NOTE 2: GOING CONCERN

These consolidated financial statements have been prepared on a going concern basis which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business for the foreseeable future. As of December 31, 2019, the Company has an accumulated deficit of \$2,578,102 since inception. This raises substantial doubt about the Company's ability to continue as a going concern.

The extent of the impact of the coronavirus ("COVID-19") outbreak on the financial performance of the Company will depend on future developments, including the duration and spread of the outbreak and related advisories and restrictions, and the impact of COVID-19 on the overall economy, all of which are highly uncertain and cannot be predicted. If the overall economy is impacted for an extended period, the Company's future operating results may be materially adversely affected.

Management's plans include raising capital through the equity markets to fund operations and eventually generate revenue through its business; however, there can be no assurance that the Company will be successful in such activities. These consolidated financial statements do not include any adjustments relating to the recovery of the recorded assets or the classifications of the liabilities that might be necessary should the Company be unable to continue as a going concern.

A BCF is recorded by the Company as a debt discount pursuant to ASC 470-20 *Debt with Conversion and Other Options*. In those circumstances, the convertible debt is recorded net of the discount related to the BCF, and the Company amortizes the discount to interest expense over the life of the debt using the effective interest method.

Embedded Conversion Features

The Company evaluates embedded conversion features within convertible debt under ASC 815 Derivatives and Hedging to determine whether the embedded conversion feature(s) should be bifurcated from the host instrument and accounted for as a derivative at fair value with changes in fair value recorded in earnings. If the conversion feature does not require derivative treatment under ASC 815, the instrument is evaluated under ASC 470-20 Debt with Conversion and Other Options for consideration of any beneficial conversion features.

Derivative Financial Instruments

On July 19, 2016 the Company filed Form 15 as Certification and Notice of Termination of Registration under Section 12(g) of the Securities Exchange Act of 1934, or suspension of duty to file reports under Sections 13 and 15(d) of the Securities Exchange Act of 1934, therefore the Company is no longer applying embedded conversion features within convertible debt under ASC 815 Derivatives and Hedging to determine whether the embedded conversion feature(s) should be bifurcated from the host instrument and accounted for as a derivative at fair value with changes in fair value recorded in earnings.

Fair Value of Financial Instruments

Based on the Termination of Registration under Section 12(g) of the Securities Exchange Act of 1934, or suspension of duty to file reports under Sections 13 and 15(d) of the Securities Exchange Act of 1934, the Company is not applying Fair Value of Financial Instruments.

Revenue Recognition

Effective January 1, 2018, the Company adopted the Financial Accounting Standards Board ("FASB") standard update ASU 2014-09, "Revenue from Contracts with Customers," ("Topic 606") which provides a principles-based, five-step approach to measure and recognize revenue from contracts with customers. Revenue is recognized when the following criteria are met:

- Identification of the contract, or contracts, with a customer;
- Identification of the performance obligations in the contract;
- Determination of the transaction price;
- Allocation of the transaction price to the performance obligations in the contract; and
- Recognition of revenue when, or as, we satisfy performance obligation.

The adoption of this guidance did not have a material impact on the Company's consolidated statements of operations, cash flows, shareholders' equity (deficit), or balance sheets as of the adoption date.

The Company did not generate any revenues during the twelve months ended December 31, 2019 and December 31, 2018.

Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Additionally, the recognition of future tax benefits, such as net operating loss carryforwards, is required to the extent that realization of such benefits is more likely than not. Deferred tax assets and liabilities are determined using enacted tax rates expected to apply to taxable income in the years in which the assets and liabilities are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period that includes the enactment date.

In the event the future tax consequences of differences between the financial reporting bases and the tax bases of the Company's assets and liabilities result in deferred tax assets, an evaluation of the probability of being able to realize the future benefits indicated by such asset is required. A valuation allowance is provided for the portion of the deferred tax asset when it is more likely than not that some or all of the deferred tax asset will not be realized. In assessing the realizability of the deferred tax assets, management considers the scheduled reversals of deferred tax liabilities, projected future taxable income, and tax planning strategies.

The Company files income tax returns in the United States, Florida State, which are subject to examination by the tax authorities in this jurisdiction. Generally, the statute of limitations related to the Company's federal and state income tax return is three years. The state impact of any federal changes for prior years remains subject to examination for a period up to five years after formal notification to the states.

Management has evaluated tax positions in accordance with ASC 740, *Income Taxes*, and has not identified any significant tax positions, other than those disclosed. All of the Company's tax years since inception remain subject to examination by Federal and State jurisdictions.

Earnings Per Share

Basic net income per common share ("*Basic EPS*") excludes dilution and is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per common share ("*Diluted EPS*") reflects the potential dilution that could occur if stock options or other contracts to issue shares of common stock were exercised or converted into common stock. The computation of Diluted EPS does not assume exercise or conversion of securities that would have an anti-dilutive effect on net income per common share.
