2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The consolidated financial statements include the financial position, results of operations, and cash flows of Winco and its wholly owned subsidiaries. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). All material intercompany balances and transactions have been eliminated in consolidation.

Cash and Cash Equivalents

Cash and cash equivalents consist of highly liquid investments purchased with an original maturity of three months or less and may include, among other things, money market fund shares. The carrying amount reported on the balance sheets for cash and cash equivalents approximates fair value.

Income Taxes

The Company records the current and deferred tax consequences of all transactions that have been recognized in the financial statements in accordance with the provisions of the enacted tax laws. Deferred tax assets are recognized for temporary differences that will result in deductible amounts in future years. Deferred tax liabilities are recognized for temporary differences that will result in taxable income in future years. The Company records a valuation allowance, when necessary, to reduce deferred tax assets to an amount that more likely than not will be realized.

The Company has reviewed its tax positions and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on federal, state, and local income tax returns for open tax years (2021 – 2023) or expected to be taken in the Company’s 2024 tax returns.

Investments in Securities

Investments in equity securities that have readily determinable fair values are measured at fair value. Gains or losses from changes in the fair value of equity securities are recorded in net income, until the investment is sold or otherwise disposed. The specific identification method is used to determine the realized gain or loss on investments sold or otherwise disposed. Fair value is determined using a valuation hierarchy generally by reference to an active trading market, using quoted closing or bid prices. Judgment is used to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization. The costs of additions and betterments are capitalized and expenditures for repairs and maintenance are charged to operations as incurred. Depreciation and amortization are calculated using the straight-line method over the estimated useful life of the asset of 3-7 years for office equipment.

Regulation

MSG is registered under the Securities Exchange Act of 1934 (“Exchange Act”) as a broker/dealer and is a member of the Financial Industry Regulatory Authority, Inc. MMC is registered with the Securities and Exchange Commission as an investment adviser under the Investment Advisers Act of 1940, as amended.

Revenue Recognition

The Company recognizes revenue from management and other fees consisting of payments for investment management and administrative services performed by MMC pursuant to Investment Management Agreements (“IMA”) with each of the Funds. Under the terms of each IMA, the Funds pay MMC a fee monthly for investment management services based on a percentage of assets under management and reimburses the Company monthly for providing at cost certain administrative services (including, but not limited to, compliance and accounting services).

The Company recognizes revenue from distribution and shareholder services to the Midas Trust provided by MSG. The Midas Trust adopted a plan in accordance with Rule 12b-1 under the Investment Company Act of 1940, as amended, on behalf of Midas and Magic, and each of Midas and Magic pays the Company a 12b-1 fee monthly as compensation for the distribution and shareholder services at an annual rate based on that Fund’s average daily net assets. As such, distribution and shareholder service fees recognized in the current period are related to performance obligations that have been satisfied during such period.

Revenue is measured at the fair value of consideration received or receivable and represents amounts receivable for services provided in the normal course of business. Revenue is generally accrued over the period for which the service is provided.

Use of Estimates

The preparation of the financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial

statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from management's estimates.

5. FAIR VALUE MEASUREMENTS

The use of estimated fair value to measure the financial instruments held by the Company is fundamental to its consolidated financial statements and is a critical accounting estimate because a substantial portion of its assets and liabilities are recorded at estimated fair value. The application of fair value measurements may be on a recurring or nonrecurring basis depending on the accounting principles applicable to the specific asset or liability or whether management has elected to carry the item at its estimated fair value.

The hierarchy of valuation techniques is based on whether the inputs to those techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1 — Quoted prices in active markets for identical instruments or liabilities.

Level 2 — Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in pricing an asset or liability and are developed based on market data obtained from sources independent of the Company. These may include quoted prices for similar assets and liabilities, interest rates, prepayment speeds, credit risk, and market-corroborated inputs.

Level 3 — Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable or unreliable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Company’s own assumptions about the factors that market participants use in pricing an asset or liability and are based on the information available in the circumstances.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when estimating fair value. The valuation method used to estimate fair value may produce a fair value measurement that may not be indicative of ultimate realizable value. Furthermore, while management believes its valuation methods are appropriate and consistent with those used by other market participants, the use of different methods or assumptions to estimate the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Those estimated values may differ significantly from the values that would have been used had a readily available and reliable market for such loans or investments existed, or had such loans or investments been liquidated, and those differences could be material to the financial statements.

Investments in securities. Investments in securities consist of shares of publicly traded affiliates. Securities are normally valued at the last reported sales price on the date of determination in the principal market or exchange where such securities are traded and are considered a level 1 measurement or, if not available, at the last reported bid price and are considered a level 2 measurement.

The assets held by the Company and its subsidiaries that were measured at fair value were as of June 30, 2024 and December 31, 2023, as follows:

June 30, 2024	Level 1	Level 2	Level 3	Total
Assets				
Investment in securities				
Common stock of publicly traded affiliates	\$ 1,462,578	\$ 7,173,524	\$ —	\$ 8,636,102
Total assets at fair value	\$ 1,462,578	\$ 7,173,524	\$ —	\$ 8,636,102
December 31, 2023	Level 1	Level 2	Level 3	Total
Assets				
Investment in securities				
Common stock of publicly traded affiliates	\$ 649,772	\$ 8,610,011	\$ —	\$ 9,259,783
Total assets at fair value	\$ 649,772	\$ 8,610,011	\$ —	\$ 9,259,783

No liabilities of the Company were measured at fair value as of June 30, 2024 and December 31, 2023.

6. EARNINGS PER SHARE

Basic earnings per share is computed using the weighted average number of shares outstanding. Diluted earnings per share is computed using the weighted average number of shares outstanding adjusted for the incremental shares attributed to potentially diluted securities. The following table sets forth the computation of basic and diluted earnings per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2024	2023	2024	2023
Net income (loss)	\$ 695,045	\$ (1,327,363)	\$ 2,045,445	\$ (745,497)
Basic and diluted weighted average common shares outstanding	1,418,758	1,418,758	1,418,758	1,418,758
Basic and diluted net income (loss) per share of common stock	\$ 0.49	\$ (0.94)	\$ 1.44	\$ (0.53)

7. CAPITAL STOCK

As of June 30, 2024, the Company was authorized to issue 1,500,000 shares of \$0.01 par value Class A common stock and 20,000 shares of \$0.01 par value of Class B common stock. As of June 30, 2024, 1,398,758 shares of Class A and 20,000 shares of Class B had been issued and was outstanding. Class A and Class B common stock are identical in all respects except for voting rights, which are vested solely in the Class B common stock.

8. INCOME TAXES

The Company had a statutory tax rate of 21% and an effective tax rate of 0% and 0% for the three months ended June 30, 2024 and 2023, respectively, with the difference attributable to changes in the amount of deferred tax assets and liabilities and the corresponding valuation allowance.

Deferred income tax assets and liabilities are recorded for differences between the financial statement and tax basis of the assets and liabilities that will result in taxable or deductible amounts in the future based on enacted laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. The Company has evaluated the available evidence supporting the realization of its gross deferred tax assets, including the amount and timing of future taxable income, and has determined that, based on net losses to date, it may not utilize all of its deferred tax assets in the future. The Company established a full valuation allowance against its deferred tax assets as of June 30, 2024 and December 31, 2023, respectively.

As of December 31, 2023, the Company has federal net operating loss carryovers of approximately \$3,613,000 which will not expire.

The utilization of net operating loss carryovers may be subject to limitations under the provision of Section 382 of the Internal Revenue Code of 1986, as amended and similar state provisions.

ASC 740-10, Accounting for Uncertain Tax Positions, requires that the Company recognize the impact of tax positions in the financial statements if the position is more likely than not to be sustained upon examination and on the technical merits of the position. The Company's policy is to recognize interest accrued related to unrecognized tax benefits and penalties as income tax expense. The Company has no material uncertain tax positions at June 30, 2024 and December 31, 2023. Consequently, no interest or penalties have been accrued by the Company.

The Company is subject to taxation in the U.S. and various state jurisdictions. The Company is no longer subject to federal examination for years before 2021.

The Company's maximum exposure under these arrangements is unknown as it involves future claims that may be made against the Company under circumstances that have not occurred.

12. RISKS AND UNCERTAINTIES

General Market Risks

The Company's portfolio and the success of its investment activities are affected by global and national economic, political and market conditions generally and also by the local economic conditions where its assets are located. U.S. and international markets have experienced volatility in recent months and years due to a number of economic, political and global macro factors, including rising inflation, wars between Russia and Ukraine and in the Middle East, and the impact of the coronavirus ("COVID-19") global pandemic. Uncertainties regarding the level of central banks' interest rate increases, political events, the Russia-Ukraine conflict and the Israel-Hamas conflict, trade tensions and the possibility of a national or global recession have also contributed to market volatility. The full impact of such external events on the financial and credit markets and consequently on the Company's financial conditions and results of operations is uncertain and cannot be fully predicted. The Company will continue to monitor these events and will adjust its operations as necessary.

Credit Risk

The Company maintains cash and cash equivalents in accounts with various financial institutions, and at times, account balances may exceed federally insured limits. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk.
