Unaudited

Note 1 – Organization of Business

On August 2, 1984, KRTL Holding Group, Inc. (the “Company”) was incorporated in the State of Utah as Big Pony Gold, Inc. The Company’s name was changed to Pan American Motorsports, Inc. in April of 1998. The name was changed to Queench, Inc. in November 2002. Effective December 31, 2021, the Company began to focus on research and development of psychedelic inspired medicines. In March of 2022, KRTL Biotech Inc. (“KRTL”) merged into a newly formed subsidiary of Queench, Inc., and KRTL was the surviving corporation. In July 2022, the Company changed its name to KRTL Holding Group, Inc. Its wholly owned subsidiaries, KRTL Biotech, Inc., and KRTL International Corp., focus on consulting and distribution.

KRTL Biotech is dedicated to biotechnology research and development. It collaborates with CGMP manufacturers, ISO Certified Laboratories, and a Bolivian public university for educational partnerships across various sectors. Their work spans agriculture, biology, and chemistry, seeking to develop progressive formulations.

KRTL International Corp. imports and wholesales alcoholic beverages, holds direct sales licenses in key states, and offers nationwide distribution. It also provides back-office solutions, import/export services, warehousing, logistics, and strategic advisory. It holds an exclusive distribution agreement for the Anzextro brand.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America. The Company has a December 31 year end.

Note 2 – Summary of Significant Accounting Policies

Use of Estimates

In preparing financial statements in conformity with generally accepted accounting principles, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The most significant estimates relate to income tax valuation allowance. On a continual basis, management reviews its estimates, utilizing currently available information, changes in facts and circumstances, historical experience, and reasonable assumptions. After such reviews, and if deemed appropriate, those estimates are adjusted accordingly. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid investments with maturities of three months or less to be cash equivalents. The Company has no cash equivalents. The Company has not maintained cash balances that exceed federally insured limits.

Revenue Recognition

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)." Topic 606 established that the Company recognize revenue using the following five-step model:

- Identification of the contract, or contracts, with a customer;
- Identification of the performance obligations in the contract;
- Determination of the transaction price;
- Allocation of the transaction price to the performance obligations in the contract; and
- Recognition of revenue when or as the Company satisfies a performance obligation.

Some contracts require the Company to perform services over a one-year period, a five-year period, or a ten-year period. In conjunction with these contracts, the Company has received payment for its services and has recorded current deferred revenue of \$12,500 and \$13,618 as of June 30, 2024 and December 31, 2023, respectively, and long-term deferred revenue of \$38,333 and \$44,583, as of June 30, 2024 and December 31, 2023, respectively.

Fair Value of Financial Instruments

Under the Fair Value Measurements Topic of the FASB Accounting Standards Codification, the Company bases its fair value on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy. Fair value measurements for assets and liabilities where there exists limited or no observable market data and, therefore, are based primarily upon management's own estimates, are often calculated based on current pricing policy, the economic and competitive environment, the characteristics of the asset or liability and other such factors. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, that could significantly affect the results of current or future value.

Impairment of long-lived assets

The Company periodically reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable. The Company recognizes an impairment loss when the sum of expected undiscounted future cash flows is less than the carrying amount of the asset. The amount of impairment is measured as the difference between the asset's estimated fair value and its book value. During the three- and six-month periods ended June 30, 2024 and 2023, the Company did not record any impairment losses.

Income Taxes

The Company accounts for income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income and the reversal of deferred tax liabilities during the period in

which related temporary differences become deductible. A valuation allowance has been established to eliminate the Company's deferred tax assets as it is more likely than not that any of the deferred tax assets will be realized.

The Company records uncertain tax positions in accordance with ASC 740 on the basis of a two-step process whereby (1) we determine whether it is more likely than not that the tax positions will be sustained on the basis of the technical merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, we recognize the largest amount of tax benefit that is more than 50 percent likely to be realized upon ultimate settlement with the related tax authority.

Based on the Company's history of losses, it has been concluded that there are no significant uncertain tax positions requiring recognition in the Company's financial statements. The Company believes that its income tax positions would be sustained on audit and does not anticipate any adjustments that would result in a material change to its financial position.

The Company may in the future become subject to foreign, federal, state, and local income taxation though it has not been since inception. The Company is not presently subject to any income tax audit in any taxing jurisdiction.

Basic Income (Loss) Per Share

Basic income (loss) per share is calculated by dividing the Company's net income applicable to common shareholders by the weighted average number of common shares during the period. A diluted earnings per share is calculated by dividing the Company's net income available to common shareholders by the diluted weighted average number of shares outstanding during the fiscal period. The diluted weighted average number of shares outstanding is the basic weighted number of shares adjusted for any potentially dilutive debt or equity. As of June 30, 2024 and 2023, the Company had dilutive equity securities outstanding, see Note 7.

Recent Accounting Pronouncements

Management does not believe that any recently issued, but not yet effective, accounting standards could have a material effect on the accompanying financial statements. As new accounting pronouncements are issued, the Company will adopt those that are applicable under the circumstances.

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position, or cash flow.

Note 3 – Going Concern Matters and Realization of Assets

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the ordinary course of business. However, the Company has limited working capital, an accumulated deficit, and incurred operating losses in recent years. The Company believes that its existing cash resources may not be sufficient to fund its working capital requirements.

The Company may not be able to raise sufficient additional debt, equity, or other cash on acceptable terms, if at all. Failure to generate sufficient revenues, raise sufficient funds, or achieve certain other business plan objectives could have a material adverse effect on the Company's results of operations, cash flows and financial position, including its ability to continue as a going concern, and may require it to significantly reduce, reorganize, discontinue, or shut down its operations. These conditions raise substantial doubt about the Company's ability to continue as a going concern. Accordingly, the Company's management has concluded that there is substantial doubt about the Company's ability to continue as a going concern within one year after the issuance date of these financial statements. There can be no assurance that the Company will be able to achieve its business plan objectives or be able to achieve or maintain cash-

flow-positive operating results. If the Company is unable to generate adequate funds from operations or raise sufficient additional funds, the Company may not be able to continue to operate its business network, respond to competitive pressures or fund its operations.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might be necessary should the Company be unable to continue in its existence.

Management's plans include the pursuit of financing from known lenders, family members and business friends.

Note 4 – Income Taxes

The Company did not have any material unrecognized tax benefits as of June 30, 2024 and December 31, 2023. The Company does not expect the unrecognized tax benefits to significantly increase or decrease within the next twelve months. The Company recorded no interest and penalties relating to unrecognized tax benefits as of and during the three- and six-month periods ended June 30, 2024, and 2023. The Company is subject to United States federal income tax, as well as taxes by various state jurisdictions.

The Company recorded no income tax expense for the three- and six month periods ended June 30, 2024, and 2023 due to a tax loss carryforward that is available to offset any taxable income.

Note 5 – Stockholders' Equity

Note 6 – Fair Value

The Fair Value Measurements Topic of the FASB Accounting Standards Codification establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest

priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1: inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the company has the ability to access at the measurement date.
- Level 2: inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs are unobservable inputs for the asset or liability.

Financial assets measured at fair value on a recurring basis are summarized below as of June 30, 2024 and December 31, 2023:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
June 30, 2024				
Equity securities at fair value	\$ —	\$ 568,659	\$ —	\$ 568,659
December 31, 2023				
Equity securities at fair value	\$ —	\$ 379,946	\$ —	\$ 379,946

Under the Fair Value Measurements Topic of the FASB Accounting Standards Codification, we base fair value on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is our policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy. Fair value measurements for assets and liabilities where there exists limited or no observable market data and, therefore, are based primarily upon management's own estimates, are often calculated based on current pricing policy, the economic and competitive environment, the characteristics of the asset or liability and other such factors. Therefore, the results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows that could significantly affect the results of current or future value.

Note 7 – Earnings Per Common Share

Earnings (loss) per common share data for the three- and six-month periods ended June 30, 2024, and 2023 was computed as follows:

	Three Months Ended June 30, 2024	Three Months Ended June 30, 2023	Six Months Ended June 30, 2024	Six Months Ended June 30, 2023
Net income (loss) attributable to common stockholders - basic	\$ 62,790	\$ (54,896)	\$ 94,094	\$ (75,039)

Earnings (loss) per share - basic	\$ 0.00	\$ (0.00)	\$ 0.00	\$ (0.00)
Earnings (loss) per share - diluted	\$ 0.00	\$ (0.00)	\$ 0.00	\$ (0.00)

In the three and six months ended June 30, 2024, convertible preferred stock was dilutive and equivalent to 133,576,137 shares of common stock. In the three and six months ended June 30, 2023, convertible preferred stock and warrants convertible into approximately 207,402,000 shares of common stock, were excluded in the diluted earnings per share calculation because they were antidilutive.
