

ABC ENERGY, INC. ANNOUNCES LARGE CONTRACT FOR ARIZONA HOME BUILDER

ABC Energy, Inc. Tucson, Arizona March 8, 2017. ABC Energy, Inc. announces the signing of a contract with a commercial home builder with a large subdivision of 150 homes in Tucson. The homes in this subdivision are to be equipped with solar energy systems and the Builder has contracted with ABCO Energy to construct the first ten home solar systems beginning March 13, 2017 and continuing to install the solar systems as quickly as the homes are built and sold. At a cost of about \$16,000 per home the total projected revenue to ABCO will be approximately \$2,400,000 over the life of the project. The owner of the project is a national company that is developing these unique concept homes for resort living throughout America's sunbelt states.

“We are very excited to be involved in this home building project where the installations are repetitive in nature and offer our company cost savings and profitability exceeding our usual profits from the residential market. We can learn how to build one system and repeat it 150 times over the entire project”, said Charlie O’Dowd President of ABCO Energy. “The economy of scale and short learning curve will be a first for ABCO. We have always dealt with a variety of differing installations that were one of a kind and this project will be a first for us with repetitive installations. It will be a very good experience for our staff and bottom line”.

A Typical Arizona Residential solar project

ABC Energy, Inc. is an Arizona licensed contractor for sales and installation of Photovoltaic Solar Systems, Solar Street Lighting and installation of LED and energy conservation lighting systems in their markets. ABCO provides products and services to residential, commercial, government and non-profit entities in all their markets.
