

## Long Island Power Authority (LIPA) recognizes Savenergy Inc. as Rising Star at their 2013 Trade Ally Recognition Breakfast

March 4, 2013

For Immediate Release

Savenergy Inc. is named Rising Star at Long Island Power Authority's (LIPA) annual Trade Ally Recognition Breakfast that was held on February 27, 2013 at the Hilton of Long Island in Melville, New York. Savenergy Inc. has partnered with LIPA for energy efficiency measures, as part of LIPA's Commercial Efficiency Program.

This annual event provides an opportunity for LIPA's Trade Ally Partners to network with other industry professionals who are in the forefront of energy conservation programs. Additionally, LIPA recognizes top performing companies with awards presented in their respective fields.

Savenergy Inc. was awarded for achieving the highest energy savings in 2012 with a total of 192 projects for a total savings of 785 kW or 2,621,122 kWh. This achievement award was presented by Dan Zaweski, Assistant Vice President of LIPA's Energy Efficiency and Renewable Programs.

"We are extremely pleased to have partnered with LIPA to support small and medium sized businesses across Long Island in reducing their energy usage, and this is just the beginning of an exciting mission that we have embarked on," says John Choi, President and CEO of Savenergy Inc.

Savenergy Inc. is a premier energy technology manufacturer that specializes in top quality LED lighting for commercial businesses. Savenergy has been honored by LIPA, a non-profit municipal electric provider, which owns the retail electric transmission and distribution system on Long Island and provides electric service to Nassau and Suffolk Counties in Long Island, New York.

### **About Savenergy Inc.**

Savenergy Inc. manufactures and installs exclusive patented energy saving devices while providing energy consulting services for their clients. Energy cost savings of 20 - 80% are achieved following the installation of Savenergy's devices, which: Savenergy Motor Saver and Savenergy LED Lighting System. Savenergy LED Lighting products are DLC Listed and Energy Star Approved, and they currently lead the market with 32 different available products qualified for the DLC Listing and Energy Star. Additionally, savings are achieved through the extension of the life of electrical equipment, while helping to protect the environment by reducing pollution and energy consumption. The company is headquartered in Inwood, New York and conducts business within the United States and overseas. For more information, visit [www.savenergynow.com](http://www.savenergynow.com).
