The Series B Preferred Stock shall be convertible into the greater of -

a) One share (subject to adjustment for forward or reverse splits, stock dividends, or recapitalizations) of common stock; or, b) such number of shares of common stock as shall equal fifty-one percent (51%) of the issued and outstanding common stock on a Fully Diluted Basis (as defined below), less that number of shares of common stock beneficially owned by the holder. The total number of shares of outstanding common stock on a Fully Diluted Basis shall include all shares of common stock that are issuable upon the conversion, exchange or exercise of other Corporation securities. Voting Rights attributes 51% of the total voting power of all issued and outstanding securities.

Transfer Agent

Corporate Stock Transfer, Inc.

3200 Cherry Creek South Drive, Ste. 430

Denver, CO, 80208

Telephone: (303) 282-4800 Facsimile: (303) 282-5800

Is the Transfer Agent registered under the Exchange Act?* X Yes

163

*To be included in the OTC Pink Current Information tier, the transfer agent must be registered under the Exchange Act.

List any restrictions on the transfer of security:

None: Common stock is DTC eligible.

Describe any trading suspension orders issued by the SEC in the past 12 months.

N/A

List any stock split, stock dividend, recapitalization, merger, acquisition, spin-off, or reorganization either currently anticipated or that occurred within the past 12 months:

Stock Split – Company completed a 100:1 reverse stock split effective January 22nd, 2016. The reverse stock split is intended to recapitalize the company with the intent of meeting minimum bid price requirements. As a result of the stock split, every 100 shares of the Company's common stock issued and outstanding at the effective time will automatically be combined into one issued and outstanding share. Any fractional shares that result from the recapitalization will be rounded up to the nearest whole share. Shareholders are not required to return their current stock certificates in connection with the recapitalization.

Acquisition – Company is actively engaged in building technical, cloud storage, IT capacity and scalability via acquisitions. The company is still in the process of reviewing possibilities.

Spin-off – Company plans to spin off its technology division pending further discussion and due diligence as well as funding to capitalize.

<u>Subsidiaries:</u> The company created a new subsidiary to better streamline product and services offering – TeleFix Technologies LLC d/b/a TeleFix IoT Systems – April 29th,2015.

- 1) The Company has no new issuances for this reporting period.
- 2) The Company pledged 1 share of Series B Preferred Stock for control block 51%.
- 3) The Company entered into stock for services agreements for organizational development, operations and business development.
- a) Shares sold under Rule 504 have been registered under Form D filing for up to \$1 million per year as per Rule 504 regulatory requirements.

5) <u>Financial Statements:</u> Appended at end of this document.

6) Describe the Issuer's Business, Products and Services

TeleFix Communications, Inc., operating subsidiary of Parent company (Holdings), private entity was founded in March 2010, pre-launched at the CTIA Wireless Show in Las Vegas. We are a woman-owned turn-key wireless communications infrastructure services provider and business technologies company.

Product- (COPS®)

-Proprietary IoT technology using Mobile to mobile video communications real time interactive platform to monitor projects and field work sites for service industries;

Services:

- -Remote Monitoring from Command Center (NOCS®)
- -Contract Infrastructure, Field and Professional services for major telecom carriers, Public Safety and original equipment manufacturers (OEMs).

<u>COPS & NOCS</u> – This solution evolved from our need to meet the immense demand for services for which the company was founded. To solve multiple problematic issues within the telecom sector and from our own inability to adequately meet and deliver on abundant service contracts, we innovated a proprietary process utilizing forward-thinking technology (COPS). We systemized a tedious project close out reporting and documentation process by integrating Internet of Things (IoT) technologies, mobile to mobile (m2m) video communications on a real time live interactive broadcast platform. The platform's capabilities enable precise delivery of TeleFix's mission and solution. Being able to remotely monitor multiple work sites either virtually or from our planned expert staffed command center (NOCS®) meets the higher level of quality and cost efficiency for which so many services industries strive. An added and key benefit of this technology is bridging the skills gap so common in today's technology workplace. From the command center, critical skills are delivered real time then stored for training purposes.

Most importantly, the solution will improve overall cash flow for service contractors with the elimination of time to collect, increase margins and profitability for related industries such as construction and engineering. We want this solution to advance industries across multiple verticals and improve lives. The company is in the process of a product roll-out. This will be a license and subscription based Software as a Service (Saas) business segment.

Multiple additional revenue streams will be derived via mobile devices and data usage.

The solution received an innovative recognition award from Verizon Wireless in October 2013 for our forward-thinking in the use of mobile technology. We have now earned a Vertical Solution Partnership contract which provides us the connectivity required using most expansive LTE (4G) network with discounted rates.

TeleFix Specialty Infrastructure services surpass current industry norms. Our promise is to ensure lower costs of services by getting work done right the first time. Employing our proprietary COPs® technology and NOCs® solution specifically developed to solve the problem of cost overages and poorly performing networks, we deliver on our promise as well as enable contractors within the industry to deliver higher quality of work and better margins all around.

The company's primary customers are private mobile carriers and equipment manufacturers.

TeleFix is poised to deliver exemplary services in design, project document management, network planning, deployment, quality control, and cost efficiency. The company areas of concentration are small cells deployment and RF Engineering.

Our key advantage to the industry is our genuine concern for our customers, employees, and passion for the industry.

Our continual commitment is to meet the requirements for higher quality and efficiencies; giving customers what they want at the price they want. These are the main pains in the industry - higher overall quality in network performance to the end consumer; faster data speeds, increased capacity, and enhanced voice service – reduced dropped calls, lower upgrade build costs, improve margins - Get the work done right the first time. Get jobs done fast.

New Products

Cloud Based Software as a Service (SaaS) Solution

A re-sellers agreement was engaged with Rollout, Inc., a start-up. Rollout provides a cloud based drawing management software for construction and engineering.

Digital Drawings:

Paperlight™ is a touch enabled projection display that allows viewing of full-size drawings digitally. Eliminates paper and need to print out plans and shop drawings for viewing and mark-up.

M2M Network (Machine to Machine)

The company has now increased its smartphone device capacity to include both Samsung and LG smartphones. Deployment and successful launch rely on availability of IoT enabled devices able to work on our network. We have found these are in limited supply. This was a barrier to deployment of our solution. As of January, devices are network ready. The company expects to launch proof-of –concept in A & E in March 2016.

The above products further enhances TeleFix's technology ecosystem of document management, best practices process and remote live video monitoring platform. Not only do they seamlessly integrate into the platform, but are and added value to our clients and end users.

A. The issuer's primary and secondary SIC Code -

Primary – 4812; 4899 Radio Telecommunications - Cellular/Wireless; 7372 Packaged Software,

video streaming.

Secondary – 1623-12 Telecommunications Equipment/Systems, Cabling & Wiring

B. The issuer's fiscal year end date;

June 30th

- C. Principal products or services, and their markets:
 - Video mobile to mobile project and documentation system COPS® & NOCS® Proprietary Technology
 - Wireless Network Infrastructure Service

7) Describe the Issuer's Facilities

The Company has a lease agreement for 2800 SF of office space. This is a temporary space to house administrative and temporary technical command center until the Company is able to remodel permanent space of approximately 5000 SF. This space will mostly be accommodating TeleFix's full 24/7/365 Technical Command Center. This remote monitoring command center (NOCS®) is key to TeleFix's full execution of service delivery's business model of "Get the Job Done Right the First Time."

8) Officers, Directors, and Control Persons

A. Names of Officers, Directors, and Control Persons
