Dear Shareholders and potential shareholders,

We would like to bring to your attention that the financial statements for the last few quarters should not be relied upon. Upon review by management, as part of an audit necessary for a merger with the Canadian company, it was discovered that revenues were overstated due to errors relating to the timing of funds being disseminated by third parties.

The Company has determined that its financial statements of its Fiscal Years 2021 and 2022 are incorrect. Specifically, the Company has determined that the financial statements overstated the Company's income during the relevant periods and will initiate a process with its accountant to determine the extent of the inaccuracies and to make corrections. We are continuing to verify the accuracy of the other statements. The Company will publish updated and corrected financial statements when this process is complete.

We want to assure you that we are taking necessary steps to rectify this issue, and the next annual report will include corrected financial statements that accurately reflect our financial performance.

We apologize for any inconvenience or confusion this may have caused, and we appreciate your continued support and trust in our company.
