UNIVERSAL POWER INDUSTRY CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

UPIN ("we", or "the Company") was incorporated on June 9, 2014 as Code Navy. The Company was in the business of offshore programming. In March 2016, there was a change of control and a name change to Universal Power Industry Corporation. The Company entered into agreements to acquire certain inventory, accounts receivable, and intellectual property assets including the Energizer® trade name for certain products. However, this acquisition was not completed.

In March 2018, the Company acquired all the shares of Play Market I, Ltd., a company under common control of management. No additional shares were issued in connection with this acquisition, and it has been accounted for as a recapitalization similar to a reverse acquisition. Play Market I, Ltd. is deemed to be the accounting acquirer. The retained earnings deficit of the nominal parent has been eliminated in the consolidation. All intercompany accounts have been eliminated.

Unaudited Financial Statements - These financial statements have been prepared by management and have not been reviewed or audited by any outside accounting firm.

Fiscal Year - The Company's fiscal year-end is June 30.

Cash and Cash Equivalents - The Company considers all highly liquid debt investments purchased with a maturity of three months or less to be cash equivalents.

Basis of Presentation - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. Actual results could differ from those estimates. Management further acknowledges that it is solely responsible for adopting sound accounting practices, establishing, and maintaining a system of internal accounting control and preventing and detecting fraud. The Company's system of internal accounting control is designed to assure, among other items, that (1) recorded transactions are valid; (2) all valid transactions are recorded and (3) transactions are recorded in the period in a timely manner to produce financial - statements which present fairly the financial condition, results of operations and cash flows of the company for the respective periods being presented.

Use of Estimates - The preparation of financial statements in accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. A change in managements ' estimates or assumptions could have a material impact on the Company's financial condition and results of operations during the period in which such changes occurred.

Actual results could differ from those estimates. The Company's financial statements reflect all adjustments that management believes are necessary for the fair presentation of their financial condition and results of operations for the periods presented.

Property, Plant and Equipment - Property and equipment are carried at cost. Expenditures for maintenance and repairs are charged against operations. Renewals and betterments that materially extend the life of the assets are capitalized. When assets are retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is reflected in income for the period.

Depreciation is computed for financial statement purposes on a straight-line basis over estimated useful lives of the related assets. The estimated useful lives of depreciable assets are:

For federal income tax purposes, depreciation is computed under the modified accelerated cost recovery system. For financial statements purposes, depreciation is computed under the straight-line method. All of the fixed assets had been fully depreciated as of all periods presented.

Advertising - Advertising expenses are recorded as general and administrative expenses when they are incurred. There was no advertising expense for the periods presented.

Research and Development - All research and development costs and software development costs are expensed as incurred. There was no research and development expense for the periods presented.

Income tax - We are subject to income taxes in the U.S. Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes. In accordance with FASB ASC Topic 740, "Income Taxes," we provide for the recognition of deferred tax assets if realization of such assets is more likely than not.

Non-Cash Equity Transactions - Shares of equity instruments issued for non-cash consideration are recorded at the fair value of the consideration received based on the market value of services to be rendered, or at the value of the stock given, considered in reference to contemporaneous cash sale of stock.

Offering costs - The Company has elected to expense offering costs as incurred, rather than capitalizing them.

Fair Value Measurements - Effective beginning second quarter 2010, the FASB ASC Topic 825, Financial Instruments, requires disclosures about fair value of financial instruments in quarterly reports as well as in annual reports. For the Company, this statement applies to certain investments and long-term debt. Also, the FASB ASC Topic 820, Fair Value Measurements and Disclosures, clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements.

The Company's adoption of FASB ASC Topic 825 did not have a material impact on the Company's financial statements.

NOTE 1- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES [Continued]

The carrying value of financial assets and liabilities recorded at fair value is measured on a recurring or nonrecurring basis. Financial assets and liabilities measured on a non-recurring basis are those that are adjusted to fair value when a significant event occurs. The Company had no financial assets or liabilities carried and measured on a nonrecurring basis

during the reporting periods. Financial assets and liabilities measured on a recurring basis are those that are adjusted to fair value each time a financial statement is prepared.

The availability of inputs observable in the market varies from instrument to instrument and depends on a variety of factors including the type of instrument, whether the instrument is actively traded, and other characteristics particular to the transaction. For many financial instruments, pricing inputs are readily observable in the market, the valuation methodology used is widely accepted by market participants, and the valuation does not require significant management discretion. For other financial instruments, pricing inputs are less observable in the market and may require management judgment. As of September 30, 2018, the Company had no financial instrument assets.

Basic and diluted earnings per share - Basic earnings per share are based on the weighted-average number of shares of common stock outstanding. Diluted Earnings per share is based on the weighted-average number of shares of common stock outstanding adjusted for the effects of common stock that may be issued as a result of the following types of potentially dilutive instruments:

- Warrants,
- Employee stock options, and
- Other equity awards, which include long-term incentive awards.

The FASS ASC Topic 260, Earnings Per Share, requires the Company to include additional shares in the computation of earnings per share, assuming dilution.

Diluted earnings per share is based on the assumption that all dilutive options were converted or exercised. Dilution is computed by applying the treasury stock method. Under this method, options are assumed to be exercised at the time of issuance, and as if funds obtained thereby were used to purchase common stock at the average market price during the period. Basic and diluted earnings per share are the same as there were no potentially dilutive instruments for the period presented.

Concentrations, Risks, and Uncertainties - The Company did not have a concentration of business with suppliers or customers constituting greater than 10% of the Company's gross sales during the period presented.

Stock Based Compensation - For purposes of determining the variables used in the calculation of stock compensation expense under the provisions of FASB ASC Topic 505, "Equity" and FASB ASC Topic 718, "Compensation-Stock Compensation," we perform an analysis of current market data and historical company data to calculate an estimate of implied volatility, the expected term of the option and the expected forfeiture rate. With the exception of the expected forfeiture rate, which is not an input, we use these estimates as variables in the Black-Scholes option pricing model. Depending upon the number of stock options granted, any fluctuations in these calculations could have a material effect on the results presented in our Consolidated Statement of income. In addition, any differences between estimated forfeitures and actual forfeitures could also have a material impact on our financial statements.

In February 2015, the FASB issued ASU No. 2015-02 (ASU 2015-02), Consolidation (Topic 810): Amendments to the Consolidation Analysis. ASU 2015-02 provides guidance on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities such as limited partnerships, limited liability corporations, and securitization structures (collateralized debt obligations, collateralized loan obligations, and mortgage-backed security transactions)

NOTE 2 - RECENTLY ENACTED ACCOUNTING STANDARDS

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers. ASU 2014-09 is a comprehensive revenue recognition standard that will supersede nearly all existing revenue recognition guidance under current U.S. GAAP and replace it with a principle-based

approach for determining revenue recognition. ASU 2014-09 will require that companies recognize revenue based on the value of transferred goods or services as they occur in the contract. The ASU also will require additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. ASU 2014-09 is effective for interim and annual periods beginning after December 15, 2016, however, the FASB has proposed a one-year deferral. Early adoption is not permitted, and either full retrospective adoption or modified retrospective adoption is permitted. The Company is in the process of evaluating the impact of ASU 2014-09 on the Company's financial statements and disclosures.

In August 2014, the FASB issued ASU No. 2014-15 (ASU 2014-15), Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern, which provides guidance on determining when and how to disclose going-concern uncertainties in the financial statements. The new standard requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued. An entity must provide certain disclosures if conditions or events raise substantial doubt about the entity's ability to continue as a going concern. The ASU applies to all entities and is effective for annual periods ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. The Company is currently evaluating the impact the adoption of ASU 2014-15 on the Company's financial statement presentation and disclosures.

ASU 2015-02 is effective for periods beginning after December 15, 2015. Early adoption is permitted. The adoption of ASU 2015-02 is not expected to have a material effect on the Company's financial statements.

Other recent accounting pronouncements issued by the FASB, including its Emerging Issues Task Force, the American Institute of Certified Public Accountants, and the Securities and Exchange Commission did not or are not believed by management to have a material impact on the Company's present or future financial statements.

NOTE 3 - GOING CONCERN

The Company's financial statements are prepared using accounting principles generally accepted in the United States of America applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. However, the Company does not have significant cash or other current assets, nor does it have an established source of revenues sufficient to cover its operating costs and to allow it to continue as a going concern.

Under the going concern assumption, an entity is ordinarily viewed as continuing in business for the foreseeable future with neither the intention nor the necessity of liquidation, ceasing trading, or seeking protection from creditors pursuant to laws or regulations. Accordingly, assets and liabilities are recorded on the basis that the entity will be able to realize its assets and discharge its liabilities in the normal course of business.

11 - UNIVERSAL POWER INDUSTRY CORP. NOTES TO FINANCIAL STATEMENTS NOTE 3 - GOING CONCERN [Continued]

The ability of the Company to continue as a going concern is dependent upon its ability to successfully accomplish its business plan and eventually attain profitable operations. The accompanying financial statements do not include any adjustments that may be necessary if the Company is unable to continue as a going concern.

During the next year, the Company's foreseeable cash requirements will relate to continual development of the operations of its business, maintaining its good standing and making the requisite filings with OTC Markets, and the payment of expenses associated with software development. The Company may experience a cash shortfall and be required to raise additional capital.

Historically, the Company has relied upon internally generated funds and funds from the sale of securities to finance its operations and growth. Management may raise additional capital through future public or private offerings of the Company's stock or through loans from private investors, although there can be no assurance that it will be able to obtain such financing. The Company's failure to do so could have a material and adverse effect upon its and its shareholders.

NOTE 4- RELATED PARTY PAYABLE AND OTHER PAYABLES

The Company has obtained cash for operations from related party advances, as well as a bank credit line during fiscal 2018 with a limit of \$80,000. The related party advances are due on demand and bear no interest. The bank credit line has a variable rate and the rate as of March 31, 2019 is 10.15%.

NOTE 5 - CAPITAL STOCK AND SECURITIES

The Company has authorized an unlimited amount of common and preferred stock, all no par value. We issued 5 million shares of common stock under an S-1 registration statement for cash of \$50,000 in December 2016, for net proceeds of \$49,215. In April 2016, we entered into an agreement to purchase certain assets, including the tradename " Energizer " from TennRich International Corp. The Company issued 8,125,000 shares to TennRich in connection with the acquisition in September 2016; however, the transaction was rescinded due to failure of Tennrich to deliver the assets. We have asked TennRich to return these shares.

In September 2016, we issued 275,000 shares of common stock to two employees. We valued the stock at \$.25 per share, based on the then trading price of the common stock. We issued 692,724 shares of common stock to a company which had lent \$48,500 to a predecessor of the Company in 2011. In October 2018, we issued 829,876 shares of common stock per the disputed terms of an alleged note to a company who claimed they lent \$37,500.00 to a predecessor of the company in 2011. The validity and terms of said note(s) is currently being challenged per a lawsuit and counter claim by this company. The previous 692,724 and 1,000,000 shares were issued for full satisfaction and settlement of any liability on the notes. Since the Company no longer carried these obligations on its balance sheet, this was treated as a non-cash transaction. As a result, there were 116,113,727 common shares outstanding as of March 31, 2021.

NOTE 6- INCOME TAXES

The Company has available as of March 31, 2022 unused operating loss carry forwards of approximately \$202,985.

NOTE 7.- LOSS PER SHARE

Net loss per share is computed by dividing the loss from operations available to common shareholders by the weighted average number of shares outstanding for the period

Dilutive loss per share was not presented, as the Company had no common stock equivalent shares for all periods presented that would affect the computation of diluted loss per share.
