These unaudited condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that assets will be realized, and liabilities discharged in the normal course of business for the foreseeable future. The Company has incurred losses since its inception and anticipates that losses will continue. For the six months ended June 30, 2024, the Company has incurred a comprehensive loss of \$1,949,143 (2023: \$1,770,270). The Company also had operating cash outflows of \$1,365,356 (2023: \$1,197,233). The Company has not generated sufficient cash inflows from operations. These conditions cast significant doubt about the Company's ability to continue as a going concern. The ability of the Company to carry out its planned business objectives is dependent on its ability to raise adequate financing from lenders, shareholders and other investors and/or generate profitability and positive cash flow. These unaudited condensed interim consolidated financial statements do not give effect to the adjustments that would be necessary should the Company be unable to continue as a going concern and to realize its assets and liquidate its liabilities and commitments at amounts different from those in the accompanying condensed interim consolidated financial statements. Such adjustments could be material.

3. BASIS OF PRESENTATION

a) Statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), including International Accounting Standards ("IAS") 34 – Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). These condensed interim consolidated financial statements do not include all disclosures required for annual audited financial statements. Accordingly, they should be read in conjunction with the notes to the Company's audited financial statements for the year ended December 31, 2023.

The Company's interim results are not necessarily indicative of its results for a full year.

These condensed interim consolidated financial statements were authorized for issue by the Board of Directors on August 26, 2024.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements For the three and six months ended June 30, 2024 and 2023 (United States Dollars, unless otherwise indicated)

b) Consolidation

These condensed interim consolidated financial statements are presented on a consolidated basis and include the accounts of the Company and its controlled entities. Control occurs when the Company is exposed to, or has right to, variable returns from its involvement with an investee and has the ability to affect those returns through its power over the investee. Details of controlled entities are as follows:

			Percenta	age Owned
Entity	Country of Incorporation	Functional Currency	June 30, 2024	December 31, 2023
MiMedia Inc.	United States	United States Dollars	100%	100%

All intercompany balances and transactions have been eliminated on consolidation.

c) Basis of measurement

These condensed interim consolidated financial statements have been prepared on a historical cost basis, modified where applicable. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The accounting policies have been applied consistently to all periods presented in these condensed interim consolidated financial statements, unless otherwise indicated.

The condensed interim consolidated financial statements have been presented in United States dollars. The Company's functional currency is Canadian dollars and its subsidiary's is United States dollars.

The functional currency of each entity is determined using the currency of the primary economic environment in which that entity operates.

In preparation of the condensed interim consolidated financial statements of the Company, the results of foreign operations with a functional currency other than United States dollars are translated to United States dollars upon consolidation. Each entity's assets and liabilities are translated to United States dollars at the prevailing exchange rate at reporting date. The revenue and expenses of these foreign operations are translated to United States dollars using average exchange rates prevailing for each reporting period. Foreign exchange differences arising on translation are recognized directly in the consolidated statement of loss and comprehensive loss and presented in the foreign currency translation reserve within equity. On disposal of a foreign operation, the related cumulative translation difference recognized in equity are reclassified to profit or loss and are recognized as part of the gain or loss on disposal.

At the entity level, transactions in currencies other than the entity's functional currency are recorded at the exchange rates prevailing on the dates of the transactions. At each reporting date, monetary items denominated in foreign currencies are translated at the prevailing exchange rates on the date of the statement of financial position. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the prevailing exchange rates on the date when the fair value was determined. Non-monetary items measured at historical costs in foreign currency are not re-translated. Exchange differences arising on the settlement of monetary items, and on the remeasurement of monetary items, are included in profit or loss for the period.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements For the three and six months ended June 30, 2024 and 2023 (United States Dollars, unless otherwise indicated)

d) Judgement and estimates

In preparing these condensed interim consolidated financial statements, management has made judgments, estimates, and assumptions that affect the applicability of the Company's accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates. Management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted prospectively in the period in which the estimates are revised. In preparing these condensed interim consolidated financial statements, the significant estimates and critical judgements were the same as those applied to the annual financial statements as at and for the year ended December 31, 2023.

Each warrant is exercisable to acquire one Subordinate Voting Share at an exercise price of \$0.65 CAD until March 14, 2025.

The Convertible Debentures mature on March 14, 2026, and bear interest at a rate of 10% per annum, payable in cash or Subordinate Voting Shares, at the option of the Company, on a semi-annual basis. Any payment of interest pursuant to the issuance of Subordinate Voting Shares will be subject to the prior approval of the TSX Venture Exchange (the "Exchange") and the issue price per Subordinate Voting Share shall be at the then applicable Market Price (as such term is defined in the applicable policies of the Exchange). The residual amount of \$284,005 was allocated to equity (conversion feature). 15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair value

The Company's financial instruments include cash and cash equivalents, accounts and other receivables, loans receivable, accounts payable and accrued liabilities and convertible debentures. IFRS 7 Financial Instruments: Disclosures ("IFRS 7") establishes a fair value hierarchy for financial instruments measured at fair value. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy are as follows:

- Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.
- Level 2 applies to assets or liabilities for which there are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly such as quoted prices for similar assets or liabilities in active markets or indirectly such as quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions.
- Level 3 applies to assets or liabilities for which there are unobservable market data.

The recorded amounts of cash and cash equivalents, accounts and other receivables, loans receivable and accounts payable and accrued liabilities approximate their respective fair values due to their short-term nature. The carrying value of the convertible debentures approximates its fair value due to minimal changes in interest rates and the Company's overall interest rate risk on the instrument.

The level within which the financial asset or financial liability is classified is determined based on the lowest level of significant input to the fair value measurement. The Company's loan receivable is categorized as Level 3.

Risk Management

The Company considers managing risk as being an integral part of its development and diversification strategies. The Company's activities expose it to a variety of financial risks: credit risk and liquidity risk. The Company focuses on actively securing short to medium term cash flows by minimizing the exposures to financial markets. The Company does not enter into financial instrument agreements including derivative financial instruments for speculative purposes.

Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash, accounts and other receivables and loans receivable. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. As at June 30, 2024 and December 31, 2023, the Company is

Notes to the Unaudited Condensed Interim Consolidated Financial Statements For the three and six months ended June 30, 2024 and 2023 (United States Dollars, unless otherwise indicated)

not exposed to credit risk in regard of any particular customer. The Company's loan receivable is secured by shares valued at \$874,443 as of June 30, 2024. The carrying amount of financial assets thus represent the maximum credit exposure.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company is exposed to this risk primarily through its convertible debt and accounts payable and accrued liabilities. The Company's approach to managing liquidity is to maintain sufficient cash to meet obligations when they become due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The key to success in managing liquidity is the degree of certainty in the cash flow projections. If future cash flows are fairly uncertain, the liquidity risk increases.

Contractual undiscounted cash flow requirements for financial liabilities as at June 30, 2024 are as follows:

	Less than 1 year	1 – 5 years	After 5 years	Total
	\$	\$	\$	\$
Accounts payable and accruals	833,735	-	-	833,735
Convertible debentures	-	4,529,846	-	4,529,846

The Company endeavors to ensure that it has sufficient cash on demand to meet its obligations as they become due by preparing expenditure budgets, which are regularly monitored and updated as considered necessary. The Company also manages its liquidity risk through the financial support of its shareholders and key management personnel.

Foreign Currency Risk

Currency risk relates to the risk that the fair values or future cash flows of the Company's financial instruments will fluctuate because of changes in foreign exchange rates. Exchange rate fluctuations affect the costs that the Company incurs in its operations.

The Company operates in an international environment, some of the Company's financial instruments and transactions are denominated in currencies other than its functional currencies. The fluctuation in foreign currencies will consequently impact the profitability of the Company and may also affect the value of the Company's assets and liabilities and the amount of shareholders' equity. At June 30, 2024, the Company held net financial assets of \$179,877 denominated in currencies other than functional currencies. A 10% change in the foreign exchange rate would result in a change in the net income for the period of approximately \$26,000.

16. CAPITAL MANAGEMENT

The Company includes total debt instruments and equity in its definition of capital. The Company's objectives are to preserve its ability to continue its operation to ensure its sustainability and to provide an adequate return to its shareholders, and to ensure sufficient equity financing in a way that maximizes the shareholders' return given the assumed risks of its activities. The Company may issue new shares following approval by the Board of Directors.
