1. NATURE OF OPERATIONS AND GOING CONCERN

Red Eagle Mining Corporation ("Red Eagle Mining" or the "Company") was incorporated under the *Business Corporations Act* in British Columbia, Canada on January 4, 2010. The address and domicile of the Company's registered office and its principal place of business is Suite 2348 - 666 Burrard Street, Vancouver, British Columbia, Canada, V6C 2X8.

The Company is primarily engaged in the development and operation of the San Ramon Gold Mine and Mill. The Company also owns an 80% controlling interest in Red Eagle Exploration Limited ("Red Eagle Exploration") which holds exploration projects in Colombia.

Going concern

These unaudited condensed interim consolidated financial statements have been prepared on the basis of generally accepted accounting principles applicable to a going concern that assumes that the Company will realize its assets and discharge its liabilities in the normal course of business.

The Company incurred a net loss during the nine months ended September 30, 2017 of \$11,940 (2016: \$1,204). As at September 30, 2017, the Company had cash and cash equivalents of \$3,625 (2016: \$4,202) and a working capital deficiency of \$13,358 (2016: \$25,674).

The Company is focused on the development of the San Ramon Mine and Mill. In order to provide working capital before gold production resumes, the Company completed a rights offering on August 11, 2017 for gross proceeds of \$23,595 (CAD \$30.0 million).

The Company's ability to continue operations in the normal course of business is dependent upon the successful execution of operations in order to resume gold production and generate sufficient cash flows. The nature and significance of these conditions, along with the working capital deficiency and the requirement to satisfy the current portion of long-term debt outstanding, may cast significant doubt about the appropriateness of the going concern assumption. These financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different than those reflected in the financial statements. Such adjustments could be material.

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE

The unaudited condensed interim consolidated financial statements of the Company have been prepared in accordance with International Accounting Standard 34 - Interim Financial Reporting and accordingly they do not contain all information and disclosures required for complete financial statements in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Therefore, they should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2016, which have been prepared in accordance with IFRS.

The unaudited condensed interim consolidated financial statements have been prepared on a historical cost basis and are presented in thousands of US dollars, unless otherwise stated.

The unaudited condensed interim consolidated financial statements of the Company for the three and nine months ended September 30, 2017 were authorized for issue by the Board of Directors, on November 14, 2017.

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE (CONTINUED)

Change in functional and presentation currency

Effective January 1, 2017, the Company changed its presentation currency from the Canadian Dollar ("CAD") to the United States Dollar ("USD"). The change in presentation currency is to better reflect the Company's business activities and to improve comparability of the Company's financial results with other publicly traded gold mining businesses. In making this change to the USD presentation currency, the Company followed the guidance in IAS 21 *The Effects of Changes in Foreign Exchange Rates* and has applied the change retrospectively as if the new presentation currency had always been the Company's presentation currency. In accordance with IAS 21, the financial statements for all years and periods presented have been translated to the new USD presentation currency as follows:

- All assets and liabilities have been translated from their functional currency into the new USD presentation currency using the closing exchange rate at the date of each balance sheet;
- Income and expenses for each statement of comprehensive loss presented have been translated at average exchange rates prevailing during each reporting period;
- Equity balances have been retrospectively translated at historical rates prevailing during the period incurred;
- All resulting exchange differences have been recognized in other comprehensive income and accumulated as a separate component of equity (cumulative translation adjustment).

In addition to the comparative financial statements, the Company has presented a third statement of financial position as at January 1, 2016 as required by IFRS.

Due to the commencement of production and realization of USD cash flows from pre-production gold sales during the first quarter of 2017, the Company re-assessed the functional currency of all entities in the group and the functional currencies of all non-Canadian entities in the group changed to USD effective January 1, 2017. Previously, these subsidiaries had either a CAD or Colombian peso functional currency. The functional currency of the parent entity (Red Eagle Mining Corporation) as well as Red Eagle Exploration remained CAD. These entities are Canadian companies with the majority of costs being incurred in CAD and financings raised in CAD.

Significant Management Judgments and Estimations

<u>Declaration of commercial production</u>

The Company announced commercial production readiness at the end of the first quarter of 2017. The criteria used by the Company to determine that the assets were operating in a manner intended by management was based on the Santa Rosa processing plant operating, over 30 consecutive days, at an average of at least 75% of design capacity. However, the underground mine subsequently did not consistently achieve planned operating levels due to ground stability conditions. To address this issue, an add-on backfill plant is being constructed, during which time, the processing plant will be on stand-by for operational readiness. Costs related to continued mine development are being capitalized. Costs to maintain the site and processing plant in a state of operational readiness are being expensed directly to the consolidated statements of comprehensive loss. For the three and nine months ended September 30, 2017, approximately \$1,076 and \$2,424, respectively, in costs related to the plant and site support activities were recorded to mine site expenses in the consolidated statements of comprehensive loss.

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE (CONTINUED)

Significant Management Judgments and Estimations (continued)

Impairment

The Company reviews and evaluates the carrying value of its mineral properties and property, plant, and equipment for impairment when events or changes in circumstances indicate that the carrying amounts of the related asset may not be recoverable. The identification of such events or changes and the performance of the assessment requires significant judgment. Furthermore, the Company's estimates of many of the factors relevant to completing this assessment, including commodity price, mineral resources, and operating, capital and reclamation costs, are subject to risks and estimation uncertainties that may further affect the determination of the recoverability of the carrying amounts of its mineral properties and property, plant, and equipment. As at September 30, 2017, the Company has not identified any events or circumstances that would indicate that the carrying amounts of the related assets may not be recoverable.

In the previous quarter, the Company performed an impairment assessment of the San Ramon Mill and Mine and concluded that there is no impairment at June 30, 2017. As at September 30, 2017, the Company has not identified any new events or circumstances that would indicate that the carrying amounts of the related assets may not be recoverable.

5. MINERAL PROPERTIES

Mineral Properties

Mineral properties consist solely of an option on the California Gold Project and 100% of each of the Vetas Gold and Santa Ana Silver Projects owned by Red Eagle Exploration. The Santa Rosa Mineral Property is included in Property, Plant and Equipment.

a) Santa Rosa

On April 15, 2011, the Company acquired 100% of the Santa Rosa Gold Project in Antioquia, Colombia, for \$9,600 (CAD \$10.0 million).

On October 22, 2012, concurrent with a private placement financing, the Company completed the sale of a 2% Net Smelter Return ("NSR") royalty over the Santa Rosa property to Liberty Metals and Mining Holdings, LLC, ("LMM") a shareholder of the Company, for gross proceeds of CAD \$8.3 million. The Company had the option to sell an additional 1% royalty for CAD \$4.2 million at any time until December 31, 2013 and on December 20, 2013, the Company exercised this option. The Company has the option to repurchase a 1% royalty for CAD \$8.3 million at any time during the first two years of commercial gold production.

On October 24, 2012, the Company executed a purchase agreement with Bullet Holdings Corp. to acquire mineral concession contracts totaling 35,910 hectares adjacent to the Company's Santa Rosa Gold Project. The consideration for the transaction was the issuance of 905,000 common shares, reimbursement of current year concession fees and the granting of a 1.5% NSR royalty over the properties acquired. LMM's royalty does not cover these properties.

On May 28, 2014, the Company executed a purchase agreement with AngloGold Ashanti Colombia S.A., to acquire 100% of contiguous mineral concession contracts totaling 1,673 hectares within the Company's Santa Rosa Gold Project. In consideration for the property, the Company paid \$375 to AGAC and granted AGAC a 2% NSR royalty over the properties acquired.

Mineral Property Obligations

b) California Gold Project

On February 15, 2017, Red Eagle Exploration announced an option to purchase 100% of six exploitation mining concessions from local miners for aggregate consideration of \$5,684 in cash and \$7,562 which is payable in shares of Red Eagle Exploration. Initial payments of \$345 and 2,180,985 common shares of Red Eagle Exploration were paid upon closing.

On March 15, 2017, Red Eagle Exploration announced an option to purchase 100% of two additional exploitation mining concessions for aggregate consideration of \$7,493 of which 50% is payable in cash and 50% is payable in shares of Red Eagle Exploration. Initial payments of \$62 and 520,367 common shares of Red Eagle Exploration were paid upon closing.

In October 2017, Red Eagle Exploration agreed to amend the terms of the California option agreements previously announced on February 15, 2017. Pursuant to the amendment, the Company will issue additional consideration to the landowners consisting of 1,907,117 common shares of Red Eagle Exploration.

The balance of the payments for both acquisitions are due over a two-year period subsequent to title transfer, at the option of Red Eagle Exploration. An additional payment is due three years from the date of title transfer equivalent to 1.5% of the value of gold and silver measured and indicated resources in the event that any are included in a NI 43-101 Technical Report. The eight properties, which collectively comprise the California Gold Project, total 250 hectares in the California-Vetas Gold District located in Santander, Colombia.

5. MINERAL PROPERTIES (CONTINUED)

Mineral Property Obligations (continued)

c) Vetas Gold Project

On February 14, 2017, Red Eagle Exploration amended the pre-existing acquisition agreements for the San Bartolo and San Antonio properties, which together with other properties collectively comprise the Vetas Gold Project. A portion of the properties were affected by the delineation of the Paramo boundaries and the outstanding amount of the purchase price was reduced proportionately. As final payment, Red Eagle Exploration issued 4,550,000 common shares and paid \$500 in cash with respect to the San Bartolo property and issued 116,700 common shares with respect to the San Antonio property.

Red Eagle Exploration has now settled all outstanding mineral property obligations.

9. LONG-TERM DEBT (CONTINUED)

In order to fund working capital requirements, on July 24, 2017, the Company entered into a bridge funding agreement for \$6,500. Upon completion of the successful rights offering and entering into an amendment to the credit agreement, the bridge loan was repaid out of Orion and LMM's participation in the rights offering on August 11, 2017 (note 10b).

On August 11, 2017, the Company entered into an amendment to the US \$60,000 credit facility (the "amended credit facility") and is no longer in default as of September 30, 2017. Under the terms of the amended credit facility, principal repayments commence on April 1, 2018 in equal monthly amortization amounts of \$1,600 with a maturity date of April 1, 2019. The credit facility is secured by all of the Company's property and assets.

The amended credit facility bears interest at a rate of the higher of LIBOR or 1%, plus 11%, compounded monthly, with interest being capitalized. The amended credit facility continues to include a production payment of \$30 per ounce payable on the first 405,000 ounces of gold produced. Additionally, as an amendment fee, the Company issued 33,105,362 shares with a fair value of \$2,625 in Red Eagle Exploration from its current holdings to the Lenders. Considering the various features of the amended credit facility, the effective interest rate is approximately 19%. The credit facility was fully drawn in 2016.

For the nine months ended September 30, 2017, the Company capitalized \$6,907 of interest on the amended credit facility to construction work in progress.

The Company is required to maintain the following financial covenants, commencing July 1, 2018:

- a) as of the end of each fiscal quarter, Debt Service Coverage Ratio on a rolling four fiscal quarter basis of at least 1.5:1;
- b) as of the end of each fiscal quarter, EBITDA to Interest Coverage Ratio on a rolling four fiscal quarter basis of at least 5:1; and
- c) as of the end of each fiscal quarter, Debt to EBITDA Ratio on a rolling four fiscal quarter basis of no greater than 2:1.
