Notes For the Three and Six Months Ended February 28, 2022

NOTE 1. NATURE AND BACKGROUND OF BUSINESS

The accompanying consolidated financial statements include Nitches, Inc. (the 'Company', 'we' or 'us'), a Nevada corporation, its wholly-owned subsidiaries and any majority controlled interests. The Company blends high tech with high-end fashion to create exclusive clothing lines and NFTs.

The Company was founded originally as a California corporation as a wholesale importer and distributor of clothing, home décor and tabletop products manufactured to our specifications and distributed in the United States under our brand labels and retailer-owned private labels. The Company moved jurisdiction to Nevada in 2008.

On November 5, 2020, International Ventures Society, LLC, a Nevada limited liability company, was appointed custodian of the Company pursuant to an Order of District Court of Clark County, Nevada. On November 6, the Company adopted amended Articles of Incorporation, which created the 2020 Series A Preferred Stock, with one share authorized. This one share effectively controls the Company by representing no less than 60% of all combined votes of Common and Preferred Stock at any time, and was issued to International Ventures Society LLC on the same day.

On December 16, 2020, International Ventures Society, LLC sold the one outstanding share of 2020 Series A Preferred Stock to Accelerate Global Market Solutions, Inc., a change of control transactions that resulted in John Morgan becoming CEO. This share of 2020 Series A Preferred Stock was converted into 100,000,000 shares of Common Stock on November 4, 2021.

In late November 2021, the Company announced it had completed the audit of its financial statements for the years ending November 30, 2021 and 2020, and intends to keep its audit up to date in future.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying financial statements have been prepared for Nitches, Inc. in accordance with accounting principles generally accepted in the United States of America (US GAAP), with all numbers shown in US Dollars.

In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation of the financial statements have been included. The financial statements include acquired subsidiaries, as discussed below, and include all consolidation entries required to include those subsidiaries.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

For the Balance Sheet and Statement of Cash Flows, all highly liquid investments with maturity of three months or less are considered to be cash equivalents. The Company had no cash equivalents as at February 28, 2022 or August 31, 2021.

Income Taxes

Income taxes are provided in accordance with the FASB Accounting Standards (ASC 740), Accounting for Income Tax. A deferred tax asset or liability is recorded for all temporary differences between financial and tax reporting and net operating loss carry forwards. Any deferred tax expense (benefit) resulting from the net change during the year is shown as deferred tax assets and liabilities. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it was more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Basic and Diluted Net Income (Loss) Per Share

Net income (loss) per unit is calculated in accordance with Codification topic 260, "Earnings per Share" for the periods presented. Basic net loss per share is computed using the weighted average number of common shares outstanding. Diluted loss per share has not been presented because the shares of common stock equivalents have not been included in the per share calculations as such inclusion would be anti-dilutive. Diluted earnings per share is based on the assumption that all dilutive stock options, warrants and convertible debt are converted or exercised applying the treasury stock method. Under this method, options, warrants and convertible debt are assumed exercised at the beginning of the period (or at the time of issuance, if later), and as if funds obtained thereby were used to purchase shares of common stock at the average market price during the period. Options, warrants and/or convertible debt will have a dilutive effect during periods of net profit only when the average market price of the units during the period exceeds the exercise or conversion price of the items.

Stock Based Compensation

Codification topic 718 “Stock Compensation” requires that the cost resulting from all share-based transactions be recorded in the financial statements and establishes fair value as the measurement objective for share-based payment transactions with employees and acquired goods or services from non-employees. The codification also provides guidance on valuing and expensing these awards, as well as disclosure requirements of these equity arrangements. The Company adopted the codification upon creation of the Company and will expense share-based costs in the period incurred. The Company has not yet adopted a stock option plan and all share-based transactions and share based compensation has been expensed in accordance with the codification guidance.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with professional standards for “Accounting for Derivative Instruments and Hedging Activities”. Professional standards generally provide three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instruments are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur, and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as “The Meaning of Conventional Convertible Debt Instrument”.

The Company accounts for convertible instruments when it has determined that the embedded conversion options should not be bifurcated from their host instruments in accordance with professional standards when “Accounting for Convertible Securities with Beneficial Conversion Features,” as those professional standards pertain to “Certain Convertible Instruments.” Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying shares of common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares of common stock based upon the differences between the fair value of the underlying shares at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40 provides that, among other things, generally, if an event not within the entity’s control could require net cash settlement, then the contract shall be classified as an asset or a liability.

Fair Value of Financial Instruments

We adopted the guidance of ASC-820 for fair value instruments, which clarifies the definition of fair value, prescribes methods for determining fair value, and establishes a fair value hierarchy to classify the inputs used in measuring fair value, as follows:

- | | |
|---------|--|
| Level 1 | Inputs are unadjusted quoted prices in active markets for identical assets or liabilities available at the measurement date. |
| Level 2 | Inputs are quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs derived from or corroborated by observable market data. |
| Level 3 | Inputs are unobservable inputs which reflect the reporting entity’s own assumptions on what assumptions the market participants would use in pricing the asset or liability based on the best available information. |

The carrying amounts for cash, accounts receivable, accounts payable and accrued expenses, and loans payable approximate their fair value based on the short-term maturity of these instruments. We did not identify any assets or liabilities that are required to be presented on the balance sheet at fair value in accordance with the accounting guidance as at February 28, 2022 but we did identify such assets or liabilities as at August 31, 2021, as detailed in Note 11, Derivative Liabilities.

ASC 825-10 “Financial Instruments” allows entities to voluntarily choose to measure certain financial assets and liabilities at fair value (fair value option). The fair value option may be elected on an instrument-by-instrument basis and is irrevocable, unless a new election date occurs. If the fair value option is elected for an instrument, unrealized gains and losses for that instrument should be reported in earnings at each subsequent reporting date. We did not elect to apply the fair value option to any outstanding instruments.

Derivative Liabilities

Derivative financial instruments consist of convertible instruments and rights to shares of the Company’s common stock. The Company assessed that it had no derivative liabilities as at February 28, 2022 and derivative liabilities as at August 31, 2021, as detailed in Note 11, Derivative Liabilities.

ASC 815 generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument subject to the requirement of ASC 815. ASC 815 also provides an exception to this rule when the host instrument is deemed to be conventional, as described.

Impact of New Accounting Standards

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position, or cash flow.

NOTE 3. GOING CONCERN

The Company's financial statements are prepared in accordance with generally accepted accounting principles applicable to a going concern. This contemplates the realization of assets and the liquidation of liabilities in the normal course of business. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Currently, the Company does not have significant cash or other material assets, nor does it have operations or a source of revenue sufficient to cover its operation costs and allow it to continue as a going concern.

The Company has a limited operating history and had a cumulative net loss from inception to February 28, 2022 of \$29,854,088. The Company has a working capital deficit of \$94,088 as at February 28, 2022.

These financial statements for the six months ended February 28, 2022 have been prepared assuming the Company will continue as a going concern, which is dependent upon the Company's ability to generate future profits and/or obtain necessary financing to meet its obligations as they come due.

The management has committed to an aggressive growth plan for the Company. The Company's future operations are dependent upon external funding and its ability to execute its business plan, realize sales and control expenses. Management believes that sufficient funding will be available from additional borrowings and private placements to meet its business objectives including anticipated cash needs for working capital, for a reasonable period of time. However, there can be no assurance that the Company will be able to obtain sufficient funds to continue the development of its business operation, or if obtained, upon terms favorable to the Company.

NOTE 4. LOANS AND NOTES PAYABLE

The Company had loans and notes payable as at February 28, 2022 and August 31, 2021 totaling \$149,852 and \$141,555 respectively, as follows:

NOTE 5. CAPITAL STOCK

As at February 28, 2022 and August 31, 2021, the Company was authorized to issue Preferred Stock and Common Stock as detailed below.

Preferred Stock

At February 28, 2022 the Company had authorized Preferred Stock in one designation totaling 1 share:

Preferred Stock Series A	<p>The Company is authorized to issue 1 share of Series A, with a par value of \$0.001 per share. As at September 1, 2019, the Company had no shares of Series A preferred stock issued and outstanding.</p> <p>On November 6, 2020, the Company adopted amended Articles of Incorporation, which created the 2020 Series A Preferred Stock, with one share authorized with a par value of \$0.001. This one share effectively controls the Company by representing no less than 60% of all combined votes of Common and Preferred Stock at any time. This one share is also convertible into 100,000,000 shares of common stock at any time.</p> <p>On November 6, 2020, in accordance with a Court Order, the Company issued the one authorized share of 2020 Series A Preferred Stock to its legally appointed Custodian, International Ventures Society, LLC.</p> <p>On December 16, 2020, International Venture Society, LLC sold the one share of issued and outstanding 2020 Series A Preferred Stock to Accelerate Global Market Solutions for a total of \$55,000, resulting in a change of control.</p> <p>On November 4, 2021, the holder of the one share of issued and outstanding 2020 Series A Preferred Stock converted this share into 100,000,000 shares of Common Stock.</p> <p>At February 28, 2022 the Company had no shares of Preferred Stock Series A issued and outstanding.</p>
--------------------------	---

As at February 28, 2022, the Company had no shares of Preferred Stock issued and outstanding.

Common Stock

As at February 28, 2022, the Company is authorized to issue up to 300,000,000 shares of Common Stock with par value \$0.001.

As at September 1, 2020, the Company had 5,659,644 shares of Common Stock issued and outstanding.

On August 3, 2021 the Company issued 100,000,000 shares of Common Stock to a consultant for services of \$14,000,000, or \$0.14 per share.

On October 12, 2021 the Company issued 1,000,000 shares of Common Stock to an investor for investment of \$30,000, or \$0.03 per share.

On October 12, 2021 the Company issued 9,000,000 shares of Common Stock to a consultant for services of \$270,000, or \$0.03 per share.

On November 4, 2021 the Company issued 1,000,000 shares of Common Stock to an investor for investment of \$30,000, or \$0.03 per share.

On November 4, 2021 the Company issued 100,000,000 shares of Common Stock to an investor for preferred stock conversion of \$100,000, or \$0.001 per share.

On November 4, 2021 the Company issued 5,000,000 shares of Common Stock to a consultant for services of \$150,000, or \$0.03 per share.

On December 14, 2021 the Company issued 2,000,000 shares of Common Stock to an investor for investment of \$60,000, or \$0.03 per share.

On January 7, 2022 the Company issued 2,000,000 shares of Common Stock to an investor for investment of \$60,000, or \$0.03 per share.

As at February 28, 2022, there were 225,659,644 shares of Common Stock issued and outstanding.

NOTE 6. DERIVATIVE LIABILITIES

The Company applies the provisions of ASC Topic 815-40, Contracts in Entity's Own Equity ("ASC Topic 815-40"), under which convertible instruments, which contain terms that protect holders from declines in the stock price (reset provisions), may not be exempt from derivative accounting treatment. As a result, embedded conversion options in convertible debt are recorded as a liability and are revalued at fair value at each reporting date. If the fair value of the note exceeds the face value of the related debt, the excess is recorded as change in fair value in operations on the issuance date.

The Company identified embedded derivatives as a Beneficial Conversion Feature of the 2020 Series A Preferred Stock, issued on November 6, 2020. This was evaluated as \$5,000,000, based on the conversion terms of one share of preferred stock for 100,000,000 shares of Common Stock and the price of the Common Stock on the date of issue of \$0.05 per share. This was posted to Additional Paid-in Capital and as a loss to the Statement of Operations for the year ended August 31, 2021. The one share of 2020 Series A Preferred Stock was subsequently converted into Common Stock on November 4, 2021.

NOTE 7. INCOME TAXES

The Company uses the assets and liability method of accounting for income taxes pursuant to SFAS No. 109 "Accounting for Income Taxes". Under the assets and liability method of SFAS No. 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

In June 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes." Specifically, the pronouncement prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken from year ended December 31, 2015 tax return onwards. The interpretation also provides guidance on the related derecognition, classification, interest and penalties, accounting for interim periods, disclosure and transition of uncertain tax positions. The Company adopted this interpretation effective on inception.

For the year ended August 31, 2021, the Company had available for US federal income tax purposes net operating loss carryovers of \$29,247,001, all of which will expire by 2041.

The Company has provided a full valuation allowance against the full amount of the net operating loss benefit, since, in the opinion of management, based upon the earnings history of the Company, it is more likely than not that the benefits will not be realized.

	February 28, 2022	August 31, 2021
Statutory federal income tax rate	21.00%	21.00%
Statutory state income tax rate	0.00%	0.00%
Valuation allowance	(21.00%)	(21.00%)
Effective tax rate	0.00%	0.00%

Deferred income taxes result from temporary differences in the recognition of income and expenses for financial reporting purposes and for tax purposes. The tax effect of these temporary differences representing deferred tax assets result principally from the following:

Deferred Tax Assets (Gross Values)	February 28, 2022	August 31, 2021
Net operating loss carry forward	\$ (29,854,088)	\$ (29,247,001)
Less valuation allowance	29,854,088	29,247,001
Net deferred tax asset	\$ -	\$ -

NOTE 8. SUBSEQUENT EVENTS

Subsequent to February 28, 2022, the Company reported the following events:
