OFF BALANCE SHEET TRANSACTIONS

The Company does not have any off-balance sheet arrangements as at January 31, 2025, or as of the date of this report.

CRITICAL JUDGMENTS AND ESTIMATES

The preparation of financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, and contingent liabilities at the date of the financial statements and reported amounts of expenses during the reporting year. Actual outcomes could differ from these estimates. The Company's financial statements include estimates which, by their nature, are uncertain. Revisions to accounting estimates are recognized in the year in which the estimate is revised and future periods if the revision affects both current and future years. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical Accounting Estimates

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- i) The application of the Company's accounting policy for exploration and evaluation assets and impairment of the capitalized expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after an expenditure is capitalized, information becomes available suggesting that the recovery of the expenditure is unlikely, the amount capitalized is written off in profit or loss in the year the new information becomes available.
- ii) The determination of the fair value related to share-based payments are subject to estimates. The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them.

Critical Accounting Judgments

Critical accounting judgments are accounting policies that have been identified as being complex or involving subjective judgments or assessments. The Company's management made the following critical accounting judgments:

- i) The Company's ability to continue as a going concern for the foreseeable future involves judgement.
- ii) The title and rights to exploration and evaluation assets. Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title or interest therein. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

Generation Uranium Inc. (Formerly Generation Gold Corp.)

Management's Discussion and Analysis - Unaudited

For the period ended January 31, 2025

- iii) The measurement and recognition of deferred income tax assets and liabilities. Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes deferred tax assets relating to tax losses carried forward to the extent there are sufficient taxable temporary differences (deferred tax liabilities) relating to the same taxation authority and the same taxable entity against which the unused tax losses can be utilized.

FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

Capital Management

The Company's objective when managing capital is to maintain its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. The Company includes share capital in the definition of capital.

The Company's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to fund the identification and evaluation of potential acquisitions. To secure the additional capital necessary to pursue these plans, the Company may attempt to raise additional funds through the issuance of equity or by securing strategic partners. The Company is not subject to externally imposed capital requirements.

Fair Values of Financial Instruments

As at January 31, 2024 and 2024, the Company did not have any financial instruments classified at FVTPL. The Company's financial instruments, consisting of cash, and accounts payable and accrued liabilities, are carried at amortized cost and approximate their fair values due to the relatively short-term maturities of the instruments.

Credit Risk

Credit risk refers to the risk that the counterparty will default on its contractual obligation resulting in financial loss to the Company. Credit risk is primarily related to the Company's cash. To minimize this risk, cash has been placed with a major Canadian financial institution.

Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulties in meeting obligations when they become due. The Company ensures that there is sufficient capital in order to meet short-term operating requirements, after taking into account the Company's holdings of cash. As at January 31, 2025, the Company had accounts payable and accrued liabilities of \$69,439 (April 30, 2024 - \$73,706) due within 12 months and had cash of \$93,708 (April 30, 2024 - \$1,182,320) to meet its current obligations.
