1. NATURE OF OPERATIONS AND GOING CONCERN

POSaBIT Systems Corporation (“**POSaBIT**” or the “**Company**”), was incorporated on June 12, 2017, pursuant to the *Business Corporations Act* (British Columbia). On April 5, 2019, the Company completed the reverse acquisition of POSaBIT, Inc. (“**POSaBIT US**”), a private company incorporated under the laws of the State of Washington, by way of a triangular merger (the “**Transaction**”). Upon completion of the Transaction, the Company changed its name to POSaBIT Systems Corporation and is now primarily engaged in the business of providing point-of-sale solutions to consumers seeking an easy way to purchase goods and services. Pursuant to the Transaction, the shareholders of POSaBIT US received 1.7539815 securities of the Company for each security of POSaBIT US held including common shares, options, and warrants.

In connection with the Transaction, the Company delisted from the TSXV and obtained listing on the Canadian Securities Exchange (“**CSE**”) under the trading symbol “**PBIT**”.

The Company’s head office is located at 15 Lake Bellevue Dr. Suite 101, Bellevue, WA 98005. Its registered address in Canada is 250 Howe Street, 20th floor, Vancouver, British Columbia V6C 3R8.

The evaluation of the standalone selling price determined \$14,420,000 of the transaction price is recognized at inception with the remaining \$6,180,000 recognized over the life of the agreement. The arrangement includes a significant financing component as a result of the extended payment terms and determined the present value of the future payments using the discount rate at inception of 2.8%, resulting in a contract asset of \$10,792,500. The discount amount of \$826,906 will be accreted to interest income over the term of the agreement.

During the three and nine months ended September 30, 2023, \$82,132 (2022 - \$nil) and \$241,205 (2022 - \$nil), respectively of interest income was accreted and has been recorded in the consolidated statements of loss.

16. LEASE LIABILITY

The Company has recognized a right-of-use asset (*note 11*) for its office premises with a corresponding lease liability which is initially measured at the present value of the future lease payments. In accordance with IFRS 16, the Company then recognizes depreciation of right-of-use asset and interest expense on lease liability in profit or loss.

The Company has entered into one lease for office space. In order to calculate the present value of the future lease payments, the Company has used a discount rate of 12% which represents its incremental borrowing rate. Prior to the adoption of IFRS 16, this lease was accounted for as an operating lease. Changes to the Company's lease liability is as follows:

	\$

17. CONVERTIBLE NOTES AND DERIVATIVE LIABILITY

During the year ended December 31, 2020, the Company completed a non-brokered financing of \$1,040,000 (the "**Financing**"), by way of issuance of convertible notes (the "**Convertible Notes**"). The Convertible Notes carry an interest rate of 12.0% per annum, payable on a calendar- quarterly basis and have a maturity date of December 31, 2023. At any time prior to December 1, 2023, at the election of the holder, outstanding principal of the Convertible Notes may be converted into common shares of the Company at CDN\$0.12 per common share.

In connection with the Financing, the Company incurred cash issue costs of \$64,450 and issued 5,650,233 common share purchase warrants (each a "**Warrant**"), each with an exercise price of C\$0.12 and maturity date of November 13, 2025 and 349,608 agent warrants (each an "**Agent Warrant**"), each with an exercise price of C\$0.12 and maturity date of November 13, 2022.

As the conversion price is set at C\$0.12 per share it is a function of the US to Canadian dollar exchange rate and a variable number of shares will be issued on conversion, resulting in a derivative liability. On initial recognition, first the derivative liability (the "**Initial Derivative Liability**") of \$948,988 was recognized, with the residual value of \$91,012 allocated to the debt component (the

POSaBIT Systems Corporation

“**Host Liability**”). The fair value of the Agent Warrants of \$25,741 was estimated using the Black-Scholes option pricing model with the following weighted average assumptions: Risk-free rate of 0.33%, expected life of 1 year, exercise price of \$0.09, volatility of 237%, dividend yield of 0% and share price of \$0.11. The fair value of the Agent Warrants and cash costs of \$64,450 was split on the same bases as the Initial Derivative Liability and the Host Liability with \$7,893 deducted from the Host Liability and \$83,119 being recorded as finance cost in the consolidated statements of loss.

The residual value is then accreted back to the face value of the Convertible Notes over the term of the loan with adjustments made for any conversions and the derivative liability is marked-to-market at each reporting date. During the three and nine months ended September 30, 2023, \$196,711 (2022 - \$49,034) and \$357,069 (2022 - \$114,055), respectively of interest accretion on the Convertible Notes was recorded in the consolidated statements of loss.

During the three and nine months ended September 30, 2023, \$nil (2022 – \$nil) and \$25,000 (2022 - \$nil), respectively in face-value of the Convertible Notes was converted.

As at September 30, 2023, the Company revalued the derivative liability at \$4,608,334 and for the three and nine months ended September 30, 2023, recorded a gain of \$395,000 (2022 – loss of \$1,018,756) and a \$2,164,794 (2022 – \$5,304,947), respectively in the consolidated statements of loss.

18. GOVERNMENT LOAN

Due the global outbreak of Novel Coronavirus (“**COVID-19**”), the federal US Government amended its small business administration (“**SBA**”) loans to provide relief from the financial effects of COVID-19. On May 18, 2020, the SBA provided the Company with a reduced-interest loan (“**SBA Loan**”) of \$150,000. The SBA Loan has an interest rate of 3.75%, is amortized over 30 years and allows for no repayment during the first year. Commencing in year 2, the Company is required to make monthly payments of \$731, which will be applied first to outstanding interest and then to principal. Any outstanding principal and interest is due on May 18, 2050.

Pursuant to IAS 20 *Accounting for Government Grants and Disclosure of Government Assistance*, the benefit of a government loan at below-market rate is treated as a government grant and measured in accordance with IFRS 9 *Financial Instruments*: the benefit of below-market rate shall be measured as the difference between the initial carrying value of the loan (being the present value of a similar loan at market rates) and the proceeds received. The Company has estimated the initial carrying value of the SBA Loan at \$40,535, using a discount rate of 18%, which was the estimated rate for a similar loan without the reduced-interest component. The difference of \$109,465 will be accreted to the loan liability over the 30-year term of the SBA Loan and offset to other income on the statements of loss and comprehensive loss. For the three and nine months ended September 30, 2023, the Company recorded interest accretion on the SBA Loan of \$2,191 (2022 - \$2,194) and \$6,505 (2022 - \$6,514), respectively in the consolidated statements of loss.

19. CREDIT FACILITY

In March 2023, the Company entered into a credit facility agreement (the “**Credit Facility**”) that provides a maximum drawdown of \$8,000,000, has a term of three years and accrues interest at 10% per annum from the closing date of the drawdown and ending on the second anniversary of the closing date and 12% thereafter. Interest only to be paid quarterly on the amount drawn down, with outstanding principal and interest due on March 31, 2026.

Pursuant to the Credit Facility, the Company issued 300,000 advisory warrants (the “**Advisory Warrants**”). The fair value of the Advisory Warrants of \$208,069 was estimated using the Black Scholes option model with assumptions as disclosed in note 19.4. The fair value of the Advisory

21. RELATED PARTY TRANSACTIONS AND BALANCES

Parties are related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Related parties may be individuals or corporate entities. A transaction is a related party transaction when there is a transfer of resources or obligations between related parties.

The Company's transactions with related parties were, in the opinion of management, carried out on normal commercial terms and in the ordinary course of the Company's business.

Key management compensation

Key management includes those individuals having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly. Key management includes the directors, named executive officers, being the Chief Executive Officer and the Chief Financial Officer. Others include the Company's Chief Technology Officer and its Chief Revenue Officer, Chief Compliance Officer and the Chief Strategic Officer. Compensation paid or payable to key management is detailed below:

September 30,	Three months ended September 30,		Nine months ended September 30,	
	2023	2022	2023	2022
	\$	\$	\$	\$

Totals	930,564	371,268	3,215,757	1,450,662

22. FINANCIAL RISK MANAGEMENT

Financial instruments measured at fair value are classified into one of levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities; and

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

At September 30, 2023, the Company's financial instruments consist of cash, receivables, license contract, accounts payable, derivative liability and credit facility. The fair values of cash, receivables, accounts payable approximate their carrying values due to the relatively short-term to maturity nature. The Company classifies its license contract at amortized cost and its derivative liability and credit facility at fair value through profit and loss.

Financial risk factors

The Company's activities expose it to a variety of financial risks: credit risk and liquidity risk. The Company's overall risk management program and business practices seek to minimize any potential adverse effects on the Company's financial performance. Risk management is carried out by the senior management team.

POSaBIT Systems Corporation

Notes to the Unaudited Interim Consolidated Financial Statements
For the three and nine months ended September 30, 2023 and 2022
(Expressed in United States Dollars)

a) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to receivables and monies due from its processors.

The Company believes that its receivables balance is fully collectable. As of September 30, 2023, \$1,649,924 (December 31, 2022 – \$2,745,121) in receivables was outstanding. The Company applies the simplified approach to providing for expected credit losses as prescribed by IFRS 9, which permits the use of the lifetime expected loss provision for all receivables. The loss allowance is based on the Company's historical collection and loss experience and incorporates forward-looking factors, where appropriate. As at September 30, 2023 the Company has evaluated its receivables due from its processors and determined the lifetime expected credit losses are nominal.

The Company maintains bank deposits with reputable financial institutions.

Concentrations of credit risk that arise from financial instruments exist for groups of customers or counterparties when they have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

b) Liquidity risk

Liquidity risk is the risk that the Company is unable to generate or obtain sufficient cash or its equivalents in a cost-effective manner to fund its obligations as they come due. The Company's liquidity risk is subject to the Convertible Notes which have interest and repayment terms.

c) Interest rate risk

The Company is subject to interest rate risk on future cash flows as its loans bear fixed rates of interest. The related party loans are interest free.

d) Capital risk management

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern to provide returns to the shareholders and to maintain an optimal capital structure to minimize the cost of capital. The Company considers shareholders' equity as capital.

To maintain or adjust the capital structure, the Company may issue new shares to the shareholders, draw upon existing credit facilities or sell assets. There are no changes in the Company's capital management policies for the nine months ended September 30, 2023 and year ended December 31, 2022.

There are no external capital management requirements or covenants as at September 30, 2023 and December 31, 2023, other than the continued listing requirements of the CSE.

23. REVENUE
