issued 95,230,000 restricted shares and Gabriel's has transferred 92,000,000 control shares. The Agreement restricts for two years any increase in total authorized shares above the 500,000,00 shares authorized and allows no reverse split of shares which would further dilute the interests of the current shareholders.

Item XIX: Articles of Incorporation and Bylaws.

Articles of Incorporation and all the amendments were previously filed on January 30, 2014. Bylaws were separately filed on January 30, 2014.

Item XX: Purchases of Equity Securities by the Issuer and Affiliated Purchasers.
