### 1. NATURE OF OPERATIONS AND LIQUIDITY RISK

Mason Resources Inc. (Previously Mason Graphite Inc.) ("Mason" or the "Company") was incorporated on March 15, 2011 under the *Business Corporations Act* (Ontario) and was continued under the *Canada Business Corporations Act* effective March 3, 2016. The Company's head office is located at 26-1501 Av. Mcgill College, Montréal, Québec, H3A 3M8, Canada. On October 27, 2023, the Company's changed its name to Mason Resources Inc. from Mason Graphite Inc.

Mason is a Canadian corporation focused on investment opportunities in minerals and materials, notably batteryrelated materials and their by-products and includes the development of value-added products, notably for green technologies like transport electrification.

These unaudited condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, 12 months from the end of the most recent reporting period. As of September 30, 2024, the Company had a working capital (not including investments) of \$5,476,285 (2024 - \$5,720,967), an accumulated deficit of \$92,674,502 (June 30, 2024 - \$86,797,443) and a net loss from continuing operations of \$5,877,059 (September 30, 2023 - \$1,787,677) for the three months ended September 30, 2024. Working capital included a cash balance of \$5,128,828 (June 30, 2024 - \$5,494,253).

Management believes that the Company has sufficient funds to meet its obligations, operating expenses and some development expenditures of the value-added graphite product for the next 12 months. Should it become required to obtain additional financing, the Company can raise funds in various ways, including through strategic partnerships, joint venture agreements, debt project financing or other options offered by financial markets. While management has been successful in securing financing in the past, there can be no assurance that it will be able to do so in the future or that these sources of funding or initiatives will be available for the Company or that they will be available on terms which are acceptable to the Company.
