Note 1 - Organization and Nature of Operations

Organization and Nature of Operations

Pennexx Foods, Inc. (collectively, “PTI,” “we,” “us,” “our” or the “Company”), was incorporated in Pennsylvania on July 20, 1999. The Company opened an office in Florida on December 5, 2019.

The Company focuses on software and the internet for the purpose of utilizing artificial intelligence to gather information for targeted marketing; specifically, the Company is developing websites and related smartphone apps.

Basis of Presentation

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”).

Liquidity, Going Concern and Management’s Plans

These unaudited financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business.

As reflected in the accompanying unaudited financial statements, for the nine months ended September 30, 2024, the Company had:

- Net loss of \$436,703; and
- Net cash used in operations was \$347,693

Additionally, nine months ended September 30, 2024, the Company had:

- Accumulated deficit of \$42,330,309,
- Stockholders’ deficit of \$1,353,462; and
- Working capital deficit of \$1,166,258

The Company has cash on hand of \$1,404 at September 30, 2024. Although the Company intends to raise additional debt (third party and related party lenders) or equity capital, the Company expects to incur losses from operations and have negative cash flows from operating activities for the near-term. These losses could be significant as the Company executes its business plan.

PENNEXX FOODS, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2024
(UNAUDITED)

These factors create substantial doubt about the Company's ability to continue as a going concern within the twelve-month period subsequent to the date that these financial statements are issued. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern. Accordingly, the financial statements have been prepared on a basis that assumes the Company will continue as a going concern and which contemplates the realization of assets and satisfaction of liabilities and commitments in the ordinary course of business.

Management's strategic plans include the following:

- Pursuing additional capital raising opportunities,
- Executing and commercializing its business operations,
- Continuing to explore and execute prospective partnering or distribution opportunities; and
- Identifying unique market opportunities that represent potential positive short-term cash flow.

Note 2 - Summary of Significant Accounting Policies

Business Segments and Concentrations

The Company uses the "management approach" to identify its reportable segments. The management approach requires companies to report segment financial information consistent with information used by management for making operating decisions and assessing performance as the basis for identifying the Company's reportable segments. The Company has identified one single reportable operating segment. The Company manages its business on the basis of one operating and reportable segment.

Customers in the United States accounted for 100% of our revenues. See revenue recognition policy below. In 2024, all of our revenues were earned from one customer (100%).

We do not have any property or equipment outside of the United States.

Use of Estimates

Preparing financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reported period. Actual results could differ from those estimates, and those estimates may be material.

PENNEXX FOODS, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2024
(UNAUDITED)

Changes in estimates are recorded in the period in which they become known. The Company bases its estimates on historical experience and other assumptions, which include both quantitative and qualitative assessments that it believes to be reasonable under the circumstances.

Fair Value of Financial Instruments

The Company accounts for financial instruments under Financial Accounting Standards Board (“FASB”) ASC 820, *Fair Value Measurements*. ASC 820 provides a framework for measuring fair value and requires disclosures regarding fair value measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, based on the Company’s principal or, in absence of a principal, most advantageous market for the specific asset or liability.

The Company uses a three-tier fair value hierarchy to classify and disclose all assets and liabilities measured at fair value on a recurring basis, as well as assets and liabilities measured at fair value on a non-recurring basis, in periods subsequent to their initial measurement. The hierarchy requires the Company to use observable inputs when available, and to minimize the use of unobservable inputs, when determining fair value.

The three tiers are defined as follows:

- Level 1—Observable inputs that reflect quoted market prices (unadjusted) for identical assets or liabilities in active markets;
- Level 2—Observable inputs other than quoted prices in active markets that are observable either directly or indirectly in the marketplace for identical or similar assets and liabilities; and
- Level 3—Unobservable inputs that are supported by little or no market data, which require the Company to develop its own assumptions.

The determination of fair value and the assessment of a measurement’s placement within the hierarchy requires judgment. Level 3 valuations often involve a higher degree of judgment and complexity. Level 3 valuations may require the use of various cost, market, or income valuation methodologies applied to unobservable management estimates and assumptions. Management’s assumptions could vary depending on the asset or liability valued and the valuation method used. Such assumptions could include estimates of prices, earnings, costs, actions of market participants, market factors, or the weighting of various valuation methods. The Company may also engage external advisors to assist us in determining fair value, as appropriate.

PENNEXX FOODS, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2024
(UNAUDITED)

Although the Company believes that the recorded fair value of our financial instruments is appropriate, these fair values may not be indicative of net realizable value or reflective of future fair values.

The Company's financial instruments, including cash, and accounts payable and accrued expenses, are carried at historical cost. At September 30, 2024 and December 31, 2023, respectively, the carrying amounts of these instruments approximated their fair values because of the short-term nature of these instruments.

ASC 825-10 "*Financial Instruments*" allows entities to voluntarily choose to measure certain financial assets and liabilities at fair value ("fair value option"). The fair value option may be elected on an instrument-by-instrument basis and is irrevocable unless a new election date occurs. If the fair value option is elected for an instrument, unrealized gains and losses for that instrument should be reported in earnings at each subsequent reporting date. The Company did not elect to apply the fair value option to any outstanding financial instruments.

Cash and Cash Equivalents

For purposes of the statements of cash flows, the Company considers all highly liquid instruments with a maturity of three months or less at the purchase date and money market accounts to be cash equivalents. At September 30, 2024 and December 31, 2023, respectively, the Company did not have any cash equivalents.

The Company is exposed to credit risk on its cash and cash equivalents in the event of default by the financial institutions to the extent account balances exceed the amount insured by the FDIC, which is \$250,000.

At September 30, 2024 and December 31, 2023, respectively, there were no accounts in excess of this insured limit.

Accounts Receivable

Accounts receivable are due thirty (30) days from the date a customer has downloaded the software application ("App") to a hardware device.

The allowance for doubtful accounts is determined based on the Company's previous loss history. The Company has not experienced any significant credit losses. Allowance for doubtful accounts was \$0 on September 30, 2024 and December 31, 2023, respectively.

(UNAUDITED)

Impairment of Long-lived Assets

Management evaluates the recoverability of the Company's identifiable intangible assets and other long-lived assets when events or circumstances indicate a potential impairment exists, in accordance with the provisions of ASC 360-10-35-15 "*Impairment or Disposal of Long-Lived Assets*." Events and circumstances considered by the Company in determining whether the carrying value of identifiable intangible assets and other long-lived assets may not be recoverable include but are not limited to: significant changes in performance relative to expected operating results; significant changes in the use of the assets; significant negative industry or economic trends; and changes in the Company's business strategy. In determining if impairment exists, the Company estimates the undiscounted cash flows to be generated from the use and ultimate disposition of these assets.

If impairment is indicated based on a comparison of the assets' carrying values and the undiscounted cash flows, the impairment to be recognized is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets.

There were no impairment losses taken during the three and nine months ended September 30, 2024 and 2023, respectively.

Property and Equipment

Property and equipment is stated at cost less accumulated depreciation. Depreciation is provided on the straight-line basis over the estimated useful lives of the assets.

Expenditures for repair and maintenance which do not materially extend the useful lives of property and equipment are charged to operations. When property or equipment is sold or otherwise disposed of, the cost and related accumulated depreciation are removed from the respective accounts with the resulting gain or loss reflected in operations.

Management reviews the carrying value of its property and equipment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable.

There were no impairment losses taken during the three and nine months ended September 30, 2024 and 2023, respectively.

Derivative Liabilities

The Company analyzes all financial instruments with features of both liabilities and equity under FASB ASC Topic No. 480, (“ASC 480”), “Distinguishing Liabilities from Equity” and FASB ASC Topic No. 815, (“ASC 815”) “Derivatives and Hedging”. Derivative liabilities are adjusted to reflect fair value at each reporting period, with any increase or decrease in the fair value recorded in the results of operations (other income/expense) as a gain or loss on the change in fair value of derivative liabilities. The Company uses a binomial pricing model to determine fair value of these instruments.

Upon conversion or repayment of a debt instrument in exchange for shares of common stock, where the embedded conversion option has been bifurcated and accounted for as a derivative liability (generally convertible debt and/or warrants), the Company records the shares of common stock at fair value, relieves all related debt, derivatives, and debt discounts, and recognizes a net gain or loss on debt extinguishment. In connection with the debt extinguishment, the Company typically records an increase to additional paid- in capital for any remaining liability balance.

Equity instruments that are initially classified as equity that become subject to reclassification under ASC Topic 815 are reclassified to liabilities at the fair value of the instrument on the reclassification date.

At September 30, 2024 and December 31, 2023, respectively, the Company did not have any derivative liabilities.

Original Issue Debt Discount

For certain notes issued, the Company provides the debt holder with an original issue discount. The original issue discount is recorded as a debt discount, reducing the face amount of the note, and is amortized to interest expense in the statement of operations, over the life of the debt.

Debt Issue Cost

Debt issuance cost paid (in cash or stock) to lenders, or third parties are recorded as debt discounts and amortized to interest expense in the statement of operations, over the life of the underlying debt.

Common Stock Payable

The Company from time to time enters into agreements for the issuance of common stock for services. When the related shares are due, but have not been authorized for issuance, the Company records these amounts as a liability. These shares are excluded from earnings (loss) per share.

Valuation of common stock payable is based upon the fair value of services rendered, which is determined based upon the quoted closing trading price of the Company's common stock. At the time services are rendered, the stock is due for payment.

The following is a summary of the Company's common stock payable:

	<u>Shares</u>	<u>Amount</u>
Balance - December 31, 2022	300,000	\$146,790
No activity in 2023	<u>-</u>	<u>-</u>
Balance - December 31, 2023	300,000	146,790
No activity in 2024	<u>-</u>	<u>-</u>
Balance - September 30, 2024	<u>300,000</u>	<u>\$146,790</u>

Common Stock Issuable

Shares classified as common stock issuable represent those shares which have been authorized for issuance but are not reflected as issued by the transfer agent. These shares are included in earnings (loss) per share.

Revenue Recognition

Pursuant to ASC 606, we recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration or payment the Company expects to be entitled to receive in exchange for those goods or services. Our revenue is recognized by applying the following five steps: 1) identify the contracts with a customer; 2) identify the performance obligations in the contract; 3) determine the transaction price; 4) allocate the transaction price to the performance obligations; and 5) recognize revenue when (or as) we satisfy a performance obligation.

We apply judgment in determining the customer's ability and intention to pay, which is based on a variety of factors including the customer's historical payment experience or, in the case of a new customer, published credit or financial information pertaining to the customer.

PENNEXX FOODS, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2024
(UNAUDITED)

If a contract includes multiple promised goods or services, we apply judgment to determine whether the promised goods or services are capable of being distinct and are distinct within the context of the contract. If these criteria are not met, the promised goods or services are accounted for as a combined performance obligation. We determine the transaction price based on the consideration which we will be entitled to receive in exchange for transferring goods or services to our customer. Currently, there are no contracts with more than one promised service.

We recognize revenue at the time that the related performance obligation is satisfied by transferring the promised goods or services to our customer.

Licensing Fee Revenues and Concentrations

The Company recognizes revenues from its licensing fees related to its sole customer in 2023. The fee allows the customer a non-exclusive right to use the Company's technology, such as the ability to market to various zip codes purchased. All arrangements are non-cancellable. Revenue is recognized at a point in time (sale of license) as no further performance obligations are required.

Software Application Revenues

The Company recognizes revenue from the sale of software application downloads to hardware devices. Upon download (delivery) of the app, which is at the point of sale, the Company has satisfied its performance obligation under contractual arrangement. All arrangements are non-cancellable and contain a single performance obligation. There are no warranties, rebates or refunds associated with the sale of the product. Customer payment is due 30 days from sale.

Consulting Revenues

The Company recognizes revenues from consulting services (including merchant fees paid for social media advertising) related to assisting companies with targeted marketing. Revenue is recognized at a point in time when services are rendered. All arrangements are non-cancellable and contain a single performance obligation. Customers pay by credit card.

Research and Development

Research and development costs are charged to expense as incurred.

Stock-Based Compensation

The Company accounts for our stock-based compensation under ASC 718 "*Compensation – Stock Compensation*" using the fair value-based method. Under this method, compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. This guidance establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments.

The Company uses the fair value method for equity instruments granted to non-employees and use the Black-Scholes model for measuring the fair value of options.

The fair value of stock-based compensation is determined as of the date of the grant or the date at which the performance of the services is completed (measurement date) and is recognized over the vesting periods.

When determining fair value, the Company considers the following assumptions in the Black-Scholes model:

- Exercise price,
- Expected dividends,
- Expected volatility,
- Risk-free interest rate; and
- Expected life of option

PENNEXX FOODS, INC.
NOTES TO FINANCIAL STATEMENTS

Income Taxes

The Company accounts for income tax using the asset and liability method prescribed by ASC 740, "Income Taxes". Under this method, deferred tax assets and liabilities are determined based on the difference between the financial reporting and tax bases of assets and liabilities using enacted tax rates that will be in effect in the year in which the differences are expected to reverse. The Company records a valuation allowance to offset deferred tax assets if based on the weight of available evidence, it is more-likely-than-not that some portion, or all, of the deferred tax assets will not be realized. The effect on deferred taxes of a change in tax rates is recognized as income or loss in the period that includes the enactment date.

The Company follows the accounting guidance for uncertainty in income taxes using the provisions of ASC 740 "Income Taxes". Using that guidance, tax positions initially need to be recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. As of September 30, 2024 and December 31, 2023, respectively, the Company had no uncertain tax positions that qualify for either recognition or disclosure in the financial statements.

The Company recognizes interest and penalties related to uncertain income tax positions in other expense. No interest and penalties related to uncertain income tax positions were recorded for the nine months ended September 30, 2024 and 2023, respectively.

Basic and Diluted Earnings (Loss) per Share

Pursuant to ASC 260-10-45, basic loss per common share is computed by dividing net loss by the weighted average number of shares of common stock outstanding for the periods presented. Diluted loss per share is computed by dividing net loss by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during the period.

Potentially dilutive common shares may consist of common stock issuable upon the conversion of stock options and warrants, convertible notes and contingently issuable shares (using the treasury stock method or the if-converted method, as applicable). These common stock equivalents may be dilutive in the future.

At December 31, 2024 and December 31, 2023, respectively, the Company had convertible notes and related accrued interest that were convertible at fixed conversion ratios ranging from \$0.019 - \$0.20 per share.

PENNEXX FOODS, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2024
(UNAUDITED)

Potential common stock equivalents at December 31, 2024 and 2023 are as follows:

	<u>December 31, 2024</u>	<u>December 31, 2023</u>
Convertible notes payable and accrued interest	<u>17,386,039</u>	<u>37,820,253</u>
Total common stock equivalents	<u><u>17,386,039</u></u>	<u><u>37,820,253</u></u>

These common stock equivalents were not included in diluted earnings per share as they would be anti-dilutive due to the Company's net loss for the three and nine months ended December 31, 2024 and 2023, respectively.

Advertising Costs

Advertising costs are expensed as incurred. Advertising costs are included as a component of general and administrative expense in the statements of operations.

The Company recognized \$381 and \$292 in marketing and advertising costs during the year ended December 31, 2024 and 2023, respectively.

The Company recognized \$13,277 and \$20,183 in marketing and advertising costs during the year ended December 31, 2024 and 2023, respectively.

Related Parties

Parties are considered to be related to the Company if the parties, directly or indirectly, through one or more intermediaries, control, are controlled by, or are under common control with the Company. Related parties also include principal owners of the Company, its management, members of the immediate families of principal owners of the Company and its management and other parties with which the Company may deal with if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests.

Recently Adopted Accounting Standards

Changes to accounting principles are established by the FASB in the form of Accounting Standards Updates (“ASU’s”) to the FASB’s Codification. We consider the applicability and impact of all ASU’s on our financial position, results of operations, stockholders’ equity, cash flows, or presentation thereof. Management has evaluated all recent accounting pronouncements issued through the date these financial statements were available to be issued and found no recent accounting pronouncements issued, but not yet effective accounting pronouncements, when adopted, will have a material impact on the financial statements of the Company.

In March 2022, the Financial Accounting Standards Board (the “FASB”) issued ASU 2022-02, Financial Instruments – Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures (“ASU 2022-02”), which eliminates the accounting guidance on troubled debt restructurings (“TDRs”) for creditors in ASC 310, Receivables (Topic 310), and requires entities to provide disclosures about current period gross write-offs by year of origination. Also, ASU 2022-02 updates the requirements related to accounting for credit losses under ASC 326, Financial Instruments – Credit Losses (Topic 326), and adds enhanced disclosures for creditors with respect to loan refinancings and restructurings for borrowers experiencing financial difficulty.

This guidance was adopted on January 1, 2023. The adoption of ASU 2022-02 did not have a material impact on the Company's financial statements.

In November 2023, the FASB issued Accounting Standards Update (“ASU”) 2023-07 - Segment Reporting (Topic 280): Improvements to Reportable Segment Disclosures. This ASU improves reportable segment disclosure requirements, primarily through enhanced disclosures about significant segment expenses. This ASU is effective for fiscal years beginning after December 15, 2023, and interim periods within fiscal years beginning after December 15, 2024. Early adoption is permitted. The Company is evaluating the impact this will have on the Company’s financial statements and disclosures.

In December 2023, the FASB issued ASU 2023-09, “Income Taxes (Topic 740): Improvements to Income Tax Disclosures” (“ASU 2023-09”). ASU 2023-09 includes amendments that further enhance income tax disclosures, primarily through standardization and disaggregation of rate reconciliation categories and income taxes paid by jurisdiction. ASU 2023-09 is effective for annual periods beginning after December 15, 2024, on either a prospective or retrospective basis. Early adoption is permitted. The Company is evaluating the impact of ASU 2023-09 on its financial statements and related disclosures.

(UNAUDITED)

The issuance of these shares is pursuant to a joint marketing and technology licensing agreement. The Company and this third party have agreed to cross advertise and market each other’s services. The Company will license its technology (dashboard) to be integrated into the service providers digital network. The service provider will assume various responsibilities such as: identifying strategic distribution with existing relationships, generate sales to existing Company customers as well as new business development, promoting the Company and its products within its existing network. Each party is responsible for its own costs and expenses related to supporting their standalone technology and marketing materials. Under this agreement, each party has granted to the other a non-exclusive, non-transferrable, royalty free license to use each other’s trade names, trademarks, logos and service marks. The agreement has an initial term of five (5) years, with an option for additional five (5) year renewals.

Note 6 - Right of Use Operating Lease

We determine if an arrangement is a lease, or contains a lease, at inception and record the leases in our financial statements upon lease commencement, which is the date when the underlying asset is made available for use by the lessor.

We have a lease agreement with lease and non-lease components and have elected to utilize the practical expedient to account for lease and non-lease components together as a single combined lease component, from both a lessee and lessor perspective with the exception of direct sales-type leases and production equipment classes embedded in supply agreements. From a lessor perspective, the timing and pattern of transfer are the same for the non-lease components and associated lease component and, the lease component, if accounted for separately, would be classified as an operating lease.

We have elected not to present short-term leases on the balance sheet as these leases have a lease term of 12 months or less at lease inception and do not contain purchase options or renewal terms that we are reasonably certain to exercise. All other lease assets and lease liabilities are recognized based on the present value of lease payments over the lease term at commencement date. Because our lease does not provide an implicit rate of return, we used our incremental borrowing rate based on the information available at lease commencement date in determining the present value of lease payments.

PENNEXX FOODS, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2024
(UNAUDITED)

In general, leases, where we are the lessee, may include options to extend the lease term. These leases may include options to terminate the lease prior to the end of the agreed upon lease term. For purposes of calculating lease liabilities, lease terms include options to extend or terminate the lease when it is reasonably certain that we will exercise such options.

Lease expense for operating leases is recognized on a straight-line basis over the lease term as cost of revenues or operating expenses depending on the nature of the leased asset. Certain operating leases provide for annual increases to lease payments based on an index or rate. We calculate the present value of future lease payments based on the index or rate at the lease commencement date.

Differences between the calculated lease payment and actual payment are expensed as incurred. Amortization of finance lease assets is recognized over the lease term as cost of revenues or operating expenses depending on the nature of the leased asset.

Interest expense on finance lease liabilities is recognized over the lease term in interest expense.

In February 2021, the Company executed a two (2) year operating lease agreement for its office space. Gross payments over the term of the lease are as follows:

<u>Payments Year Ended December 31, 2023</u>	<u>\$ 1,860</u>
	<u><u>\$1,860</u></u>

The lease had an option to renew for 3 additional one (1) year periods with an increase of 4% in annual rent. At lease inception, based on historical and expected future operations, the Company did not believe the renewal options would be executed.

Effective January 31, 2023, the lease expired and the one (1) year option was not executed. The Company is currently leasing its office space on a month-to-month basis.
