DIGATRADE TO ADD ETHEREUM “ETH” TO TRADING PLATFORM

For Immediate Release

Vancouver, British Columbia – Sept 7, 2017 – **DIGATRADE FINANCIAL CORP** (OTCQB: DIGAF) a digital asset exchange platform, blockchain development services and fintech advisory company today announced the execution of a development agreement with ANX International to integrate the Ethereum Coin “ETH” onto the Digatrade Exchange Platform. The functions included will be to enable withdraw and deposit functions and enable the trading pair Ether “ETH” to Bitcoin “BTC”.

Ethereum is a decentralized platform that runs smart contracts: applications that run exactly as programmed without any possibility of downtime, censorship, fraud or third-party interference. These apps run on a custom built blockchain, an enormously powerful shared global infrastructure that can move value around and represent the ownership of property. This enables developers to create markets, store registries of debts or promises, move funds in accordance with instructions given long in the past (like a will or futures contract) and many other things that have not been invented yet, all without a middle man or counterparty risk. The project was bootstrapped via an ether pre-sale during August 2014 by fans all around the world. It is developed by the Ethereum Foundation, a Swiss non-profit, with contributions from great minds across the globe. Currently, ETH has an approximate market-capitalization of \$31.28billion and a coin price of US\$330, the growth of the value of the coin has risen over 3000% this year and over 180% in the last month.

In response to a possible Digatrade token release, the Company is currently reviewing with its legal advisors the regulatory and compliance framework recently published by the Canadian Securities Administrators (CSA) who on August 24, 2017 published CSA Staff Notice 46-307 *Crypto-currency Offerings*, which outlines how securities law requirements may apply to initial coin offerings (ICOs), initial token offerings (ITOs), cryptocurrency investment funds and the cryptocurrency exchanges trading these products.

The notice describes the factors CSA staff consider in assessing whether prospectus, registration and marketplace requirements apply. It also outlines how the CSA can help fintech businesses contemplating such offerings and summarizes key issues that businesses should be prepared to discuss with CSA staff.

"The technology behind cryptocurrency offerings has the potential to generate new capital raising opportunities for businesses and we welcome this type of innovation," said Louis Morisset, CSA Chair and President and CEO of the Autorité des marchés financiers. "Given the growing activity in this novel area, we are publishing guidance to help fintech businesses understand what obligations may apply under securities laws.

Brad Moynes, CEO of Digatrade stated "In response to an influx of inquiries, if Digatrade were to offer an ICO or token release (subject to regulatory guidelines) to its community as part of a broader digital corporate finance model; the Etheruem "ETH" smart contract would be an efficient mechanism to govern and operate the process and as a result will be listed on the Digatrade Exchange".

Additional information will be provided as it materializes.

Forward-Looking Information

This press release contains certain "forward-looking information". All statements, other than statements of historical fact, that address activities, events or development that the Company believes, expects or anticipates will or may occur in the future constitute forward-looking information. This forward-looking information reflects the current expectations or beliefs of the company based on information currently available to the Company. Forward-looking information is subject to a number of significant risks and uncertainties and other factors that may cause the actual results of the Company to differ materially from those discussed in the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on the Company. Factors that could cause actual results or events to differ materially from current expectations include, but are not limited to, the possibility of unanticipated costs and expenses. Any forward-looking information speaks only as of the date on which it is made and, except as

may be required by applicable securities laws, the company disclaims any intent or obligation to update any forward-looking information whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such information due to the inherent uncertainty therein.
